NOTICE TO BIDDERS

Sealed proposals are requested for the Public Safety Dispatch Remodel, Bid Number B0027821. Proposals will be received for the above contract at the Office of the Department of Purchasing, Indiana State University, Facilities Management and Purchasing Building, 951 Sycamore Street, Terre Haute, Indiana 47809, until 2:00pm Local Time, May 11, 2022. Respondents delivering Bids must wear some form of facial PPE while in the Facilities Management and Purchasing Building.

There will be no in person Public Bid Opening. The Bids will be opened at 2:15pm on the due date and read aloud via Teams conference call. For conference call access call 812-228-8187 and enter conference ID 404 396 660 followed by the # sign.

Bidding Documents may be downloaded from the ISU Plan Room at <http://www.indstateplanroom.com/> on **April 25 2022** for \$5.00 per person/download which covers all downloads for that particular Project. Bidders must register for a free account the first time they access the website. Bid Documents may be ordered for purchase on CD, for \$7.50 per CD, or on paper copy at applicable printing costs from Rapid Reproductions, Inc., 129 South 11<sup>th</sup> Street, Terre Haute, IN 47807 (812-238-1681 Toll Free 800-736-7084).

Proposals are to be made on the Bid Form published in the Project Manual, based on Form 96 (Revised), as prescribed by the State Board of Accounts. As a mandatory requirement the Proposal shall be accompanied by a certified check; cashier's check or a Bid Bond (AIA A310) for an amount not less than 5% of the total bid price for Base Bid(s) and all add Alternates. See Section 00 10 10 Instructions to Bidders 3.01 for Bid Bond Requirements

Bidder(s) receiving awards shall be required to provide acceptable surety in the form of a Performance and Labor and Materials Payment Bond for the full amount of the award. Include the cost of all bonds and insurance in the Bid amount.

Indiana State University is a Tax Exempt Institution and Indiana Sales Tax for products permanently incorporated in work shall not be included as part of the Bid or on any Application for Payment.

All Bidders must comply with All State and Federal Non-Discrimination laws.

Responsive bidders may not have an active dispute, claim, or litigation with Indiana State University.

Indiana State University reserves the right to accept or reject any Bid and to waive any irregularities in Bidding. Any proposal received after the time fixed herein shall be returned unopened.

No bid may be withdrawn after the opening of Bids without the consent of Indiana State University for a period of One Hundred Twenty (120) days after the time of opening Bids.

There will not be an actual Pre-Bid conference meeting for the Project. A copy of a Pre-Bid Information sheet will be included with the Bidding Documents. Bidders shall review the information sheet and the contained information will become a part of the Bidding Documents.

Pre-Bid site visits have been scheduled at 10:00am on May 3, 2022 at the ISU Public Safety Dispatch Center, 210 North 6<sup>th</sup> Street, Terre Haute, Indiana 47809. While masks are not required on the ISU campus or in campus buildings attendees are reminded to practice social distancing whenever possible. *Representatives of each of the Bidders are strongly urged to attend.*

Contract Award shall be to a Single Prime Bidder for all single Base Bid project work or the Contract Award may be to multiple Single Prime Bidders for multiple Base Bid Package project work. The prime Bidder(s) shall be an experienced and qualified Contractor(s) having successfully completed a minimum of three (3) projects of similar size and scope. The Bid form for this Project requires the Bidder to submit evidence of successful installation of similar projects (minimum of three projects), including customer information, scope, dates, Contract dollar amounts. With their Bid the Bidder shall submit their most current audited financial statement and vendor trade credit references as evidence of financial capability to perform the work.

**All questions relating to this Project shall be addressed to:**

**Scott Tillman, Project Manager**

**Phone 812-237-8198 E-mail [scott.tillman@indstate.edu](mailto:scott.tillman@indstate.edu)**

NOTICE TO BIDDERS

INDIANA STATE UNIVERSITY BOARD OF TRUSTEES

By: Diann E. McKee  
Senior Vice President for Finance and Administration and University Treasurer  
Indiana State University

END OF SECTION 00 10 00

00 10 10  
INSTRUCTIONS TO BIDDERS

PART 1- INSTRUCTIONS TO BIDDERS

1.01 GENERAL

- A. Bidders shall carefully read the Notice to Bidders with regard to preparation of proposals, which includes the date and place for receiving proposals. See PART 3 of this Section 00 10 10 Instructions to Bidders for a complete list of the required forms for Bidding.
- B. All Bidders shall fully inform themselves of the conditions under which the work is to be performed, the site of the work, the obstacles that may be encountered, and other relevant matters concerning the work to be performed.
- C. The Contractor shall begin Work immediately after Award preparing submittals and procuring material. Actual Work shall begin the week of May 16, 2022 with all Work substantially completed by August 14, 2022. Final closeout shall be within thirty (30) calendar days thereafter. A warranty walk-thru will be held eleven (11) months from the date of substantial completion.
- D. No Bidder, after being awarded the contract, shall be allowed any extra compensation for reason of their failure to fully inform themselves, prior to their Bidding, of all requirements of the Contract Documents, the Drawings, and Specifications.
- E. If any Bidder for the proposed contract is in doubt as to the true meaning of any part of the Drawings, Specifications or their proposed Contract Documents, they may submit to the Owner written request for any interpretation thereof. The Bidder submitting the request will be responsible for its prompt delivery. Any interpretation of the proposed documents will be made only by an Addendum duly issued. A copy of such Addendum will be posted to the ISU Plan Room and e-mail notification sent to each registered plan holder (see 1.07 of this Section). Such Addendum, if any, issued before submission of the Bids, shall be taken into account and included in the proposal.
- F. Any Bidder may withdraw their Bid at any time prior to the scheduled time for the receipt of bids.
- G. No Bidder may withdraw their Bid or proposal for a period of One Hundred Twenty (120) calendar days after date and time set for opening Bids.
- H. It is understood that the Owner reserves the right to waive any irregularities in Bidding and to accept or reject any or all Bids.
- I. It is further understood on Bids with multiple Bid Packages the Owner reserves the right to selectively Award individual Bid Packages to multiple Prime Bidders submitting the lowest and best Bids for the individual Bid Packages.

1.02 EXAMINATION OF SITE AND BIDDING DOCUMENTS

- A. The site shall be carefully examined prior to bidding to ascertain the location of the work, existing conditions, and all other matters which may affect the work under this Contract. Each Bidder by making their Bid represents that they have visited the site and familiarized themselves with the local conditions under which the Work is to be performed.
- B. The Bidding Documents shall be carefully examined to ascertain the character, quality and quantity of the work to be performed, of materials and items to be furnished, of equipment and facilities needed during construction, of utilities and of all other matters which may affect the work under the Contract. Each Bidder by making their Bid represents that they have read and fully understands the Bidding Documents.

1.03 PRE-BID CONFERENCE

- A. A pre-bid conference will be held to answer Bidders' questions regarding the Bidding Documents.

00 10 10  
INSTRUCTIONS TO BIDDERS

- B. An Addendum will be issued confirming any information conveyed at pre-bid conference and no verbal response tendered during pre-bid conference shall have legal standing unless so confirmed by Addendum.

1.04 BIDDING QUESTIONS

- A. All questions, even if asked and answered at the pre-bid conference, shall be submitted in writing via e-mail to the Architect/Engineer/Owner.
- B. The last day for questions to be submitted shall be three (3) business days prior to the scheduled date for the receipt of Bids. Any questions submitted after that date may not receive consideration.

1.05 EXECUTION OF AGREEMENT

- A. For all Projects the forms of agreement which the successful Bidder, as Contractor, will enter into will be an ISU Award Letter, an ISU Purchase Order and a Contract for Construction. Prior to issuance of the Purchase Order the Contractor shall provide to the Director of Purchasing the Labor and Material Performance Bond, their most current financial statement and vendor trade credit references as evidence of financial capability to perform the work and the policies of insurance or insurance certificates as required by the Contract Documents and listed in the Award Letter. All Bonds and Insurance shall have an A.M. Best rating of not less than an "A". Once all the required paperwork has been received by ISU Purchasing and the Purchase Order issued, five (5) copies of the Contract for Construction Between Indiana State University and Contractor, will be mailed to the Contractor for their signature and return to the Senior Vice President for Finance and Administration for Owner signature. A fully executed copy of this Contract will be returned to the Contractor for their files.
- B. Time Limits for Execution of Agreement.
  - 1. The successful Bidder shall supply the required paperwork (their Financial Statement (if not supplied with their Bid), Certificate of Insurance and their Performance and Payment Bond) to the ISU Purchasing Department within ten (10) calendar days after receipt of the ISU Award Letter.
  - 2. The successful Bidder shall within seven (7) calendar days after receipt of the Contract for Construction Between Indiana State University and Contractor enter into the written Contract to perform the work in accordance with the Drawings and Specifications by signing and returning the Contract to the Senior Vice President for Finance and Administration for Owner's signature and return to the Bidder.
- C. In the case a Bidder whose Bid is accepted, fails to perform their Bid by providing the required paperwork within ten (10) calendar days after receipt of the Award Letter and entering into the written Contract with the Owner within seven (7) calendar days after receipt, then this failure may be cause for their certified check, draft or Bid Bond, and the proceeds thereof, to remain the absolute property of the Owner, as liquidated damages, it being impossible to estimate the amount of damages such failure would occasion.

1.06 INDEMNIFICATION

- A. Bidders, in consideration of the privilege of Bidding, specifically waive all rights both legal and equitable which they have or might be construed to have against Indiana State University because of any action taken in accepting or rejecting bids and proposals, for themselves, and /or for subcontractors, suppliers and/or manufacturers, who may file an action based on any such acceptance or rejection. Bidders shall be liable for any resultant reasonable attorney fees and expenses incurred by Indiana State University.

00 10 10  
INSTRUCTIONS TO BIDDERS

1.07 ADDENDA

- A. All Addenda for the Project will be posted on the ISU Plan Room at: <http://www.indstateplanroom.com/>. Addenda may be downloaded at no cost to registered plan holders.
- B. A Bidder must register for a free account the first time they access the ISU Plan Room website.
- C. The Bidder will receive an e-mail notifying that an Addendum is available for download from this site. The Bidder is advised to periodically check this link in the event an e-mail fails to deliver.

1.08 SUBSTITUTIONS PRIOR TO BID

- A. Requests for substitution of any material, construction, equipment and methods named or described in the Specifications, on the Drawings and any Addenda issued shall be submitted in writing to the Architect/Engineer and Owner a minimum of seven (7) calendar days prior to Bidding. Complete support documentation shall be provided that the item to be substituted is equal to or exceeds the material, construction, equipment or methods named or described in the Specifications, on the Drawings and any Addenda issued with the request for substitution. It is solely at the discretion of the Architect/Engineer and the Owner to allow any requests for substitution.
- B. Should it be determined after Award of the Bid that the Bidder based their Bid on any material, construction, equipment and methods not named or described in the Specifications, on the Drawings and any Addenda issued as approved for substitution prior to Bidding shall be disallowed and the material, construction, equipment and methods named or described in the Specifications, on the Drawings and any Addenda issued shall be provided at no additional cost to the Owner.

PART 2 - SUBCONTRACTORS, SUPPLIER AND MANUFACTURER'S BIDS TO BIDDERS

2.01 SUBCONTRACTOR, SUPPLIER AND MANUFACTURE BUNDLING OF PRICES TO PROSPECTIVE BIDDERS

- A. Subcontractors, Suppliers and Manufacturers are permitted to bundle quote prices to Bidders however these bundled prices may not be used to withhold providing individual pricing to a Bidder for bundled items when requested by a Bidder to provide individual pricing. No subcontractor or supplier shall make it a condition of their bid that another part of the project be awarded to them.
- B. Failure to provide individual pricing upon Bidder's request may be cause to disqualify a Subcontractor or Supplier and Manufacturer from Indiana State University Projects.

PART 3- EXECUTION FORMS FOR BIDDING

3.01 BID BOND

- A. A certified or cashier's check or Bid Bond is a mandatory requirement to be submitted with the Bid and shall be based on not less than five (5) percent of the Bid amount total of the Base Bid(s) and all add Alternates.
- B. The Bid bond shall be in the form prescribed by the Contract Documents except as provided otherwise by Laws or Regulations, and shall be executed by such sureties as are named in the list of "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Circular 570 (amended) by the Financial Management Service, Surety Bond Branch, U.S. Department of the Treasury. The Bid Bond shall be obtained from surety or insurance company that is duly licensed or authorized in the jurisdiction in which the Project is located to issue bonds or insurance policies for the limits and coverages so required. In addition to appearing on Circular 570 U.S. Dept. of the Treasury, such Surety or insurance company shall maintain an A.M. Best's Rating of not less than "A.

00 10 10  
INSTRUCTIONS TO BIDDERS

- C. Failure to submit an acceptable Bid Bond with the Bid shall disqualify a Bidder.
- 3.02 BIDDERS FINANCIAL STATEMENT
- A. With their Bid the Bidder shall submit their most current independently audited or reviewed financial statement and vendor trade credit references as evidence of financial capability to perform the work.
  - B. Failure to submit the Bidder's financial statement may be cause to disqualify a Bidder.
- 3.03 CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY EXCLUSION (SECTION 00 10 20 OF PROJECT MANUAL)
- A. This certificate is required by the regulations implementing Executive Order 12549 Debarment and Suspension, 34 CFR Part 85, Section 85.510, Participants' responsibilities. The regulations were published as Part V11 of the May 26, 1988 Federal Register (pages 19160-19211).
  - B. Submit at time of Bid. Failure to submit with the Bid may be cause to disqualify a Bidder.
- 3.04 MBE/WBE/VBE PARTICIPATION PLAN. (SECTION 00 10 40 OF THE PROJECT MANUAL)
- A. See Section 00 10 30 MBE/WBE/VBE COMPLIANCE INSTRUCTIONS for full details on submission of the Participation Plan.
  - B. This Plan must be submitted at time of Bid by **all Bidders**. Failure to submit with the Bid may be cause to disqualify a Bidder.
- 3.05 MANDATORY TIER II REPORTING REQUIREMENT FOR PROJECTS EQUAL TO OR GREATER THAN \$500,000.00. (Note: this form may not be included in all Project Manuals)
- A. MBE/WBE/VBE utilization in the performance of this Contract must be reported with each Application for Payment using the ISU Business Diversity Spend Reporting Form for Construction/Renovation/Facilities Repair Projects (see included: Tier II Spend Report Form.xlsx.)
  - B. Compliance with Owner's Mandatory Tier II Reporting Requirement is a condition for the approval of an Applications for Payment.
  - C. An electronic copy in Excel format will be included with the Award Letter when applicable.
- 3.06 BIDDER'S CERTIFICATION OF AUTHORIZED EMPLOYMENT (SECTION 00 10 45 OF THE PROJECT MANUAL)
- A. Bidder must certify at time the of Bidding that they have read and understand the "Contractor's Certification of Authorized Employment" provision of the Contract Documents In Section 00 20 11 Amendments to General Conditions Article 13, subparagraph 13.1.7.3 and its subparagraphs
  - B. Submit at time of Bid. Failure to submit with the Bid may be cause to disqualify a Bidder.
- 3.07 BID FORM (SECTION 00 20 00 OF THE PROJECT MANUAL)
- A. In order to receive consideration, make all Bids in strict accordance with the following:
    - 1. Proposals shall be submitted only on the form furnished, a copy of which is bound into and forms a part of this Project Manual, and which will become a part of the Purchase Order Contract of the successful Bidder (use a photocopy of the Bid Form herein).
    - 2. Proposals shall be completely and correctly filled out using ink or typewriter, with signatures in ink.

00 10 10  
INSTRUCTIONS TO BIDDERS

3. Prices, except unit prices and percentages, shall be stated both in figures and in writing. In the event of a discrepancy between writing and the figures, the written amount shall govern.
  4. Proposals shall be signed by the Bidder, by a partner, or a duly authorized officer for a corporation, and shall give the Bidder's business address and telephone number. Failure to sign the Bid form may be cause to disqualify a Bid.
  5. Proposals submitted by non-Indiana corporations shall be accompanied by a certificate of good standing issued by the Indiana Secretary of State.
  6. Any interlineation, alteration or erasure of the published Bid Form may be grounds for rejection of the proposal. Proposal shall contain no recapitulation of the work to be done.
  7. Proposals shall be based only on the material, construction, equipment and methods named or described in the Specifications, on the Drawings, and any Addenda issued prior to Bidding. See item 1.08 of this Sections for substitution request requirements.
- B. Modification of proposals already submitted will be accepted by letter, fax or telegram if received by the Owner prior to the date and hour set for opening of proposals.
- C. Each Bid shall be addressed to the Owner, and shall be delivered to the Office of the Director of Purchasing at the address given in the Notice to Bidders on or before the day and hour set for opening of Bids. Each Bid shall be enclosed in a sealed envelope bearing the title of the Project, the name of the Bidder, and the date and hour of the Bid opening. It is the sole responsibility of the bidder to see that their bid is received on time.
- 3.08 ADDENDA
- D. Indicate receipt of Addenda on the Bid Form in the spaces provided for acknowledgement.
- E. Failure to indicate receipt may be cause to disqualify a Bid.
- 3.09 BID FORM - BASE BID(S)
- A. Base Bid(s) shall be based only on the material, construction, equipment and methods named or described in the Specifications, on the Drawings, and any Addenda issued prior to Bidding. See item 1.08 of this Section for substitution request requirements.
- B. On Bids with multiple Base Bid Packages the Owner reserves the right to selectively Award individual Base Bid Packages to multiple Prime Bidders submitting the lowest and best Bids for the individual Bid Packages.
- 3.10 BID FORM - ALTERNATE BID(S)
- A. Each Bidder, in addition to submission of the Base Bid, shall submit a Bid for any Alternate(s) as called for (if any). Failure to submit said Alternate Bid(s) shall be sufficient cause for the Owner to reject any proposal in its entirety. Also the Owner may consider the Alternate Bid in awarding of a Contract, but is under no obligation to accept any Alternate Bid.
- B. Proposals shall be based only on the material, construction, equipment and methods named or described in the Specifications, on the Drawings, and any Addenda issued prior to Bidding. See item 1.08 of this Section for substitution request requirements.
- 3.11 BID FORM – ALLOWANCES
- A. Allowances (if any) shall be included in the applicable Bid (Base Bid(s) or Alternate Bid(s)) as called for in the Allowance Section of the Bid Form and/or Section 01 23 60 Allowances.

00 10 10  
INSTRUCTIONS TO BIDDERS

- B. It is solely at the discretion of the Architect/Engineer/Owner what costs may be applied to an Allowance.
- C. Any unused portion of an Allowance shall be returned to the Owner at Contract Closeout.

3.12 NON-COLLUSION AFFIDAVIT

- A. The Bidder, by its officers and agents or representatives present at the time of filing their bid, being duly sworn, say on their oaths that neither they nor any of them have in any way, directly or indirectly, entered into any arrangement or agreement with any other bidder, or with any public office of the State of Indiana, of any county or municipality or other public offices whereby such affiance or either of them, has paid or is to pay to such other bidder or public officer any sum of money, or has given or is to give to such other bidders or public officer anything of value whatever, or such affiance of affiance or either of them has not, directly or indirectly entered into any arrangement or agreement with any other bidder or bidders, which tends to or does lessen or destroy free competition in letting of the contract sought for by the attached bids; that no inducement of any form or character other than which appears upon the face of the bid will be suggested, offered, paid, or delivered to any person whomsoever to influence the acceptance of the said bid or awarding of the contract, nor has this bidder any agreement or understanding of any kind whatsoever, with any person whomsoever to pay, deliver to, or share with any other person in any way or manner, any of the proceeds of the contract sought by this bid.
- B. Submission of the signed Bid Form indicates compliance.

3.13 NON-DISCRIMINATION

- A. The Bidder and its Subcontractors, if any, shall not discriminate against any employee or applicant for employment, to be employed in the performance of this Contract, with respect to their hire, tenure, terms, conditions or privileges of employment or any matter directly or indirectly related to employment because of their sex, race, natural origin, ancestry or religion or disability as prohibited under the Americans with Disabilities Act. Breach of this covenant may be regarded as a material breach of the Contract.
- B. Submission of the signed Bid Form indicates compliance.

3.14 CERTIFICATION OF UNITED STATES STEEL PRODUCTS

- A. The Bidder certifies that the Bidder and all Subcontractors will comply with the statutory obligations to use steel products made in the United States.
- B. Submission of the signed Bid Form indicates compliance.

3.15 BID FORM - APPENDIX A SUBCONTRACTOR AND SUPPLIER/MANUFACTURERS LISTS

- A. The Prime Contractor (Bidder) shall list all Subcontractors and Suppliers/Manufacturers called for in Appendix A of the Bid Form at the time of Bid Submission. Failure to provide this information may be sufficient cause to disallow a Bid.
- B. **The Prime Contractor (Bidder) shall use the Subcontractors, Suppliers, Materials and Equipment as listed in the Bid Form Appendix "A" submitted at the time of Bid. It is the Prime Contractor's (Bidder's) responsibility to assure they have listed the correct Subcontractors, Suppliers, Materials and Equipment on their Bid Form. THERE SHALL BE NO CHANGES PERMITTED TO THESE LISTS.**
  - 1. Exception: If the Owner determines the Subcontractors, Suppliers, Materials or Equipment are not acceptable, the Owner shall notify the Prime Contractor (Bidder) in writing within two (2) working days after receipt of Bids of the unacceptable Subcontractor(s), Supplier(s), Material(s) and/or Equipment(s).

00 10 10  
INSTRUCTIONS TO BIDDERS

3.16 BID FORM - APPENDIX B UNIT PRICES

- A. Each Bidder shall submit pricing for Unit Prices as called for (if any) in Appendix B. Failure to submit said pricing may be sufficient cause for the Owner to reject any proposal in its entirety. Also the Owner may consider the Unit Pricing in awarding of a Contract.
- B. Unit Prices shall be based only on the material, construction, equipment and methods named or described in the Specifications, on the Drawings, and any Addenda issued prior to Bidding.
- C. Unit prices include all necessary material, plus cost for delivery, installation, insurance, applicable taxes, overhead, and profit.

3.17 BID FORM - APPENDIX C

- A. By 2:00pm on the next business day after receipt of Bids the Bidder shall submit, a wage rate schedule for the workers of the Prime Bidder and all major Subcontractors involved in the Work. The wage rate shall include the worker's hourly rate plus all fringe benefits to be paid to the worker.
- B. A major Subcontractor is defined as any Subcontractor whose portion of the Bid is in excess of \$250,000 or 20% of the total Bid whichever is less.
- C. Failure to submit this wage rate schedule within the allotted time may be sufficient cause to disallow a Bid. The wage rates provided may be used as a basis for Award of the Bid.
- D. The Owner reserves the right to require certified payroll records to be provided to verify the wage rates listed on the wage rate schedule are accurate.

MBE/WBE/VBE COMPLIANCE INSTRUCTIONS

PART 1 – CONSTRUCTION SERVICES – INSTRUCTION TO BIDDERS

1.01 MBE/WBE/VBE Participation Plan

- A. Indiana State University is committed to diversity and non-discrimination in all aspects of its operations. This initiative is to ensure that certified MBEs, WBEs, and VBEs are included in all invitations for quotes and bids, and that all prospective bidders are notified of Indiana State University's expectation for diversity, including but not limited to MBE/WBE/VBE participation in procurement contracts for professional services, materials, supplies and equipment, and in contracts for the construction, architectural services, renovation or repair of university facilities and equipment. This expectation extends to all tiers of contractor utilization. Each Prime contractor should actively solicit and include certified minority, women and veteran owned subcontractors in bid submissions if economically feasible.
- B. The Minority, Women's and Veteran's Business Enterprise Participation Plan (form included in specifications) shall be submitted with the bid. This Participation Plan will be considered during the proposal evaluation process.
- C. Indiana State University's annual MBE, WBE, and VBE participation goals parallel those set by the Indiana Department of Administration for its own business diversity efforts. The State MBE/WBE participation goals may be found at [www.in.gov/idoa/mwbe/2743.htm](http://www.in.gov/idoa/mwbe/2743.htm) and VBE participation goals may be found at [www.in.gov/idoa/2862.htm](http://www.in.gov/idoa/2862.htm)

1.02 Definitions

- A. "Minority-owned Business Enterprise" (MBE) means an individual, partnership, corporation, limited liability company, or joint venture of any kind that is 51% owned and controlled by (1) or more persons who are (a) United States citizens; and (b) members of a racial minority group: African American, American Indians, Hispanics, Asian Americans, or other similar minority group as defined by 13 CFR 124.103 and have been certified by the State of Indiana.
- B. "Women-owned Business Enterprise" (WBE) means an individual, partnership, corporation, limited liability company, or joint venture of any kind that is 51% owned and controlled by (1) or more persons who are (a) United States citizens; and (b) whose gender is female and have been certified by the State of Indiana.
- C. "Veteran-owned Business Enterprise" (VBE) means an Indiana firm with its principal place of business location in Indiana and is currently certified by the Department of Veterans Affairs as a veteran-owned business and have been certified by the State of Indiana or who have been Federally certified.

1.03 Qualifications for Participation

- A. In order to count toward participation goals, the MBEs and WBEs must be certified by the State of Indiana.
- B. VBEs must be certified by the State of Indiana or have been Federally certified.

1.04 Failure to Participate

- A. Failure to submit the Minority, Women's and Veteran's Business Enterprise Participation Plan with the Bid may be cause to reject a Bid.
- B. The Owner retains the right to hold payment, and/or to reject future bids submitted by the successful Contractor in the event that Contractor misrepresents either MBE/WBE/VBE participation in this Project, or its efforts to obtain MBE/WBE/VBE participation in this project, or fails to report MBE/WBE/VBE spend on this project.
- C. The Owner, at its discretion, may waive in part or in whole the minority-owned business enterprise, women-owned business enterprise and/or veteran-owned business enterprise requirement if in the opinion of the Owner it would be impractical, or not in the best interest of the Owner.

00 10 30  
MBE/WBE/VBE COMPLIANCE INSTRUCTIONS

1.05 Mandatory Tier II Reporting Requirement for Projects equal to or greater than \$500,000.00

- A. The successful Contractor shall take all necessary and reasonable steps to ensure that MBE/WBE/VBEs have the maximum opportunity to compete for and perform work on this Contract.
- B. MBE/WBE/VBE utilization in the performance of this Contract must be reported with each Application for Payment using the ISU Business Diversity Spend Reporting Form for Construction/Renovation/Facilities Repair Projects (see included: Tier II Spend Report Form.xlsx.)
- C. Compliance with Owner's Mandatory Tier II Reporting Requirement is a condition for the approval of an Applications for Payment.

## BIDDER'S CERTIFICATION OF AUTHORIZED EMPLOYMENT

In accordance with Indiana Code 22-5-1. 7 as amended, each Contractor in any tier of a public works project shall not knowingly employ unauthorized aliens. Every contractor shall enroll in and verify the work eligibility status of all employees hired after June 30, 2015 using the U.S. Citizenship and Immigration Services (USCIS) E-Verify program as defined in IC §22-5-1.7-3, unless the E-Verify program no longer exists.

The Prime Contractor shall require their subcontractors who perform work under this Contract to certify to the Prime Contractor that the subcontractor does not knowingly employ or contract with an unauthorized alien and that the subcontractor has enrolled and is participating in the E-Verify program. The Prime Contractor agrees to maintain this certification throughout the duration of the term of a contract with a subcontractor. The successful Prime Contractor and its sub-contractors at all levels shall comply with all provisions of the statute or the Contract is subject to cancellation.

---

I hereby certify that I have read and understand the "Contractor's Certification of Authorized Employment" provision of the Contract Documents In Section 00 20 11 Amendments to General Conditions Article 13, subparagraph 13.1.7.3 and its subparagraphs and that the undersigned and proposed and actual sub-contractors at all tiers shall comply with the provisions of the Statute

On behalf of and as authorized by the Bidder, I affirm and depose that the Bidder and our Subcontractors shall not knowingly employ unauthorized aliens.

Terre Haute, Indiana 47809

# **Contract for Construction Between Indiana State University and Contractor**

ISU Form CfC101-20  
Based on AIA Form A101

---

## **AGREEMENT**

Agreement for the Contract of Construction made as of the \_\_\_\_\_ day of \_\_\_\_\_ in the  
year of Two Thousand and \_\_\_\_\_

**BETWEEN** the Owner  
Indiana State University  
210 North Seventh Street  
Terre Haute, Indiana 47809-0001

and the Contractor:  
(Name and address)

Project is:  
(Name and location)

The Architect/Engineer is:  
(Name and address)

Indiana State University and the Contractor agree as set forth below:

## **Part 1 – Contract Documents:**

The Contract Documents include this Contract for Construction, Conditions of the Contract (General and Special Conditions), Drawings, Specifications, Addenda issued prior to execution of this Contract, other documents listed in this Contract, and Modifications issued after execution of this Contract; these form the Contract, and are as fully a part of the Contract as if attached to this Contract or repeated herein. This Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representation or agreements, either written or oral. An enumeration of the Contract Documents and other Modifications appears in Part 9 of this document.

## **Part 2 – Work of This Contract:**

The Contractor shall execute the entire work as described in the Contract Documents, except to the extent specifically indicated in the Contract Documents to be the responsibility of others, or as follows:

## **Part 3 – Start Date and Substantial Completion Date:**

- 3.01 The Start Date shall be as indicated in Section 00 10 10 of the Project Specifications, as listed in any subsequent Addenda, the Award Letter or as listed below:
- 3.02 The Contractor shall achieve Substantial Completion as indicated in Section 00 10 10 of the Project Specifications, as listed in any subsequent Addenda, the Award Letter or as listed below:
- 3.03 Substantial Completion may be adjusted as allowed under Contract Documents or as mutually agreed upon in writing by the Owner and the Contractor.

## **Part 4 – Contract Sum:**

- 4.01 Indiana State University shall pay the Contractor in current funds for the Contractor's performance of the Contract the Contract Sum of \_\_\_\_\_ dollars (\$ \_\_\_\_\_) subject to additions or deductions as provided in the Contract Documents
- 4.02 The Contract Sum is based upon the following Alternates, if any, which are described in the Contract Documents and are hereby accepted by Indiana State University:
- 4.03 Unit Prices, if any, are as follows:
- 4.04 Allowances

## **Part 5 – Progress Payments**

- 5.01 Based on an Application for Payment Issued to the Architect/Engineer by the Contractor, Indiana State University shall make progress payments on the account of the Contract Sum to the Contractor as provided below and elsewhere in the Contract Documents.
- 5.02 The period covered by each Application for Payment shall be on a regular monthly basis of not less than Twenty Eight (28) calendar days.
- 5.03 When the Application for Payment is received by the Architect/Engineer, Indiana State University shall make payment within fifteen (15) days after the approval of the Application for Payment by the Architect/Engineer and receipt by Indiana State University Office of Finance and Administration.
- 5.04 Each Application for Payment shall be based on the schedule of values submitted by the Contractor in accordance with the Contract Documents. The schedule of values shall allocate the entire Contract Sum among the various portions of Work and shall be prepared in a form and supported by such data as required by the Architect/Engineer and Indiana State University to evaluate and substantiate the accuracy of the Application for Payment. Unless objected to by the Architect/Engineer or Indiana State University this schedule of values shall be the basis for all Contractor Applications for Payment.
- 5.05 Applications for Payment shall indicate the percentage of completion of each portion of Work as of the end of the application period.
- 5.06 A Partial Waiver of Lien shall be included with each progress Application for Payment.
- 5.07 Subject to provisions of the Contract Documents, the amount of the Application for Payment shall be computed as follows:
  - A. Total of all portions of Work indicted on the schedule of values completed during the application period.
  - B. Total of verified stored materials indicated on the schedule of values acquired during the application period, provided proof of insurance on the storage facility is submitted.
  - C. Total of all Change Orders approved or Change Directives issued during the application period.
  - D. Less a Retainage of ten percent (10%)
  - E. Subtract the aggregate of previous Applications of Payments made to Indiana State University and subtract amounts, if any, withheld or nullified by the Architect/Engineer.
- 5.08 The progress payment amount determined by Section 5.06 shall be further modified under the following circumstances
  - A. Add, upon Substantial Completion of the Work, a sum sufficient to increase the total payments to ninety five percent (95%) of the Contract Sum; less any amounts the Architect/Engineer or Indiana State University shall determine for incomplete work and unsettled claims.
  - B. Add, if final completion of the work is thereafter materially delayed through no fault of the Contractor, any additional amounts payable in accordance with Subparagraph 9.10.3 of the General Conditions.
- 5.09 Reduction or Limitation of Retainage:
  - A. At the sole written discretion of Indiana State University, if acceptable progress is made, at fifty percent (50%) completion of the Contract Sum the remaining Retainage may be reduced to 0%.

## **Part 6 – Final Payment**

- 6.01 Final payment, constituting the remaining unpaid balance of the Contract Sum, shall be made to the Contractor by Indiana State University when:
  - A. The Contract has been fully performed by the Contractor as detailed in the Contract Documents.
  - B. Approval of the Final Application for Payment is received from the Architect/Engineer.
- 6.02 No Contractor claims for additional compensation shall be permitted or accepted more than sixty (60) days following the Contractor's submission of their Final Application for Payment.
- 6.03 Payment shall be made by Indiana State University 61 days after issuance of the of the Contractor's Final Application for Payment and Final Waiver of Lien and final approval from the Architect/Engineer of the Final Application for Payment.

## **Part 7 – Miscellaneous Provisions**

- 7.01 Where reference is made in this document to a provision of the General Conditions or another Contract Document, the reference refers to that provision as amended or supplemented by other provisions of the Contract Documents.

## **Part 8 – Termination or Suspension**

- 8.01 The Contract may be terminated by Indiana State University or the Contractor as provided in Article 14 of the General Conditions.
- 8.02 The Work may be suspended by Indiana State University as provided in Article 14 of the General Conditions.

## **Part 9 – Enumeration of Contract Documents**

- 9.01 The Contract Documents, except for Modifications issued after execution of this Contract, are enumerated as follows:
- A. The agreement is this executed **Contract for Construction Between Indiana State University and Contractor, ISU Form CfC101-20**.
  - B. The General Conditions are the General Conditions of the Contract for Construction, AIA Document A201.
  - C. The Supplementary and Other Conditions are those contained in the Project Specifications and are as follows:  
See attached Exhibit A Sections 00 and 01
  - D. The Specifications:  
See attached Exhibit A Sections 02-33 as applicable
  - E. The Drawings:  
See attached Exhibit B
  - F. The Addenda:  

Number	Date	Pages
--------	------	-------
  - G. Other Documents, if any, forming the Contract Documents are as follows:  
Debarment Form, Diversity Compliance Form, Contractor's Certification of Authorized Employment Form, Award Letter, Purchase Order

This agreement is entered into as of the day and year first written above and is executed in at least five (5) copies of which one is delivered to the Contractor, one is delivered to the Architect/Engineer, and the remainder to Indiana State University for distribution to the ISU Purchasing Department, the Office of the Senior Vice President for Finance and Administration and the ISU Facilities Management Department.

**OWNER'S RIGHTS REGARDING ACCEPTANCE OF BIDS**

**It is understood that the Owner reserves the right to accept or reject any Bid and to waive any irregularities in Bidding. It is further understood on Bids with multiple Base Bid Packages the Owner reserves the right to selectively Award individual Base Bid Packages to multiple Prime Bidders submitting the lowest and best Bids for the individual Base Bid Packages.**

00 20 00  
BID FORM

**TAX EXEMPT**

Indiana State University is a Tax Exempt Institution and Indiana Sales Tax for products permanently incorporated in work shall not be included as part of the Bid. All other applicable Federal, State and Local taxes shall be included in the Bid sum. Tax exempt certificate available upon request.

**OFFER:**

Pursuant to and in compliance with 'Instructions to Bidders', and other Bidding Documents prepared by the Indiana State University Facilities Management Department for the above mentioned project, the signer, having become thoroughly familiar with the terms and conditions of the proposed Contract Documents and with local conditions affecting the performance and costs of the Work at the place where the Work is to be completed, and having fully inspected the site in all particulars, hereby proposes and agrees to fully perform the Work within the time stated and in strict accordance with the intent of the proposed Contract Documents, including furnishing bonds, insurance, labor, materials, and to do all the Work required to construct and complete in accordance with the proposed Contract Documents as follows:

BASE BID: Remodel of existing area to create an expanded ISU Police Dispatch Center per Specifications and Drawings

\_\_\_\_\_ Dollars (\$ \_\_\_\_\_)  
(State Amount in Words)

**ALTERNATE BIDS**

1. No Alternates Requested

**ALLOWANCES**

1. A \$1,500 Allowance shall be included in the Base Bid for the A/E to create "Record Drawings" as detailed in Section 01 77 00 Contract Closeout.
2. A \$10,000 Allowance shall be included in the Base Bid for Unforeseen Conditions and General Construction Contingency. It is solely at the discretion of the Architect/Engineer/Owner what costs may be applied to this Allowance.

**ACCEPTANCE**

This offer shall be opened to acceptance and is irrevocable for the period as follows:

- Base Bid and All Alternates - One Hundred Twenty (120) calendar days from the Bid opening date.

If the Owner accepts the Bid within the time period stated above, Bidder will:

- Furnish the required bonds and insurance certificates within ten (10) calendar days of receipt of the Award Letter
- Commence work within seven (7) calendar days of receipt of the Award Letter or as Directed by the Owner.
- Execute the Contract for Construction Between Indiana State University and Contractor within seven (7) calendar days of receipt of the Contract.

The Bidder agrees to coordinate and expedite their work and that if the Award is given within fourteen (14) calendar days from the Bid opening date the work shall be substantially completed as listed in Section 00 10 10 Instructions to Bidders 1.01 C. If the Award is not made within the stated fourteen (14) calendar days then the substantial completion date may be adjusted as allowed by the Contract Documents or as mutually agreed upon in writing by the Owner and Contractor.

00 20 00  
BID FORM

NON-COLLUSION AFFIDAVIT

The Bidder, by its officers and agents or representatives present at the time of filing their bid, being duly sworn, say on their oaths that neither they nor any of them have in any way, directly or indirectly, entered into any arrangement or agreement with any other bidder, or with any public office of the State of Indiana, of any county or municipality or other public offices whereby such affiance or either of them, has paid or is to pay to such other bidder or public officer any sum of money, or has given or is to give to such other bidders or public officer anything of value whatever, or such affiance of affiance or either of them has not, directly or indirectly entered into any arrangement or agreement with any other bidder or bidders, which tends to or does lessen or destroy free competition in letting of the contract sought for by the attached bids; that no inducement of any form or character other than which appears upon the face of the bid will be suggested, offered, paid, or delivered to any person whomsoever to influence the acceptance of the said bid or awarding of the contract, nor has this bidder any agreement or understanding of any kind whatsoever, with any person whomsoever to pay, deliver to, or share with any other person in any way or manner, any of the proceeds of the contract sought by this bid.

NON-DISCRIMINATION

The Bidder and its Subcontractors, if any, shall not discriminate against any employee or applicant for employment, to be employed in the performance of this Contract, with respect to their hire, tenure, terms, conditions or privileges of employment or any matter directly or indirectly related to employment because of their sex, race, natural origin, ancestry or religion or disability as prohibited under the Americans with Disabilities Act. Breach of this covenant may be regarded as a material breach of the Contract.

CERTIFICATION OF UNITED STATES STEEL PRODUCTS

The Bidder certifies that the Bidder and all Subcontractors will comply with the statutory obligations to use steel products made in the United States.

MBE/WBE/VBE BIDDING:

See Section 00 10 30 for requirements for MBE/WBE/VBE Compliance. Section 00 10 40 MBE/WBE/VBE Participation Plan must be completed by **all Bidders** and submitted with the Bid. Failure to submit with the Bid may be sufficient cause to disqualify a Bid.

#### ADDITIONS AND DELETIONS:

The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

**ELECTRONIC COPYING** of any portion of this AIA® Document to another electronic file is prohibited and constitutes a violation of copyright laws as set forth in the footer of this document.

## INDEX

(Topics and numbers in bold are section headings.)

### Acceptance of Nonconforming Work

9.6.6, 9.9.3, **12.3**

Acceptance of Work

9.6.6, 9.8.2, 9.9.3, 9.10.1, 9.10.3, **12.3**

### Access to Work

**3.16**, 6.2.1, **12.1**

Accident Prevention

10

Acts and Omissions

3.2, 3.3.2, 3.12.8, 3.18, 4.2.3, 8.3.1, 9.5.1, 10.2.5,  
10.2.8, 13.4.2, 13.7, 14.1, 15.2

Addenda

1.1.1, 3.11.1

Additional Costs, Claims for

3.7.4, 3.7.5, 6.1.1, 7.3.7.5, 10.3, 15.1.4

### Additional Inspections and Testing

9.4.2, 9.8.3, 12.2.1, **13.5**

Additional Insured

11.1.4

### Additional Time, Claims for

3.2.4, 3.7.4, 3.7.5, 3.10.2, 8.3.2, **15.1.5**

### Administration of the Contract

3.1.3, **4.2**, 9.4, 9.5

Advertisement or Invitation to Bid

1.1.1

Aesthetic Effect

4.2.13

### Allowances

**3.8**, 7.3.8

All-risk Insurance

11.3.1, 11.3.1.1

### Applications for Payment

4.2.5, 7.3.9, 9.2, **9.3**, 9.4, 9.5.1, 9.6.3, 9.7, 9.10,  
11.1.3

Approvals

2.1.1, 2.2.2, 2.4, 3.1.3, 3.10.2, 3.12.8, 3.12.9, 3.12.10,  
4.2.7, 9.3.2, 13.5.1

### Arbitration

8.3.1, 11.3.10, 13.1.1, 15.3.2, **15.4**

## ARCHITECT

**4**

Architect, Definition of

### 4.1.1

Architect, Extent of Authority

2.4.1, 3.12.7, 4.1, 4.2, 5.2, 6.3, 7.1.2, 7.3.7, 7.4, 9.2,  
9.3.1, 9.4, 9.5, 9.6.3, 9.8, 9.10.1, 9.10.3, 12.1, 12.2.1,  
13.5.1, 13.5.2, 14.2.2, 14.2.4, 15.1.3, 15.2.1

Architect, Limitations of Authority and  
Responsibility

2.1.1, 3.12.4, 3.12.8, 3.12.10, 4.1.2, 4.2.1, 4.2.2,  
4.2.3, 4.2.6, 4.2.7, 4.2.10, 4.2.12, 4.2.13, 5.2.1, 7.4,  
9.4.2, 9.5.3, 9.6.4, 15.1.3, 15.2

Architect's Additional Services and Expenses

2.4.1, 11.3.1.1, 12.2.1, 13.5.2, 13.5.3, 14.2.4

Architect's Administration of the Contract

3.1.3, 4.2, 3.7.4, 15.2, 9.4.1, 9.5

Architect's Approvals

2.4.1, 3.1.3, 3.5, 3.10.2, 4.2.7

Architect's Authority to Reject Work

3.5, 4.2.6, 12.1.2, 12.2.1

Architect's Copyright

1.1.7, 1.5

Architect's Decisions

3.7.4, 4.2.6, 4.2.7, 4.2.11, 4.2.12, 4.2.13, 4.2.14, 6.3,  
7.3.7, 7.3.9, 8.1.3, 8.3.1, 9.2, 9.4.1, 9.5, 9.8.4, 9.9.1,  
13.5.2, 15.2, 15.3

Architect's Inspections

3.7.4, 4.2.2, 4.2.9, 9.4.2, 9.8.3, 9.9.2, 9.10.1, **13.5**

Architect's Instructions

3.2.4, 3.3.1, 4.2.6, 4.2.7, 13.5.2

Architect's Interpretations

4.2.11, 4.2.12

Architect's Project Representative

4.2.10

Architect's Relationship with Contractor

1.1.2, 1.5, 3.1.3, 3.2.2, 3.2.3, 3.2.4, 3.3.1, 3.4.2, 3.5,  
3.7.4, 3.7.5, 3.9.2, 3.9.3, 3.10, 3.11, 3.12, 3.16, 3.18,  
4.1.2, 4.1.3, 4.2, 5.2, 6.2.2, 7, 8.3.1, 9.2, 9.3, 9.4, 9.5,  
9.7, 9.8, 9.9, 10.2.6, 10.3, 11.3.7, 12, 13.4.2, 13.5,  
15.2

Architect's Relationship with Subcontractors

1.1.2, 4.2.3, 4.2.4, 4.2.6, 9.6.3, 9.6.4, 11.3.7

Architect's Representations

9.4.2, 9.5.1, 9.10.1

Architect's Site Visits

3.7.4, 4.2.2, 4.2.9, 9.4.2, 9.5.1, 9.9.2, 9.10.1, **13.5**

Asbestos

10.3.1

Attorneys' Fees

3.18.1, 9.10.2, 10.3.3

Award of Separate Contracts

6.1.1, 6.1.2

### Award of Subcontracts and Other Contracts for Portions of the Work

**5.2**

## Basic Definitions

### 1.1

Bidding Requirements

1.1.1, 5.2.1, 11.4.1

Binding Dispute Resolution

9.7, 11.3.9, 11.3.10, 13.1.1, 15.2.5, 15.2.6.1, 15.3.1,  
15.3.2, 15.4.1

### Boiler and Machinery Insurance

**11.3.2**

Bonds, Lien

7.3.7.4, 9.10.2, 9.10.3

### Bonds, Performance, and Payment

7.3.7.4, 9.6.7, 9.10.3, 11.3.9, **11.4**

Building Permit

3.7.1

## **Capitalization**

### **1.3**

Certificate of Substantial Completion

9.8.3, 9.8.4, 9.8.5

## **Certificates for Payment**

4.2.1, 4.2.5, 4.2.9, 9.3.3, **9.4**, 9.5, 9.6.1, 9.6.6, 9.7,

9.10.1, 9.10.3, 14.1.1.3, 14.2.4, 15.1.3

Certificates of Inspection, Testing or Approval  
13.5.4

Certificates of Insurance

9.10.2, 11.1.3

## **Change Orders**

1.1.1, 2.4.1, 3.4.2, 3.7.4, 3.8.2.3, 3.11.1, 3.12.8, 4.2.8,  
5.2.3, 7.1.2, 7.1.3, **7.2**, 7.3.2, 7.3.6, 7.3.9, 7.3.10,  
8.3.1, 9.3.1.1, 9.10.3, 10.3.2, 11.3.1.2, 11.3.4, 11.3.9,  
12.1.2, 15.1.3

**Change Orders**, Definition of

### **7.2.1**

## **CHANGES IN THE WORK**

2.2.1, 3.11, 4.2.8, **7**, 7.2.1, 7.3.1, 7.4, 7.4.1, 8.3.1,

9.3.1.1, 11.3.9

**Claims**, Definition of

### **15.1.1**

## **CLAIMS AND DISPUTES**

3.2.4, 6.1.1, 6.3, 7.3.9, 9.3.3, 9.10.4, 10.3.3, **15**, 15.4

Claims and Timely Assertion of Claims

15.4.1

## **Claims for Additional Cost**

3.2.4, 3.7.4, 6.1.1, 7.3.9, 10.3.2, **15.1.4**

## **Claims for Additional Time**

3.2.4, 3.7.4.6.1.1, 8.3.2, 10.3.2, **15.1.5**

## **Concealed or Unknown Conditions, Claims for**

### **3.7.4**

Claims for Damages

3.2.4, 3.18, 6.1.1, 8.3.3, 9.5.1, 9.6.7, 10.3.3, 11.1.1,

11.3.5, 11.3.7, 14.1.3, 14.2.4, 15.1.6

Claims Subject to Arbitration

15.3.1, 15.4.1

## **Cleaning Up**

### **3.15, 6.3**

Commencement of the Work, Conditions Relating to

2.2.1, 3.2.2, 3.4.1, 3.7.1, 3.10.1, 3.12.6, 5.2.1, 5.2.3,

6.2.2, 8.1.2, 8.2.2, 8.3.1, 11.1, 11.3.1, 11.3.6, 11.4.1,

15.1.4

**Commencement of the Work**, Definition of

### **8.1.2**

## **Communications Facilitating Contract**

## **Administration**

3.9.1, **4.2.4**

Completion, Conditions Relating to

3.4.1, 3.11, 3.15, 4.2.2, 4.2.9, 8.2, 9.4.2, 9.8, 9.9.1,

9.10, 12.2, 13.7, 14.1.2

## **COMPLETION, PAYMENTS AND**

### **9**

Completion, Substantial

4.2.9, 8.1.1, 8.1.3, 8.2.3, 9.4.2, 9.8, 9.9.1, 9.10.3,

12.2, 13.7

Compliance with Laws

1.6.1, 3.2.3, 3.6, 3.7, 3.12.10, 3.13, 4.1.1, 9.6.4,

10.2.2, 11.1, 11.3, 13.1, 13.4, ~~13.5.1~~, 13.5.2, 13.6,

14.1.1, 14.2.1.3, 15.2.8, 15.4.2, 15.4.3

Concealed or Unknown Conditions

3.7.4, 4.2.8, 8.3.1, 10.3

Conditions of the Contract

1.1.1, 6.1.1, 6.1.4

Consent, Written

3.4.2, 3.7.4, 3.12.8, 3.14.2, 4.1.2, 9.3.2, 9.8.5, 9.9.1,

9.10.2, 9.10.3, 11.3.1, 13.2, 13.4.2, 15.4.4.2

## **ARTICLE 1 GENERAL PROVISIONS**

### **§ 1.1 BASIC DEFINITIONS**

#### **§ 1.1.1 THE CONTRACT DOCUMENTS**

The Contract Documents are enumerated in the Agreement between the Owner and Contractor (hereinafter the Agreement) and consist of the Agreement, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, Addenda issued prior to execution of the Contract, other documents listed in the Agreement and Modifications issued after execution of the Contract. A Modification is (1) a written amendment to the Contract signed by both parties, (2) a Change Order, (3) a Construction Change Directive or (4) a written order for a minor change in the Work issued by the Architect. Unless specifically enumerated in the Agreement, the Contract Documents do not include the advertisement or invitation to bid, Instructions to Bidders, sample forms, other information furnished by the Owner in anticipation of receiving bids or proposals, the Contractor's bid or proposal, or portions of Addenda relating to bidding requirements.

#### **§ 1.1.2 THE CONTRACT**

The Contract Documents form the Contract for Construction. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind (1) between the Contractor and the Architect or the Architect's consultants, (2) between the Owner and a Subcontractor or a Sub-subcontractor, (3) between the Owner and the Architect or the Architect's consultants or (4) between any persons or entities other than the Owner and the Contractor. The Architect shall, however, be entitled to performance and enforcement of obligations under the Contract intended to facilitate performance of the Architect's duties.

#### **§ 1.1.3 THE WORK**

The term "Work" means the construction and services required by the Contract Documents, whether completed or partially completed, and includes all other labor, materials, equipment and services provided or to be provided by the Contractor to fulfill the Contractor's obligations. The Work may constitute the whole or a part of the Project.

#### **§ 1.1.4 THE PROJECT**

The Project is the total construction of which the Work performed under the Contract Documents may be the whole or a part and which may include construction by the Owner and by separate contractors.

#### **§ 1.1.5 THE DRAWINGS**

The Drawings are the graphic and pictorial portions of the Contract Documents showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules and diagrams.

#### **§ 1.1.6 THE SPECIFICATIONS**

The Specifications are that portion of the Contract Documents consisting of the written requirements for materials, equipment, systems, standards and workmanship for the Work, and performance of related services.

#### **§ 1.1.7 INSTRUMENTS OF SERVICE**

Instruments of Service are representations, in any medium of expression now known or later developed, of the tangible and intangible creative work performed by the Architect and the Architect's consultants under their respective professional services agreements. Instruments of Service may include, without limitation, studies, surveys, models, sketches, drawings, specifications, and other similar materials.

#### **§ 1.1.8 INITIAL DECISION MAKER**

The Initial Decision Maker is the person identified in the Agreement to render initial decisions on Claims in accordance with Section 15.2 and certify termination of the Agreement under Section 14.2.2.

### **§ 1.2 CORRELATION AND INTENT OF THE CONTRACT DOCUMENTS**

**§ 1.2.1** The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by the Contractor. The Contract Documents are complementary, and what is required by one shall be as binding as if required by all; performance by the Contractor shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the indicated results.

**§ 1.2.2** Organization of the Specifications into divisions, sections and articles, and arrangement of Drawings shall not control the Contractor in dividing the Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

**§ 1.2.3** Unless otherwise stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meanings.

### **§ 1.3 CAPITALIZATION**

Terms capitalized in these General Conditions include those that are (1) specifically defined, (2) the titles of numbered articles or (3) the titles of other documents published by the American Institute of Architects.

### **§ 1.4 INTERPRETATION**

In the interest of brevity the Contract Documents frequently omit modifying words such as “all” and “any” and articles such as “the” and “an,” but the fact that a modifier or an article is absent from one statement and appears in another is not intended to affect the interpretation of either statement.

### **§ 1.5 OWNERSHIP AND USE OF DRAWINGS, SPECIFICATIONS AND OTHER INSTRUMENTS OF SERVICE**

**§ 1.5.1** The Architect and the Architect’s consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and will retain all common law, statutory and other reserved rights, including copyrights. The Contractor, Subcontractors, Sub-subcontractors, and material or equipment suppliers shall not own or claim a copyright in the Instruments of Service. Submittal or distribution to meet official regulatory requirements or for other purposes in connection with this Project is not to be construed as publication in derogation of the Architect’s or Architect’s consultants’ reserved rights.

**§ 1.5.2** The Contractor, Subcontractors, Sub-subcontractors and material or equipment suppliers are authorized to use and reproduce the Instruments of Service provided to them solely and exclusively for execution of the Work. All copies made under this authorization shall bear the copyright notice, if any, shown on the Instruments of Service. The Contractor, Subcontractors, Sub-subcontractors, and material or equipment suppliers may not use the Instruments of Service on other projects or for additions to this Project outside the scope of the Work without the specific written consent of the Owner, Architect and the Architect’s consultants.

### **§ 1.6 TRANSMISSION OF DATA IN DIGITAL FORM**

If the parties intend to transmit Instruments of Service or any other information or documentation in digital form, they shall endeavor to establish necessary protocols governing such transmissions, unless otherwise already provided in the Agreement or the Contract Documents.

## **ARTICLE 2 OWNER**

### **§ 2.1 GENERAL**

**§ 2.1.1** The Owner is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Owner shall designate in writing a representative who shall have express authority to bind the Owner with respect to all matters requiring the Owner’s approval or authorization. Except as otherwise provided in Section 4.2.1, the Architect does not have such authority. The term “Owner” means the Owner or the Owner’s authorized representative.

**§ 2.1.2** The Owner shall furnish to the Contractor within fifteen days after receipt of a written request, information necessary and relevant for the Contractor to evaluate, give notice of or enforce mechanic’s lien rights. Such information shall include a correct statement of the record legal title to the property on which the Project is located, usually referred to as the site, and the Owner’s interest therein.

### **§ 2.2 INFORMATION AND SERVICES REQUIRED OF THE OWNER**

**§ 2.2.1** Prior to commencement of the Work, the Contractor may request in writing that the Owner provide reasonable evidence that the Owner has made financial arrangements to fulfill the Owner’s obligations under the Contract. Thereafter, the Contractor may only request such evidence if (1) the Owner fails to make payments to the Contractor as the Contract Documents require; (2) a change in the Work materially changes the Contract Sum; or (3) the Contractor identifies in writing a reasonable concern regarding the Owner’s ability to make payment when due. The Owner shall furnish such evidence as a condition precedent to commencement or continuation of the Work or

the portion of the Work affected by a material change. After the Owner furnishes the evidence, the Owner shall not materially vary such financial arrangements without prior notice to the Contractor.

**§ 2.2.2** Except for permits and fees that are the responsibility of the Contractor under the Contract Documents, including those required under Section 3.7.1, the Owner shall secure and pay for necessary approvals, easements, assessments and charges required for construction, use or occupancy of permanent structures or for permanent changes in existing facilities.

**§ 2.2.3** The Owner shall furnish surveys describing physical characteristics, legal limitations and utility locations for the site of the Project, and a legal description of the site. The Contractor shall be entitled to rely on the accuracy of information furnished by the Owner but shall exercise proper precautions relating to the safe performance of the Work.

**§ 2.2.4** The Owner shall furnish information or services required of the Owner by the Contract Documents with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and relevant to the Contractor's performance of the Work with reasonable promptness after receiving the Contractor's written request for such information or services.

**§ 2.2.5** Unless otherwise provided in the Contract Documents, the Owner shall furnish to the Contractor one copy of the Contract Documents for purposes of making reproductions pursuant to Section 1.5.2.

### **§ 2.3 OWNER'S RIGHT TO STOP THE WORK**

If the Contractor fails to correct Work that is not in accordance with the requirements of the Contract Documents as required by Section 12.2 or repeatedly fails to carry out Work in accordance with the Contract Documents, the Owner may issue a written order to the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, the right of the Owner to stop the Work shall not give rise to a duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity, except to the extent required by Section 6.1.3.

### **§ 2.4 OWNER'S RIGHT TO CARRY OUT THE WORK**

If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a ten-day period after receipt of written notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may, without prejudice to other remedies the Owner may have, correct such deficiencies. In such case an appropriate Change Order shall be issued deducting from payments then or thereafter due the Contractor the reasonable cost of correcting such deficiencies, including Owner's expenses and compensation for the Architect's additional services made necessary by such default, neglect or failure. Such action by the Owner and amounts charged to the Contractor are both subject to prior approval of the Architect. If payments then or thereafter due the Contractor are not sufficient to cover such amounts, the Contractor shall pay the difference to the Owner.

## **ARTICLE 3 CONTRACTOR**

### **§ 3.1 GENERAL**

**§ 3.1.1** The Contractor is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Contractor shall be lawfully licensed, if required in the jurisdiction where the Project is located. The Contractor shall designate in writing a representative who shall have express authority to bind the Contractor with respect to all matters under this Contract. The term "Contractor" means the Contractor or the Contractor's authorized representative.

**§ 3.1.2** The Contractor shall perform the Work in accordance with the Contract Documents.

**§ 3.1.3** The Contractor shall not be relieved of obligations to perform the Work in accordance with the Contract Documents either by activities or duties of the Architect in the Architect's administration of the Contract, or by tests, inspections or approvals required or performed by persons or entities other than the Contractor.

### **§ 3.2 REVIEW OF CONTRACT DOCUMENTS AND FIELD CONDITIONS BY CONTRACTOR**

**§ 3.2.1** Execution of the Contract by the Contractor is a representation that the Contractor has visited the site, become generally familiar with local conditions under which the Work is to be performed and correlated personal observations with requirements of the Contract Documents.

**§ 3.2.2** Because the Contract Documents are complementary, the Contractor shall, before starting each portion of the Work, carefully study and compare the various Contract Documents relative to that portion of the Work, as well as the information furnished by the Owner pursuant to Section 2.2.3, shall take field measurements of any existing conditions related to that portion of the Work, and shall observe any conditions at the site affecting it. These obligations are for the purpose of facilitating coordination and construction by the Contractor and are not for the purpose of discovering errors, omissions, or inconsistencies in the Contract Documents; however, the Contractor shall promptly report to the Architect any errors, inconsistencies or omissions discovered by or made known to the Contractor as a request for information in such form as the Architect may require. It is recognized that the Contractor's review is made in the Contractor's capacity as a contractor and not as a licensed design professional, unless otherwise specifically provided in the Contract Documents.

**§ 3.2.3** The Contractor is not required to ascertain that the Contract Documents are in accordance with applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, but the Contractor shall promptly report to the Architect any nonconformity discovered by or made known to the Contractor as a request for information in such form as the Architect may require.

**§ 3.2.4** If the Contractor believes that additional cost or time is involved because of clarifications or instructions the Architect issues in response to the Contractor's notices or requests for information pursuant to Sections 3.2.2 or 3.2.3, the Contractor shall make Claims as provided in Article 15. If the Contractor fails to perform the obligations of Sections 3.2.2 or 3.2.3, the Contractor shall pay such costs and damages to the Owner as would have been avoided if the Contractor had performed such obligations. If the Contractor performs those obligations, the Contractor shall not be liable to the Owner or Architect for damages resulting from errors, inconsistencies or omissions in the Contract Documents, for differences between field measurements or conditions and the Contract Documents, or for nonconformities of the Contract Documents to applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities.

### **§ 3.3 SUPERVISION AND CONSTRUCTION PROCEDURES**

**§ 3.3.1** The Contractor shall supervise and direct the Work, using the Contractor's best skill and attention. The Contractor shall be solely responsible for, and have control over, construction means, methods, techniques, sequences and procedures and for coordinating all portions of the Work under the Contract, unless the Contract Documents give other specific instructions concerning these matters. If the Contract Documents give specific instructions concerning construction means, methods, techniques, sequences or procedures, the Contractor shall evaluate the jobsite safety thereof and, except as stated below, shall be fully and solely responsible for the jobsite safety of such means, methods, techniques, sequences or procedures. If the Contractor determines that such means, methods, techniques, sequences or procedures may not be safe, the Contractor shall give timely written notice to the Owner and Architect and shall not proceed with that portion of the Work without further written instructions from the Architect. If the Contractor is then instructed to proceed with the required means, methods, techniques, sequences or procedures without acceptance of changes proposed by the Contractor, the Owner shall be solely responsible for any loss or damage arising solely from those Owner-required means, methods, techniques, sequences or procedures.

**§ 3.3.2** The Contractor shall be responsible to the Owner for acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and other persons or entities performing portions of the Work for, or on behalf of, the Contractor or any of its Subcontractors.

**§ 3.3.3** The Contractor shall be responsible for inspection of portions of Work already performed to determine that such portions are in proper condition to receive subsequent Work.

### **§ 3.4 LABOR AND MATERIALS**

**§ 3.4.1** Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other

facilities and services necessary for proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

**§ 3.4.2** Except in the case of minor changes in the Work authorized by the Architect in accordance with Sections 3.12.8 or 7.4, the Contractor may make substitutions only with the consent of the Owner, after evaluation by the Architect and in accordance with a Change Order or Construction Change Directive.

**§ 3.4.3** The Contractor shall enforce strict discipline and good order among the Contractor's employees and other persons carrying out the Work. The Contractor shall not permit employment of unfit persons or persons not properly skilled in tasks assigned to them.

### **§ 3.5 WARRANTY**

The Contractor warrants to the Owner and Architect that materials and equipment furnished under the Contract will be of good quality and new unless the Contract Documents require or permit otherwise. The Contractor further warrants that the Work will conform to the requirements of the Contract Documents and will be free from defects, except for those inherent in the quality of the Work the Contract Documents require or permit. Work, materials, or equipment not conforming to these requirements may be considered defective. The Contractor's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the Contractor, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage. If required by the Architect, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment.

### **§ 3.6 TAXES**

The Contractor shall pay sales, consumer, use and similar taxes for the Work provided by the Contractor that are legally enacted when bids are received or negotiations concluded, whether or not yet effective or merely scheduled to go into effect.

### **§ 3.7 PERMITS, FEES, NOTICES AND COMPLIANCE WITH LAWS**

**§ 3.7.1** Unless otherwise provided in the Contract Documents, the Contractor shall secure and pay for the building permit as well as for other permits, fees, licenses, and inspections by government agencies necessary for proper execution and completion of the Work that are customarily secured after execution of the Contract and legally required at the time bids are received or negotiations concluded.

**§ 3.7.2** The Contractor shall comply with and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities applicable to performance of the Work.

**§ 3.7.3** If the Contractor performs Work knowing it to be contrary to applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, the Contractor shall assume appropriate responsibility for such Work and shall bear the costs attributable to correction.

**§ 3.7.4 Concealed or Unknown Conditions.** If the Contractor encounters conditions at the site that are (1) subsurface or otherwise concealed physical conditions that differ materially from those indicated in the Contract Documents or (2) unknown physical conditions of an unusual nature, that differ materially from those ordinarily found to exist and generally recognized as inherent in construction activities of the character provided for in the Contract Documents, the Contractor shall promptly provide notice to the Owner and the Architect before conditions are disturbed and in no event later than 21 days after first observance of the conditions. The Architect will promptly investigate such conditions and, if the Architect determines that they differ materially and cause an increase or decrease in the Contractor's cost of, or time required for, performance of any part of the Work, will recommend an equitable adjustment in the Contract Sum or Contract Time, or both. If the Architect determines that the conditions at the site are not materially different from those indicated in the Contract Documents and that no change in the terms of the Contract is justified, the Architect shall promptly notify the Owner and Contractor in writing, stating the reasons. If either party disputes the Architect's determination or recommendation, that party may proceed as provided in Article 15.

**§ 3.7.5** If, in the course of the Work, the Contractor encounters human remains or recognizes the existence of burial markers, archaeological sites or wetlands not indicated in the Contract Documents, the Contractor shall immediately suspend any operations that would affect them and shall notify the Owner and Architect. Upon receipt of such notice, the Owner shall promptly take any action necessary to obtain governmental authorization required to resume

the operations. The Contractor shall continue to suspend such operations until otherwise instructed by the Owner but shall continue with all other operations that do not affect those remains or features. Requests for adjustments in the Contract Sum and Contract Time arising from the existence of such remains or features may be made as provided in Article 15.

### **§ 3.8 ALLOWANCES**

**§ 3.8.1** The Contractor shall include in the Contract Sum all allowances stated in the Contract Documents. Items covered by allowances shall be supplied for such amounts and by such persons or entities as the Owner may direct, but the Contractor shall not be required to employ persons or entities to whom the Contractor has reasonable objection.

**§ 3.8.2** Unless otherwise provided in the Contract Documents,

- .1 Allowances shall cover the cost to the Contractor of materials and equipment delivered at the site and all required taxes, less applicable trade discounts;
- .2 Contractor's costs for unloading and handling at the site, labor, installation costs, overhead, profit and other expenses contemplated for stated allowance amounts shall be included in the Contract Sum but not in the allowances; and
- .3 Whenever costs are more than or less than allowances, the Contract Sum shall be adjusted accordingly by Change Order. The amount of the Change Order shall reflect (1) the difference between actual costs and the allowances under Section 3.8.2.1 and (2) changes in Contractor's costs under Section 3.8.2.2.

**§ 3.8.3** Materials and equipment under an allowance shall be selected by the Owner with reasonable promptness.

### **§ 3.9 SUPERINTENDENT**

**§ 3.9.1** The Contractor shall employ a competent superintendent and necessary assistants who shall be in attendance at the Project site during performance of the Work. The superintendent shall represent the Contractor, and communications given to the superintendent shall be as binding as if given to the Contractor.

**§ 3.9.2** The Contractor, as soon as practicable after award of the Contract, shall furnish in writing to the Owner through the Architect the name and qualifications of a proposed superintendent. The Architect may reply within 14 days to the Contractor in writing stating (1) whether the Owner or the Architect has reasonable objection to the proposed superintendent or (2) that the Architect requires additional time to review. Failure of the Architect to reply within the 14 day period shall constitute notice of no reasonable objection.

**§ 3.9.3** The Contractor shall not employ a proposed superintendent to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not change the superintendent without the Owner's consent, which shall not unreasonably be withheld or delayed.

### **§ 3.10 CONTRACTOR'S CONSTRUCTION SCHEDULES**

**§ 3.10.1** The Contractor, promptly after being awarded the Contract, shall prepare and submit for the Owner's and Architect's information a Contractor's construction schedule for the Work. The schedule shall not exceed time limits current under the Contract Documents, shall be revised at appropriate intervals as required by the conditions of the Work and Project, shall be related to the entire Project to the extent required by the Contract Documents, and shall provide for expeditious and practicable execution of the Work.

**§ 3.10.2** The Contractor shall prepare a submittal schedule, promptly after being awarded the Contract and thereafter as necessary to maintain a current submittal schedule, and shall submit the schedule(s) for the Architect's approval. The Architect's approval shall not unreasonably be delayed or withheld. The submittal schedule shall (1) be coordinated with the Contractor's construction schedule, and (2) allow the Architect reasonable time to review submittals. If the Contractor fails to submit a submittal schedule, the Contractor shall not be entitled to any increase in Contract Sum or extension of Contract Time based on the time required for review of submittals.

**§ 3.10.3** The Contractor shall perform the Work in general accordance with the most recent schedules submitted to the Owner and Architect.

### **§ 3.11 DOCUMENTS AND SAMPLES AT THE SITE**

The Contractor shall maintain at the site for the Owner one copy of the Drawings, Specifications, Addenda, Change Orders and other Modifications, in good order and marked currently to indicate field changes and selections made during construction, and one copy of approved Shop Drawings, Product Data, Samples and similar required submittals. These shall be available to the Architect and shall be delivered to the Architect for submittal to the Owner upon completion of the Work as a record of the Work as constructed.

### **§ 3.12 SHOP DRAWINGS, PRODUCT DATA AND SAMPLES**

**§ 3.12.1** Shop Drawings are drawings, diagrams, schedules and other data specially prepared for the Work by the Contractor or a Subcontractor, Sub-subcontractor, manufacturer, supplier or distributor to illustrate some portion of the Work.

**§ 3.12.2** Product Data are illustrations, standard schedules, performance charts, instructions, brochures, diagrams and other information furnished by the Contractor to illustrate materials or equipment for some portion of the Work.

**§ 3.12.3** Samples are physical examples that illustrate materials, equipment or workmanship and establish standards by which the Work will be judged.

**§ 3.12.4** Shop Drawings, Product Data, Samples and similar submittals are not Contract Documents. Their purpose is to demonstrate the way by which the Contractor proposes to conform to the information given and the design concept expressed in the Contract Documents for those portions of the Work for which the Contract Documents require submittals. Review by the Architect is subject to the limitations of Section 4.2.7. Informational submittals upon which the Architect is not expected to take responsive action may be so identified in the Contract Documents. Submittals that are not required by the Contract Documents may be returned by the Architect without action.

**§ 3.12.5** The Contractor shall review for compliance with the Contract Documents, approve and submit to the Architect Shop Drawings, Product Data, Samples and similar submittals required by the Contract Documents in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness and in such sequence as to cause no delay in the Work or in the activities of the Owner or of separate contractors.

**§ 3.12.6** By submitting Shop Drawings, Product Data, Samples and similar submittals, the Contractor represents to the Owner and Architect that the Contractor has (1) reviewed and approved them, (2) determined and verified materials, field measurements and field construction criteria related thereto, or will do so and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents.

**§ 3.12.7** The Contractor shall perform no portion of the Work for which the Contract Documents require submittal and review of Shop Drawings, Product Data, Samples or similar submittals until the respective submittal has been approved by the Architect.

**§ 3.12.8** The Work shall be in accordance with approved submittals except that the Contractor shall not be relieved of responsibility for deviations from requirements of the Contract Documents by the Architect's approval of Shop Drawings, Product Data, Samples or similar submittals unless the Contractor has specifically informed the Architect in writing of such deviation at the time of submittal and (1) the Architect has given written approval to the specific deviation as a minor change in the Work, or (2) a Change Order or Construction Change Directive has been issued authorizing the deviation. The Contractor shall not be relieved of responsibility for errors or omissions in Shop Drawings, Product Data, Samples or similar submittals by the Architect's approval thereof.

**§ 3.12.9** The Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, Product Data, Samples or similar submittals, to revisions other than those requested by the Architect on previous submittals. In the absence of such written notice, the Architect's approval of a resubmission shall not apply to such revisions.

**§ 3.12.10** The Contractor shall not be required to provide professional services that constitute the practice of architecture or engineering unless such services are specifically required by the Contract Documents for a portion of the Work or unless the Contractor needs to provide such services in order to carry out the Contractor's responsibilities for construction means, methods, techniques, sequences and procedures. The Contractor shall not be

required to provide professional services in violation of applicable law. If professional design services or certifications by a design professional related to systems, materials or equipment are specifically required of the Contractor by the Contract Documents, the Owner and the Architect will specify all performance and design criteria that such services must satisfy. The Contractor shall cause such services or certifications to be provided by a properly licensed design professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, Shop Drawings and other submittals prepared by such professional. Shop Drawings and other submittals related to the Work designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to the Architect. The Owner and the Architect shall be entitled to rely upon the adequacy, accuracy and completeness of the services, certifications and approvals performed or provided by such design professionals, provided the Owner and Architect have specified to the Contractor all performance and design criteria that such services must satisfy. Pursuant to this Section 3.12.10, the Architect will review, approve or take other appropriate action on submittals only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Contractor shall not be responsible for the adequacy of the performance and design criteria specified in the Contract Documents.

### **§ 3.13 USE OF SITE**

The Contractor shall confine operations at the site to areas permitted by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities and the Contract Documents and shall not unreasonably encumber the site with materials or equipment.

### **§ 3.14 CUTTING AND PATCHING**

**§ 3.14.1** The Contractor shall be responsible for cutting, fitting or patching required to complete the Work or to make its parts fit together properly. All areas requiring cutting, fitting and patching shall be restored to the condition existing prior to the cutting, fitting and patching, unless otherwise required by the Contract Documents.

**§ 3.14.2** The Contractor shall not damage or endanger a portion of the Work or fully or partially completed construction of the Owner or separate contractors by cutting, patching or otherwise altering such construction, or by excavation. The Contractor shall not cut or otherwise alter such construction by the Owner or a separate contractor except with written consent of the Owner and of such separate contractor; such consent shall not be unreasonably withheld. The Contractor shall not unreasonably withhold from the Owner or a separate contractor the Contractor's consent to cutting or otherwise altering the Work.

### **§ 3.15 CLEANING UP**

**§ 3.15.1** The Contractor shall keep the premises and surrounding area free from accumulation of waste materials or rubbish caused by operations under the Contract. At completion of the Work, the Contractor shall remove waste materials, rubbish, the Contractor's tools, construction equipment, machinery and surplus materials from and about the Project.

**§ 3.15.2** If the Contractor fails to clean up as provided in the Contract Documents, the Owner may do so and Owner shall be entitled to reimbursement from the Contractor.

### **§ 3.16 ACCESS TO WORK**

The Contractor shall provide the Owner and Architect access to the Work in preparation and progress wherever located.

### **§ 3.17 ROYALTIES, PATENTS AND COPYRIGHTS**

The Contractor shall pay all royalties and license fees. The Contractor shall defend suits or claims for infringement of copyrights and patent rights and shall hold the Owner and Architect harmless from loss on account thereof, but shall not be responsible for such defense or loss when a particular design, process or product of a particular manufacturer or manufacturers is required by the Contract Documents, or where the copyright violations are contained in Drawings, Specifications or other documents prepared by the Owner or Architect. However, if the Contractor has reason to believe that the required design, process or product is an infringement of a copyright or a patent, the Contractor shall be responsible for such loss unless such information is promptly furnished to the Architect.

### **§ 3.18 INDEMNIFICATION**

**§ 3.18.1** To the fullest extent permitted by law the Contractor shall indemnify and hold harmless the Owner, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work, provided that such claim, damage, loss or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), but only to the extent caused by the negligent acts or omissions of the Contractor, a Subcontractor, anyone directly or indirectly employed by them or anyone for whose acts they may be liable, regardless of whether or not such claim, damage, loss or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations of indemnity which would otherwise exist as to a party or person described in this Section 3.18.

**§ 3.18.2** In claims against any person or entity indemnified under this Section 3.18 by an employee of the Contractor, a Subcontractor, anyone directly or indirectly employed by them or anyone for whose acts they may be liable, the indemnification obligation under Section 3.18.1 shall not be limited by a limitation on amount or type of damages, compensation or benefits payable by or for the Contractor or a Subcontractor under workers' compensation acts, disability benefit acts or other employee benefit acts.

## **ARTICLE 4 ARCHITECT**

### **§ 4.1 GENERAL**

**§ 4.1.1** The Owner shall retain an architect lawfully licensed to practice architecture or an entity lawfully practicing architecture in the jurisdiction where the Project is located. That person or entity is identified as the Architect in the Agreement and is referred to throughout the Contract Documents as if singular in number.

**§ 4.1.2** Duties, responsibilities and limitations of authority of the Architect as set forth in the Contract Documents shall not be restricted, modified or extended without written consent of the Owner, Contractor and Architect. Consent shall not be unreasonably withheld.

**§ 4.1.3** If the employment of the Architect is terminated, the Owner shall employ a successor architect as to whom the Contractor has no reasonable objection and whose status under the Contract Documents shall be that of the Architect.

### **§ 4.2 ADMINISTRATION OF THE CONTRACT**

**§ 4.2.1** The Architect will provide administration of the Contract as described in the Contract Documents and will be an Owner's representative during construction until the date the Architect issues the final Certificate for Payment. The Architect will have authority to act on behalf of the Owner only to the extent provided in the Contract Documents.

**§ 4.2.2** The Architect will visit the site at intervals appropriate to the stage of construction, or as otherwise agreed with the Owner, to become generally familiar with the progress and quality of the portion of the Work completed, and to determine in general if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. However, the Architect will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. The Architect will not have control over, charge of, or responsibility for, the construction means, methods, techniques, sequences or procedures, or for the safety precautions and programs in connection with the Work, since these are solely the Contractor's rights and responsibilities under the Contract Documents, except as provided in Section 3.3.1.

**§ 4.2.3** On the basis of the site visits, the Architect will keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and report to the Owner (1) known deviations from the Contract Documents and from the most recent construction schedule submitted by the Contractor, and (2) defects and deficiencies observed in the Work. The Architect will not be responsible for the Contractor's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect will not have control over or charge of and will not be responsible for acts or omissions of the Contractor, Subcontractors, or their agents or employees, or any other persons or entities performing portions of the Work.

#### **§ 4.2.4 COMMUNICATIONS FACILITATING CONTRACT ADMINISTRATION**

Except as otherwise provided in the Contract Documents or when direct communications have been specially authorized, the Owner and Contractor shall endeavor to communicate with each other through the Architect about matters arising out of or relating to the Contract. Communications by and with the Architect's consultants shall be through the Architect. Communications by and with Subcontractors and material suppliers shall be through the Contractor. Communications by and with separate contractors shall be through the Owner.

**§ 4.2.5** Based on the Architect's evaluations of the Contractor's Applications for Payment, the Architect will review and certify the amounts due the Contractor and will issue Certificates for Payment in such amounts.

**§ 4.2.6** The Architect has authority to reject Work that does not conform to the Contract Documents. Whenever the Architect considers it necessary or advisable, the Architect will have authority to require inspection or testing of the Work in accordance with Sections 13.5.2 and 13.5.3, whether or not such Work is fabricated, installed or completed. However, neither this authority of the Architect nor a decision made in good faith either to exercise or not to exercise such authority shall give rise to a duty or responsibility of the Architect to the Contractor, Subcontractors, material and equipment suppliers, their agents or employees, or other persons or entities performing portions of the Work.

**§ 4.2.7** The Architect will review and approve, or take other appropriate action upon, the Contractor's submittals such as Shop Drawings, Product Data and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Architect's action will be taken in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness while allowing sufficient time in the Architect's professional judgment to permit adequate review. Review of such submittals is not conducted for the purpose of determining the accuracy and completeness of other details such as dimensions and quantities, or for substantiating instructions for installation or performance of equipment or systems, all of which remain the responsibility of the Contractor as required by the Contract Documents. The Architect's review of the Contractor's submittals shall not relieve the Contractor of the obligations under Sections 3.3, 3.5 and 3.12. The Architect's review shall not constitute approval of safety precautions or, unless otherwise specifically stated by the Architect, of any construction means, methods, techniques, sequences or procedures. The Architect's approval of a specific item shall not indicate approval of an assembly of which the item is a component.

**§ 4.2.8** The Architect will prepare Change Orders and Construction Change Directives, and may authorize minor changes in the Work as provided in Section 7.4. The Architect will investigate and make determinations and recommendations regarding concealed and unknown conditions as provided in Section 3.7.4.

**§ 4.2.9** The Architect will conduct inspections to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion pursuant to Section 9.8; receive and forward to the Owner, for the Owner's review and records, written warranties and related documents required by the Contract and assembled by the Contractor pursuant to Section 9.10; and issue a final Certificate for Payment pursuant to Section 9.10.

**§ 4.2.10** If the Owner and Architect agree, the Architect will provide one or more project representatives to assist in carrying out the Architect's responsibilities at the site. The duties, responsibilities and limitations of authority of such project representatives shall be as set forth in an exhibit to be incorporated in the Contract Documents.

**§ 4.2.11** The Architect will interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Contractor. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

**§ 4.2.12** Interpretations and decisions of the Architect will be consistent with the intent of, and reasonably inferable from, the Contract Documents and will be in writing or in the form of drawings. When making such interpretations and decisions, the Architect will endeavor to secure faithful performance by both Owner and Contractor, will not show partiality to either and will not be liable for results of interpretations or decisions rendered in good faith.

**§ 4.2.13** The Architect's decisions on matters relating to aesthetic effect will be final if consistent with the intent expressed in the Contract Documents.

**§ 4.2.14** The Architect will review and respond to requests for information about the Contract Documents. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness. If appropriate, the Architect will prepare and issue supplemental Drawings and Specifications in response to the requests for information.

## **ARTICLE 5 SUBCONTRACTORS**

### **§ 5.1 DEFINITIONS**

**§ 5.1.1** A Subcontractor is a person or entity who has a direct contract with the Contractor to perform a portion of the Work at the site. The term "Subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Subcontractor or an authorized representative of the Subcontractor. The term "Subcontractor" does not include a separate contractor or subcontractors of a separate contractor.

**§ 5.1.2** A Sub-subcontractor is a person or entity who has a direct or indirect contract with a Subcontractor to perform a portion of the Work at the site. The term "Sub-subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Sub-subcontractor or an authorized representative of the Sub-subcontractor.

### **§ 5.2 AWARD OF SUBCONTRACTS AND OTHER CONTRACTS FOR PORTIONS OF THE WORK**

**§ 5.2.1** Unless otherwise stated in the Contract Documents or the bidding requirements, the Contractor, as soon as practicable after award of the Contract, shall furnish in writing to the Owner through the Architect the names of persons or entities (including those who are to furnish materials or equipment fabricated to a special design) proposed for each principal portion of the Work. The Architect may reply within 14 days to the Contractor in writing stating (1) whether the Owner or the Architect has reasonable objection to any such proposed person or entity or (2) that the Architect requires additional time for review. Failure of the Owner or Architect to reply within the 14 day period shall constitute notice of no reasonable objection.

**§ 5.2.2** The Contractor shall not contract with a proposed person or entity to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not be required to contract with anyone to whom the Contractor has made reasonable objection.

**§ 5.2.3** If the Owner or Architect has reasonable objection to a person or entity proposed by the Contractor, the Contractor shall propose another to whom the Owner or Architect has no reasonable objection. If the proposed but rejected Subcontractor was reasonably capable of performing the Work, the Contract Sum and Contract Time shall be increased or decreased by the difference, if any, occasioned by such change, and an appropriate Change Order shall be issued before commencement of the substitute Subcontractor's Work. However, no increase in the Contract Sum or Contract Time shall be allowed for such change unless the Contractor has acted promptly and responsively in submitting names as required.

**§ 5.2.4** The Contractor shall not substitute a Subcontractor, person or entity previously selected if the Owner or Architect makes reasonable objection to such substitution.

### **§ 5.3 SUBCONTRACTUAL RELATIONS**

By appropriate agreement, written where legally required for validity, the Contractor shall require each Subcontractor, to the extent of the Work to be performed by the Subcontractor, to be bound to the Contractor by terms of the Contract Documents, and to assume toward the Contractor all the obligations and responsibilities, including the responsibility for safety of the Subcontractor's Work, which the Contractor, by these Documents, assumes toward the Owner and Architect. Each subcontract agreement shall preserve and protect the rights of the Owner and Architect under the Contract Documents with respect to the Work to be performed by the Subcontractor so that subcontracting thereof will not prejudice such rights, and shall allow to the Subcontractor, unless specifically provided otherwise in the subcontract agreement, the benefit of all rights, remedies and redress against the Contractor that the Contractor, by the Contract Documents, has against the Owner. Where appropriate, the Contractor shall require each Subcontractor to enter into similar agreements with Sub-subcontractors. The Contractor shall make available to each proposed Subcontractor, prior to the execution of the subcontract agreement, copies of the Contract Documents to which the Subcontractor will be bound, and, upon written request of the Subcontractor, identify to the Subcontractor terms and conditions of the proposed subcontract agreement that may

be at variance with the Contract Documents. Subcontractors will similarly make copies of applicable portions of such documents available to their respective proposed Sub-subcontractors.

#### **§ 5.4 CONTINGENT ASSIGNMENT OF SUBCONTRACTS**

**§ 5.4.1** Each subcontract agreement for a portion of the Work is assigned by the Contractor to the Owner, provided that

- .1 assignment is effective only after termination of the Contract by the Owner for cause pursuant to Section 14.2 and only for those subcontract agreements that the Owner accepts by notifying the Subcontractor and Contractor in writing; and
- .2 assignment is subject to the prior rights of the surety, if any, obligated under bond relating to the Contract.

When the Owner accepts the assignment of a subcontract agreement, the Owner assumes the Contractor's rights and obligations under the subcontract.

**§ 5.4.2** Upon such assignment, if the Work has been suspended for more than 30 days, the Subcontractor's compensation shall be equitably adjusted for increases in cost resulting from the suspension.

**§ 5.4.3** Upon such assignment to the Owner under this Section 5.4, the Owner may further assign the subcontract to a successor contractor or other entity. If the Owner assigns the subcontract to a successor contractor or other entity, the Owner shall nevertheless remain legally responsible for all of the successor contractor's obligations under the subcontract.

### **ARTICLE 6 CONSTRUCTION BY OWNER OR BY SEPARATE CONTRACTORS**

#### **§ 6.1 OWNER'S RIGHT TO PERFORM CONSTRUCTION AND TO AWARD SEPARATE CONTRACTS**

**§ 6.1.1** The Owner reserves the right to perform construction or operations related to the Project with the Owner's own forces, and to award separate contracts in connection with other portions of the Project or other construction or operations on the site under Conditions of the Contract identical or substantially similar to these including those portions related to insurance and waiver of subrogation. If the Contractor claims that delay or additional cost is involved because of such action by the Owner, the Contractor shall make such Claim as provided in Article 15.

**§ 6.1.2** When separate contracts are awarded for different portions of the Project or other construction or operations on the site, the term "Contractor" in the Contract Documents in each case shall mean the Contractor who executes each separate Owner-Contractor Agreement.

**§ 6.1.3** The Owner shall provide for coordination of the activities of the Owner's own forces and of each separate contractor with the Work of the Contractor, who shall cooperate with them. The Contractor shall participate with other separate contractors and the Owner in reviewing their construction schedules. The Contractor shall make any revisions to the construction schedule deemed necessary after a joint review and mutual agreement. The construction schedules shall then constitute the schedules to be used by the Contractor, separate contractors and the Owner until subsequently revised.

**§ 6.1.4** Unless otherwise provided in the Contract Documents, when the Owner performs construction or operations related to the Project with the Owner's own forces, the Owner shall be deemed to be subject to the same obligations and to have the same rights that apply to the Contractor under the Conditions of the Contract, including, without excluding others, those stated in Article 3, this Article 6 and Articles 10, 11 and 12.

#### **§ 6.2 MUTUAL RESPONSIBILITY**

**§ 6.2.1** The Contractor shall afford the Owner and separate contractors reasonable opportunity for introduction and storage of their materials and equipment and performance of their activities, and shall connect and coordinate the Contractor's construction and operations with theirs as required by the Contract Documents.

**§ 6.2.2** If part of the Contractor's Work depends for proper execution or results upon construction or operations by the Owner or a separate contractor, the Contractor shall, prior to proceeding with that portion of the Work, promptly report to the Architect apparent discrepancies or defects in such other construction that would render it unsuitable for such proper execution and results. Failure of the Contractor so to report shall constitute an acknowledgment that

the Owner's or separate contractor's completed or partially completed construction is fit and proper to receive the Contractor's Work, except as to defects not then reasonably discoverable.

**§ 6.2.3** The Contractor shall reimburse the Owner for costs the Owner incurs that are payable to a separate contractor because of the Contractor's delays, improperly timed activities or defective construction. The Owner shall be responsible to the Contractor for costs the Contractor incurs because of a separate contractor's delays, improperly timed activities, damage to the Work or defective construction.

**§ 6.2.4** The Contractor shall promptly remedy damage the Contractor wrongfully causes to completed or partially completed construction or to property of the Owner or separate contractors as provided in Section 10.2.5.

**§ 6.2.5** The Owner and each separate contractor shall have the same responsibilities for cutting and patching as are described for the Contractor in Section 3.14.

### **§ 6.3 OWNER'S RIGHT TO CLEAN UP**

If a dispute arises among the Contractor, separate contractors and the Owner as to the responsibility under their respective contracts for maintaining the premises and surrounding area free from waste materials and rubbish, the Owner may clean up and the Architect will allocate the cost among those responsible.

## **ARTICLE 7 CHANGES IN THE WORK**

### **§ 7.1 GENERAL**

**§ 7.1.1** Changes in the Work may be accomplished after execution of the Contract, and without invalidating the Contract, by Change Order, Construction Change Directive or order for a minor change in the Work, subject to the limitations stated in this Article 7 and elsewhere in the Contract Documents.

**§ 7.1.2** A Change Order shall be based upon agreement among the Owner, Contractor and Architect; a Construction Change Directive requires agreement by the Owner and Architect and may or may not be agreed to by the Contractor; an order for a minor change in the Work may be issued by the Architect alone.

**§ 7.1.3** Changes in the Work shall be performed under applicable provisions of the Contract Documents, and the Contractor shall proceed promptly, unless otherwise provided in the Change Order, Construction Change Directive or order for a minor change in the Work.

### **§ 7.2 CHANGE ORDERS**

**§ 7.2.1** A Change Order is a written instrument prepared by the Architect and signed by the Owner, Contractor and Architect stating their agreement upon all of the following:

- .1 The change in the Work;
- .2 The amount of the adjustment, if any, in the Contract Sum; and
- .3 The extent of the adjustment, if any, in the Contract Time.

### **§ 7.3 CONSTRUCTION CHANGE DIRECTIVES**

**§ 7.3.1** A Construction Change Directive is a written order prepared by the Architect and signed by the Owner and Architect, directing a change in the Work prior to agreement on adjustment, if any, in the Contract Sum or Contract Time, or both. The Owner may by Construction Change Directive, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions or other revisions, the Contract Sum and Contract Time being adjusted accordingly.

**§ 7.3.2** A Construction Change Directive shall be used in the absence of total agreement on the terms of a Change Order.

**§ 7.3.3** If the Construction Change Directive provides for an adjustment to the Contract Sum, the adjustment shall be based on one of the following methods:

- .1 Mutual acceptance of a lump sum properly itemized and supported by sufficient substantiating data to permit evaluation;
- .2 Unit prices stated in the Contract Documents or subsequently agreed upon;
- .3 Cost to be determined in a manner agreed upon by the parties and a mutually acceptable fixed or percentage fee; or

.4 As provided in Section 7.3.7.

**§ 7.3.4** If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are materially changed in a proposed Change Order or Construction Change Directive so that application of such unit prices to quantities of Work proposed will cause substantial inequity to the Owner or Contractor, the applicable unit prices shall be equitably adjusted.

**§ 7.3.5** Upon receipt of a Construction Change Directive, the Contractor shall promptly proceed with the change in the Work involved and advise the Architect of the Contractor's agreement or disagreement with the method, if any, provided in the Construction Change Directive for determining the proposed adjustment in the Contract Sum or Contract Time.

**§ 7.3.6** A Construction Change Directive signed by the Contractor indicates the Contractor's agreement therewith, including adjustment in Contract Sum and Contract Time or the method for determining them. Such agreement shall be effective immediately and shall be recorded as a Change Order.

**§ 7.3.7** If the Contractor does not respond promptly or disagrees with the method for adjustment in the Contract Sum, the Architect shall determine the method and the adjustment on the basis of reasonable expenditures and savings of those performing the Work attributable to the change, including, in case of an increase in the Contract Sum, an amount for overhead and profit as set forth in the Agreement, or if no such amount is set forth in the Agreement, a reasonable amount. In such case, and also under Section 7.3.3.3, the Contractor shall keep and present, in such form as the Architect may prescribe, an itemized accounting together with appropriate supporting data. Unless otherwise provided in the Contract Documents, costs for the purposes of this Section 7.3.7 shall be limited to the following:

- .1 Costs of labor, including social security, old age and unemployment insurance, fringe benefits required by agreement or custom, and workers' compensation insurance;
- .2 Costs of materials, supplies and equipment, including cost of transportation, whether incorporated or consumed;
- .3 Rental costs of machinery and equipment, exclusive of hand tools, whether rented from the Contractor or others;
- .4 Costs of premiums for all bonds and insurance, permit fees, and sales, use or similar taxes related to the Work; and
- .5 Additional costs of supervision and field office personnel directly attributable to the change.

**§ 7.3.8** The amount of credit to be allowed by the Contractor to the Owner for a deletion or change that results in a net decrease in the Contract Sum shall be actual net cost as confirmed by the Architect. When both additions and credits covering related Work or substitutions are involved in a change, the allowance for overhead and profit shall be figured on the basis of net increase, if any, with respect to that change.

**§ 7.3.9** Pending final determination of the total cost of a Construction Change Directive to the Owner, the Contractor may request payment for Work completed under the Construction Change Directive in Applications for Payment. The Architect will make an interim determination for purposes of monthly certification for payment for those costs and certify for payment the amount that the Architect determines, in the Architect's professional judgment, to be reasonably justified. The Architect's interim determination of cost shall adjust the Contract Sum on the same basis as a Change Order, subject to the right of either party to disagree and assert a Claim in accordance with Article 15.

**§ 7.3.10** When the Owner and Contractor agree with a determination made by the Architect concerning the adjustments in the Contract Sum and Contract Time, or otherwise reach agreement upon the adjustments, such agreement shall be effective immediately and the Architect will prepare a Change Order. Change Orders may be issued for all or any part of a Construction Change Directive.

#### **§ 7.4 MINOR CHANGES IN THE WORK**

The Architect has authority to order minor changes in the Work not involving adjustment in the Contract Sum or extension of the Contract Time and not inconsistent with the intent of the Contract Documents. Such changes will be effected by written order signed by the Architect and shall be binding on the Owner and Contractor.

## **ARTICLE 8 TIME**

### **§ 8.1 DEFINITIONS**

**§ 8.1.1** Unless otherwise provided, Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work.

**§ 8.1.2** The date of commencement of the Work is the date established in the Agreement.

**§ 8.1.3** The date of Substantial Completion is the date certified by the Architect in accordance with Section 9.8.

**§ 8.1.4** The term “day” as used in the Contract Documents shall mean calendar day unless otherwise specifically defined.

### **§ 8.2 PROGRESS AND COMPLETION**

**§ 8.2.1** Time limits stated in the Contract Documents are of the essence of the Contract. By executing the Agreement the Contractor confirms that the Contract Time is a reasonable period for performing the Work.

**§ 8.2.2** The Contractor shall not knowingly, except by agreement or instruction of the Owner in writing, prematurely commence operations on the site or elsewhere prior to the effective date of insurance required by Article 11 to be furnished by the Contractor and Owner. The date of commencement of the Work shall not be changed by the effective date of such insurance.

**§ 8.2.3** The Contractor shall proceed expeditiously with adequate forces and shall achieve Substantial Completion within the Contract Time.

### **§ 8.3 DELAYS AND EXTENSIONS OF TIME**

**§ 8.3.1** If the Contractor is delayed at any time in the commencement or progress of the Work by an act or neglect of the Owner or Architect, or of an employee of either, or of a separate contractor employed by the Owner; or by changes ordered in the Work; or by labor disputes, fire, unusual delay in deliveries, unavoidable casualties or other causes beyond the Contractor's control; or by delay authorized by the Owner pending mediation and arbitration; or by other causes that the Architect determines may justify delay, then the Contract Time shall be extended by Change Order for such reasonable time as the Architect may determine.

**§ 8.3.2** Claims relating to time shall be made in accordance with applicable provisions of Article 15.

**§ 8.3.3** This Section 8.3 does not preclude recovery of damages for delay by either party under other provisions of the Contract Documents.

## **ARTICLE 9 PAYMENTS AND COMPLETION**

### **§ 9.1 CONTRACT SUM**

The Contract Sum is stated in the Agreement and, including authorized adjustments, is the total amount payable by the Owner to the Contractor for performance of the Work under the Contract Documents.

### **§ 9.2 SCHEDULE OF VALUES**

Where the Contract is based on a stipulated sum or Guaranteed Maximum Price, the Contractor shall submit to the Architect, before the first Application for Payment, a schedule of values allocating the entire Contract Sum to the various portions of the Work and prepared in such form and supported by such data to substantiate its accuracy as the Architect may require. This schedule, unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment.

### **§ 9.3 APPLICATIONS FOR PAYMENT**

**§ 9.3.1** At least ten days before the date established for each progress payment, the Contractor shall submit to the Architect an itemized Application for Payment prepared in accordance with the schedule of values, if required under Section 9.2, for completed portions of the Work. Such application shall be notarized, if required, and supported by such data substantiating the Contractor's right to payment as the Owner or Architect may require, such as copies of requisitions from Subcontractors and material suppliers, and shall reflect retainage if provided for in the Contract Documents.

**§ 9.3.1.1** As provided in Section 7.3.9, such applications may include requests for payment on account of changes in the Work that have been properly authorized by Construction Change Directives, or by interim determinations of the Architect, but not yet included in Change Orders.

**§ 9.3.1.2** Applications for Payment shall not include requests for payment for portions of the Work for which the Contractor does not intend to pay a Subcontractor or material supplier, unless such Work has been performed by others whom the Contractor intends to pay.

**§ 9.3.2** Unless otherwise provided in the Contract Documents, payments shall be made on account of materials and equipment delivered and suitably stored at the site for subsequent incorporation in the Work. If approved in advance by the Owner, payment may similarly be made for materials and equipment suitably stored off the site at a location agreed upon in writing. Payment for materials and equipment stored on or off the site shall be conditioned upon compliance by the Contractor with procedures satisfactory to the Owner to establish the Owner's title to such materials and equipment or otherwise protect the Owner's interest, and shall include the costs of applicable insurance, storage and transportation to the site for such materials and equipment stored off the site.

**§ 9.3.3** The Contractor warrants that title to all Work covered by an Application for Payment will pass to the Owner no later than the time of payment. The Contractor further warrants that upon submittal of an Application for Payment all Work for which Certificates for Payment have been previously issued and payments received from the Owner shall, to the best of the Contractor's knowledge, information and belief, be free and clear of liens, claims, security interests or encumbrances in favor of the Contractor, Subcontractors, material suppliers, or other persons or entities making a claim by reason of having provided labor, materials and equipment relating to the Work.

#### **§ 9.4 CERTIFICATES FOR PAYMENT**

**§ 9.4.1** The Architect will, within seven days after receipt of the Contractor's Application for Payment, either issue to the Owner a Certificate for Payment, with a copy to the Contractor, for such amount as the Architect determines is properly due, or notify the Contractor and Owner in writing of the Architect's reasons for withholding certification in whole or in part as provided in Section 9.5.1.

**§ 9.4.2** The issuance of a Certificate for Payment will constitute a representation by the Architect to the Owner, based on the Architect's evaluation of the Work and the data comprising the Application for Payment, that, to the best of the Architect's knowledge, information and belief, the Work has progressed to the point indicated and that the quality of the Work is in accordance with the Contract Documents. The foregoing representations are subject to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, to results of subsequent tests and inspections, to correction of minor deviations from the Contract Documents prior to completion and to specific qualifications expressed by the Architect. The issuance of a Certificate for Payment will further constitute a representation that the Contractor is entitled to payment in the amount certified. However, the issuance of a Certificate for Payment will not be a representation that the Architect has (1) made exhaustive or continuous on-site inspections to check the quality or quantity of the Work, (2) reviewed construction means, methods, techniques, sequences or procedures, (3) reviewed copies of requisitions received from Subcontractors and material suppliers and other data requested by the Owner to substantiate the Contractor's right to payment, or (4) made examination to ascertain how or for what purpose the Contractor has used money previously paid on account of the Contract Sum.

#### **§ 9.5 DECISIONS TO WITHHOLD CERTIFICATION**

**§ 9.5.1** The Architect may withhold a Certificate for Payment in whole or in part, to the extent reasonably necessary to protect the Owner, if in the Architect's opinion the representations to the Owner required by Section 9.4.2 cannot be made. If the Architect is unable to certify payment in the amount of the Application, the Architect will notify the Contractor and Owner as provided in Section 9.4.1. If the Contractor and Architect cannot agree on a revised amount, the Architect will promptly issue a Certificate for Payment for the amount for which the Architect is able to make such representations to the Owner. The Architect may also withhold a Certificate for Payment or, because of subsequently discovered evidence, may nullify the whole or a part of a Certificate for Payment previously issued, to such extent as may be necessary in the Architect's opinion to protect the Owner from loss for which the Contractor is responsible, including loss resulting from acts and omissions described in Section 3.3.2, because of

- .1 defective Work not remedied;
- .2 third party claims filed or reasonable evidence indicating probable filing of such claims unless security acceptable to the Owner is provided by the Contractor;

- .3 failure of the Contractor to make payments properly to Subcontractors or for labor, materials or equipment;
- .4 reasonable evidence that the Work cannot be completed for the unpaid balance of the Contract Sum;
- .5 damage to the Owner or a separate contractor;
- .6 reasonable evidence that the Work will not be completed within the Contract Time, and that the unpaid balance would not be adequate to cover actual or liquidated damages for the anticipated delay; or
- .7 repeated failure to carry out the Work in accordance with the Contract Documents.

**§ 9.5.2** When the above reasons for withholding certification are removed, certification will be made for amounts previously withheld.

**§ 9.5.3** If the Architect withholds certification for payment under Section 9.5.1.3, the Owner may, at its sole option, issue joint checks to the Contractor and to any Subcontractor or material or equipment suppliers to whom the Contractor failed to make payment for Work properly performed or material or equipment suitably delivered. If the Owner makes payments by joint check, the Owner shall notify the Architect and the Architect will reflect such payment on the next Certificate for Payment.

## **§ 9.6 PROGRESS PAYMENTS**

**§ 9.6.1** After the Architect has issued a Certificate for Payment, the Owner shall make payment in the manner and within the time provided in the Contract Documents, and shall so notify the Architect.

**§ 9.6.2** The Contractor shall pay each Subcontractor no later than seven days after receipt of payment from the Owner the amount to which the Subcontractor is entitled, reflecting percentages actually retained from payments to the Contractor on account of the Subcontractor's portion of the Work. The Contractor shall, by appropriate agreement with each Subcontractor, require each Subcontractor to make payments to Sub-subcontractors in a similar manner.

**§ 9.6.3** The Architect will, on request, furnish to a Subcontractor, if practicable, information regarding percentages of completion or amounts applied for by the Contractor and action taken thereon by the Architect and Owner on account of portions of the Work done by such Subcontractor.

**§ 9.6.4** The Owner has the right to request written evidence from the Contractor that the Contractor has properly paid Subcontractors and material and equipment suppliers amounts paid by the Owner to the Contractor for subcontracted Work. If the Contractor fails to furnish such evidence within seven days, the Owner shall have the right to contact Subcontractors to ascertain whether they have been properly paid. Neither the Owner nor Architect shall have an obligation to pay or to see to the payment of money to a Subcontractor, except as may otherwise be required by law.

**§ 9.6.5** Contractor payments to material and equipment suppliers shall be treated in a manner similar to that provided in Sections 9.6.2, 9.6.3 and 9.6.4.

**§ 9.6.6** A Certificate for Payment, a progress payment, or partial or entire use or occupancy of the Project by the Owner shall not constitute acceptance of Work not in accordance with the Contract Documents.

**§ 9.6.7** Unless the Contractor provides the Owner with a payment bond in the full penal sum of the Contract Sum, payments received by the Contractor for Work properly performed by Subcontractors and suppliers shall be held by the Contractor for those Subcontractors or suppliers who performed Work or furnished materials, or both, under contract with the Contractor for which payment was made by the Owner. Nothing contained herein shall require money to be placed in a separate account and not commingled with money of the Contractor, shall create any fiduciary liability or tort liability on the part of the Contractor for breach of trust or shall entitle any person or entity to an award of punitive damages against the Contractor for breach of the requirements of this provision.

## **§ 9.7 FAILURE OF PAYMENT**

If the Architect does not issue a Certificate for Payment, through no fault of the Contractor, within seven days after receipt of the Contractor's Application for Payment, or if the Owner does not pay the Contractor within seven days after the date established in the Contract Documents the amount certified by the Architect or awarded by binding dispute resolution, then the Contractor may, upon seven additional days' written notice to the Owner and Architect,

stop the Work until payment of the amount owing has been received. The Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shut-down, delay and start-up, plus interest as provided for in the Contract Documents.

## **§ 9.8 SUBSTANTIAL COMPLETION**

**§ 9.8.1** Substantial Completion is the stage in the progress of the Work when the Work or designated portion thereof is sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work for its intended use.

**§ 9.8.2** When the Contractor considers that the Work, or a portion thereof which the Owner agrees to accept separately, is substantially complete, the Contractor shall prepare and submit to the Architect a comprehensive list of items to be completed or corrected prior to final payment. Failure to include an item on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

**§ 9.8.3** Upon receipt of the Contractor's list, the Architect will make an inspection to determine whether the Work or designated portion thereof is substantially complete. If the Architect's inspection discloses any item, whether or not included on the Contractor's list, which is not sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work or designated portion thereof for its intended use, the Contractor shall, before issuance of the Certificate of Substantial Completion, complete or correct such item upon notification by the Architect. In such case, the Contractor shall then submit a request for another inspection by the Architect to determine Substantial Completion.

**§ 9.8.4** When the Work or designated portion thereof is substantially complete, the Architect will prepare a Certificate of Substantial Completion that shall establish the date of Substantial Completion, shall establish responsibilities of the Owner and Contractor for security, maintenance, heat, utilities, damage to the Work and insurance, and shall fix the time within which the Contractor shall finish all items on the list accompanying the Certificate. Warranties required by the Contract Documents shall commence on the date of Substantial Completion of the Work or designated portion thereof unless otherwise provided in the Certificate of Substantial Completion.

**§ 9.8.5** The Certificate of Substantial Completion shall be submitted to the Owner and Contractor for their written acceptance of responsibilities assigned to them in such Certificate. Upon such acceptance and consent of surety, if any, the Owner shall make payment of retainage applying to such Work or designated portion thereof. Such payment shall be adjusted for Work that is incomplete or not in accordance with the requirements of the Contract Documents.

## **§ 9.9 PARTIAL OCCUPANCY OR USE**

**§ 9.9.1** The Owner may occupy or use any completed or partially completed portion of the Work at any stage when such portion is designated by separate agreement with the Contractor, provided such occupancy or use is consented to by the insurer as required under Section 11.3.1.5 and authorized by public authorities having jurisdiction over the Project. Such partial occupancy or use may commence whether or not the portion is substantially complete, provided the Owner and Contractor have accepted in writing the responsibilities assigned to each of them for payments, retainage, if any, security, maintenance, heat, utilities, damage to the Work and insurance, and have agreed in writing concerning the period for correction of the Work and commencement of warranties required by the Contract Documents. When the Contractor considers a portion substantially complete, the Contractor shall prepare and submit a list to the Architect as provided under Section 9.8.2. Consent of the Contractor to partial occupancy or use shall not be unreasonably withheld. The stage of the progress of the Work shall be determined by written agreement between the Owner and Contractor or, if no agreement is reached, by decision of the Architect.

**§ 9.9.2** Immediately prior to such partial occupancy or use, the Owner, Contractor and Architect shall jointly inspect the area to be occupied or portion of the Work to be used in order to determine and record the condition of the Work.

**§ 9.9.3** Unless otherwise agreed upon, partial occupancy or use of a portion or portions of the Work shall not constitute acceptance of Work not complying with the requirements of the Contract Documents.

## **§ 9.10 FINAL COMPLETION AND FINAL PAYMENT**

**§ 9.10.1** Upon receipt of the Contractor's written notice that the Work is ready for final inspection and acceptance and upon receipt of a final Application for Payment, the Architect will promptly make such inspection and, when the

Architect finds the Work acceptable under the Contract Documents and the Contract fully performed, the Architect will promptly issue a final Certificate for Payment stating that to the best of the Architect's knowledge, information and belief, and on the basis of the Architect's on-site visits and inspections, the Work has been completed in accordance with terms and conditions of the Contract Documents and that the entire balance found to be due the Contractor and noted in the final Certificate is due and payable. The Architect's final Certificate for Payment will constitute a further representation that conditions listed in Section 9.10.2 as precedent to the Contractor's being entitled to final payment have been fulfilled.

**§ 9.10.2** Neither final payment nor any remaining retained percentage shall become due until the Contractor submits to the Architect (1) an affidavit that payrolls, bills for materials and equipment, and other indebtedness connected with the Work for which the Owner or the Owner's property might be responsible or encumbered (less amounts withheld by Owner) have been paid or otherwise satisfied, (2) a certificate evidencing that insurance required by the Contract Documents to remain in force after final payment is currently in effect and will not be canceled or allowed to expire until at least 30 days' prior written notice has been given to the Owner, (3) a written statement that the Contractor knows of no substantial reason that the insurance will not be renewable to cover the period required by the Contract Documents, (4) consent of surety, if any, to final payment and (5), if required by the Owner, other data establishing payment or satisfaction of obligations, such as receipts, releases and waivers of liens, claims, security interests or encumbrances arising out of the Contract, to the extent and in such form as may be designated by the Owner. If a Subcontractor refuses to furnish a release or waiver required by the Owner, the Contractor may furnish a bond satisfactory to the Owner to indemnify the Owner against such lien. If such lien remains unsatisfied after payments are made, the Contractor shall refund to the Owner all money that the Owner may be compelled to pay in discharging such lien, including all costs and reasonable attorneys' fees.

**§ 9.10.3** If, after Substantial Completion of the Work, final completion thereof is materially delayed through no fault of the Contractor or by issuance of Change Orders affecting final completion, and the Architect so confirms, the Owner shall, upon application by the Contractor and certification by the Architect, and without terminating the Contract, make payment of the balance due for that portion of the Work fully completed and accepted. If the remaining balance for Work not fully completed or corrected is less than retainage stipulated in the Contract Documents, and if bonds have been furnished, the written consent of surety to payment of the balance due for that portion of the Work fully completed and accepted shall be submitted by the Contractor to the Architect prior to certification of such payment. Such payment shall be made under terms and conditions governing final payment, except that it shall not constitute a waiver of claims.

**§ 9.10.4** The making of final payment shall constitute a waiver of Claims by the Owner except those arising from

- .1 liens, Claims, security interests or encumbrances arising out of the Contract and unsettled;
- .2 failure of the Work to comply with the requirements of the Contract Documents; or
- .3 terms of special warranties required by the Contract Documents.

**§ 9.10.5** Acceptance of final payment by the Contractor, a Subcontractor or material supplier shall constitute a waiver of claims by that payee except those previously made in writing and identified by that payee as unsettled at the time of final Application for Payment.

## **ARTICLE 10 PROTECTION OF PERSONS AND PROPERTY**

### **§ 10.1 SAFETY PRECAUTIONS AND PROGRAMS**

The Contractor shall be responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the performance of the Contract.

### **§ 10.2 SAFETY OF PERSONS AND PROPERTY**

**§ 10.2.1** The Contractor shall take reasonable precautions for safety of, and shall provide reasonable protection to prevent damage, injury or loss to

- .1 employees on the Work and other persons who may be affected thereby;
- .2 the Work and materials and equipment to be incorporated therein, whether in storage on or off the site, under care, custody or control of the Contractor or the Contractor's Subcontractors or Sub-subcontractors; and
- .3 other property at the site or adjacent thereto, such as trees, shrubs, lawns, walks, pavements, roadways, structures and utilities not designated for removal, relocation or replacement in the course of construction.

**§ 10.2.2** The Contractor shall comply with and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities bearing on safety of persons or property or their protection from damage, injury or loss.

**§ 10.2.3** The Contractor shall erect and maintain, as required by existing conditions and performance of the Contract, reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards, promulgating safety regulations and notifying owners and users of adjacent sites and utilities.

**§ 10.2.4** When use or storage of explosives or other hazardous materials or equipment or unusual methods are necessary for execution of the Work, the Contractor shall exercise utmost care and carry on such activities under supervision of properly qualified personnel.

**§ 10.2.5** The Contractor shall promptly remedy damage and loss (other than damage or loss insured under property insurance required by the Contract Documents) to property referred to in Sections 10.2.1.2 and 10.2.1.3 caused in whole or in part by the Contractor, a Subcontractor, a Sub-subcontractor, or anyone directly or indirectly employed by any of them, or by anyone for whose acts they may be liable and for which the Contractor is responsible under Sections 10.2.1.2 and 10.2.1.3, except damage or loss attributable to acts or omissions of the Owner or Architect or anyone directly or indirectly employed by either of them, or by anyone for whose acts either of them may be liable, and not attributable to the fault or negligence of the Contractor. The foregoing obligations of the Contractor are in addition to the Contractor's obligations under Section 3.18.

**§ 10.2.6** The Contractor shall designate a responsible member of the Contractor's organization at the site whose duty shall be the prevention of accidents. This person shall be the Contractor's superintendent unless otherwise designated by the Contractor in writing to the Owner and Architect.

**§ 10.2.7** The Contractor shall not permit any part of the construction or site to be loaded so as to cause damage or create an unsafe condition.

#### **§ 10.2.8 INJURY OR DAMAGE TO PERSON OR PROPERTY**

If either party suffers injury or damage to person or property because of an act or omission of the other party, or of others for whose acts such party is legally responsible, written notice of such injury or damage, whether or not insured, shall be given to the other party within a reasonable time not exceeding 21 days after discovery. The notice shall provide sufficient detail to enable the other party to investigate the matter.

#### **§ 10.3 HAZARDOUS MATERIALS**

**§ 10.3.1** The Contractor is responsible for compliance with any requirements included in the Contract Documents regarding hazardous materials. If the Contractor encounters a hazardous material or substance not addressed in the Contract Documents and if reasonable precautions will be inadequate to prevent foreseeable bodily injury or death to persons resulting from a material or substance, including but not limited to asbestos or polychlorinated biphenyl (PCB), encountered on the site by the Contractor, the Contractor shall, upon recognizing the condition, immediately stop Work in the affected area and report the condition to the Owner and Architect in writing.

**§ 10.3.2** Upon receipt of the Contractor's written notice, the Owner shall obtain the services of a licensed laboratory to verify the presence or absence of the material or substance reported by the Contractor and, in the event such material or substance is found to be present, to cause it to be rendered harmless. Unless otherwise required by the Contract Documents, the Owner shall furnish in writing to the Contractor and Architect the names and qualifications of persons or entities who are to perform tests verifying the presence or absence of such material or substance or who are to perform the task of removal or safe containment of such material or substance. The Contractor and the Architect will promptly reply to the Owner in writing stating whether or not either has reasonable objection to the persons or entities proposed by the Owner. If either the Contractor or Architect has an objection to a person or entity proposed by the Owner, the Owner shall propose another to whom the Contractor and the Architect have no reasonable objection. When the material or substance has been rendered harmless, Work in the affected area shall resume upon written agreement of the Owner and Contractor. By Change Order, the Contract Time shall be extended appropriately and the Contract Sum shall be increased in the amount of the Contractor's reasonable additional costs of shut-down, delay and start-up.

**§ 10.3.3** To the fullest extent permitted by law, the Owner shall indemnify and hold harmless the Contractor, Subcontractors, Architect, Architect's consultants and agents and employees of any of them from and against claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work in the affected area if in fact the material or substance presents the risk of bodily injury or death as described in Section 10.3.1 and has not been rendered harmless, provided that such claim, damage, loss or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), except to the extent that such damage, loss or expense is due to the fault or negligence of the party seeking indemnity.

**§ 10.3.4** The Owner shall not be responsible under this Section 10.3 for materials or substances the Contractor brings to the site unless such materials or substances are required by the Contract Documents. The Owner shall be responsible for materials or substances required by the Contract Documents, except to the extent of the Contractor's fault or negligence in the use and handling of such materials or substances.

**§ 10.3.5** The Contractor shall indemnify the Owner for the cost and expense the Owner incurs (1) for remediation of a material or substance the Contractor brings to the site and negligently handles, or (2) where the Contractor fails to perform its obligations under Section 10.3.1, except to the extent that the cost and expense are due to the Owner's fault or negligence.

**§ 10.3.6** If, without negligence on the part of the Contractor, the Contractor is held liable by a government agency for the cost of remediation of a hazardous material or substance solely by reason of performing Work as required by the Contract Documents, the Owner shall indemnify the Contractor for all cost and expense thereby incurred.

#### **§ 10.4 EMERGENCIES**

In an emergency affecting safety of persons or property, the Contractor shall act, at the Contractor's discretion, to prevent threatened damage, injury or loss. Additional compensation or extension of time claimed by the Contractor on account of an emergency shall be determined as provided in Article 15 and Article 7.

### **ARTICLE 11 INSURANCE AND BONDS**

#### **§ 11.1 CONTRACTOR'S LIABILITY INSURANCE**

**§ 11.1.1** The Contractor shall purchase from and maintain in a company or companies lawfully authorized to do business in the jurisdiction in which the Project is located such insurance as will protect the Contractor from claims set forth below which may arise out of or result from the Contractor's operations and completed operations under the Contract and for which the Contractor may be legally liable, whether such operations be by the Contractor or by a Subcontractor or by anyone directly or indirectly employed by any of them, or by anyone for whose acts any of them may be liable:

- .1 Claims under workers' compensation, disability benefit and other similar employee benefit acts that are applicable to the Work to be performed;
- .2 Claims for damages because of bodily injury, occupational sickness or disease, or death of the Contractor's employees;
- .3 Claims for damages because of bodily injury, sickness or disease, or death of any person other than the Contractor's employees;
- .4 Claims for damages insured by usual personal injury liability coverage;
- .5 Claims for damages, other than to the Work itself, because of injury to or destruction of tangible property, including loss of use resulting therefrom;
- .6 Claims for damages because of bodily injury, death of a person or property damage arising out of ownership, maintenance or use of a motor vehicle;
- .7 Claims for bodily injury or property damage arising out of completed operations; and
- .8 Claims involving contractual liability insurance applicable to the Contractor's obligations under Section 3.18.

**§ 11.1.2** The insurance required by Section 11.1.1 shall be written for not less than limits of liability specified in the Contract Documents or required by law, whichever coverage is greater. Coverages, whether written on an occurrence or claims-made basis, shall be maintained without interruption from the date of commencement of the Work until the date of final payment and termination of any coverage required to be maintained after final payment, and, with respect to the Contractor's completed operations coverage, until the expiration of the period for correction

of Work or for such other period for maintenance of completed operations coverage as specified in the Contract Documents.

**§ 11.1.3** Certificates of insurance acceptable to the Owner shall be filed with the Owner prior to commencement of the Work and thereafter upon renewal or replacement of each required policy of insurance. These certificates and the insurance policies required by this Section 11.1 shall contain a provision that coverages afforded under the policies will not be canceled or allowed to expire until at least 30 days' prior written notice has been given to the Owner. An additional certificate evidencing continuation of liability coverage, including coverage for completed operations, shall be submitted with the final Application for Payment as required by Section 9.10.2 and thereafter upon renewal or replacement of such coverage until the expiration of the time required by Section 11.1.2. Information concerning reduction of coverage on account of revised limits or claims paid under the General Aggregate, or both, shall be furnished by the Contractor with reasonable promptness.

**§ 11.1.4** The Contractor shall cause the commercial liability coverage required by the Contract Documents to include (1) the Owner, the Architect and the Architect's consultants as additional insureds for claims caused in whole or in part by the Contractor's negligent acts or omissions during the Contractor's operations; and (2) the Owner as an additional insured for claims caused in whole or in part by the Contractor's negligent acts or omissions during the Contractor's completed operations.

## **§ 11.2 OWNER'S LIABILITY INSURANCE**

The Owner shall be responsible for purchasing and maintaining the Owner's usual liability insurance.

## **§ 11.3 PROPERTY INSURANCE**

**§ 11.3.1** Unless otherwise provided, the Owner shall purchase and maintain, in a company or companies lawfully authorized to do business in the jurisdiction in which the Project is located, property insurance written on a builder's risk "all-risk" or equivalent policy form in the amount of the initial Contract Sum, plus value of subsequent Contract Modifications and cost of materials supplied or installed by others, comprising total value for the entire Project at the site on a replacement cost basis without optional deductibles. Such property insurance shall be maintained, unless otherwise provided in the Contract Documents or otherwise agreed in writing by all persons and entities who are beneficiaries of such insurance, until final payment has been made as provided in Section 9.10 or until no person or entity other than the Owner has an insurable interest in the property required by this Section 11.3 to be covered, whichever is later. This insurance shall include interests of the Owner, the Contractor, Subcontractors and Sub-subcontractors in the Project.

**§ 11.3.1.1** Property insurance shall be on an "all-risk" or equivalent policy form and shall include, without limitation, insurance against the perils of fire (with extended coverage) and physical loss or damage including, without duplication of coverage, theft, vandalism, malicious mischief, collapse, earthquake, flood, windstorm, falsework, testing and startup, temporary buildings and debris removal including demolition occasioned by enforcement of any applicable legal requirements, and shall cover reasonable compensation for Architect's and Contractor's services and expenses required as a result of such insured loss.

**§ 11.3.1.2** If the Owner does not intend to purchase such property insurance required by the Contract and with all of the coverages in the amount described above, the Owner shall so inform the Contractor in writing prior to commencement of the Work. The Contractor may then effect insurance that will protect the interests of the Contractor, Subcontractors and Sub-subcontractors in the Work, and by appropriate Change Order the cost thereof shall be charged to the Owner. If the Contractor is damaged by the failure or neglect of the Owner to purchase or maintain insurance as described above, without so notifying the Contractor in writing, then the Owner shall bear all reasonable costs properly attributable thereto.

**§ 11.3.1.3** If the property insurance requires deductibles, the Owner shall pay costs not covered because of such deductibles.

**§ 11.3.1.4** This property insurance shall cover portions of the Work stored off the site, and also portions of the Work in transit.

**§ 11.3.1.5** Partial occupancy or use in accordance with Section 9.9 shall not commence until the insurance company or companies providing property insurance have consented to such partial occupancy or use by endorsement or

otherwise. The Owner and the Contractor shall take reasonable steps to obtain consent of the insurance company or companies and shall, without mutual written consent, take no action with respect to partial occupancy or use that would cause cancellation, lapse or reduction of insurance.

### **§ 11.3.2 BOILER AND MACHINERY INSURANCE**

The Owner shall purchase and maintain boiler and machinery insurance required by the Contract Documents or by law, which shall specifically cover such insured objects during installation and until final acceptance by the Owner; this insurance shall include interests of the Owner, Contractor, Subcontractors and Sub-subcontractors in the Work, and the Owner and Contractor shall be named insureds.

### **§ 11.3.3 LOSS OF USE INSURANCE**

The Owner, at the Owner's option, may purchase and maintain such insurance as will insure the Owner against loss of use of the Owner's property due to fire or other hazards, however caused. The Owner waives all rights of action against the Contractor for loss of use of the Owner's property, including consequential losses due to fire or other hazards however caused.

**§ 11.3.4** If the Contractor requests in writing that insurance for risks other than those described herein or other special causes of loss be included in the property insurance policy, the Owner shall, if possible, include such insurance, and the cost thereof shall be charged to the Contractor by appropriate Change Order.

**§ 11.3.5** If during the Project construction period the Owner insures properties, real or personal or both, at or adjacent to the site by property insurance under policies separate from those insuring the Project, or if after final payment property insurance is to be provided on the completed Project through a policy or policies other than those insuring the Project during the construction period, the Owner shall waive all rights in accordance with the terms of Section 11.3.7 for damages caused by fire or other causes of loss covered by this separate property insurance. All separate policies shall provide this waiver of subrogation by endorsement or otherwise.

**§ 11.3.6** Before an exposure to loss may occur, the Owner shall file with the Contractor a copy of each policy that includes insurance coverages required by this Section 11.3. Each policy shall contain all generally applicable conditions, definitions, exclusions and endorsements related to this Project. Each policy shall contain a provision that the policy will not be canceled or allowed to expire, and that its limits will not be reduced, until at least 30 days' prior written notice has been given to the Contractor.

### **§ 11.3.7 WAIVERS OF SUBROGATION**

The Owner and Contractor waive all rights against (1) each other and any of their subcontractors, sub-subcontractors, agents and employees, each of the other, and (2) the Architect, Architect's consultants, separate contractors described in Article 6, if any, and any of their subcontractors, sub-subcontractors, agents and employees, for damages caused by fire or other causes of loss to the extent covered by property insurance obtained pursuant to this Section 11.3 or other property insurance applicable to the Work, except such rights as they have to proceeds of such insurance held by the Owner as fiduciary. The Owner or Contractor, as appropriate, shall require of the Architect, Architect's consultants, separate contractors described in Article 6, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waivers of subrogation by endorsement or otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

**§ 11.3.8** A loss insured under the Owner's property insurance shall be adjusted by the Owner as fiduciary and made payable to the Owner as fiduciary for the insureds, as their interests may appear, subject to requirements of any applicable mortgagee clause and of Section 11.3.10. The Contractor shall pay Subcontractors their just shares of insurance proceeds received by the Contractor, and by appropriate agreements, written where legally required for validity, shall require Subcontractors to make payments to their Sub-subcontractors in similar manner.

**§ 11.3.9** If required in writing by a party in interest, the Owner as fiduciary shall, upon occurrence of an insured loss, give bond for proper performance of the Owner's duties. The cost of required bonds shall be charged against proceeds received as fiduciary. The Owner shall deposit in a separate account proceeds so received, which the

Owner shall distribute in accordance with such agreement as the parties in interest may reach, or as determined in accordance with the method of binding dispute resolution selected in the Agreement between the Owner and Contractor. If after such loss no other special agreement is made and unless the Owner terminates the Contract for convenience, replacement of damaged property shall be performed by the Contractor after notification of a Change in the Work in accordance with Article 7.

**§ 11.3.10** The Owner as fiduciary shall have power to adjust and settle a loss with insurers unless one of the parties in interest shall object in writing within five days after occurrence of loss to the Owner's exercise of this power; if such objection is made, the dispute shall be resolved in the manner selected by the Owner and Contractor as the method of binding dispute resolution in the Agreement. If the Owner and Contractor have selected arbitration as the method of binding dispute resolution, the Owner as fiduciary shall make settlement with insurers or, in the case of a dispute over distribution of insurance proceeds, in accordance with the directions of the arbitrators.

#### **§ 11.4 PERFORMANCE BOND AND PAYMENT BOND**

**§ 11.4.1** The Owner shall have the right to require the Contractor to furnish bonds covering faithful performance of the Contract and payment of obligations arising thereunder as stipulated in bidding requirements or specifically required in the Contract Documents on the date of execution of the Contract.

**§ 11.4.2** Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations arising under the Contract, the Contractor shall promptly furnish a copy of the bonds or shall authorize a copy to be furnished.

### **ARTICLE 12 UNCOVERING AND CORRECTION OF WORK**

#### **§ 12.1 UNCOVERING OF WORK**

**§ 12.1.1** If a portion of the Work is covered contrary to the Architect's request or to requirements specifically expressed in the Contract Documents, it must, if requested in writing by the Architect, be uncovered for the Architect's examination and be replaced at the Contractor's expense without change in the Contract Time.

**§ 12.1.2** If a portion of the Work has been covered that the Architect has not specifically requested to examine prior to its being covered, the Architect may request to see such Work and it shall be uncovered by the Contractor. If such Work is in accordance with the Contract Documents, costs of uncovering and replacement shall, by appropriate Change Order, be at the Owner's expense. If such Work is not in accordance with the Contract Documents, such costs and the cost of correction shall be at the Contractor's expense unless the condition was caused by the Owner or a separate contractor in which event the Owner shall be responsible for payment of such costs.

#### **§ 12.2 CORRECTION OF WORK**

##### **§ 12.2.1 BEFORE OR AFTER SUBSTANTIAL COMPLETION**

The Contractor shall promptly correct Work rejected by the Architect or failing to conform to the requirements of the Contract Documents, whether discovered before or after Substantial Completion and whether or not fabricated, installed or completed. Costs of correcting such rejected Work, including additional testing and inspections, the cost of uncovering and replacement, and compensation for the Architect's services and expenses made necessary thereby, shall be at the Contractor's expense.

##### **§ 12.2.2 AFTER SUBSTANTIAL COMPLETION**

**§ 12.2.2.1** In addition to the Contractor's obligations under Section 3.5, if, within one year after the date of Substantial Completion of the Work or designated portion thereof or after the date for commencement of warranties established under Section 9.9.1, or by terms of an applicable special warranty required by the Contract Documents, any of the Work is found to be not in accordance with the requirements of the Contract Documents, the Contractor shall correct it promptly after receipt of written notice from the Owner to do so unless the Owner has previously given the Contractor a written acceptance of such condition. The Owner shall give such notice promptly after discovery of the condition. During the one-year period for correction of Work, if the Owner fails to notify the Contractor and give the Contractor an opportunity to make the correction, the Owner waives the rights to require correction by the Contractor and to make a claim for breach of warranty. If the Contractor fails to correct nonconforming Work within a reasonable time during that period after receipt of notice from the Owner or Architect, the Owner may correct it in accordance with Section 2.4.

**§ 12.2.2.2** The one-year period for correction of Work shall be extended with respect to portions of Work first performed after Substantial Completion by the period of time between Substantial Completion and the actual completion of that portion of the Work.

**§ 12.2.2.3** The one-year period for correction of Work shall not be extended by corrective Work performed by the Contractor pursuant to this Section 12.2.

**§ 12.2.3** The Contractor shall remove from the site portions of the Work that are not in accordance with the requirements of the Contract Documents and are neither corrected by the Contractor nor accepted by the Owner.

**§ 12.2.4** The Contractor shall bear the cost of correcting destroyed or damaged construction, whether completed or partially completed, of the Owner or separate contractors caused by the Contractor's correction or removal of Work that is not in accordance with the requirements of the Contract Documents.

**§ 12.2.5** Nothing contained in this Section 12.2 shall be construed to establish a period of limitation with respect to other obligations the Contractor has under the Contract Documents. Establishment of the one-year period for correction of Work as described in Section 12.2.2 relates only to the specific obligation of the Contractor to correct the Work, and has no relationship to the time within which the obligation to comply with the Contract Documents may be sought to be enforced, nor to the time within which proceedings may be commenced to establish the Contractor's liability with respect to the Contractor's obligations other than specifically to correct the Work.

### **§ 12.3 ACCEPTANCE OF NONCONFORMING WORK**

If the Owner prefers to accept Work that is not in accordance with the requirements of the Contract Documents, the Owner may do so instead of requiring its removal and correction, in which case the Contract Sum will be reduced as appropriate and equitable. Such adjustment shall be effected whether or not final payment has been made.

## **ARTICLE 13 MISCELLANEOUS PROVISIONS**

### **§ 13.1 GOVERNING LAW**

The Contract shall be governed by the law of the place where the Project is located except that, if the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 15.4.

### **§ 13.2 SUCCESSORS AND ASSIGNS**

**§ 13.2.1** The Owner and Contractor respectively bind themselves, their partners, successors, assigns and legal representatives to covenants, agreements and obligations contained in the Contract Documents. Except as provided in Section 13.2.2, neither party to the Contract shall assign the Contract as a whole without written consent of the other. If either party attempts to make such an assignment without such consent, that party shall nevertheless remain legally responsible for all obligations under the Contract.

**§ 13.2.2** The Owner may, without consent of the Contractor, assign the Contract to a lender providing construction financing for the Project, if the lender assumes the Owner's rights and obligations under the Contract Documents. The Contractor shall execute all consents reasonably required to facilitate such assignment.

### **§ 13.3 WRITTEN NOTICE**

Written notice shall be deemed to have been duly served if delivered in person to the individual, to a member of the firm or entity, or to an officer of the corporation for which it was intended; or if delivered at, or sent by registered or certified mail or by courier service providing proof of delivery to, the last business address known to the party giving notice.

### **§ 13.4 RIGHTS AND REMEDIES**

**§ 13.4.1** Duties and obligations imposed by the Contract Documents and rights and remedies available thereunder shall be in addition to and not a limitation of duties, obligations, rights and remedies otherwise imposed or available by law.

**§ 13.4.2** No action or failure to act by the Owner, Architect or Contractor shall constitute a waiver of a right or duty afforded them under the Contract, nor shall such action or failure to act constitute approval of or acquiescence in a breach there under, except as may be specifically agreed in writing.

## **§ 13.5 TESTS AND INSPECTIONS**

**§ 13.5.1** Tests, inspections and approvals of portions of the Work shall be made as required by the Contract Documents and by applicable laws, statutes, ordinances, codes, rules and regulations or lawful orders of public authorities. Unless otherwise provided, the Contractor shall make arrangements for such tests, inspections and approvals with an independent testing laboratory or entity acceptable to the Owner, or with the appropriate public authority, and shall bear all related costs of tests, inspections and approvals. The Contractor shall give the Architect timely notice of when and where tests and inspections are to be made so that the Architect may be present for such procedures. The Owner shall bear costs of (1) tests, inspections or approvals that do not become requirements until after bids are received or negotiations concluded, and (2) tests, inspections or approvals where building codes or applicable laws or regulations prohibit the Owner from delegating their cost to the Contractor.

**§ 13.5.2** If the Architect, Owner or public authorities having jurisdiction determine that portions of the Work require additional testing, inspection or approval not included under Section 13.5.1, the Architect will, upon written authorization from the Owner, instruct the Contractor to make arrangements for such additional testing, inspection or approval by an entity acceptable to the Owner, and the Contractor shall give timely notice to the Architect of when and where tests and inspections are to be made so that the Architect may be present for such procedures. Such costs, except as provided in Section 13.5.3, shall be at the Owner's expense.

**§ 13.5.3** If such procedures for testing, inspection or approval under Sections 13.5.1 and 13.5.2 reveal failure of the portions of the Work to comply with requirements established by the Contract Documents, all costs made necessary by such failure including those of repeated procedures and compensation for the Architect's services and expenses shall be at the Contractor's expense.

**§ 13.5.4** Required certificates of testing, inspection or approval shall, unless otherwise required by the Contract Documents, be secured by the Contractor and promptly delivered to the Architect.

**§ 13.5.5** If the Architect is to observe tests, inspections or approvals required by the Contract Documents, the Architect will do so promptly and, where practicable, at the normal place of testing.

**§ 13.5.6** Tests or inspections conducted pursuant to the Contract Documents shall be made promptly to avoid unreasonable delay in the Work.

## **§ 13.6 INTEREST**

Payments due and unpaid under the Contract Documents shall bear interest from the date payment is due at such rate as the parties may agree upon in writing or, in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.

## **§ 13.7 TIME LIMITS ON CLAIMS**

The Owner and Contractor shall commence all claims and causes of action, whether in contract, tort, breach of warranty or otherwise, against the other arising out of or related to the Contract in accordance with the requirements of the final dispute resolution method selected in the Agreement within the time period specified by applicable law, but in any case not more than 10 years after the date of Substantial Completion of the Work. The Owner and Contractor waive all claims and causes of action not commenced in accordance with this Section 13.7.

## **ARTICLE 14 TERMINATION OR SUSPENSION OF THE CONTRACT**

### **§ 14.1 TERMINATION BY THE CONTRACTOR**

**§ 14.1.1** The Contractor may terminate the Contract if the Work is stopped for a period of 30 consecutive days through no act or fault of the Contractor or a Subcontractor, Sub-subcontractor or their agents or employees or any other persons or entities performing portions of the Work under direct or indirect contract with the Contractor, for any of the following reasons:

- .1 Issuance of an order of a court or other public authority having jurisdiction that requires all Work to be stopped;
- .2 An act of government, such as a declaration of national emergency that requires all Work to be stopped;

- .3 Because the Architect has not issued a Certificate for Payment and has not notified the Contractor of the reason for withholding certification as provided in Section 9.4.1, or because the Owner has not made payment on a Certificate for Payment within the time stated in the Contract Documents; or
- .4 The Owner has failed to furnish to the Contractor promptly, upon the Contractor's request, reasonable evidence as required by Section 2.2.1.

§ 14.1.2 The Contractor may terminate the Contract if, through no act or fault of the Contractor or a Subcontractor, Sub-subcontractor or their agents or employees or any other persons or entities performing portions of the Work under direct or indirect contract with the Contractor, repeated suspensions, delays or interruptions of the entire Work by the Owner as described in Section 14.3 constitute in the aggregate more than 100 percent of the total number of days scheduled for completion, or 120 days in any 365-day period, whichever is less.

§ 14.1.3 If one of the reasons described in Section 14.1.1 or 14.1.2 exists, the Contractor may, upon seven days' written notice to the Owner and Architect, terminate the Contract and recover from the Owner payment for Work executed, including reasonable overhead and profit, costs incurred by reason of such termination, and damages.

§ 14.1.4 If the Work is stopped for a period of 60 consecutive days through no act or fault of the Contractor or a Subcontractor or their agents or employees or any other persons performing portions of the Work under contract with the Contractor because the Owner has repeatedly failed to fulfill the Owner's obligations under the Contract Documents with respect to matters important to the progress of the Work, the Contractor may, upon seven additional days' written notice to the Owner and the Architect, terminate the Contract and recover from the Owner as provided in Section 14.1.3.

## § 14.2 TERMINATION BY THE OWNER FOR CAUSE

§ 14.2.1 The Owner may terminate the Contract if the Contractor

- .1 repeatedly refuses or fails to supply enough properly skilled workers or proper materials;
- .2 fails to make payment to Subcontractors for materials or labor in accordance with the respective agreements between the Contractor and the Subcontractors;
- .3 repeatedly disregards applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of a public authority; or
- .4 otherwise is guilty of substantial breach of a provision of the Contract Documents.

§ 14.2.2 When any of the above reasons exist, the Owner, upon certification by the Initial Decision Maker that sufficient cause exists to justify such action, may without prejudice to any other rights or remedies of the Owner and after giving the Contractor and the Contractor's surety, if any, seven days' written notice, terminate employment of the Contractor and may, subject to any prior rights of the surety:

- .1 Exclude the Contractor from the site and take possession of all materials, equipment, tools, and construction equipment and machinery thereon owned by the Contractor;
- .2 Accept assignment of subcontracts pursuant to Section 5.4; and
- .3 Finish the Work by whatever reasonable method the Owner may deem expedient. Upon written request of the Contractor, the Owner shall furnish to the Contractor a detailed accounting of the costs incurred by the Owner in finishing the Work.

§ 14.2.3 When the Owner terminates the Contract for one of the reasons stated in Section 14.2.1, the Contractor shall not be entitled to receive further payment until the Work is finished.

§ 14.2.4 If the unpaid balance of the Contract Sum exceeds costs of finishing the Work, including compensation for the Architect's services and expenses made necessary thereby, and other damages incurred by the Owner and not expressly waived, such excess shall be paid to the Contractor. If such costs and damages exceed the unpaid balance, the Contractor shall pay the difference to the Owner. The amount to be paid to the Contractor or Owner, as the case may be, shall be certified by the Initial Decision Maker, upon application, and this obligation for payment shall survive termination of the Contract.

## § 14.3 SUSPENSION BY THE OWNER FOR CONVENIENCE

§ 14.3.1 The Owner may, without cause, order the Contractor in writing to suspend, delay or interrupt the Work in whole or in part for such period of time as the Owner may determine.

**§ 14.3.2** The Contract Sum and Contract Time shall be adjusted for increases in the cost and time caused by suspension, delay or interruption as described in Section 14.3.1. Adjustment of the Contract Sum shall include profit. No adjustment shall be made to the extent

- .1 that performance is, was or would have been so suspended, delayed or interrupted by another cause for which the Contractor is responsible; or
- .2 that an equitable adjustment is made or denied under another provision of the Contract.

#### **§ 14.4 TERMINATION BY THE OWNER FOR CONVENIENCE**

**§ 14.4.1** The Owner may, at any time, terminate the Contract for the Owner's convenience and without cause.

**§ 14.4.2** Upon receipt of written notice from the Owner of such termination for the Owner's convenience, the Contractor shall

- .1 cease operations as directed by the Owner in the notice;
- .2 take actions necessary, or that the Owner may direct, for the protection and preservation of the Work; and
- .3 except for Work directed to be performed prior to the effective date of termination stated in the notice, terminate all existing subcontracts and purchase orders and enter into no further subcontracts and purchase orders.

**§ 14.4.3** In case of such termination for the Owner's convenience, the Contractor shall be entitled to receive payment for Work executed, and costs incurred by reason of such termination, along with reasonable overhead and profit on the Work not executed.

### **ARTICLE 15 CLAIMS AND DISPUTES**

#### **§ 15.1 CLAIMS**

##### **§ 15.1.1 DEFINITION**

A Claim is a demand or assertion by one of the parties seeking, as a matter of right, payment of money, or other relief with respect to the terms of the Contract. The term "Claim" also includes other disputes and matters in question between the Owner and Contractor arising out of or relating to the Contract. The responsibility to substantiate Claims shall rest with the party making the Claim.

##### **§ 15.1.2 NOTICE OF CLAIMS**

Claims by either the Owner or Contractor must be initiated by written notice to the other party and to the Initial Decision Maker with a copy sent to the Architect, if the Architect is not serving as the Initial Decision Maker. Claims by either party must be initiated within 21 days after occurrence of the event giving rise to such Claim or within 21 days after the claimant first recognizes the condition giving rise to the Claim, whichever is later.

##### **§ 15.1.3 CONTINUING CONTRACT PERFORMANCE**

Pending final resolution of a Claim, except as otherwise agreed in writing or as provided in Section 9.7 and Article 14, the Contractor shall proceed diligently with performance of the Contract and the Owner shall continue to make payments in accordance with the Contract Documents. The Architect will prepare Change Orders and issue Certificates for Payment in accordance with the decisions of the Initial Decision Maker.

##### **§ 15.1.4 CLAIMS FOR ADDITIONAL COST**

If the Contractor wishes to make a Claim for an increase in the Contract Sum, written notice as provided herein shall be given before proceeding to execute the Work. Prior notice is not required for Claims relating to an emergency endangering life or property arising under Section 10.4.

##### **§ 15.1.5 CLAIMS FOR ADDITIONAL TIME**

**§ 15.1.5.1** If the Contractor wishes to make a Claim for an increase in the Contract Time, written notice as provided herein shall be given. The Contractor's Claim shall include an estimate of cost and of probable effect of delay on progress of the Work. In the case of a continuing delay, only one Claim is necessary.

**§ 15.1.5.2** If adverse weather conditions are the basis for a Claim for additional time, such Claim shall be documented by data substantiating that weather conditions were abnormal for the period of time, could not have been reasonably anticipated and had an adverse effect on the scheduled construction.

### § 15.1.6 CLAIMS FOR CONSEQUENTIAL DAMAGES

The Contractor and Owner waive Claims against each other for consequential damages arising out of or relating to this Contract. This mutual waiver includes

- .1 damages incurred by the Owner for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity or of the services of such persons; and
- .2 damages incurred by the Contractor for principal office expenses including the compensation of personnel stationed there, for losses of financing, business and reputation, and for loss of profit except anticipated profit arising directly from the Work.

This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination in accordance with Article 14. Nothing contained in this Section 15.1.6 shall be deemed to preclude an award of liquidated damages, when applicable, in accordance with the requirements of the Contract Documents.

### § 15.2 INITIAL DECISION

§ 15.2.1 Claims, excluding those arising under Sections 10.3, 10.4, 11.3.9, and 11.3.10, shall be referred to the Initial Decision Maker for initial decision. The Architect will serve as the Initial Decision Maker, unless otherwise indicated in the Agreement. Except for those Claims excluded by this Section 15.2.1, an initial decision shall be required as a condition precedent to mediation of any Claim arising prior to the date final payment is due, unless 30 days have passed after the Claim has been referred to the Initial Decision Maker with no decision having been rendered. Unless the Initial Decision Maker and all affected parties agree, the Initial Decision Maker will not decide disputes between the Contractor and persons or entities other than the Owner.

§ 15.2.2 The Initial Decision Maker will review Claims and within ten days of the receipt of a Claim take one or more of the following actions: (1) request additional supporting data from the claimant or a response with supporting data from the other party, (2) reject the Claim in whole or in part, (3) approve the Claim, (4) suggest a compromise, or (5) advise the parties that the Initial Decision Maker is unable to resolve the Claim if the Initial Decision Maker lacks sufficient information to evaluate the merits of the Claim or if the Initial Decision Maker concludes that, in the Initial Decision Maker's sole discretion, it would be inappropriate for the Initial Decision Maker to resolve the Claim.

§ 15.2.3 In evaluating Claims, the Initial Decision Maker may, but shall not be obligated to, consult with or seek information from either party or from persons with special knowledge or expertise who may assist the Initial Decision Maker in rendering a decision. The Initial Decision Maker may request the Owner to authorize retention of such persons at the Owner's expense.

§ 15.2.4 If the Initial Decision Maker requests a party to provide a response to a Claim or to furnish additional supporting data, such party shall respond, within ten days after receipt of such request, and shall either (1) provide a response on the requested supporting data, (2) advise the Initial Decision Maker when the response or supporting data will be furnished or (3) advise the Initial Decision Maker that no supporting data will be furnished. Upon receipt of the response or supporting data, if any, the Initial Decision Maker will either reject or approve the Claim in whole or in part.

§ 15.2.5 The Initial Decision Maker will render an initial decision approving or rejecting the Claim, or indicating that the Initial Decision Maker is unable to resolve the Claim. This initial decision shall (1) be in writing; (2) state the reasons therefor; and (3) notify the parties and the Architect, if the Architect is not serving as the Initial Decision Maker, of any change in the Contract Sum or Contract Time or both. The initial decision shall be final and binding on the parties but subject to mediation and, if the parties fail to resolve their dispute through mediation, to binding dispute resolution.

§ 15.2.6 Either party may file for mediation of an initial decision at any time, subject to the terms of Section 15.2.6.1.

§ 15.2.6.1 Either party may, within 30 days from the date of an initial decision, demand in writing that the other party file for mediation within 60 days of the initial decision. If such a demand is made and the party receiving the demand fails to file for mediation within the time required, then both parties waive their rights to mediate or pursue binding dispute resolution proceedings with respect to the initial decision.

**§ 15.2.7** In the event of a Claim against the Contractor, the Owner may, but is not obligated to, notify the surety, if any, of the nature and amount of the Claim. If the Claim relates to a possibility of a Contractor's default, the Owner may, but is not obligated to, notify the surety and request the surety's assistance in resolving the controversy.

**§ 15.2.8** If a Claim relates to or is the subject of a mechanic's lien, the party asserting such Claim may proceed in accordance with applicable law to comply with the lien notice or filing deadlines.

### **§ 15.3 MEDIATION**

**§ 15.3.1** Claims, disputes, or other matters in controversy arising out of or related to the Contract except those waived as provided for in Sections 9.10.4, 9.10.5, and 15.1.6 shall be subject to mediation as a condition precedent to binding dispute resolution.

**§ 15.3.2** The parties shall endeavor to resolve their Claims by mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement. A request for mediation shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of binding dispute resolution proceedings but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration is stayed pursuant to this Section 15.3.2, the parties may nonetheless proceed to the selection of the arbitrator(s) and agree upon a schedule for later proceedings.

**§ 15.3.3** The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

### **§ 15.4 ARBITRATION**

**§ 15.4.1** If the parties have selected arbitration as the method for binding dispute resolution in the Agreement, any Claim subject to, but not resolved by, mediation shall be subject to arbitration which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules in effect on the date of the Agreement. A demand for arbitration shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the arbitration. The party filing a notice of demand for arbitration must assert in the demand all Claims then known to that party on which arbitration is permitted to be demanded.

**§ 15.4.1.1** A demand for arbitration shall be made no earlier than concurrently with the filing of a request for mediation, but in no event shall it be made after the date when the institution of legal or equitable proceedings based on the Claim would be barred by the applicable statute of limitations. For statute of limitations purposes, receipt of a written demand for arbitration by the person or entity administering the arbitration shall constitute the institution of legal or equitable proceedings based on the Claim.

**§ 15.4.2** The award rendered by the arbitrator or arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

**§ 15.4.3** The foregoing agreement to arbitrate and other agreements to arbitrate with an additional person or entity duly consented to by parties to the Agreement shall be specifically enforceable under applicable law in any court having jurisdiction thereof.

### **§ 15.4.4 CONSOLIDATION OR JOINDER**

**§ 15.4.4.1** Either party, at its sole discretion, may consolidate an arbitration conducted under this Agreement with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation, (2) the arbitrations to be consolidated substantially involve common questions of law or fact, and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).

**§ 15.4.4.2** Either party, at its sole discretion, may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration, provided that the party sought to be joined consents in writing to such joinder. Consent to arbitration involving an

additional person or entity shall not constitute consent to arbitration of any claim, dispute or other matter in question not described in the written consent.

**§ 15.4.4.3** The Owner and Contractor grant to any person or entity made a party to an arbitration conducted under this Section 15.4, whether by joinder or consolidation, the same rights of joinder and consolidation as the Owner and Contractor under this Agreement.

PART 1 – GENERAL

1.01 AMENDMENTS TO GENERAL CONDITIONS

- A. The General Conditions for this Project shall be the American Institute of Architects' Document A201-2007, "General Conditions of the Contract for Construction, Articles 1 through 15, inclusive, 38 pages, and hereafter referred to as the "General Conditions." Such document is specifically made a part of the Contract Documents.
- B. The following amendments shall modify, delete, and supplement the General Conditions. Where any Article, Paragraph, or Subparagraph in the General Conditions is supplemented by one of the following Paragraphs, the provisions of such Article, Paragraph, or Subparagraph shall remain in full force and effect and the supplemental provisions shall be considered as added thereto. Where any Article, Paragraph not so amended, deleted, voided, or superseded shall remain in full force and the order and numbering of subsequent articles, Paragraphs or Subparagraphs shall be changed to read as if in sequence.
- C. Refer to other Division 00 documents for additional supplemental requirements.

PART 2 – AMENDMENT ARTICLES

2.01 ARTICLE 1

- A. Subparagraph 1.1.1: Amend this Subparagraph by deleting the last sentence beginning with the words "Unless specifically enumerated" and substituting the following sentence: "The Contract Documents shall also include the Notice to Bidders, Instructions to Bidders, Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion, Bid Form, Subcontractors and Materials Listing, Contractor's Non-Collusion Affidavit, and all portions of Addenda relating to Bidding Requirements."

- B. Add the following Subparagraph 1.1.7

"1.1.7 ARCHITECT/ENGINEER"

"Where the word Architect is used in the AIA A201-2007 it shall be inferred to also include the Design Engineer(s), e.g. Architect/Engineer, Engineer (for Engineer only Administered Projects).

- C. Add the following Section 1.7

"1.7 LITIGATION

1.7.1 All litigation under this Contract must be initiated in Vigo County, Indiana and Contractor consents to the jurisdiction of the Vigo County courts.

1.7.2 Contractor hereby waives its right to a jury trial in any matters litigated in Vigo County.

1.7.3 In any litigation initiated by Contractor, Contractor shall reimburse all attorney's fees and expenses incurred by Owner up to a maximum of \$100,000 provided Contractor has presented its claims as required by this Contract and the Owner has made a good faith offer to resolve any dispute prior to litigation. The determination of a 'good faith offer' shall rest solely with the Architect who will render their opinion in writing to Contractor or Owner upon request prior to Contractor initiating litigation or thereafter as requested. The Architect's decision is binding on Owner and Contractor and admissible in court as determinative of this issue.

1.7.4 In any litigation initiated by Owner against Contractor, provided Contractor was given the opportunity to resolve all issues prior to litigation being initiated and failed to do so through a reasonable offer, as determined by the Architect, then Contractor shall be responsible to reimburse all attorney's fees and expenses incurred by Owner for all litigation as well as for all pre-litigation activities engaged in by the Owner for

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

investigating, evaluating, or mediating any claims, issues, or matters related to Contractor.”

2.02 ARTICLE 2

- A. Subparagraph 2.1.2: Delete this Subparagraph in its entirety.
- B. Subparagraph 2.2.5: Amend this Subparagraph by adding “electronically” after the word Documents in the second line.

2.03 ARTICLE 3

- A. Paragraph 3.2: Amend this Paragraph by deleting Subparagraph 3.2.1 in its entirety and replacing with the following new subparagraph 3.2.1 and its subparagraphs:

“3.2.1 By executing the Contract, the Contractor represents to the Owner that:”

“3.2.1.1 The Contractor has a high level of experience and expertise in the business administration construction, management, workplace health and safety supervision and superintendence of projects of similar size and complexity and that it will perform the Work with the care, skill and diligence of such a contractor.”

“3.2.1.2 Contractor and, to the best of its knowledge, its subcontractors are financially solvent, able to pay all debts as they mature and have sufficient working capital to complete the Work and all obligations thereunder.”

“3.2.1.3 The Contractor is able to furnish the plant, tools, materials, supplies, equipment and labor required to complete the Work.”

“3.2.1.4 Contractor is authorized to do business in the State of Indiana.”

“3.2.1.5 Contractor’s execution of the Contract and its performance thereof are within its authorized powers.”

“3.2.1.6 Contractor has:”

“3.2.1.6.1 Studied the Contract Documents, understands their provisions and that that they are sufficiently detailed and complete to permit the Contractor to perform the Work in accordance with the Contract Documents, within the Contract Time and for the Contract Sum.”

“3.2.1.6.2. Inspected the Project site.”

“3.2.1.6.3 Investigated and satisfied itself as to:

“3.2.1.6.3.1 The site and locality where the Work is to be performed and the conditions and difficulties to be encountered, including access thereto.”

“3.2.1.6.3.2 The availability of utilities and access thereto.”

“3.2.1.6.3.3 Conditions affecting transportation, disposal, handling and storage of materials, supplies and equipment.”

“3.2.1.6.3.4 Any materials, supplies or equipment which are to be furnished by the Owner for the Contractor’s use.”

“3.2.1.6.3.5 The type and availability of tools, equipment and facilities to perform the Work.”

“3.2.1.6.3.6 The availability and adequacy of labor and trades, and, if applicable, union wage scales, benefits, working conditions, craft jurisdictions, area practices and collective bargaining agreements affecting the Work.”

“3.2.1.6.3.7 Prevailing weather and climatological conditions.”

“3.2.1.6.3.8 All laws applicable to the Work and to the Contractor.”

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

“3.2.1.6.3.9 All other factors which may affect the Contractor’s performance of the Work.”

- B. Paragraph 3.4: Amend this Paragraph by adding Subparagraphs 3.4.4 through 3.4.7 as follows:

“3.4.4 The Contractor shall employ competently trained and experienced engineers and supervisors, who shall coordinate general, mechanical, and electrical Work and crafts with the required construction progress. The Contractor shall exercise complete control over their Subcontractor(s) in a manner which will unite their efforts toward completion of the project as contracted.”

“3.4.5 The Contractor shall continuously maintain adequate protection of all their Work and the Work of Subcontractors from damage and shall hold harmless the Owner and Architect/Engineer from injury or loss arising in connection with this contract, including legal defense costs. The Contractor shall make good any such damage, injury, or loss, except such as may be directly due to errors in the Contract Documents or those caused by agents or employees of the Owner.”

“3.4.6 The Contractor shall be responsible for and shall establish and verify exterior lines and the required elevations of all buildings and structures to be erected at the site.”

“3.4.7 The Contractor shall coordinate and expedite the Work of all lower tier Contractors.”

- C. Paragraph 3.5: Amend this Paragraph by adding Subparagraphs 3.5.1, 3.5.2, and 3.5.3 as follows:

“3.5.1 The Contractor shall warranty that all Work executed under the respective sections will be free from defects of materials and workmanship for the period of one (1) year from the Date of Substantial Completion of the Work or within such longer period of time as may be prescribed by law or by the terms of any applicable special warranty required by the Contract Documents. The Contractor further agrees that they will, at their own expense, repair and replace all such defective Work, and all other Work damaged that becomes defective during the term of the warranty. Where warranties are required, Contractor shall secure warranties in writing from Subcontractors, manufacturers and/or material suppliers addressed to and in favor of the Owner and deliver same to the Owner upon completion of Work. Delivery of warranties shall not relieve the Contractor from any obligations assumed under any other provisions of Contract.”

“3.5.2 Any damage to the building or its contents and/or Work of other Contractors caused by failure of any piece of equipment and/or faulty installation shall be repaired or replaced by the party or parties furnishing the original equipment/installation and paid for by the Contractor at fault.”

“3.5.3 An inspection of the installed Work and/or equipment will be made just before the end of the stipulated warranty period and any installations and/or equipment which, in the opinion of the Architect/Engineer and/or Owner, show undue wear, failure, incorrect operation, or otherwise do not conform to the letter and intent of the Contract Documents shall be repaired or replaced by the Contractor furnishing same at no additional charge.”

- D. Paragraph 3.6: Amend this Subparagraph by adding the words “Unless otherwise provided in the Contract Documents,” to the beginning of this Paragraph.

- E. Paragraph 3.9: Amend this Paragraph by adding Subparagraph 3.9.4 as follows:

“3.9.4 Subcontractors for any other Work shall have a competent superintendent at the site at all times when Work is being performed under their contracts.

- F. Paragraph 3.13: Amend this Paragraph by adding Subparagraph 3.13.1 as follows:

“3.13.1 The Contractor shall prepare an overlay sketch of the construction areas indicating spaces assigned for field office, storage sheds, containers, trailers and field

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

shops, and for stockpiles and staging of materials for all trades. This sketch shall be submitted to the Owner and the Architect/Engineer for their information prior to moving any such equipment and materials onto the Project Site.”

- G. Paragraph 3.16: Amend this Paragraph 3.16 adding the following to the end:

“If Work is being executed at locations other than the Project site, the Contractor shall notify the Architect/Engineer where such Work is being executed, and at what time such Work will be ready for inspection, in order that the Architect/Engineer may inspect such Work Prior to its delivery to the Project Site.”

- H. Paragraph 3.18: Amend this Paragraph by adding Subparagraph 3.18.3 as follows:

“3.18.3 The Contractor shall indemnify the Owner and Architect/Engineer for any claim, demand or expense which may be made by reason of:

“.1 Any injury to person or property sustained by the Owner or by any person, firms, or corporations, if caused by the Contractor.”

“.2 Any injury to person or property sustained by any person, firms, or corporations caused by an act or omission of the Contractor or of any person, firm, or corporation directly or indirectly employed by him in connection with this Work, whether the said injury or damage occurs upon or adjacent to the Work.”

“.3 The Contractor, at his own cost, expense, and risk, shall defend any and all actions, suits, or other legal proceedings that may be rendered against the Owner and Architect/Engineer in any such action, suit, or proceedings.”

“.4 The Contractor shall indemnify the Owner and Architect/Engineer from any and all costs resulting from any claim or suits in connection with liens that may be brought or instituted against the Owner. Neither the final payment or any part of the retained percentage of the Contract shall become due until the Contractor has delivered to the Owner a complete release of all liens arising out of the Contract.”

2.04 ARTICLE 4

- A. Subparagraph 4.1.2: Delete this Subparagraph in its entirety.
- B. Subparagraph 4.2.7: Modify the first sentence of this Subparagraph by deleting the words “approve or take” and substituting the word “indicate.”
- C. Subparagraph 4.2.10: Amend this Subparagraph by adding the words “in writing” after the word “agree” in the first sentence.

2.05 ARTICLE 5

- A. Paragraph 5.3: Amend this Paragraph by adding the following sentence thereto:
- “Unless otherwise excepted, nothing contained in this Contract shall create any contractual relationship between any Subcontractor and the Owner.”

2.06 ARTICLE 6 (NO CHANGE)

2.07 ARTICLE 7

- A. Paragraph 7.1: Amend this Paragraph by adding the following new Subparagraph 7.1.4:
- “7.1.4 When a change in the Work is contemplated which may affect the Contract Sum or duration of the Work, the Architect/Engineer will issue a ‘Proposal Request’ detailing the Work involved in such proposed change. Upon receipt of such ‘Proposal Request,’ the Contractor shall promptly, but in no case longer than five (5) working days, issue a reply or ‘Change Quotation,’ stipulating the change in cost of Project and/or duration as a result of the proposed change. This issuance of a Proposal Request does not, in any way, authorize commencement of the Work therein described. Should, after review and consultation with the Owner, the Architect/Engineer find the ‘Change Quotation’ by the

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

Contractor to be acceptable, the Architect/Engineer will within thirty (30) calendar days issue a written 'Change Order' to the Contractor."

B. Add the following Subparagraph 7.1.5 as follows

"7.1.5 If Contractor proceeds with change order work before receiving a fully executed change order or change directive, then Contractor waives the right to object to the scope of work change, the amount of the change order, and the adjustment, if any, to the time of performance."

C. Amend Subparagraph 7.3.3 by adding the following Subparagraphs:

".5 Time and material."

".6 Extra Work performed under Item .5 above shall be upon the option of the Owner only in the event that the lump sum required under Item .1 is not acceptable."

".7 Extra Work shall be performed for the cost of the labor payroll plus 15% of the labor payroll and the cost of the material plus 5% of the material cost. Said markup fees are intended to compensate for the cost of payroll taxes, insurance of all kinds, all taxes of the Contractor, including State Taxes, Federal Income Tax, Unemployment, and FICA Taxes, as well as all other overhead costs, expenses, and carrying charges whatsoever, including the profit to be derived from such additional Work. Labor payroll is defined as the actual hourly labor cost plus any fringes payable as listed on the wage rate schedule(s) provided as required by the Bidding Documents."

".8 In case such Work is performed by a Subcontractor or a lower tier Contractor with the Owner's consent, the Work shall be marked up as indicated in 7.3.3.7 by the Contractor actually performing the Work. Each succeeding Contractor may mark up their direct labor and material costs as indicated in 7.3.3.7. Otherwise each succeeding Contractor, including the Prime Contractor, may add 5% for handling/coordination. Additional mark-ups of a Subcontractor's costs shall not be permitted."

".9 Costs for bond premiums are allowable provided documentation from the Bonding Company is included detailing the added bond cost premium, the current bond total and the new bond total."

D. Subparagraph 7.3.7: Amend the following:

".1 Delete the text and replace with:

"1 The cost of the labor payroll plus 15% of the labor payroll;"

".2 Delete the semicolon at the end of the sentence and add "plus 5% of the total of the costs;"

".3 Delete the semicolon at the end of the sentence and add "plus 5% of the total of the costs;"

".4 Delete all text following the word bonds in the first line and replace with ",with documentation from the Bonding Company including details of the added bond cost premium, the current bond total and the new bond total;"

".5 Delete the text and replace with:

".5 Additional costs of supervision directly attributable to the change if the change results in supervision of change work at a time outside the normal work hours of the Project."

E. Paragraph 7.3: Add the following new Subparagraphs 7.3.11, 7.3.12, and 7.3.13:

"7.3.11 When extra Work is performed under Item 7.3.3.2 above, said unit prices shall represent the total cost to the Owner and shall not be subject to any additional charges whatsoever."

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

“7.3.12 In order to facilitate checking of quotations for extras or credits, all proposals shall be accompanied by a complete breakdown of costs, including labor, material, and subcontracts. Labor and material shall be marked up in the manner prescribed herein. Where cost items consist of major subcontracts, such contracts shall be broken down in a similar fashion.”

“7.3.13 When changes are made that result in a credit to the Owner, the value of the credit will be established by the method indicated in Items 7.3.3.1 or 7.3.3.2”

2.08 ARTICLE 8 (NO CHANGE)

2.09 ARTICLE 9

- A. Subparagraph 9.3.1: Amend this Subparagraph by deleting the words “if required” in the third line.

- B. Paragraph 9.3: Amend this Paragraph by adding Subparagraph 9.3.4 as follows:

“9.3.4 The Owner will retain, until the Work is at least fifty percent (50%) complete, ten percent (10%) of the amount due the Contractor on account of approved progress payments. At the time the Work is at least fifty percent (50%) completed or thereafter, if the manner of completion of the Work and its progress are and remain satisfactory to the Owner and Architect/Engineer, and in the absence of other good and sufficient reasons, the Architect/Engineer will (upon presentation by the Contractor of Consent of Surety) recommend to the Owner that any remaining approved partial payments be paid in full. Regardless of the Owner’s decision relative to further retainage, all prior retainages that were withheld will be held until completion of the contract Work and all remedial Work, listed as conditions of substantial completion, and following final payment. If retainage is limited to ten percent (10%) of the first fifty percent (50%) of the contract amount, as described above, five percent (5%) will be withheld from payments for all subsequent change orders; therefore, the minimum retainage shall be five percent (5%) of the current contract amount.”

- C. Subparagraph 9.6.3: Delete this Subparagraph in its entirety.

- D. Subparagraph 9.6.5: Delete this Subparagraph in its entirety.

- E. Paragraph 9.7: Delete the text of this Paragraph and replace with the following new Subparagraphs 9.7.1 and 9.7.2

“9.7.1 The Architect shall issue to the Owner a Certificate for Payment within seven calendar days after receipt of the Contractor’s Application for Payment. Upon receipt of the Certificate for Payment (Application for Payment) from the Architect, the Owner will endeavor to make payment to the Contractor within fifteen calendar days. If payment is not made within a reasonable time, then the Contractor may, upon seven additional days’ written notice to the Owner and Architect, stop the Work until payment of the amount owing has been received. The Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor’s reasonable costs of shutdown, delay and start-up, plus interest as provided for in the Contract Documents.”

“9.7.2 If an Application for Payment is being held for just cause, the Architect shall notify the Contractor in writing of the cause and what remedial action must be taken for the Application for Payment to be released for payment.

- F. Subparagraph 9.10.2: Amend this Subparagraph by deleting the word “and” in the eighth line and adding the following after the “Owner” in the eleventh line:

“and (6) the Architect/Engineer has received the required Record Drawings, brochures, manuals, operating instructions, warranties, affidavits, final application for payment, any other special data requirements and has performed a final inspection and confirmed that all items of completion are correct and acceptable at which time he will initiate a ‘Final Completion’ letter establishing the date of Final Completion.”

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

2.10 ARTICLE 10

- A. Subparagraph 10.2.2: Amend this Subparagraph by adding the following to the end thereof:

“In the event of conflict between these Contract Documents and any Federal, State, or Local Authority laws, rules, regulations, or requirements, the most stringent requirement shall govern the Work.”
- B. Subparagraph 10.3.1: Amend this Subparagraph by deleting the phrase “and Architect” in the sixth line.
- C. Subparagraph 10.3.2: Amend this Subparagraph by deleting the phrase “and Architect” in the second sentence; deleting the phrase “and the Architect” from the third sentence; and by deleting the words “either” and “or Architect” from the fourth sentence; by replacing the phrase, “and the Architect have” with the word “has” in the fourth sentence.
- D. Paragraph 10.3 add the following Subparagraph 10.3.7

10.3.7 “The Contractor shall also comply with all the safety paragraphs listed in Section 00 30 00 of the Contract Documents. In the event of conflict between 10.3 and Section 00 30 00, Section 00 30 00 shall prevail.”

2.11 ARTICLE 11

- A. Article 11: Insert a new Subparagraph 11.1 and renumber each succeeding Paragraph accordingly:

11.1 See Specification Section 00 20 20 for additional requirements. In the event of conflict between Section 00 20 20 and this Paragraph 11, requirements of Section 00 20 20 shall prevail.
- B. Subparagraph 11.1.1 (renumbered 11.2.1): Amend this Subparagraph by adding the phrase, “and that are acceptable to the Owner,” following the word “located,” in the second line.
- C. Subparagraph 11.1.1 (renumbered 11.2.1): Amend this Subparagraph by adding the phrase, “, Indiana State University, the Indiana State University Board of Trustees and the Architect/Engineer,” following the word “Contractor,” in the second line.
- D. Subparagraph 11.1.1 (renumbered 11.2.1): Amend this Subparagraph by adding Sub-Subparagraphs .9 and .10 as follows:

“.9 Liability insurance shall include all major divisions of coverage and be on a comprehensive basis including:

  - Premises Operations (including X, C, and U coverage’s as applicable)
  - Independent Contractor’s Protective
  - Products and Completed Operations
  - Personal Injury Liability with Employment Exclusion deleted
  - Contractual, including specified provision for the Contractor’s obligations under Paragraph 3.18
  - Owned, non-owned and hired motor vehicles”

“.10 Broad Form Property Damage including Completed Operations: If the General Liability coverage’s are provided by a Commercial General Liability Policy on a claims made basis, the policy date or Retroactive Date shall predate the Contract; the termination date of the policy or applicable extended reporting period shall be no earlier than the termination date of coverage’s required to be maintained after final payment, certified in accordance with Subparagraph 9.10.2.”
- E. Subparagraph 11.1.2 (renumbered 11.2.2): Add the following renumbered Subparagraph 11.2.2.1

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

“11.2.2.1 The insurance required by renumbered Subparagraph 11.2.1 shall be written for not less than the following limits, or greater if required by law:

See Section 00 20 20 for Insurance Requirement Levels

- F. Subparagraph 11.1.3 (renumbered 11.2.3): Amend this Subparagraph by changing the word “30” to “60” in the second sentence.

- G. Subparagraph 11.1.3 (renumbered 11.2.3): Amend this Subparagraph by deleting the last sentence beginning with the phrase, “Information concerning reduction....” And substituting the following:

“The form of the certificate shall be AIA Document G715, SUPPLEMENTAL ATTACHMENT for Acord Certificate of Insurance 25-S (7/90). Contractor shall furnish promptly to the Owner copies of any endorsements that are subsequently issued amending coverage or limits. Certificates of Insurance shall name the Owner (Indiana State University Board of Trustees) and Architect/Engineer as ‘Additional Insured’s.’”

- H. Paragraph 11.1 (renumbered 11.2): Amend this Paragraph by adding Subparagraph 11.2.5 as follows:

“11.2.5 The Contractor, in connection with the above mentioned Workmen’s Compensation and Occupational Disease Insurance, shall furnish to the Owner, prior to commencement of the Work, duly executed and validated forms as prescribed by the Indiana Industrial Board showing that such insurance is in full force and effect.”

- I. Sub-subparagraph 11.3.1.1 (renumbered 11.4.1.1): Amend this Subparagraph by adding the following Subparagraph 11.4.1.1.1:

“11.4.1.1.1: Such Insurance shall not insure against loss due to theft of Contractor’s, Subcontractor’s, Sub-Subcontractor’s tools, equipment, and other personal property. The responsibility to guard against such thefts shall lie with the respective Contractor, Subcontractor, or Sub-Subcontractor whose tools, equipment, and other personal property are susceptible to such thefts.”

- J. Subparagraph 11.3.1.3 (renumbered 11.4.1.3): Add the following phrase to the end of the sentence:

The deductible amount shall be \$25,000.00 unless otherwise advised by the Owner.

- K. Subparagraph 11.3.9 (renumbered 11.4.9): Delete this Subparagraph in its entirety.

## 2.12 ARTICLE 12

- A. Subparagraph 12.2.2.1: Amend this Subparagraph by adding the following sentence to the end:

“Where special warranties of longer duration are required, the Contractor shall secure warranties from Subcontractors, manufacturers and/or material suppliers as applicable, addressed to and in favor of the Owner, and deliver copies of same to the Owner upon completion of the Work. Delivery of said warranties shall not relieve Contractor of any obligation assumed under any other provisions of the Contract.”

## 2.13 ARTICLE 13

- A. Subparagraph 13.1: Delete the text in its entirety and replace with the following:

“13.1 Contractor and all Subcontractors are responsible to comply with Indiana Code as it pertains to public works projects. The following are notable requirements set forth in IC 5-16-13, in effect as of July 1, 2015, but are not inclusive of all requirements.”

- B. Subparagraph 13.1: Add the following numbered Subparagraph 13.1.1:

“13.1.1 Contractor agrees, and represents to Owner, that at least 15% of the Contract Price (at the time this Agreement is executed) is comprised of any combination of the

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

following: 1) Work performed by Contractor's employees; 2) Services supplied directly by Contractor's employees; or 3) Materials supplied directly by Contractor.

- C. Subparagraph 13.1: Add the following numbered Subparagraph 13.1.2:

"13.1.2 Contractor and all Subcontractors, regardless of tier, shall not pay cash to its employees for Work performed on this public works Project."

- D. Subparagraph 13.1: Add the following numbered Subparagraph 13.1.3:

"13.1.3 Contractor and all Subcontractors, regardless of tier, shall comply with federal Fair Labor Standards Act of 1938."

- E. Subparagraph 13.1: Add the following numbered Subparagraph 13.1.4:

"13.1.4 Contractor and all Subcontractors, regardless of tier, shall be in compliance with workers compensation requirements of Indiana Code 22-3-5-1 and Indiana Code 22-3-7-34 and commits worker's compensation fraud if such Contractor or Subcontractor falsely classifies an employee as an independent contractor, sole proprietor, owner, partner, officer, or member of a limited liability company."

- F. Subparagraph 13.1: Add the following numbered Subparagraph 13.1.5:

"13.1.5 Contractor and all Subcontractor, regardless of tier, shall be in compliance with unemployment compensation system requirements of Indiana Code 22-4-1 through 22-4-39-5."

- G. Subparagraph 13.1: Add the following numbered Subparagraph 13.1.6:

"13.1.6 Contractor and all Subcontractors, regardless of tier, shall be in compliance with requirements for drug testing of its employees set forth in Indiana Code 4-13-18-1 through 4-13-18-7 if estimated cost of public works Contract is at least \$150,000. With each application for payment the Contractor shall submit an affidavit, dated and signed by the Contractor, that neither they nor, to their knowledge, any of their subcontractors has violated the "Drug Testing Program provision of the Indiana Code."

- H. Subparagraph 13.1: Add the following numbered Subparagraph 13.1.7:

"13.1.7 Following provisions shall be in effect for Contracts awarded after March 31, 2018."

- I. Subparagraph 13.1.7: Add the following numbered Subparagraph 13.1.7.1:

"13.1.7.1 Contractor and Subcontractors, regardless of tier, shall preserve its payroll and related records for three (3) years after completion of the project work and such records shall be open to inspection by the Indiana Department of Workforce Development."

- J. Subparagraph 13.1.7: Add the following numbered Subparagraphs 13.1.7.2 and 13.1.7.2.1:

"13.1.7.2 Recommended Employment of Apprentices"

"13.1.7.2.1 Owner strongly recommends that Contractor employs apprentices from each building trades craft involved in the Project to the maximum extent feasible. In doing so, the Contractor shall consider whether such apprentices are indentured into a Joint Apprenticeship Training Program or other comparable bona fide apprenticeship training program, registered and certified with the U.S. Department of Labor, Bureau of Apprenticeship and Training and shall use as a guide the Apprenticeship Standards of the Labor-Management Contract for the appropriate jurisdictional area when determining the appropriate ratio of apprentices from each respective craft."

- K. Subparagraph 13.1.7: Add the following numbered Subparagraphs 13.1.7.3, 13.1.7.3.1 and 13.1.7.3.2:

"13.1.7.3 Contractor's Certification of Authorized Employment (E-Verify Requirements.)"

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

“13.1.7.3.1 In accordance with Indiana Code 22-5-1. 7 as amended, each Contractor in any tier of a public works project shall not knowingly employ unauthorized aliens. Every contractor shall enroll in and verify the work eligibility status of all employees hired after June 30, 2015 using the U.S. Citizenship and Immigration Services (USCIS) E-Verify program as defined in IC §22-5-1.7-3, unless the E-Verify program no longer exists.

“13.1.7.3.2 The Prime Contractor shall require their subcontractors who perform work under this Contract to certify to the Prime Contractor that the subcontractor does not knowingly employ or contract with an unauthorized alien and that the subcontractor has enrolled and is participating in the E-Verify program. The Prime Contractor agrees to maintain this certification throughout the duration of the term of a contract with a subcontractor. The Prime Contractor and its sub-contractors at all levels must comply with all provisions of the statute or the Contract is subject to cancellation.”

- L. Subparagraph 13.1.7: Add the following numbered Subparagraphs 13.1.7.4 and 13.1.7.4.1

“13.1.7.4 Non-Collusion Affidavit”

“13.1.7.4.1 The Bidder, by its officers and agents or representatives present at the time of filing their bid, being duly sworn, say on their oaths that neither they nor any of them have in any way, directly or indirectly, entered into any arrangement or agreement with any other bidder, or with any public office of the State of Indiana, of any county or municipality or other public offices whereby such affiance or either of them, has paid or is to pay to such other bidder or public officer any sum of money, or has given or is to give to such other bidders or public officer anything of value whatever, or such affiance of affiance or either of them has not, directly or indirectly entered into any arrangement or agreement with any other bidder or bidders, which tends to or does lessen or destroy free competition in letting of the contract sought for by the attached bids; that no inducement of any form or character other than which appears upon the face of the bid will be suggested, offered, paid, or delivered to any person whomsoever to influence the acceptance of the said bid or awarding of the contract, nor has this bidder any agreement or understanding of any kind whatsoever, with any person whomsoever to pay, deliver to, or share with any other person in any way or manner, any of the proceeds of the contract sought by this bid.”

- M. Subparagraph 13.1.7: Add the following numbered Subparagraphs 13.1.7.5 and 13.1.7.5.1

“13.1.7.5 Non-Discrimination”

“13.1.7.5.1 The Bidder and its Subcontractors, if any, shall not discriminate against any employee or applicant for employment, to be employed in the performance of this Contract, with respect to their hire, tenure, terms, conditions or privileges of employment or any matter directly or indirectly related to employment because of their sex, race, natural origin, ancestry or religion or disability as prohibited under the Americans with Disabilities Act. Breach of this covenant may be regarded as a material breach of the Contract.”

- N. Subparagraph 13.1.7: Add the following numbered Subparagraphs 13.1.7.6 and 13.1.7.6.1

“13.1.7.6 Certification of United States Steel”

“13.1.7.6.1 The Bidder certifies that the Bidder and all Subcontractors will comply with the statutory obligations to use steel products made in the United States.

- O. Subparagraph 13.5.1: Add the following Subparagraph 13.5.1.1:

“13.5.1.1: Prior to commencing the Project the Contractor shall submit a list of all proposed testing companies for the Project to the Architect/Engineer and Owner for approval.”

- P. Subparagraph 13.5.2: Add the following Subparagraph 13.5.2.1

00 20 11  
AMENDMENTS TO GENERAL CONDITIONS

“13.5.2.1: Prior to testing, unless the testing company has been previously approved, the Contractor shall submit to the Architect/Engineer and Owner the proposed testing company for approval.”

2.14 ARTICLE 14

- A. Subparagraph 14.1.1: Amend this Subparagraph by deleting Sub-Subparagraph .4.
- B. Subparagraph 14.2.1: Amend this Subparagraph by adding a new Sub-Subparagraph 14.2.1.5 as follows:

“.5 becomes financially incapable of completing the Work contemplated by the Contract Documents.”

- C. Add subparagraph 14.2.5 as follows

“14.2.5 Contractor shall be responsible to reimburse Owner all attorney’s fees and expenses incurred by Owner if Contractor is terminated for cause.”

2.15 ARTICLE 15

- A. Subparagraph 15.1.2: Delete the text of this Subparagraph and replace by adding the following Subparagraph 15.1.2.1, Subparagraph 15.1.2.2 and Subparagraph 15.1.2.3:

“Subparagraph 15.1.2.1 Claims must be initiated by written notice to the Architect within 21 calendar days after the occurrence of the event.”

“Subparagraph 15.1.2.2 Notice of a claim must include what the claim is for, when the event occurred causing the claim, the amount of additional time (Project extension) being requested and any financial implications of the claim with sufficient specificity to allow the Owner an opportunity to modify the Project scope to remain within the Owner’s approved budget.”

“Subparagraph 15.1.2.3 If adverse weather conditions are the basis for a Claim for additional time, such Claim shall be documented by data substantiating that weather conditions were abnormal for the period of time, could not have been reasonably anticipated and had an adverse effect on the scheduled construction.”

- B. Subparagraph 15.1.4 delete this Subparagraph in its entirety.
- C. Subparagraph 15.1.5 delete this and all its subparagraphs in their entirety.
- D. Subparagraph 15.3.2 Delete the text in its entirety and replace with the following:

“15.3.2. If, through acts of neglect on the part of the Contractor, any other Contractor or Subcontractor shall suffer loss or damage on the Work, the Contractor shall agree to settle with such other Contractor or Subcontractor by negotiation or binding dispute resolution, if such other Contractor or Subcontractor will so settle. If such other Contractor or Subcontractor shall assert any claim against the Owner on account of any damage alleged to have been so sustained, the Owner shall notify the Contractor, who shall indemnify and save harmless the Owner against any such claim, including legal defense costs.”

- E. Subparagraph 15.3.3 In the first sentence after the word “fee” add a period and delete the remainder of that sentence.
- F. Paragraph 15.4: Delete this Paragraph in its entirety. Additionally; delete all references and requirements for Arbitration throughout the entire AIA A201-2007 Document and replace with Litigation.

PART 3 – NOT USED

END OF SECTION 00 20 11

Blank Page

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

Preface: ***These Supplementary General Conditions supplement and modify AIA Document A201 General Conditions of the Contract for Construction (2007 Edition), General Conditions between the Owner and Contractor.***

PART 1- SUPPLEMENTARY GENERAL CONDITIONS

1.01 DEFINITIONS

- A. "Contract". The Contract or Agreement, the Notice to Bidders, the Instructions to Bidders, the Bid or Proposal, the General Conditions, The Special Conditions, the Specification and Drawings, also any Addenda or the Modifications incorporated in any of the above documents before the execution of the Contract or Agreement.
- B. "Owner": The Indiana State University Board of Trustees.
- C. "Architect/Engineer": the individual or firm hired by the Owner to prepare the Construction Documents and to Administer the Contract.
- D. "Contractor": The person, firm or corporation who, with the Owner, executes the Contract, or the duly recognized assignee thereof.
- E. "Subcontractor": A person, firm or corporation who, under contract with Contractor, furnished material only, labor and materials, or labor only, at the site of or for the project.
- F. "Director": The Director of Department of Facilities Management at Indiana State University, or his duly authorized representative.
- G. "Surety": Any person, firm or corporation which has executed, as surety, the Contractor's performance bond securing the performance of the within contracts.
- H. "Work": Includes both materials and labor.

1.02 BOND

- A. Before any contract made for this work becomes valid, the Contractor shall furnish the Owner a satisfactory performance and payment bonds, in such form as the Owner may prescribe and with such surety or sureties as it may approve each in an amount equal to 100% of the total contract price. All bonds shall be in the form prescribed by the Contract Documents except as provided otherwise by Laws or Regulations, and shall be executed by such sureties as are named in the list of "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Circular 570 (amended) by the Financial Management Service, Surety Bond Branch, U.S. Department of the Treasury. All bonds signed by an agent or attorney-in-fact must be accompanied by a certified copy of that individual's authority to bind the surety. These bonds shall guarantee all labor and material to be as required, the faithful payment of any claim or liens from any cause for which the Contractor or any Subcontractor is liable, including those for labor, materials, utility service, transportation costs and for supplies, equipment, machinery (or the rental thereof).
- B. Licensed Sureties and Insurers
  - 1. All bonds required by the Contract Documents (such as the Bid Specifications, Award Letter, Contract for Construction, etc.) to be purchased and maintained by the Contractor shall be obtained from surety or insurance companies that are duly licensed or authorized in the jurisdiction in which the Project is located to issue bonds or insurance policies for the limits and coverages so required. In addition to appearing on Circular 570 U.S. Dept. of the Treasury, such Surety or insurance company shall maintain an A.M. Best's Rating of not less than "A".

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

C. The surety bond shall contain the following paragraph:

1. "The said surety for value received hereby stipulates and agrees that no change, extension of time, alterations, or additions to the terms of the contract, or to the work to be performed hereunder, or the specifications accompanying them, shall in any way affect its obligations on this bond, alteration or addition to the terms of the contract, or to the work or the specifications."

1.03 INSURANCE

**NOTE: The dollar amounts shown in this paragraph are for jobs over \$50,000.  
See footnotes and amounts for jobs less than \$50,000.**

- A. The Prime Contractor(s) shall provide all insurances listed here-in in these Specifications and shall require the Subcontractor(s) to provide the same. The Prime Contractor(s) shall not commence work under this Contract until they have obtained all insurance required by these specifications and until such insurance has been approved by the Owner, nor shall the Contractor allow any Subcontractor to commence work on his subcontract until all similar insurance required of the Subcontractor has been obtained. Policies expiring on a fixed date before final acceptance of the project must be renewed and evidence of such renewal submitted to the Owner before such date.
- B. The Prime Contractor(s) shall furnish the Owner with satisfactory evidence of the insurance required, with satisfactory compliance as determined solely by Owner.
- C. It is solely the responsibility of the Prime Contractor(s) to confirm that the Subcontractor(s) are in compliance with the insurance requirements of these Specifications, to maintain copies of the Subcontractors insurance on file and to be prepared to provide evidence of these insurances to the Owner upon demand.
- D. Insurance Required:
  1. Worker's Compensation and Employers Insurance:
    - a. The Prime Contractor(s) shall maintain during the life of this contract Worker's Compensation and Employers Liability Insurance for all Prime Contractor's employees employed at or involved in any manner with the project, and, in case any work is sublet, the Prime Contractor(s) shall require the Subcontractor(s), at their own expense, similarly to provide Worker's Compensation and Employers Liability Insurance for all of the Subcontractor's employees engaged in or involved in any manner with work under this contract. Such Workers' Compensation insurance will be in accordance with the statutory requirements of the State of Indiana, with and including Worker's Compensation for All Other States, if any. The Prime Contractor(s) shall and require Subcontractor(s) to provide insurance coverage equal to that provided under the Worker's Compensation Act, for the protection of the Contractor's employees not otherwise protected. Employer's liability coverage must be maintained in amounts not less than \$500,000/\$500,000/\$500,000. Limits may be provided through a single policy or a primary/excess policy basis.
  2. Commercial General Liability Insurance.<sup>1</sup>
    - a. The Contractor shall and require Subcontractors, at their own expense respectively, to maintain during the life of this contract Commercial General Liability Insurance insuring the Prime Contractor and any subcontractor, and owner and any other party required to be insured, from claims for bodily injury, death, personal injury and property damage which may arise from or on account of operations under this Contract, whether such operations be by the Prime Contractor(s) or by any

---

<sup>1</sup> For Smaller Contracts, the following limits (including umbrella liability) are permitted:

Contracts \$25,000 to \$49,999.....	\$ 2,000,000
"       \$10,000 to \$24,999.....	\$ 1,000,000
"       \$ 9,999 and under.....	\$ 500,000

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

Subcontractor or by anyone directly or indirectly employed by either of them and the amounts of such insurance shall be as follows:

- \$2,000,000 General Aggregate
- \$1,000,000 Combined Single Limit Bodily Injury, Property Damage
- \$1,000,000 Products/Completed Operations
- \$1,000,000 Personal Injury and Advertising Injury
- \$ 100,000 Fire Damage

The General Aggregate limit shall apply separately, in total, to this project only.

3. Business Auto Insurance<sup>2</sup>:

- a. The Prime Contractor(s) shall and shall require all Subcontractors to maintain at their own expense respectively, at all times during the life of this contract, business auto insurance covering all liability and claims arising from the ownership, use, maintenance, operation, loading or unloading of automobiles anywhere in the United States, in connection with the performance of the Contract, whether such automobiles are owned, hired, or non-owned by the Contractor or Subcontractors.
- b. Such auto insurance shall be written with a limit of not less than \$1,000,000 per occurrence as a combined single limit for Bodily Injury and Property Damage coverage.

4. Umbrella Liability Insurance<sup>2</sup>:

- a. The Prime Contractor(s) shall and shall require all Subcontractors to maintain at their own expense respectively, at all times during the life of this Contract, Umbrella Liability Insurance providing excess coverage over the above specified primary insurance in an amount not less than:
  - \$1,000,000 for contracts \$50,000 to \$99,999.99
  - \$2,000,000 for contracts \$100,000 to \$999,999.99
  - \$3,000,000 for contracts \$ 1,000,000 to \$2,999,999.99
  - \$5,000,000 for contracts over \$3,000,000

E. Additional Insurance Requirements:

1. The Prime Contractor(s) shall and shall require all Subcontractors to include Indiana State University, Indiana State University Board of Trustees and any Architect/Engineer Firm hired by Indiana State University for the Project, as an additional insured on their Commercial General Liability, Umbrella Liability Insurance and Business Auto Insurance policies with regard to this contract.
2. Certificate(s) of Insurance shall include an endorsement of a Waiver of Subrogation in favor of the Owner for Commercial General Liability Insurance, Umbrella Liability Insurance, Worker's Compensation and Employers Liability Insurance and Business Auto Insurance.
3. On Projects in excess of \$1,000,000.00 a copy of the applicable pages from the Contractor's policy shall be provided showing the endorsements listed in paragraphs 1 and 2 of this Item 1.03 E.
4. With regard to the above mentioned Commercial General Liability, Business Auto, and Umbrella Liability Insurance, if in the event of any major change or cancellation of such policy, the Prime Contractor(s) shall and shall require all Subcontractors to give a 30-day advance notice to the Owner.
5. The Prime Contractor(s) shall and shall require of all Subcontractors that the insurance companies must have an A.M. Best's rating of not less than an "A" for projects over \$150,000 and a rating of B+ or higher for projects under \$150,000 and that the insurance

<sup>2</sup> For Smaller Contracts, the following limits (including umbrella liability) are permitted

Contracts \$25,000 to \$49,999.....	\$2,000,000
\$10,000 to \$24,999.....	\$1,000,000
\$ 9,999 and under.....	\$ 500,000

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

companies are duly licensed or authorized in the jurisdiction in which the Project is located to issue insurance policies for the limits and coverages so required.

F. Builders Risk Insurance:

1. The Owner agrees to provide property insurance including Builders Risk insurance for property under construction, and all materials and labor at or within 1,000 feet of the site intended for use in the "work" or project. Pursuant to this agreement, Owner hereby affirms the policy contains a waiver of subrogation in favor of the contractor or subcontractors should loss or damage of the type insured against result in loss to covered property; and Owner agrees to release from liability the contractor, to the extent such loss or damage is insured by said policy.
2. Coverage does not extend to personal property, tools, equipment, scaffolding, staging, or similar equipment of the contract or subcontractor(s), or any employees thereof.
3. Notwithstanding the foregoing however, Contractor is responsible for the property insurance deductible of \$25,000 applicable to each covered loss to the work or project. Contractor acknowledges and affirms it will, without delay, pay the deductible, or if the loss remains within the deductible, pay that part of the deductible that equals the loss amount.

G. Indemnification:

1. The Prime Contractor shall and shall require Subcontractors to indemnify the Owner and any other party required to be insured from all claims arising from the failure of the Prime Contractor(s) to require the Subcontractors to provide the insurance required by these Specifications.
2. Notwithstanding any other provision to the contrary, the Contractor(s) agree to indemnify the Owner only for losses due to personal injury, or property damage to the extent caused by Contractor's negligent acts or omissions, or the negligent acts or omissions of Contractor's employees, agents and subcontractors during the performance of this Contract, but not to the extent caused by others. The Contractor shall defend Owner on claims that do not present a conflict of legal theory or fact between Owner and Contractor. Each party shall defend itself on any claim that does present a conflict of legal theory or fact between the parties.
3. Under no circumstances shall either party be liable for any loss, damage or delay due to any cause beyond either party's reasonable control, including but not limited to acts of government, fire, explosion, theft, weather damage, flood, earthquake, riot, civil commotion, war, mischief or act of God.
4. In the event of a strike or work stoppage by Contractor's employees, the Contractor agrees to use its best efforts to fulfill its obligations pursuant to their contract utilizing management and supervisory personnel.
5. Under no circumstances shall either party be liable to the other for special, indirect, or consequential damages of any kind including, but not limited to, loss of profits, loss of good will, loss of business opportunity, additional financing costs or loss of use of any equipment or property, whether in contract, tort (including negligence), warranty or otherwise, notwithstanding any indemnity or other provision to the contrary.

1.04 SUBCONTRACTORS

- A. At the time of Bid the Prime Contractor(s) (Bidder(s)) shall provide the names of the proposed Subcontractors listed in Appendix A of the Bid Form. Prior to the Awarding of the Contract, the Contractor shall submit to the Owner, in writing, the names of all the proposed Subcontractors and major material vendors. All Subcontractors shall be licensed and bonded and shall be held to the same level of experience and qualifications as are required of the Prime Contractor (Bidder) in Section 001000 NOTICE TO BIDDERS last paragraph.
- B. The Prime Contractor shall be responsible for the acts and omissions of his Subcontractors and of persons either directly or indirectly employed by them as he is for the acts and omissions of persons directly employed by him.

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

- C. Nothing contained in the Contract shall create any contractual relationship between any Sub-contractor and the Owner, and no Subcontractor will be recognized as a party to the Contract.
- D. The Prime Contractor shall use the Subcontractors, Suppliers, Materials and Equipment as listed in the Bid Form Appendix "A" submitted at the time of Bid. There shall be no changes permitted to this list except as listed in Section 00 10 10 Paragraph 3.14 APPENDIX A, Item B.1.

1.05 DRAWINGS

- A. The drawings referred to in these specifications show such plans and details as are regarded necessary by the Architect/Engineer and/or the Owner to properly illustrate the work required, to estimate the cost of the work, and to complete its construction.
- B. The Architect/Engineer and/or the Owner will from time to time furnish such additional detail and working drawings as may be deemed necessary to interpret and explain the Contract drawings and all such additional drawings shall be of equal force with those mentioned above and shall be considered as forming part of this Contract.
- C. The general character of the work shall be subject to minor modifications when detailed or full sized drawings for such work are prepared.
- D. All lettering on drawings is to be considered a part of the drawings.
- E. All drawings, specifications, etc., are the property of the Owner and shall be returned before the final award is issued, if so requested.

1.06 RELATIONSHIP AND PRIORITY OF DOCUMENTS

- A. The documents comprising the Contract are complementary and what is called for by one shall be as binding as if called for by all. The intention of the Contract is to include all labor, materials, and equipment necessary for the proper execution of the work.
- B. In the case of a discrepancy between the requirements of the Drawings and the Specifications or between Sections of the Specifications:
  - 1. The more stringent shall apply.
  - 2. In equal situations the Specifications or as directed by the Owner prevails.

1.07 PERMITS

- A. The Contractor shall give all requisite notices to public officials, secure and pay for all permits, legal fees or charges, have the work inspected by all proper public authorities, pay all charges connected with such inspections and deliver the proper inspection certificates and all receipts for charges to the Owner.
- B. The Contractor shall give all notices and comply with all laws, ordinances, rules, regulations and orders of any public authority bearing on the performance of the work. If the Contractor observes that any of the Contract Documents are at variance therewith in any respect, he shall promptly notify the Owner in writing, and any necessary change shall be accomplished by the appropriate modification. If the Contractor performs any work knowing it to be contrary to such laws, ordinances, rules and regulations and without such notice to the Architect, he shall assume full responsibility therefore and shall bear all cost attributable thereto.

1.08 SAMPLES

- A. The Contractor shall submit in writing to the Owner for approval samples and shop or installation drawings of the materials he proposes to use, or such other related materials as owner otherwise requests.
- B. Each sample shall be labeled, bearing the name and quality of the material, the Contractor's name, the date and a description of the sample. A letter from the Contractor stating that the samples conform to the requirements of the drawings and specifications shall accompany all such samples. Transportation charges on all samples shall be prepaid.

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

- C. Samples and drawings shall be submitted in due time so as to permit proper consideration without delaying the Contractor's operation. Material shall not be ordered until approval is received from the Owner, in writing. The use of any material will be permitted only so long as it remains equal to the approved sample.

1.09 CONTRACTOR'S SUPERVISION

- A. The Prime Contractor shall maintain on the Project site a competent Project Superintendent at all times any work is being performed; either by the Prime Contractor's workers or any Subcontractor's workers. **If the Project Superintendent is not on the Project site the Owner shall be notified immediately. If the Project Superintendent is not on the jobsite, without written prior approval or notification to be away from the jobsite, the Owner may be entitled to a \$1,000 credit for each day or part of the day the Project Superintendent is not onsite while actual work is being performed.**
- B. The Contractor's superintendent shall represent the Contractor during their absence and all directions given the superintendent shall be as binding as if given to the Contractor.

1.11 LAYING OUT AND UTILITY LOCATES

- A. The Contractor shall thoroughly examine the drawings and specifications before commencing work and report to the Owner if any discrepancy, errors, or defect appears, but he shall not be held responsible for their existence.
- B. The Contractor shall lay out his own work.
- C. Prior to any cutting, drilling, trenching, excavating or other earthwork the Contractor shall determine the exact location of all utility lines and appurtenances that could be encountered which are not shown on the drawings as follows.
  - 1. A minimum of forty eight (48) hours prior to commencing work the Contractor shall contact Indiana Locates for all public utility locates.
  - 2. A minimum of forty eight (48) hours prior to commencing work the Contractor shall contact the Project Coordinator for all ISU Utility locates.
- D. Failure to contact for the appropriate locates shall make Contractor solely responsible for all costs incurred to repair all damaged utility lines or appurtenances.
- E. The Contractor shall hand excavate within three (3) feet, or as required by the Utility Company, on either side of a marked utility unless exact depth of the marked utility is known and the planned work will in no way be in close proximity with the utility line or appurtenance.

1.12 MATERIAL AND LABOR

- A. Except as otherwise stipulated, the Contractor shall provide and pay for all materials, labor, tools and equipment necessary for the execution of the work.
- B. The Owner reserves the right to require the Contractor to discontinue the service of any workmen employed on the work whom he deems incompetent, negligent, or otherwise objectionable, and to suspend any portion of the work embraced in the Contract whenever, in his opinion, it would be inexpedient to start or continue such work.

1.13 DEFECTIVE WORK AND MATERIALS

- A. Any materials and workmanship found to be defective, improperly placed, not in strict conformity with the drawings and specifications, or defaced or injured through action of fire or elements, through usage by the Contractor or his employees or from any other cause, shall be removed immediately from the premises and satisfactory materials or work substituted therefore without delay. This shall include making good the work of other Contractors destroyed or damaged by such removal or replacement. The cost of the above replacements shall be borne by the Contractor responsible for the defective work or material.
- B. Should the Contractor in the execution of his work discover any imperfections or errors in the work of other Contractors that would interfere with the proper execution of his contract, he

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

shall immediately report this fact to the Owner. Errors or imperfections in the work of other Contractors will in no case excuse installation of imperfect work by this Contractor.

- C. No previous inspection shall be held as an acceptance of defective work or materials or relieve the Contractor from the obligation to furnish sound materials or to perform satisfactory work in accordance with the contract requirements. The final payment shall not relieve the Contractor of the responsibility for faulty materials or workmanship and he shall remedy all such defects, settlements, or other work resulting there from, which shall appear within a period of one (1) year from date of final acceptance or within the period stipulated in certain separate guarantees or bonds required elsewhere in the specifications, whichever may be the longer.
- D. The Owner shall be the sole judge of the materials furnished and the character of work performed.

**1.14 RESPONSIBILITY FOR DAMAGE**

- A. The Contractor shall be responsible for all damages to life and property due to his action or failure to act when action would reasonably be expected. He shall be responsible for all parts of his work, both temporary and permanent, until the work under his contract is declared accepted by the Owner.
- B. The Contractor shall continuously maintain adequate protection of all his work from damage, and shall protect the Owner's property and all adjacent property from injury in connection with the Contract.
- C. The Contractor shall be held responsible for damage to work of other Contractors that is the result of his operation.
- D. Should the Contractor believe that the work shown by the drawings or specifications is not correct when executed to obtain safe and substantial results, or if any discrepancy appears, it is his duty to immediately notify the Owner in writing, stop work on same, and await written instruction.

**1.15 INDIANA SALES TAX**

- A. Indiana State University is a Tax Exempt Institution and Indiana Sales Tax for products permanently incorporated in work shall not be included as part of the Bid or on any Application for Payment.
- B. Contractor Responsibilities:
  - 1. Pay Indiana Sales Tax on all non-exempt purchases and provide the Owner with detailed documentation of all taxes of non-exempt items invoiced on their Application for Payment. Documentation shall be provided with their Application for Payment at the time of first billing of each taxable item.
  - 2. Upon completion of work, file with Owner notarized statement that all purchases were made under their exemption certificate where entitled to be exempt.
  - 3. Pay legally assessed penalties for improper use of the exemption certificate number.

**1.16 CLEANING UP**

- A. The Contractor shall at all times keep the premises free from accumulations of waste material or rubbish.
- B. When directed by the Owner, the Contractor shall clear out and remove any rubbish that may constitute an obstruction to the progress of the work.
- C. At completion of the contract, the Contractor shall remove from the premises all rubbish and surplus material, and shall repair any damage to his work no matter by who caused, and shall leave the premises clean and in perfect repair and order.

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

1.17 NON-DISCRIMINATION CLAUSE

- A. "Pursuant to the requirements of Indiana Code 22-9-1-10 and 5-16-6-1, Contractor and his Subcontractors may not discriminate against any employee or applicant for employment to be employed in the performance of such contract, with respect to their hire, tenure, terms, conditions or privileges of employment or any matter directly or indirectly related to employment because of their sex, race, natural origin, ancestry or religion or disability as prohibited under the Americans With Disabilities Act. The contractor and subcontractor, if any, agrees to comply with all the provisions contained in the Equal Opportunity Clause quoted in Executive Orders No. 11246 and No. 11375. In addition, the contractor shall cause this Equal Opportunity Clause to be included in the subcontracts or purchase orders hereunder unless exempted by rules, regulations and orders of the Secretary of Labor issued pursuant to Section 204 of the Executive Orders No. 11246 and No. 11375 as amended. Breach of the covenant may be regarded as a material breach of contract."

1.18 PUBLIC RELATIONS

- A. Indiana State University is an Affirmative Action Institution. Any inappropriate actions toward any Indiana State University student, faculty or staff member by any Contractor's Employee shall result in the employee being told to leave the Campus of Indiana State University immediately. This employee shall not be allowed to return to work on the Project for the duration of the Project or longer. Repeated offences by a Contractor's employees may result in disqualification of the Contractor for this and future Indiana State University Projects.

1.19 "OR APPROVED EQUAL" CLAUSE

- A. Unless the Specifications indicates that substitutions are not allowed, whenever a material or article required is specified or shown on the plans by using the name of the proprietary product or of a particular manufacturer or vendor, any material or article which will perform adequately the duties imposed by the general design will be considered equal and satisfactory providing the material or article so proposed is of equal substance and function in the Architect/Engineer and Owner's opinion. It shall not be purchased or installed without written approval. Requests for substitution prior to Bidding shall be as per Section 001010 INSTRUCTIONS TO BIDDERS Item 1.08
- B. Complete descriptive information, specifications and samples or sample material must be submitted at the time the proposal is submitted. In addition, a list of projects with dates and contact persons must be submitted at the time the proposal is submitted showing where the proposed alternate material or article has been installed or used. Failure to submit information as requested will be cause for rejection of the Bid submitted.

1.20 VERIFYING MEASUREMENTS

- A. The Contractor shall verify all measurements on the site and be responsible for any mistakes he may make and their results. If the Contractor discovers any discrepancy, in figures on the drawings, he shall report same to the Architect/Engineer and Owner before proceeding with any work affected by the discrepancy and shall be held responsible for results should he fail to make such reports.

1.21 EXTRAS

- A. Without invalidating the Contract, the Owner may order extra work or make changes by altering, adding to, or deducting from the work, the Contract sum being adjusted accordingly, and the consent of the Surety being first obtained where necessary or desirable. All work of the kind Bid upon shall be paid for at the price stipulated in the proposal, and no claims for any extra work or materials shall be allowed unless the work is ordered in writing by the Owner, and the price is stated in such order.
- B. Requests for compensation, for previously approved Change Orders omitted from an Application for Payment, received sixty (60) calendar days after Owner receipt of the Final Application for Payment (Release of Retainage) shall not be honored.

00 20 20  
SUPPLEMENTARY GENERAL CONDITIONS

1.22 GENERAL GUARANTY

- A. Neither the final certificate of payment nor any provision in the Contract documents nor partial or entire occupancy of the premises by the Owner shall constitute an acceptance of work not done in accordance with the Contract documents or relieve the Contractor of liability in respect to any express warranties or responsibility for faulty materials or workmanship. The Contractor shall remedy any defects in the work and pay for any damage to other work resulting there from, which shall appear within a period of one (1) year from the date of final acceptance of the work, unless a longer period is specified.

003000  
ISU SPECIAL REQUIREMENTS AND INFORMATION

PART 1- SPECIAL REQUIREMENTS

1.01 BARRICADES

- A. ISU will provide barricades during the initial closure of a construction site. However, once the Contractor mobilizes, ISU will remove the barricades, and Contractor shall replace them with his own. If additional barricades are required during the construction phase, Contractors shall provide them at their expense.

1.02 BURIED UTILITIES

- A. All Direct Buried Utility Lines and Utility Duct Banks will be marked by use of the appropriate marker tape continuously installed a minimum of twelve (12) inches above said utility line or duct bank. Marker tape shall be a minimum of six (6) inches wide.

1.03 REMOVAL AND RE-INSTALLATION OF EQUIPMENT

- A. The Owner is not responsible for the removal or re-installation of any equipment necessitated by this work.
- B. All electrical disconnects and reconnects of equipment necessitated by this work shall be performed by a licensed bonded Electrical Contractor hired by the Contractor to perform this work. The Owner will assist in locating the power source but will not be responsible for the actual performance the electrical work.

1.04 PRIME CONTRACTOR RIGHT OF SALVAGE

- A. The Owner has the first right of salvage of any items not slated for re-use on every Project.
- B. Should the Owner waive their right for salvage for any item not slated for re-use or designated in for recycling; then these items become the property of the Prime Contractor.
- C. The Prime Contractor at their discretion may grant to others the right to salvage items not slated for re-use and this may be used to comply with the recycling requirements as long as records are kept.
- D. However; once an item has been placed in a dumpster or any other trash receptacle no one is allowed to enter a dumpster or search through a trash receptacle for the purpose of removing items for salvage while these trash containers are on the campus of Indiana State University.
- E. The Prime Contractor shall protect these trash containers by use of a six (6) foot high chain link fence enclosure around the trash container(s) to prevent any person from gaining access to the trash containers for actions prohibited by this item.

1.05 CERTIFICATE OF INDUSTRIAL BOARD

- A. The Contractor shall furnish a certificate of insurance from an insurance company acceptable to Indiana State University evidencing that the Contractor has complied with the Indiana Worker's Compensation Law.

1.06 COVID 19 REQUIREMENTS FOR ISU PROJECT WORK

- A. Effective March 5, 2022 the wearing of masks is optional on the Campus of Indiana State University (ISU) and in ISU buildings. Contractor's employees will no longer be required to wear masks when working in occupied ISU buildings unless the occupant of the space where the work is being performed requests the Contractor's employees to wear a mask. The Contractor's employees shall have a mask available to put on if the occupant requests masks be worn in their space. The same applies to Vendors visiting the work space.
- B. Any Contractor and Subcontractor's employees exposed to Covid 19 shall be required to comply with CDC and State of Indiana guidelines, whichever is more stringent, for quarantine/isolation and shall not return to work on the Project until medically cleared to

ISU SPECIAL REQUIREMENTS AND INFORMATION

return to work. The effected Contractor and Subcontractor shall notify the Owner in writing of any Covid 19 incidents.

## 1.07 CAMPUS TOBACCO POLICY

- A. Effective in 2011 the following became the ISU smoking policy:
  1. The sale of tobacco products is prohibited on university-owned, operated, or leased property.
  2. The use of smoking tobacco products is prohibited on university-owned, operated, or leased property.
  3. The use of smoking tobacco products is permitted in privately owned vehicles and in designated smoking areas on campus.
  4. Any exceptions for the use of smoking tobacco products on university-owned, operated, or leased property must be approved by the President or Provost.
  5. Enforcement of this policy will depend on the cooperation of all faculty, staff, and students not only to comply with the policy, but also to encourage others to comply, in order to promote a healthy environment in which to work, study and live.
  6. Observation of violation of the policy should be reported to Public Safety at 812-237-5555. Follow up for violations of the policy should be referred to the appropriate administrative office for review and action for faculty through the office of Academic Affairs, for staff through Human Resources and to the Dean of Students for students.
- B. Amendments to this policy for Contractors
  1. Delete item 5 in its entirety and replace with the following:  
 "Enforcement of this policy will depend on the cooperation of the Contractors and their employees to comply with the policy and encourage others to comply in order to promote a healthy environment in which to work".
  2. Delete item 6 in its entirety and replace with the following:  
 "Observation of violation of this policy should be reported to the Contractor's Project Superintendent and/or the Owner's Project Manager. Contractor's employees repeatedly violating this policy may be asked to leave the Campus of Indiana State University and not be allowed to continue work on the Project".
  3. Add the following item 7:  
 "For major construction or renovation Projects (as determined solely by the Owner) the Owner shall designate a Contractor's smoking area near or within the boundaries of the job-site; unless the Prime Contractor(s) chooses to declare the entire Project job-site as non-smoking. Under no circumstances shall smoking be permitted within a building under construction or renovation.
- C. Additionally on construction sites on university-owned, operated, or leased property the use of smokeless tobacco products is prohibited.

## 1.08 PARKING REGULATIONS

- A. Beginning January 2018, construction employees will be required to park with a Construction Permit in Lot N (11<sup>th</sup> and Chestnut), Lot K (1<sup>st</sup> and Chestnut) or Lot I (3<sup>rd</sup> and Tippecanoe) when regular classes are in session. Contractors will be allowed to request an appropriate number of permits depending upon the project size for "core campus" parking. These permits should be used for carpooling or transporting employees to/from the construction and the construction parking lots. Contractors will also be allowed to have 2 foreman construction permits per project which will allow the foreman direct access to the construction project.
- B. When regular classes are not in session (i.e. weekends, Fall Break, Winter Recess, and summer sessions [the Monday after commencement thru one week before move-in]) contractors and their employees will be allowed to park in any regular/open lot on campus with a construction permit unless the lot is reserved for an event.

ISU SPECIAL REQUIREMENTS AND INFORMATION

## 1.09 ISU ENVIRONMENTAL CODE FOR CONTRACTORS

- A. Prior to starting any work, Contractor shall provide to the Owner a written document containing emergency procedures in case of:
  - 1. Liquid spills or leaks
  - 2. Release of gases or toxic vapors
  - 3. Excessive smoke
- B. This document shall contain but not be limited to:
  - 1. Emergency medical, fire, and police phone numbers including the ISU University Police.
  - 2. EPA phone numbers
  - 3. IDEM phone numbers
  - 4. Location of Material Safety Data Sheets.
- C. Prior to using any chemical or hazardous material the contractor shall provide the Owner with a copy of Material Data Safety Sheets covering the chemical or hazardous material.
- D. Contractor shall not burn or bury waste material on campus, or discharge any hazardous, or undesirable materials to sewers, or release toxic materials to the air.
- E. Contractor shall provide adequate exhaust ventilation for work area when generation of air contaminants is likely, i.e., painting, handling flammable liquids, welding, cutting, applying adhesives, etc.
- F. Contractor shall have at the job site Material Safety Data Sheets (MSDS) covering all chemicals and hazardous materials to be used in the work area. MSDS are to be available to workers and ISU personnel during normal working hours. Contractor shall use proper procedures based on MSDS when handling hazardous chemicals and materials.
- G. Contractor shall provide vacuum breakers or backflow preventers at each location where he utilizes building water supply.
- H. Any Contractor employee who deliberately interferes with environmental monitoring shall be removed from the project immediately.
- I. Contractor shall prevent fumes from welding, cutting, etc. and dust generated by construction from entering areas outside the work area by erecting plastic film barriers, sealing openings and ducts, and installing exhaust fans as required.
- J. Air contaminants in the work area shall not exceed OSHA regulations.

## 1.10 ISU SAFETY CODE FOR CONTRACTORS

- A. General:
  - 1. All work performed by contractors shall be done in accordance with all applicable Federal, State and Local laws, codes, and regulations and recommendations of Factory Mutual Engineering and Research (FM).
  - 2. Any safety hazard or unsafe act recognized by the Owner shall be reported to the Contractor responsible for job coordination. The safety hazard shall be corrected in a timely manner dictated by the severity of the safety hazard or unsafe act.
  - 3. Contractors shall remove all rubbish from the job site daily.
  - 4. All construction materials shall be protected from wind damage. Materials shall be secured to prevent them from becoming airborne with subsequent injury to personnel or damage to property.
- B. Communication:
  - 1. Contractor's job supervisors, or designated safety persons, must carry at all times a cellular phone to facilitate communication between the job site and the ISU University

ISU SPECIAL REQUIREMENTS AND INFORMATION

Police and Facilities Management Department. The cellular phones must remain on the job site during regular working hours. Contractor(s) shall report to the designated representative of ISU, or to ISU Police, any safety problem, code infraction, personal injury, or damage to ISU property. Report shall be made immediately after such occurrence.

C. Fire Protection:

1. Contractors shall provide a type "ABC" fire extinguisher for each work crew.
2. Extinguishers are to be kept within easy reach of each work crew and never farther than 10 feet from some worker. Inspection tags on extinguishers shall indicate the date of last inspection.
3. Contractor's supervisor shall keep torch cutting operations to a minimum by instructing personnel to use power saws, pipe cutters, etc. It shall be the duty and responsibility of the Contractor performing any cutting or welding to comply with the safety provisions of the National Fire Codes (NFC) pertaining to such work.
4. Contractor shall adhere to Factory Mutual Engineering and Research (FM) "Cutting and Welding" permit system. Permits are available through the Office of Environmental Safety's Fire Specialist Office at 812-237-4020.
5. Prime Contractor shall provide a one hour fire watch at the end of each workday when any cutting or welding occurred to assure that no possibility of fire exists from any work performed that day.

D. Safety Program: Prior to starting any work the Contractor shall submit to ISU a written safety program for the project including but not limited to:

1. Occupational Health & Environmental Controls
  - a. Personal Protective Equipment
  - b. Fire Protection & Prevention
  - c. Hand & Power Tools
  - d. Ladders & Scaffolds
  - e. Motor Vehicles and Mechanized Equipment
  - f. Accident Prevention
  - g. Safety Inspections
  - h. OSHA Inspections
2. Instruct all of his personnel as to location of emergency telephone(s).
3. Instruct all his personnel as to location of fire alarm (pull) stations.
4. Instruct all of his personnel to follow FM "Cutting and Welding Permit Systems" and emphasize the need to advise ISU's representative 24 hours prior to doing any welding, cutting, brazing, etc.
5. Instruct all his personnel to advise ISU representative prior to doing any welding, cutting, or brazing on or near a roof structure.
6. Instruct all personnel as to location on the job site of a copy of OSHA 29 CFR, Part 1926.
7. Instruct all of his personnel as to location of first aid supplies.

E. Flammable Storage:

1. Flammable or combustible liquids (paints, thinners, asphalt, gasoline, and tar or similar materials) shall be stored and handled as per NFPA 30, 4-5.5, and OSHA Construction Standard 1926.152. Quantities of flammable paints, etc., inside building work areas shall not exceed the amount to be used in one day.

ISU SPECIAL REQUIREMENTS AND INFORMATION

2. Containers of Class I liquids that are stored outside of an inside liquid storage area shall not exceed a capacity of 1 gallon, except safety cans shall be permitted up to 2 gallon capacity. Not more than 10 gallons of class I and class II liquids combined shall be stored in a single fire area outside of an approved storage cabinet or an inside liquid storage area unless in safety cans. Not more than 25 gallons of class I and class II liquids combined shall be stored in a single fire area in safety cans outside of an inside fluid storage area or an approved storage cabinet. Not more than 60 gallons of class IIIA liquids shall be stored outside of an inside liquid storage area or outside an approved storage cabinet.
  3. Rags saturated with flammable liquids shall be placed in approved cans and removed from the work site at the end of the work shift.
- F. Site Control: Contractor shall be responsible for securing the job site at all times and have personnel on call 24 hours per day for emergencies. Contractors shall protect their equipment and materials and ISU property from theft. Contractors shall secure doors, and openings including roof openings.
- G. Prior to a multiple day shutdown the Contractors shall:
1. Remove all debris and leave the premises broom clean.
  2. Shut off all unnecessary electric power and water supplies.
  3. Remove all flammable liquids from the work site.
  4. Secure small tools in gang boxes.
  5. Leave drives open for emergencies.
- H. Temporary Electrical Service:
1. Temporary electrical service shall be provided by a licensed, bonded electrical contractor.
  2. All extension cords shall be protected from abrasion and traffic. Multiple lengths of extension cord shall be connected with waterproof twistlock type connectors. Any electrical service over 115 volts shall be marked accordingly. All electrical power supplied from building service or portable generators shall have ground fault protection as part of the circuit.
  3. Portable generators or welders driven by internal combustion engines shall not be located inside the building. Positioning of this equipment outside the building shall be such that engine exhaust shall not enter the workplace or adjacent buildings.
- I. OSHA Reporting:
1. Contractors shall complete an OSHA 106 form on all reportable occupational injuries and illnesses for each of their job locations on the ISU campus. This requires posting the information from the initial accident report on a master log (OSHA 200) form within six working days after the accident occurs. This form must be kept available for OSHA Compliance Safety and Health Office and ISU review.
  2. See OSHA Regulations 29 CFR Part 1904, "Recording and Reporting Occupational Injuries and Illnesses"
- 1.11 FIRE SUPPRESSION SYSTEM REGULATIONS
- A. Prior to closing any fire suppression system valve or in any way making a fire suppression system inoperable the Contractor shall contact the Fire Specialist's Office at 812-237-4020 to obtain a FM Global Red Tag so the impairment to the system may be reported.
- B. When the work is complete the Contractor shall immediately contact the Fire Safety Specialist to report the work is complete so the red tag may be removed and FM Global notified that the system has been returned to normal operation.

ISU SPECIAL REQUIREMENTS AND INFORMATION

## 1.12 ELECTRICAL SAFETY REGULATIONS

- A. OSHA *Control of Hazardous Energy Lockout/Tagout Regulations* apply to all work performed on the Campus of Indiana State University. These Regulations are available for review on the OSHA Internet Website at <http://www.osha.gov/SLTC/controlhazardousenergy/index.html> . Any individual who removes another's lock or tag shall be ordered to leave Indiana State University and shall be disqualified from any future work at Indiana State University.
- B. High fault currents, in excess of 45kA, exist at certain points on electrical systems at Indiana State University. Employing Contractors shall make their employees working on campus electrical systems aware that this condition exists.
- C. No individual shall be permitted to install or service any energized circuit, equipment or apparatus where voltages greater than 100 volts to ground is present unless another individual is present.
- D. No individual shall be permitted to operate or service any main or feeder main overcurrent protection device, whether group mounted or individually mounted, unless another individual is present.
- E. Deliberately shorting a branch circuit to ground to locate a branch feeder breaker is strictly prohibited.
- F. Any individual observed in violation of Regulations "C", "D" or "E" may be asked to immediately leave the workplace and/or their employer may be fined based on the following scale. Violations may apply to one or multiple employees.
- 1<sup>st</sup> violation                      Notice of Violation Warning Placed in Employing Firm's Work Record File
  - 2<sup>nd</sup> violation                      \$100.00
  - 3<sup>rd</sup> violation                      \$250.00
  - All subsequent violations      \$500.00 per incident
- G. **Repeated violations may be cause to disqualify the individual and/or employing firm from any other future work on the campus of Indiana State University.**

## 1.13 FIRE ALARM SYSTEM COORDINATION WITH PROJECT WORK

- A. An automatic fire detection system may in operation in areas of work. Prior to start of Work the Contractor shall verify with the Owner if devices are present in the Work area.
- B. Contractor shall coordinate with Owner for the shut down and reactivation of automatic fire detection devices in work areas based on the following procedures.
1. Prior to 2:30pm on the day before work is scheduled the Contractor shall contact either Pat Teeters at 812-237-8187 (Office) or 812-230-6141 (Cellular) to request fire alarm devices be disabled. If no answer, call Brad Welker at 812-237-8109 (alternate contacts). The Contractor shall provide exact work location, the time the devices are required to be disabled by and a means by which to contact the Contractor the next day, i.e. pager or cellular phone number. It is permissible to leave a "voice mail" of the required information.
  2. Prior to starting work the next day the Contractor shall contact Pat Teeters (preferred contact) or Brad Welker (alternate contact) to verify if the required devices are disabled. Please listen carefully to the voice mail announcement for information in the event of no answer.
  3. Prior to leaving the job-site at the end of workday or by 2:30pm the Contractor shall contact one of the aforementioned individuals to report clearance to reactivate the devices for the evening and what, if any, devices require disabling for the following workday.

ISU SPECIAL REQUIREMENTS AND INFORMATION

C. Failure to follow these procedures may result in fines being levied on the Contractor based on the following schedule.

- 1<sup>st</sup> failure to call and schedule in advance – Warning.
- Any subsequent failure to call and schedule in advance – \$10.00 per occurrence
- 1<sup>st</sup> failure to call resulting in activation of fire alarm system – Warning or \$100.00, dependent on situation as determined by the Owner.
- Any subsequent failure to call resulting in activation of fire alarm system - \$100.00 per occurrence.

#### 1.14 INSPECTION

A. At the conclusion of the entire work encompassed in this contract, written notice requesting inspection shall be submitted to the Owner at least ten (10) days prior to the anticipated inspection date.

#### 1.15 PAYMENT AND FINAL ACCEPTANCE

A. Anticipated Draw Schedule

1. For any Project in excess of \$500,000.00 the Contractor shall submit an anticipated monthly drawdown schedule.
2. This schedule shall be submitted within fourteen (14) calendar days after Award of Contract to:

The Office of the Senior Vice President for Finance and Administration  
Rankin Hall Suite 210  
Terre Haute, IN 47809

B. Applications for Payments shall be submitted on AIA Application for Payment form G702 with Continuation Sheet G703 (or on a form approved by the Owner). While no set date is required for Applications for Payment, the application shall be submitted on a regular monthly basis for labor and materials permanently installed in the work, for material stored on site and for properly insured materials stored off-site under the following conditions:

1. For purposes of making periodic estimates, the Contractor shall furnish an itemized breakdown of his contract amount, distributed according to different classes of work. In making application for payments, the Contractor shall show, each period, the percentages of completion of each class.
2. Contractor shall send five (5) copies for each Application for Payment.
3. The Owner will make partial payment to the Contractor on the basis of a duly certified, approved estimate of the work performed during the preceding calendar month by the Contractor within 15 days after receipt by the Owner.
4. Payment will be made on balance due on labor and materials installed permanently in the work to within 90% of estimated value, and not to exceed 90% of the value of materials delivered to the site which are not subject to damage by exposure to the elements.
5. Stored materials and equipment offsite: The Owner will make payment for materials and equipment store offsite under the following conditions.
  - a. The Contractor requests in writing to the Architect/Engineer/Owner for payment on offsite stored materials and equipment.
  - b. The Architect/Engineer/Owner is given access to the offsite storage facility for purposes of inspection and verification of the stored materials and equipment. Any material or equipment not properly stored or protected shall not be approved for payment.
  - c. The Contractor shall provide to the Architect/Engineer/Owner a current Certificate of Insurance on the remote storage facility. This insurance shall remain in force for the duration of the storage of the stored materials and equipment at the remote location.

ISU SPECIAL REQUIREMENTS AND INFORMATION

6. The Owner, if conditions in its opinion warrant, has the right to withhold, in addition to retained percentages, such an amount or amounts from the payment to the Contractor as may be necessary to pay just unpaid claims for labor and services rendered and materials furnished in connection with the work.
7. The Owner will not approve for payment on any estimate, the value on any materials which, in his opinion, does not meet the contract requirements.
8. At the conclusion of installation and satisfactory inspection by the Owner, the work shall be acceptable for payment of an amount equal to ninety-five (95%) percent of the total contract amount.
9. Reduction or Limitation of Retainage:
  - a. At the sole written discretion of Indiana State University, if acceptable progress is made, at fifty percent (50%) completion of the Contract Sum the remaining Retainage may be reduced to 0%.
  - b. Any subsequent Change Orders after the reduction of Retainage shall have 5% Retainage withheld.
10. **Requests for compensation, for previously approved Change Orders omitted from an Application for Payment, received sixty (60) calendar days after Owner receipt of the Final Application for Payment (Release of Retainage) shall not be honored.**
11. Final payment will be due and payable the later of sixty-one (61) days from date of receipt of the Final Application for Payment or after the Contractor has completed all punch list items, certified that all Subcontractors and Suppliers have been paid, and all claims, including the Contractor's, have been resolved. Before issuance of the final payment, the Contractor shall furnish an affidavit (Final Waiver of Lien) as evidence that there are no claims on account of the Contract, outstanding liens of claims for materials furnished, or labor performed on the work. The final payment shall constitute the acceptance of the work by the Owner, except as to work thereafter found to be defective. The date of such payment shall be regarded as the date of final acceptance of the work.
12. Warranty: The Warranty Period shall be per AIA A201-2007 Article 3 Paragraph 3.5 as amended by Specification Section 00 20 11 Amendments to General Conditions.

**C. ACH Payments**

1. In an effort to expedite Contractor payments Indiana State University requests the Contractor set up an ACH account for Project Payments. Contact Catherine Procarione in the ISU Office of the Controller at 812-237-3525 to set up this account.
2. If the Contractor currently has an ACH Account with Indiana State University it is not necessary to set up an account for each Project. It is solely the responsibility of the Contractor to maintain accurate Banking information on file with the ISU Office of the Controller.

**D. Special provisions regarding Retainage and Escrow:**

1. The laws of the State of Indiana (IC 5-16-5.5-3 as amended) contain certain provisions regarding retainage, bonds and payment of Contractors and Subcontractors. The Contracts and Subcontracts entered into pursuant to these instructions to Bidders shall be governed by those provisions with respect to Contracts in excess of \$200,000 entered into between a Contractor and the Indiana State University Board of Trustees.
2. These provisions require, among other things, that the amounts retained by the Owner from the contractor pursuant to retainage provisions be placed in an escrow agreement to be executed by the Contractor. Pursuant to these provisions, the successful Bidder shall be required to execute an escrow agreement between the Contractor and the Owner.
3. This escrow agreement shall have no application to payment withheld by the Owner pursuant to provisions of the Construction Contract intended to protect the Owner from loss on account of defective work not remedied; claims filed on reasonable evidence; failure of the Contractor to make payments when due to subcontractors or for material or

ISU SPECIAL REQUIREMENTS AND INFORMATION

labor; reasonable doubt that the contract can be completed for the balance then unpaid; damage to another contract; failure or refusal of the Contractor to prosecute the work in strict compliance with the above process schedule; or similar provision.

4. In addition, each successful Bidder will be required to comply with all applicable provisions of the statute referred to above with respect to each of his Subcontractors (as the term 'Subcontractor' is defined in the statute referred to above).
5. The Contractor shall contact Kathy Abernathy in the Office of the Senior Vice President for Finance and Administration at (812)-237-3554 to set-up this escrow account.
6. Should a Contractor fail to execute an Escrow Agreement between the Contractor and the Owner (Indiana State University Board of Trustees) the Contractor waives all claims for any interest the Contractor would have accrued had an Escrow Agreement been executed.

## 1.16 CONTRACTOR'S BID

- A. Contractor shall submit Bid for Base Bid and any Alternate Bids as listed in Section 00 20 00.

## 1.17 INVOICING

- A. All invoices and/or Certificates of Payment must be addressed to:

Indiana State University  
Department of Facilities Management  
951 Sycamore Street  
Terre Haute, IN 47809  
Attention: Scott Tillman

- B. It is permissible to submit applications for payment electronically via e-mail. E-mail copies of the Application for Payment to:

1. Scott Tillman [scott.tillman@indstate.edu](mailto:scott.tillman@indstate.edu)
2. Pat Teeters [patrick.teeters@indstate.edu](mailto:patrick.teeters@indstate.edu)

**Do not sent Applications for Payment to the ISU Accounts Payable Office**

- C. A Partial Wavier of Lien shall be submitted with every Application for Payment until the final Application for Payment (Release of Retainage) when a Final Waiver of Lien shall be submitted.

## 1.18 SITE LOCATION(S)

- A. **ISU Public Safety Office, 210 North 6<sup>th</sup> Street, Terre Haute, Indiana 47809**

## 1.19 PROJECT CONTACT

- A. All questions regarding this Project shall be addressed to:

**Scott Tillman**

ISU Department of Facilities Management  
951 Sycamore Street  
Terre Haute, IN 47809  
Phone 812-237-8198 Cell 812-878-4251 e-mail [scott.tillman@indstate.edu](mailto:scott.tillman@indstate.edu)

Also submit MEPT Questions to:

**Dale Warner, R.E. Dimond and Associates**

Phone 317-634-4672 Cell 317-403-0668 e-mail [dale.warner@redimons.com](mailto:dale.warner@redimons.com)

01 10 00  
SUMMARY OF WORK

PART 1 - GENERAL

1.01 DESCRIPTION

- A. The project is located on the campus of Indiana State University at ISU Police Department Dispatch, 210 North 6<sup>th</sup> Street, Terre Haute, Indiana 47809

1.02 RELATED SECTIONS

- A. Division 00 Sections
- B. Division 01 Sections
- C. All Division 02-33 Sections as applicable

1.03 SCOPE OF WORK – BASE BID

- A. The following, but not limited to, is included in the Base Bid Package:
  - 1. The Dispatch Center will remain in operation (limited) during the duration of the Project
  - 2. Selective demolition
  - 3. Construction of new dispatch stations
  - 4. Construction of new walls with frames and doors.
  - 5. Installation of an access control system on new main entry door.
  - 6. Installation of new steel frame windows with security glass and cashier functions.
  - 7. Installation of new ceiling.
  - 8. Mechanical demolition and installation of new systems
  - 9. Electrical demolition and installation of new systems.
  - 10. Lighting demolition and replacements
  - 11. Installation of new fire alarm system using an Owner provided FACP. Contractor will need to provide additional peripheral devices.
  - 12. IT demolition and installation of new data and fiber drops.
  - 13. Relocation of existing equipment.
- B. Procedures
  - 1. Coordination: Modify or adjust affected adjacent work as necessary to completely integrate work of the Base Bid into the Project.
  - 2. Include as part of the Base Bid miscellaneous devices, accessory objects, and similar items incidental to or required for a complete installation whether or not indicated as part of the Base Bid.

1.04 SCOPE OF WORK – ALTERNATES

- A. The following, but not limited to, is included in the Alternate(s)
  - 1. There is no Alternate Work Requested**
- B. The cost or credit for each Alternate is the net addition to or deduction from the Contract Sum to incorporate Alternate into the Work. No other adjustments are made to the Contract Sum.
- C. Procedures
  - 1. Coordination: Modify or adjust affected adjacent work as necessary to completely integrate work of the Alternate into the Project.

01 10 00  
SUMMARY OF WORK

2. Include as part of each Alternate, miscellaneous devices, accessory objects, and similar items incidental to or required for a complete installation whether or not indicated as part of Alternate.
  3. Notification: Immediately following award of the Contract, notify each party involved, in writing, of the status of each Alternate. Indicate if Alternates have been accepted, rejected, or deferred for later consideration. Include a complete description of negotiated modifications to Alternates.
  4. Execute accepted Alternates under the same conditions as other work of the Contract.
- D. Selection and Award of Alternates: The Owner reserves the right to selectively accept or reject Alternates at their discretion and is under no obligation to accept any Alternates.
- 1.05 BID SUBMISSION REQUIREMENTS
- A. Bids shall be submitted on the included Bid Form (Section 00 20 00) and will be reviewed and accepted or rejected at the Owner's option.
  - B. All Bids shall be held for a period of One Hundred Twenty (120) Calendar days after submission of the Bid.
  - C. Refer to Section 00 10 10 Instructions to Bidders Part 3 for additional Bid submission requirements.
- 1.06 RELATED WORK SPECIFIED ELSEWHERE
- A. The Prime Contractor shall be aware, and shall make his subcontractors aware that the requirements in the sections of Divisions 00 and 01 pertain to all the work and they are binding on each section of these specifications as if they were repeated in each section in their entirety.
  - B. The Prime Contractor shall be responsible for understanding the scope and intent of the work in all sections of these Specifications
  - C. The Prime Contractor is responsible for review of all sections of the Specifications and all Drawings to confirm any additional areas of responsibility.
  - D. All Contractors are responsible for their area of work which might show up only on a drawing from another series or Specification section.
- 1.07 CONTRACTS
- A. Work shall be performed under one Prime Contract.
- 1.08 PRIME CONTRACTOR'S DUTIES
- A. Project Supervision: see Section 00 20 20 item 1.09 for requirements
  - B. Except as specifically noted, provide and pay for:
    1. Labor, materials and equipment
    2. Tools, construction equipment and machinery
    3. Other facilities and services necessary for proper execution and completion of work
  - C. Pay legally required State and Federal Taxes.
  - D. Contractor shall make all his own measurements in the field and shall be responsible for correct fitting. He shall coordinate this work with all other branches in such a manner as to cause a minimum of conflict or delay. Contractor shall coordinate his work in advance with all other trades and report immediately any difficulty which can be anticipated.
  - E. The Contract Documents shall be carefully studied by the Contractor during the course of construction. Any errors in layout or errors of omission which are discovered shall be referred immediately to the Architect/Engineer for interpretation or correction.

01 10 00  
SUMMARY OF WORK

- F. Secure and pay for, as necessary for proper execution and completion of work, and as applicable at time of receipt of bids:
  - 1. Permits
  - 2. Licenses
- G. Give required notices.
- H. Comply with codes ordinances, rules, regulations, orders and other legal requirements of public authorities which bear on performance of work.
- I. Promptly submit written notice to Architect/Engineer of observed variances of Contract Documents from legal requirements.
- J. Enforce strict discipline and good order among employees.
- K. Coordinate delivery and installation dates with Architect/Engineer and Owner and incorporate into Construction Schedule.
- L. Prepare and update Construction Schedule.
- M. Notify and receive approval from the Owner at least 48 hours in advance for utility connections, or shut-off. Coordinate these operations with the Owner, through the Architect/Engineer, and complete the work in the minimum amount of time.
- N. Notify the Architect/Engineer in writing when work is completed and keep the Architect/Engineer informed of the progress of the work. No work shall be closed or covered until it has been inspected and approved. Should work not inspected be covered, uncover all such work so that it can be properly inspected and after such inspection, properly repair and replace all of the work at no additional cost to the Owner.
- O. Where the Contract Documents require any work to be tested, the Architect/Engineer shall be notified sufficiently in advance so that he may observe such tests.
- P. Contractor shall submit a copy of any permits he has secured before starting work on this project unless otherwise stated by Owner.
- Q. Where the Contract Documents require the use of AIA Documents including, but not limited to, G702 Application and Certificate for Payment and G703 Continuation Sheet.
- R. For Projects in excess of \$500,000.00 submit with each Application for Payment the Owner's Mandatory Tier II Spend Report using the ISU Business Diversity Spend Reporting Form for Construction/Renovation/Facilities Repair Projects per instructions on the Section 00 10 41 Tier II Spending Reporting Form.

1.09 OTHER REQUIREMENTS

- A. Nightly the Prime Contractor shall secure the construction site to discourage unauthorized individuals from accessing the site. Special effort to secure the site shall be made on Friday evenings.
- B. While the site shall be kept orderly at all times, weekly the Prime Contractor shall clean-up the construction site of:
  - 1. Any accumulated trash and rubbish.
  - 2. Dirt, dust, mud, etc. associated with the construction process.
  - 3. Salvaged materials not slated for re-use and excess materials not slated for use.

01 10 00  
SUMMARY OF WORK

Blank Page

01 23 60  
ALLOWANCES

PART 1 – GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.02 SUMMARY

- A. This Section includes administrative and procedural requirements governing allowances.
  - 1. Certain materials and equipment are specified in the Contract Documents by allowances. In some cases, these allowances include installation. Allowances have been established in lieu of additional requirements and to defer selection of actual materials and equipment to a later date when additional information is available for evaluation. If necessary, additional requirements will be issued by Change Order.
- B. Types of allowances include the following:
  - 1. Lump-sum allowances.
  - 2. Unit-cost allowances.
  - 3. Contingency allowances.
  - 4. Testing and inspecting allowances.
  - 5. Quantity allowances.
- C. Related Sections include the following:
  - 1. Division 01 Section "Contract Modification Procedures" for procedures for submitting and handling Change Orders.
  - 2. Division 01 Section "Quality Requirements" for procedures governing the use of allowances for testing and inspecting.

1.03 SELECTION AND PURCHASE

- A. At the earliest practical date after award of the Contract, advise the Architect of the date when final selection and purchase of each product or system described by an allowance must be completed to avoid delaying the Work.
- B. At Architect's request, obtain proposals for each allowance for use in making final selections. Include recommendations that are relevant to performing the Work.
- C. Purchase products and systems selected by Architect from the designated supplier.

1.04 SUBMITTALS

- A. Submit proposals for purchase of products or systems included in allowances, in the form specified for Change Orders.
- B. Submit invoices or delivery slips to show actual quantities of materials delivered to the site for use in fulfillment of each allowance.

1.05 CONTINGENCY ALLOWANCES

- A. Use the contingency allowance only as directed by Architect for Owner's purposes and only by Change Orders that indicate amounts to be charged to the allowance.
- B. Contractor's overhead, profit, and related costs for products and equipment ordered by Owner under the contingency allowance are included in the allowance and are not part of the Contract Sum. These costs include delivery, installation, taxes, insurance, equipment rental, and similar costs.
- C. Change Orders authorizing use of funds from the contingency allowance will include Contractor's related costs and reasonable overhead and profit margins.

01 23 60  
ALLOWANCES

- D. At Project closeout, credit unused amounts remaining in the contingency allowance to Owner by Change Order.

1.06 TESTING AND INSPECTING ALLOWANCES

- A. Testing and inspecting allowances include the cost of engaging testing agencies, actual tests and inspections, and reporting results.
- B. The allowance does not include incidental labor required to assist the testing agency or costs for retesting if previous tests and inspections result in failure.
- C. Costs of services not required by the Contract Documents are not included in the allowance.
- D. At Project closeout, credit unused amounts remaining in the testing and inspecting allowance to Owner by Change Order.

1.07 UNUSED MATERIALS

- A. Return unused materials purchased under an allowance to manufacturer or supplier for credit to Owner, after installation has been completed and accepted.
  - 1. If requested by Architect, prepare unused material for storage by Owner when it is not economically practical to return the material for credit. If directed by Architect, deliver unused material to Owner's storage space. Otherwise, disposal of unused material is Contractor's responsibility.

PART 2 – PRODUCTS (Not Used)

PART 3 – EXECUTION

3.01 EXAMINATION

- A. Examine products covered by an allowance promptly on delivery for damage or defects. Return damaged or defective products to manufacturer for replacement.

3.02 PREPARATION

- A. Coordinate materials and their installation for each allowance with related materials and installations to ensure that each allowance item is completely integrated and interfaced with related work.

3.03 SCHEDULE OF ALLOWANCES

- A. Allowance # 1: A \$1,500 allowance shall be included in the Base Bid for the A/E to create record drawings. These drawings shall be based on the Contractors field mark-ups of the Construction Documents. The Contractor is solely responsible to provide accurate mark-ups for the creation of these record drawings. Should it be discovered that errors exist in the record drawings the Contractor shall pay for the re-creation of accurate record drawings at no additional cost to the Owner.
- B. Allowance # 2: A \$10,000 Allowance shall be included in the Base Bid for Unforeseen Conditions and General Construction Contingency. It is solely at the discretion of the Architect/Engineer/Owner what costs may be applied to this Allowance. Any unused Allowance monies shall be returned to the Owner at Project closeout by Change Order.

END OF SECTION 01 23 60

01 25 00  
CONTRACT CONSIDERATIONS

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Schedule of Values
- B. Application for Payment
- C. Change procedures
- D. Alternates
- E. Substantial Completion
- F. Final Completion

1.02 SCHEDULE OF VALUES

- A. Submit a printed schedule on AIA Form G703 - Application and Certificate for Payment Continuation Sheet or similar form.
- B. Submit Schedule of Values electronically in PDF format within 15 calendar days after date of the Award Letter.
- C. Format: Utilize the Table of Contents of this Project Manual. Identify each line item with number and title of the major specification Section. Identify site mobilization, bonds and insurance, and other overhead costs.
- D. Include in each line item, the amount of Allowances specified in this section. For unit cost Allowances, identify quantities taken from Contract Documents multiplied by the unit cost to achieve the total for the item.
- E. Include within each line item, a direct proportional amount of Contractor's overhead and profit.
- F. Revise schedule if additional Alternates are Awarded after the initial Award by adding these Alternates as separate line items broken down in detail as was provided in the initial approved Schedule of Values.
- G. Revise schedule to list approved Change Orders, broken down in detail as was provided in the initial approved Schedule of Values.
- H. Submit "Consent of Surety to Schedule of Values" with Schedule of Values.

1.03 APPLICATIONS FOR PAYMENT

- A. Submit four (4) copies of each application on AIA Form G702- Application and Certificate for Payment and AIA G703 - Continuation Sheet or similar.
- B. Content and Format: Utilize most current approved Schedule of Values for listing items in each Application for Payment.
- C. Payment Period: As indicated in the Contract Documents.
- D. Waiver of Liens.
- E. Include Certified Payroll forms if required by Owner.

1.04 CHANGE PROCEDURES

- A. The Architect/Engineer will advise of minor changes in the Work not involving and adjustment to Contract Sum/Price or Contract Time as authorized by AIA A201, 2007 Edition, Paragraph 7.4 by issuing supplemental instructions on AIA Form G710 or ISU Form SI/FCC-12.
  - 1. The Architect/Engineer may issue a Request for Proposal (RFP) which includes A detailed description of a proposed change, with supplementary or revised Drawings and

01 25 00  
CONTRACT CONSIDERATIONS

Specifications if required. Contractor shall prepare and submit an estimate within 10 calendar days, listing if:

- a. A change in Contract Time for executing the change is requested.
- b. A stipulation of any overtime work required
- c. The period of time during which the requested price will be considered valid, but not less than 21 calendar days.

B. The Contractor may propose changes by submitting a request for change, Change Proposal (CP), to the Architect/Engineer, describing the proposed change and its full effect on the Work.

1. Include a statement describing:

- a. The reason for the change.
- b. The effect on the Contract Sum/Price and Contract Time with full documentation.
- c. A statement describing the effect on Work by separate or other Contractors.
- d. A stipulation of any overtime work required.
- e. The period of time during which the requested price will be considered valid, but not less than 21 calendar days.

C. RFP and CP Pricing

1. Project Supervision costs:

a. Section 00 20 20 Item 1.09 states in part:

"The Prime Contractor shall maintain on the Project site a competent Project Superintendent at all times any work is being performed; either by the Prime Contractor's workers or any Subcontractor's workers."

b. There shall be no costs included in the pricing of a RFP or CP for Project Superintendent's Supervision Hours while the work is being performed unless the Work included in the RFP/CP pricing will occur at a time not within the normal scheduled Project hours of construction.

2. Contractor Mark-up and Allowable Charges

a. Section 00 20 11 2.07 Subparagraph 3.3.3.7, 3.3.3.8 and 3.3.3.9 states:

".7 Extra Work shall be performed for the cost of the labor payroll plus 15% of the labor payroll and the cost of the material plus 5% of the material cost. Said markup fees are intended to compensate for the cost of payroll taxes, insurance of all kinds, all taxes of the Contractor, including State Taxes, Federal Income Tax, Unemployment, and FICA Taxes, as well as all other overhead costs, expenses, and carrying charges whatsoever, including the profit to be derived from such additional Work. Labor payroll is defined as the actual hourly labor cost plus any fringes payable as listed on the wage rate schedule(s) provided as required by the Bidding Documents.

".8 In case such Work is performed by a Subcontractor or a lower tier Contractor with the Owner's consent, the Work shall be marked up as indicated in 7.3.3.7 by the Contractor actually performing the Work. Each succeeding Contractor may mark up their direct labor and material costs as indicated in 7.3.3.7. Otherwise each succeeding Contractor, including the Prime Contractor, may add 5% for handling/coordination. Additional mark-ups of a Subcontractor's costs shall not be permitted.

01 25 00  
CONTRACT CONSIDERATIONS

- “9 Costs for bond premiums are allowable provided documentation from the Bonding Company is included detailing the added bond cost premium, the current bond total and the new bond total.”
- b. Labor charges subject to the 15% mark-up shall be based on the actual labor payroll defined as the actual hourly labor cost plus any fringes payable as listed on the wage rate schedule(s) provided as required by the Bidding Documents.”. The Wage Rate Schedule, submitted as required by the Contract Documents, shall be used to determine if the hourly labor rate used for pricing and labor mark-up is correct.
  - c. Insurance, Taxes and similar shall not be included in the RFP or CP pricing since, per 3.3.3.7, “Said markup fees are intended to compensate for the cost of payroll taxes, insurance of all kinds, all taxes of the Contractor, including State Taxes, Federal Income Tax, Unemployment, and FICA Taxes, as well as all other overhead costs, expenses, and carrying charges whatsoever, including the profit to be derived from such additional Work”.
3. All RFP and CP pricing shall be submitted in enough detail for the Architect/Engineer and Owner to properly evaluate the proposed pricing. These pricing details extend to the lower tier Subcontractor’s pricing as well. The Architect/Engineer and Owner may request additional pricing breakdown if in their opinion insufficient pricing detail was provided for evaluation. The Contractor shall promptly provide the additional pricing detail.
- D. Stipulated Sum/Price Change Order: Based on Proposal Request and Contractor's fixed price quotation or Contractor's request for a Change Order as approved by Architect/Engineer and Owner.
  - E. Construction Change Directive: Architect/Engineer may issue a directive, on AIA Form G713 or ISU Form CCD-18 Construction Change Directive signed by the Owner, instructing the Contractor to proceed with a change in the Work, for subsequent inclusion in a Change Order. Document will describe changes in the Work, and designate method of determining any change in Contract Sum/Price or Contract Time. Promptly execute the change.
  - F. Maintain detailed records of work done on Time and Material basis. Provide full information required for evaluation of proposed changes, and to substantiate costs for changes in the Work.
  - G. Execution of Change Orders: Architect/Engineer will issue Change Orders for signatures of parties as provided in the Conditions of the Contract.
- 1.05 ALTERNATES
- A. Alternate Bid prices shall be held for one hundred twenty (120) days from date of Bid.
  - B. Alternate Bids may be used as the basis for Award of Contract.
  - C. The Owner may Award none, some or all Alternates submitted.
  - D. The Owner is under no obligation to accept any Alternates submitted.
  - E. Accepted Alternates shall be listed as separate line items on the Schedule of Values broken down as directed by the Architect/Engineer/Owner.
- 1.06 SUBSTANTIAL COMPLETION
- A. The substantial completion date shall be as listed in Section 001010 INSTRUCTIONS TO BIDDERS. The substantial completion date may be adjusted as allowed by the Contract Documents or as mutually agreed upon in writing by the Owner and Contractor.
  - B. **Should a Contractor list an early substantial completion date on their Project Schedule or any Project Document, this early substantial completion date shall not be permitted to be used as a claim for additional compensation for the Contractor’s failure to meet their early substantial completion date.**

CONTRACT CONSIDERATIONS

- C. Warranty: The Warranty Period shall commence at substantial completion per AIA A201-2007 Article 3 Paragraph 3.5 as amended by Specification Section 00 20 11 AMENDMENTS TO GENERAL CONDITIONS.

## 1.07 FINAL COMPLETION

- A. The Contractor's final Application for Payment (Release of Retainage) shall not be approved for payment until all punch list items are complete, all claims (Contractor and Subcontractor) have been resolved and all conditions of Section 01 77 00 PROJECT CLOSEOUT have been met.
- B. Requests for compensation, for previously approved Change Orders omitted from an Application for Payment, received sixty (60) calendar days after receipt of the Final Application for Payment (Release of Retainage) shall not be honored.**
- C. Final payment will be due and payable the late of sixty-one (61) days from date of receipt of the Final Application for Payment or after the Contractor has completed all punch list items, certified that all Subcontractors and Suppliers have been paid, and all claims, including the Contractor's, have been resolved. Before issuance of the final payment, the Contractor shall furnish an affidavit (Final Waiver of Lien) as evidence that there are no claims on account of the Contract, outstanding liens of claims for materials furnished, or labor performed on the work. The final payment shall constitute the acceptance of the work by the Owner, except as to work thereafter found to be defective. The date of such payment shall be regarded as the date of final acceptance of the work.

PART 2 – NOT USED

PART 3 – NOT USED

END OF SECTION 01 25 00

01 31 00  
COORDINATION AND MEETINGS

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Coordination.
- B. Field engineering.
- C. Preconstruction meeting.
- D. Progress meetings.
- E. Field Record Drawings and Specifications

1.02 COORDINATION

- A. Coordination scheduling, submittals, and Work of the various sections of the Project Manual to assure efficient and orderly sequence of installation of interdependent construction elements, with provision for accommodating items installed later.
- B. Verify utility requirements and characteristics of operating equipment are compatible with building utilities. Coordinate work of various sections having interdependent responsibilities for installing, connecting to, and placing in service, such equipment.
- C. Coordinate space requirements and installation of mechanical and electrical work which are indicated diagrammatically on drawings. Follow routing shown for pipes, ducts, and conduit, as closely as practicable; place runs parallel with line of building. Utilize spaces efficiently to maximize accessibility for other installations, for maintenance, and for repairs.
- D. The Contractor shall provide coordination drawings for above-ceiling areas where at least two different services run in parallel or cross one another. Drawings are to be submitted, reviewed by the consultant team, and returned to the contractor prior to the start of any installation in these areas.
- E. In finished areas except as otherwise indicated, conceal pipes, ducts, and wiring within the construction. Coordinate locations of fixtures and outlets with finish elements.
- F. Coordinate completion and cleanup of Work of separate sections in preparation for Substantial Completion and for portions of Work designated for Owner's occupancy.
- G. After Owner occupancy of premises, coordinate access to site for correction of defective Work and Work not in accordance with Contract Documents, to minimize disruption of Owner's activities.

1.03 FIELD ENGINEERING

- A. Contractor to locate and protect survey control and reference points.
- B. Control datum for survey is that established by Owner provided survey and/or shown on Drawings.
- C. Verify set-backs and easements, confirm drawing dimensions and elevations.
- D. Provide field engineering services. Establish elevations, lines, and levels, utilizing recognized engineering survey practices.
- E. Submit a copy of registered site drawing and certificate signed by the Land Surveyor that the elevations and locations of the Work is in conformance with the Contract Documents.

1.04 PRECONSTRUCTION MEETING

- A. Architect/Engineer will schedule a meeting after Notice of Award.
- B. Attendance Required: Owner, Architect/Engineer, Contractor and major subcontractors.

01 31 00  
COORDINATION AND MEETINGS

C. Agenda:

1. Introductions.
    - a. Official Project Name and Number (to appear on all Project correspondence)
    - b. Designation of personnel representing the parties in Contract, Owner and the Architect/Engineer
  2. Status of required paperwork to ISU Purchasing Department.
  3. Distribution of Contract Documents.
  4. Submission of full list of sub-contractors and suppliers, schedule of values, proposed pay application schedule and proposed project schedule.
  5. Procedures and processing of submittals, substitutions, field decisions, proposal request, Change Orders, and Contract closeout procedures.
  6. Scheduling activities of a Testing Agency (if required).
  7. Use of premise by Owner and Contractor.
  8. Owner's requirements and partial occupancy.
  9. Construction facilities and controls provided by Owner.
  10. Temporary utilities.
  11. Survey and building layout.
  12. Security and housekeeping procedures.
  13. Procedures for testing.
  14. Procedures for maintaining record documents.
- D. Architect/Engineer to record minutes and distribute copies within seven (7) days after meeting to participants, with copies to Architect/Engineer, Owner, and those affected by decisions made.

1.05 PROGRESS MEETINGS

- A. Schedule and attend meetings throughout progress of the Work at maximum monthly intervals.
- B. Architect/Engineer will make arrangements for meetings, prepare agenda with copies for participant and preside at meetings.
- C. Attendance Required: Job superintendent, major Subcontractors and suppliers, Owner, and Architect/Engineer, as appropriate to agenda topics for each meeting.
- D. Agenda:
  1. Review minutes of previous meetings.
  2. Review of Work progress.
  3. Field observations, problems, and decisions.
  4. Identification of problems which impede planned progress.
  5. Review of submittals schedule and status of submittals.
  6. Review of off-site fabrication and delivery schedules.
  7. Maintenance of progress schedule.
  8. Corrective measures to regain projected schedules.
  9. Planned progress during succeeding work period.
  10. Coordination of projected progress.
  11. Maintenance of quality and work standards.
  12. Effect of proposed changes on progress schedule
  13. Other business relating to Work.

01 31 00  
COORDINATION AND MEETINGS

- E. Architect/Engineer to record minutes and distribute copies within seven (7) days after meeting to participants, with copies to the Owner, and those affected by decisions made.

1.06 FIELD PROJECT RECORD DOCUMENTS

A. Documents and Samples at the Site:

1. General: The Prime Contractor shall maintain at the site for the Owner and A/E a record copy of the Drawings, Specifications, addenda, bulletins, Architect/Engineer's Supplemental Instructions, and Change Orders, in good order and marked currently to record changes and selections made during construction, and in addition reviewed Shop Drawings, Product Data, Samples and similar required submittals. These shall be available to the Owner and the Architect/Engineer review.
2. Posting:
  - a. Record Drawings: Keep a complete record of the locations of all items indicating the Work as actually installed. Changes and deviations are to be indicated on the Record Contract Drawings. Give particular attention to concealed work which would be difficult to identify, measure, and record at a later date. The Subcontractor shall record concealed items, changes, and deviations under the direction of the Contractor as the Work progresses. The Contractor shall clearly identify all deviations from the Contract Documents.
  - b. Record Specifications: Indicate the changes made by addendum, bulletin, Architect/Engineer's Supplemental Instructions, and Change Order. Indicate the manufacturer selected for all items whether specified proprietarily or generally.
  - c. No review of record documents by the Architect/Engineer/Owner shall be a waiver of deviations from the Contract Documents or the submittals, or in any way relieve the Contractor from his responsibility to perform the Work in accordance with the Contract Documents.

END OF SECTION 01 31 00

01 31 00  
COORDINATION AND MEETINGS

Blank Page

01 32 00  
SUBMITTALS AND SUBSTITUTIONS

PART 1 - GENERAL

1.01 DESCRIPTION

- A. Wherever possible throughout the Contract Documents, the minimum acceptable quality of workmanship and materials has been defined either by manufacturer's name and catalog number or by reference to recognized industry standards.
- B. To ensure that the specified products are furnished and installed in accordance with the design intent, procedures have been established for advance submittal of design data and for its review by the Architect/Engineer.
- C. The Architect/Engineer's review of Contractor's material submittal shall not relieve the Contractor of responsibility for errors, omission, quantities, or capacities even though work is executed in accordance with the reviewed/approved submittal material.
- D. The checking of the Contractor's Material Submittal is a gratuitous assistance and the Architect/Engineer does not thereby assume responsibility or liability for errors or omissions. Where such errors or omissions are discovered later, they shall be made good by the Contractor, irrespective of any review/approval by the Architect/Engineer since Contractor's Proposal assumes a complete, operable, and acceptable installation.
- E. Work Included:
  - 1. Submit, to the Architect/Engineer, shop drawings, project data and samples required by Specification sections electronically in PDF format.
  - 2. Simultaneous to submitting to the Architect/Engineer, the Contractor shall submit to the Owner's designated contacts a copy of all submittals provided to the Architect/Engineer in PDF Format.
  - 3. All submittals shall be separated by CSI format and shall list the appropriate CSI 6-digit code on the PDF file name. Submittal packages which include items listed under different Specification sections shall be submitted as separate PDF Files. Multiple submittals at different times under the same Specification Section shall have file name extension added to indicate the number of the submittal, e.g. 26 51 00(1), 26 51 00(2), etc.
  - 4. Designate in construction schedule dates for submission and dates reviewed shop drawings, project data and samples will be needed for each product in order to maintain the progress of construction as scheduled. Also indicate critical delivery dates of all items.
  - 5. Any submittal that requires expedited review shall be noted on the submittal cover page with a "required by" review date listed. A Contractor's failure to submit in a timely manner is not cause to request an expedited review.

1.02 PRODUCT HANDLING

- A. Make all submittals of shop drawings, samples, requests for substitution, and other similar items, in strict accordance with the provisions of this section of these Specifications.

1.03 DEFINITIONS

- A. Shop Drawings:
  - 1. Original drawings, prepared by Contractor, subcontractor, supplier or distributor, which illustrate some portion of the work, showing fabrication, layout, setting or erection details.
    - a. Prepared by a qualified detailer
    - b. Identify details by reference to sheet and detail numbers shown on contract drawings.

01 32 00  
SUBMITTALS AND SUBSTITUTIONS

B. Product Data:

1. Manufacturer's standard schematic drawings:
  - a. Scanned copies of schematic drawings from hard copy paper catalog pages are not acceptable. Obtain PDF files of schematic drawings from the Supplier/Manufacturer for submission.
  - b. Modify drawings to delete information which is not applicable to project.
  - c. Supplement standard information to provide additional information applicable to project.
2. Manufacturer's catalog sheets, brochures, diagrams, schedules, performance charts, illustrations and other standard descriptive data.
  - a. Scanned copies of catalog sheets from hard copy paper catalog pages are not acceptable. Obtain PDF files of items from the Supplier/Manufacturer for submission.
  - b. Clearly mark each item to identify pertinent materials, products, or models to be provided.
  - c. Show dimensions and clearances required.
  - d. Show performance characteristics and capabilities.
  - e. Show wiring diagrams and controls.
3. Material and Safety Data Sheets shall be furnished for all applicable Project Materials.

1.04 SUBMITTAL REVIEW TIME

- A. Every effort will be made to return submittals within ten (10) calendar days or less.
- B. This ten (10) days may require adjustment based on, but not limited to, the following:
  1. Complexity of the submittal
  2. Size of the job and number of items included in the submittal
  3. Number of submittals received at the same time or on the same day
- C. Submittals received that do not clearly indicate the items being provided on the submittal will be returned marked "Rejected Resubmit" which will further delay the submittal return time.

PART 2 - PRODUCTS

2.01 SHOP DRAWINGS

- A. Scale required: Unless otherwise specifically directed by the Architect/Engineer, make all shop drawings accurately to a scale sufficiently large to show all pertinent features of the item and its method of connection to the work.
- B. All shop drawings shall be submitted electronically in PDF Format to the Architect/Engineer with a simultaneous submission to the Owner's designated recipients.
- C. Accompany shop drawings with transmittal letter containing:
  1. Date and revision dates
  2. Project title and number
  3. The names of:
    - a. Architect/Engineer
    - b. Contractor
    - c. Subcontractor
    - d. Supplier
    - e. Manufacturer

01 32 00  
SUBMITTALS AND SUBSTITUTIONS

- f. Separate detailer when pertinent
  - 4. Identification of product or material
  - 5. Relation to adjacent structure or materials
  - 6. Field dimensions, clearly identified as such
  - 7. Specification section number
  - 8. Applicable standards, such as ASTM number of Federal Specification
  - 9. A blank space 2-1/2" x 3", for the Architect/Engineer's electronic stamp
  - D. Identification of deviations from Contract Documents
  - E. Contractor's stamp, initialed or signed, certifying to review of submittal, verification of field measurements and compliance with Contract Documents. Any materials submitted without the Contractor's stamp of approval will be returned to the Contractor with no action taken.
  - F. Reviewed shop drawings shall be returned to the Contractor and Owner's designated recipients electronically stamped as follows:
    - 1. Reviewed
    - 2. Reviewed as Noted
    - 3. Rejected - Resubmit
  - G. The Owner shall submit their review comments to the Architect/Engineer. Official Review of shop drawings shall be by the Architect/Engineer only. The Contractor shall not proceed based on Owner comments only unless the Owner is the Architect/Engineer.
- 2.02 SUBMITTALS
- A. All submittals for materials and equipment shall be made within forty (40) days of award of the contract and in no case shall any materials or equipment be delivered to the job site until submittals have been reviewed by the Architect/Engineer and Owner. This requirement will be a condition for approval of subsequent Applications for Payment.
  - B. All submittals shall be submitted electronically in PDF Format to the Architect/Engineer with a simultaneous submission to the Owner's designated recipients.
  - C. Submittals which reflect color samples shall be submitted in color.
  - D. Accompany submittals with transmittal letter containing:
    - 1. Date and revision dates
    - 2. Project title and number
    - 3. The names of:
      - a. Architect/Engineer
      - b. Contractor
      - c. Subcontractor
      - d. Supplier
      - e. Manufacturer
      - f. Separate detailer when pertinent
    - 4. Identification of product or material
    - 5. Relation to adjacent structure or materials
    - 6. Field dimensions, clearly identified as such
    - 7. Specification section number
    - 8. Applicable standards, such as ASTM number of Federal Specification
    - 9. A blank space 2-1/2" x 3", for the Architect/Engineer's electronic stamp
  - E. Identification of deviations from Contract Documents

01 32 00  
SUBMITTALS AND SUBSTITUTIONS

- F. Contractor's stamp, initialed or signed, certifying to review of submittal, verification of field measurements and compliance with Contract Documents. Any materials submitted without the Contractor's stamp of approval will be returned to the Contractor with no action taken.
- G. Reviewed submittals shall be returned to the Contractor electronically stamped as follows:
  - 1. Reviewed
  - 2. Reviewed as Noted
  - 3. Rejected - Resubmit
- H. The Owner shall submit their review comments to the Architect/Engineer. Official Review of submittals shall be by the Architect/Engineer only. The Contractor shall not proceed based on Owner comments only unless the Owner is the Architect/Engineer.

2.03 SAMPLES

- A. Physical samples as defined by the General Conditions shall be furnished to the Architect/Engineer for approval prior to ordering or fabrication of any product.
- B. Submit samples as specified in each of specification sections.
- C. Submit an electronic transmittal or review sheet stamped by the Contractor with a blank space for the Architect/Engineer's electronic stamp.

2.04 SUBSTITUTIONS DURING CONSTRUCTION

- A. The approved "Suppliers and Manufacturers List" is an essential part of the Contract. Substitutions of materials, equipment, etc. require the written approval of the Architect/Engineer and Owner. Substitutions during construction will only be considered when there is a proven benefit to the Owner. It is at the sole discretion of the Architect/Engineer and Owner to determine if the substitution is warranted.
  - 1. The Architect/Engineer and Owner will consider proposals for substitution of specified materials, equipment, and methods only when such proposals are accompanied by full and complete technical data and all other information required by the Architect/Engineer and Owner to evaluate the proposed substitution. Also, submit with request accurate cost data on the proposed substitution in comparison with the product specified, whether or not modification of the Contract Sum is to be a consideration.
  - 2. Do not substitute materials, equipment, or methods unless such substitution has been specifically approved for this work by the Architect/Engineer and Owner.
  - 3. Requests for substitution, when forwarded by the Contractor to the Architect/Engineer and Owner, are understood to mean that the Contractor:
    - a. Represents that they have personally investigated the proposed substitute product and determined that it is equal or superior in all respects to that specified;
    - b. Will provide the same guarantee for the substitution that they would for that specified;
    - c. Certifies that the cost data presented is complete and includes all related costs under this Contract, but excludes costs under separate contracts and the Architect's redesign cost, and that he waives all claims for additional cost related to the substitution which subsequently become apparent;
    - d. Will coordinate the installation of the accepted substitute, making such changes as may be required for the work to be complete in all respects.
- B. See Section 00 10 10 INSTRUCTIONS TO BIDDERS Item 1.08 for requirements for substitutions prior to Bid.

PART 3 – NOT USED

01 32 00  
SUBMITTALS AND SUBSTITUTIONS

END OF SECTION 01 32 00

01 40 00  
QUALITY CONTROL

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Quality assurance - control of installation.
- B. Tolerances
- C. References.
- D. Mockup.
- E. Inspecting and testing laboratory services.
- F. Manufacturer's field services and reports.

1.02 QUALITY ASSURANCE - CONTROL OF INSTALLATION

- A. Monitor quality control over suppliers, manufacturers, Products, services, site conditions, and workmanship, to produce Work of specified quality.
- B. Comply with manufacturer's instructions, including each step in sequence.
- C. Should manufacturer's instructions conflict with Contract Documents, request clarification from Architect/Engineer before proceeding.
- D. Comply with specified standards as minimum quality for the Work except where more stringent tolerances, codes, or specified requirements indicate higher standards or more precise workmanship.
- E. Perform work by persons qualified to produce workmanship of quality.
- F. Secure Products in place with positive anchorage devices designed and sized to withstand stresses, vibration, physical distortion, or disfigurement.

1.03 TOLERANCES

- A. Monitor tolerance control of installed Products to produce acceptable Work. Do not permit tolerances to accumulate.
- B. Comply with manufacturer's tolerances. Should manufacturer's tolerances conflict with Contract Documents, request clarification from Architect/Engineer before proceeding.
- C. Adjust Products to appropriate dimensions; position before securing Products in place.

1.04 REFERENCES

- A. For Products or workmanship specified by association, trade, or other consensus standards, comply with requirements of the standard, except when more rigid requirements are specified or are required by applicable codes.
- B. Conform to reference standard by date of issue current on date of Contract Documents, except where a specific date is established by code.
- C. Obtain copies of standards where required by product specification sections.
- D. The contractual relationship, duties, and responsibilities of the parties in Contract nor those of the Architect/Engineer shall not be altered from the Contract Documents by mention or inference otherwise in any reference document.

1.05 INSPECTING AND TESTING LABORATORY SERVICES

- A. See Section 01 41 00 for requirements for the selection of Inspection and Testing Laboratory Services Testing Agency (Agencies) and responsibility for payment for these services.
- B. An independent firm will perform inspections, tests, and other services specified in individual specification sections and as required by the Architect/Engineer or the Owner.

01 40 00  
QUALITY CONTROL

- C. Inspecting, testing, and source quality control may occur on or off the project site. Perform off-site inspecting or testing as required by the Architect/Engineer or the Owner.
- D. Reports will be submitted by the independent firm to the Architect/Engineer and Contractor, in duplicate, indicating observations and results of tests and indicating compliance or non-compliance with Contract Documents.
- E. Cooperate with independent firm; furnish samples of materials, design mix, equipment, tools, storage, safe access, and assistance by incidental labor as requested.
- F. Notify Architect/Engineer and independent firm 24 hours prior to expected time for operations requiring services.
- G. Make arrangements with independent firm and pay for additional samples and tests required for Contractor's use.
- H. Testing or inspecting does not relieve Contractor to perform Work to contract requirements.
- I. Retesting required because of non-conformance to specified requirements shall be performed by the same independent firm on instructions by the Architect/Engineer. Payment for retesting will be paid by the Contractor.

1.06 MANUFACTURERS' FIELD SERVICES AND REPORTS

- A. When specified individual specification sections, require material or Product suppliers or manufacturers to provide qualified staff personnel to observe site conditions, conditions of surfaces and installation, quality of workmanship, start-up of equipment, test, adjust and balance of equipment as applicable, and to initiate instructions when necessary.
- B. Submit qualifications of observations. Observer subject to approval of Architect/Engineer.
- C. Report observations and site decisions or instructions given to applicators or installers that are supplemental or contrary to manufacturer's written instructions.
- D. Submit report in duplicate within 30 days of observations to Architect/Engineer for information.

PART 2 – NOT USED

PART 3 – NOT USED

END OF SECTION 01 40 00

01 42 00  
DEFINITIONS AND STANDARDS

PART 1 - GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Division 01 Specification sections, apply to work of this section.

1.02 DESCRIPTION OF REQUIREMENTS

- A. General: This section specifies procedural and administrative requirements for compliance with governing regulations and the codes and standards imposed upon the work. The requirements include the obtaining of permits, licenses, inspections, releases and similar documentation, as well as payments, statements and similar requirements associated with regulations, codes and standards.
- B. "Regulations" is defined to include laws, statutes, ordinances and lawful orders issued by governing authorities, as well as those rules, conventions and agreements within the construction industry which effectively control the performance of the work regardless of whether they are lawfully imposed by governing authority or not.
- C. Governing Regulations: Refer to General and Supplementary Conditions for requirement related to compliance with governing regulations.

1.03 DEFINITIONS

- A. General Explanation: A substantial amount of specification language consists of definitions for terms found in other Contract Documents, including drawings. (Drawings must be recognized as diagrammatic in nature and not completely descriptive of the requirements indicated thereon). Certain terms used in Contract Documents are defined in this article. Definitions and explanations contained in this section are not necessarily either complete or exclusive, but are general for the work to the extent that they are not stated more explicitly in another element of the Contract Documents.
- B. General Requirements: The provisions or requirements of Division 00 and Division 01 sections apply to entire work of Contract and, where so indicated, to other elements which are included in project.
- C. Indicated: The term "indicated" is a cross-reference to graphic representations, notes or schedules in the specifications, and to similar means of recording requirements in Contract Documents. Where terms such as "shown", "noted", "scheduled" and "specified" are used in lieu of "indicated", it is for purpose of helping reader locate cross-reference, and no limitation of location is intended except as specifically noted.
- D. Directed, Requested, Etc.: Where not otherwise explained, terms such as "directed", "requested", "authorized", "selected", "approved", "required", "accepted", and "permitted", mean "directed by Architect/Engineer", "requested by Architect/Engineer", and similar phrases. However, no such implied meaning will be interpreted to extend Architect's/Engineer's responsibility into the Contractor's area of construction supervision.
- E. Approve: Where used in conjunction with Architect's/Engineer's response to submittals, requests, applications, inquiries, reports and claims by Contractor, the meaning of term "approved" will be held to limitations of Architect's/Engineer's responsibilities and duties as specified in General and Supplementary Conditions. In no case will "approval" by Architect/Engineer be interpreted as a release of Contractor from responsibilities to fulfill requirements of Contract Documents.
- F. Project Site: The term "project site" is defined as the space available to the Contractor for performance of the work, wither exclusively or in conjunction with others performing other work as part of the project. The extent of the project site is shown on the drawings, and may or may not be identical with description of the land upon which project is to be built.

01 42 00  
DEFINITIONS AND STANDARDS

- G. **Furnish:** Except as otherwise defined in greater detail, term "furnish" is used to mean supply and deliver to project site, ready for unloading, unpacking, assembly, installation, and similar operations, as applicable in each instance.
  - H. **Install:** Except as otherwise defined in greater detail, term "install" is used to describe operations at project site including unloading, unpacking, assembly, erection, placing, anchoring, applying, working to dimension, finishing, curing, protecting, cleaning and similar operations, as applicable in each instance.
  - I. **Provide:** Except as otherwise defined in greater detail, term "provide" means to furnish and install, complete and ready for intended use, as applicable in each instance.
  - J. **Installer:** The term "installer" is defined as the entity (person or firm) engaged by the Contractor, its Subcontractor or Sub-subcontractor for performance of a particular unit of work at the project site, including installation, erection, application and similar required operations. It is a requirement that installers be expert in the operations they are engaged to perform.
  - K. **Testing Laboratories:** The term "testing laboratory" is defined as an independent entity engaged to perform specific inspections or tests of the work, either at the project site or elsewhere; and to report and, if required, interpret results of those inspections or tests.
- 1.04 **PROJECT MANUAL FORMAT AND CONTENT EXPLANATION**
- A. **General:** This article is provided to help the user of these specifications more readily understand the format, language, implied requirements and similar conventions of content. None of the following explanations shall be interpreted to modify the substance of the contract requirements.
  - B. **Production Methods:** Portions of these specifications have been produced by the Architect's/Engineer's standard method of editing master specifications, and may contain minor deviations from traditional writing formats. Such deviations are a natural result of this production technique, and no other meaning shall be implied.
  - C. **Project Manual Format:** These specifications are organized based upon the Construction Specifications Institute's 33 Division format. The organization of these specifications into Divisions, Sections or Trade Headings generally conforms to recognized industry practice.
    - 1. Divisions are groupings of related or similar sections. The divisions are recognized as the construction industry consensus method of uniform specification organization.
    - 2. **Sections:** For convenience, "Sections" are considered as the basic units of work. The section title is descriptive only and not intended to limit the meaning or content of a section or to be completely descriptive of requirements specified therein.
    - 3. **Section Numbering** is used to facilitate cross-references in the Contract Documents. Sections are placed in the Project Manual in numeric sequence; however, the numeric sequence is not complete and the listing of the section in the "Index" at the beginning of the Project Manual must be consulted to determine the numbers and names of specifications sections in the Contract Documents.
  - D. **Project Identification:** The project number of the Contract Documents is the Bid Number recorded on the Project Manual Cover Sheet, in Section 00 10 00 Notice to Bidders and Section 00 20 00 Bid Form.
  - E. **Page Numbering:** Pages are numbered independently for each section. The section number is shown together with the page number at the bottom of each page to facilitate the location of text in the Project Manual.

01 42 00  
DEFINITIONS AND STANDARDS

- F. Text Subordination: Portions of specification text are subordinated to other portions in the following manner:
1. Certain sections may be subordinate to other sections or parts of other sections. When that occurs, the degree of subordination is described in those sections.
  2. Sub-articles, which are printed in upper/lower case lettering, are subordinate to Article titles.
  3. Paragraphs and lines of text are subordinate to sub-article titles.
  4. Paragraphs and lines of text that are indented from the left margin are subordinate to the preceding text that is either not indented, or is indented by a lesser amount.
- G. Project Manual Content: This project specification has been produced employing certain conventions in the use of language as well as conventions regarding the intended meaning of certain terms, words, and phrases when used in particular situations or circumstances. These conventions are explained as follows:
1. In certain circumstances, the language of the specifications and other Contract Documents is of the abbreviated type. It implies words and meanings that will be appropriately interpreted. Singular words will be interpreted as plural and plural words will be interpreted as singular where applicable and where the full context of the Contract Documents so indicates.
  2. Imperative language is generally used in specifications. Except as otherwise indicated, requirements expressed imperatively are to be performed by Contractor. At certain locations in the text, for clarity of reading, contrasting subjective language is used to describe responsibilities which must be fulfilled indirectly by Contractor or, when so noted, by others.
- H. Methods of Specifying: The techniques or methods of specifying requirements varies throughout the text.
1. The method used for specifying one unit or work has no bearing on requirements for another unit of work.
  2. Methods of specifying may include the following, or any combination of the following:
    - a. Prescriptive.
    - b. Open-generic-descriptive.
    - c. Performance.
    - d. Proprietary.
    - e. Compliance with reference standards.
- I. Specialists Assignments: In certain instances, specification text requires or implies that specific elements of the work are to be assigned to specialists or expert entities, who must be engaged for the performance of the work. Such assignments are intended to establish which part or entity involved in a specific element of the work is considered as being sufficiently experienced in the indicated construction processes or operations to be recognized as "expert" in those processes or operations. Nevertheless, the final responsibility for fulfillment of the entire set of all contract requirements remains with the Contractor.
- J. These requirements should not be interpreted to conflict with the enforcement of building codes and similar regulations governing the work. They are also not intended to interfere with local trade union jurisdictional settlements and similar conventions.
- K. Trades: Except as otherwise indicated, the use of titles such as "Carpentry" in specification text, is not intended to imply that the work must be performed by an accredited or unionized tradesperson of corresponding generic name (such as "carpenter"). It is also not intended to

01 42 00  
DEFINITIONS AND STANDARDS

imply that specified requirements apply exclusively to work by tradespersons of that corresponding generic name.

1.05 DRAWING SYMBOL

- A. General: Except as otherwise noted indicated, graphic symbols used on drawings are those symbols recognized in the construction industry for purposes indicated. Where not otherwise noted, symbols are defined by "Architectural Graphic Standards", published by John Wiley & Sons, Inc., latest edition.
- B. Mechanical/Electrical Drawings: Graphic symbols used on mechanical/electrical drawings are generally aligned with symbols recommend by ASHRAE. Where appropriate, these symbols supplemented by more specific symbols as recommended by other recognized technical associations including ASME, ASPE, IEEE and similar organizations. Refer instances of uncertainty to the Architect/Engineer for clarification before proceeding.

1.06 INDUSTRY STANDARDS

- A. General Applicability of Standards: Except to the extent that more explicit or more stringent requirements are written into the Contract Documents, applicable standards of the construction industry have the same force and effect as if copied directly into the Contract Documents. Such industry standards are hereby made a part of the Contract Documents by reference. Individual specification sections indicate which codes and standards the Contractor must keep available for reference at the project site.
- B. Referenced standards (standard referenced directly in Contract Documents) have precedence over non-referenced standards which are recognized in industry for applicability to work.
- C. Non-referenced standards are hereby defined as not being applicable to the work, except as general requirement of whether the work complies with recognized construction industry standards.
- D. Publication Dates: Except as otherwise indicated, where compliance with an industry standard is required, comply with standard in effect as of date of Contract Documents.
- E. Updated Standards: At the request of the Architect/Engineer, Contractor or governing authority, submit a change order proposal where an applicable industry code or standard has been revised and reissued after the date of the Contract Documents and before the performance of the work affected. The Architect/Engineer will decide whether to issue the change order to proceed with the updated standard.
- F. Conflicting Requirements: Where compliance with 2 or more standards is specified, and where these standards establish different or conflicting requirements for minimum quantities or quality levels, the most stringent requirement will be enforced, unless the Contract Documents specifically indicate a less stringent requirement. Refer requirements that are different, but apparently equal, and uncertainties as to which quality level is more stringent to the Architect/Engineer for a decision before proceeding.
- G. Minimum Quantities or Quality Levels: In every instance, the quantity or quality level shown or specified is intended to be the minimum for the work to be provided or performed. Unless otherwise indicated, the actual work may either comply exactly, within specified, or may exceed that minimum within reasonable limits. In complying with these requirements, the indicated numeric values are either minimum or maximum values, as noted, or as appropriate for the context of the requirements. Refer instances of uncertainty to the Architect/Engineer for decision before proceeding.
- H. Copies of Standards: Contract Documents require that each entity performing work be experienced in that part of the work being performed. Each entity is also required to be familiar with recognized industry standards applicable to that part of the work. Copies of applicable standards are not bound with the Contract Documents.

DEFINITIONS AND STANDARDS

- I. Where copies of standards are needed for proper performance of the work, the Contractor is required to obtain such copies directly from the publication source.
- J. Although certain copies of standards needed for enforcement of the requirements may be required submittals, the Architect/Engineer reserves the right to require the Contractor to submit additional copies of these standards as necessary for enforcement of the requirements.
- K. Abbreviations and Names: Where acronyms or abbreviations are used in the specifications or other Contract Documents they are defined to mean the industry recognized name of the trade association, standards generating organization, governing authority or other entity applicable to the context of the text provision. Refer to the "Encyclopedia of Associations", published by Gale Research Co., available in most libraries.

## 1.07 GOVERNING REGULATIONS/AUTHORITIES

- A. General: The procedure followed by Architect/Engineer has been to contact governing authorities where necessary to obtain information needed for the purpose of preparing Contract Documents; recognized that such information may or may not be of significance in relation to Contractor's responsibilities for performing the work. Contact governing authorities directly for necessary information and decisions having a bearing on performance of work.
- B. Trade Union Jurisdictions: The Contractor shall maintain, and shall require Prime Subcontractor to maintain, complete current information on jurisdictional matters, regulations actions and pending actions, as applicable to the work. Discuss new developments at appropriate project meetings at the earliest feasible dates, and record information of relevance along with the actions agreed upon. The manner in which Contract Documents have been organized and subdivided is not intended to be an indication of jurisdictional or trade union agreements. Assign and subcontract the work, and employ trades-men laborers, in a manner which will not unduly risk jurisdictional disputes of kind which could result in conflicts, delays, claims and losses in the performance of the work.

## 1.08 SUBMITTALS

- A. Permits, Licenses, and Certificates: For the Owner's records, submit copies of permits, licenses, certifications, inspection reports, releases, jurisdictional settlements, notices, receipts for fee payments, judgments, and similar documents, correspondence and records established in conjunction with compliance with standards and regulations bearing upon performance of the work.

01 42 00  
DEFINITIONS AND STANDARDS

Blank Page

01 50 10  
TEMPORARY FACILITIES - RENOVATION PROJECTS

PART 1 – GENERAL

1.01 CONTRACTOR'S USE OF PREMISES AND FACILITIES

- A. Confine operations at site to areas permitted by:
  - 1. Construction Limits
  - 2. Contract Documents
  - 3. Written Owner Approval
- B. Do not load structure with weight that will endanger structure or existing adjacent structures including any subsurface construction.
- C. The Prime Contractor shall assume full responsibility for protection and safekeeping of product stored on premises.
- D. The Prime Contractor shall move any stored products which interfere with operations of Owner or other Contractor.
- E. The activities of the Prime Contractor, including his subcontractors, material suppliers, employees, and others engaged in the work, shall be strictly limited to the Owner's property. Under no circumstances shall parking, material storage, or other uses of adjacent private property be permitted. Locations of storage areas, field office, parking areas, and the like on the project site shall be only within the construction limits as indicated on the drawings or as approved by the Owner.
- F. Use of Installed Work: Construction personnel may use toilet facilities, sink, and other fixtures and equipment installed in work only as expressly permitted by Architect/Engineer or Owner. Any privileges granted may be revoked if abused.
- G. Construction personnel shall exercise care and shall provide whatever protective measures are required to assure that their particular portions of the work do not damage or alter portions of the work that have been previously installed, either partially or completely. All work so damaged or altered shall be repaired or replaced to the satisfaction of the Architect by the party whose work has been affected, and the expense thereof shall be borne by the party who caused the damage or alteration.
- H. Protection of Floors: In interior areas used for construction or field "shops", protect floors from physical damage, oil drippings, and other staining which might impair bonding of new floor coverings, utilizing such methods as heavy polyethylene covering, sawdust or sand boxes, rigid insulation or the like.

1.02 FIELD OFFICE

- A. The Prime Contractor and their Sub-Contractors shall be responsible for their own field office.
- B. The Prime Contractor shall provide telephone service, including cellular phone for the on-site foreman, for the duration of the project.
- C. Provide at all times fire extinguishers as required by applicable codes and regulations.
- D. Post in a conspicuous space near the telephone, pertinent emergency phone numbers and notices as may be required by governing authorities and fire protection department.

1.03 SITE PROTECTION

- A. Contractor shall adhere to Factory Mutual Engineering and Research (FM) "Cutting and Welding" permit system. Permits are available through the Office of Environmental Safety's Fire Specialist Office at 812-237-4020.
- B. Prime Contractor shall provide a one hour fire watch at the end of each workday when any cutting or welding occurred to assure that no possibility of fire exists from any work performed that day.

01 50 10  
TEMPORARY FACILITIES - RENOVATION PROJECTS

1.04 TEMPORARY ELECTRIC SERVICE

- A. Responsibility: The Prime Contractor shall be allowed to utilize the Owner's electricity for all construction purposes. The Prime Contractor shall arrange for the distribution and continuance throughout the work and the removal at the completion of the work of temporary electrical service. All electrical installations shall be by a Licensed Bonded Electrical Contractor. All elements of such temporary electric service shall conform to the regulations of the National Electric Code, current edition, and OSHA. All temporary wiring shall include a green equipment grounding conductor, and the entire temporary electrical service shall have equipment grounding continuity; all outlets for the connection of portable equipment shall be of the GFCI type. The Contractor shall provide all necessary wiring. The Prime Contractor or their Sub Contractor shall provide extension cords, outlets, etc. required to extend temporary service from nearest outlets of adequate capacity for the power required to points of usage.
- B. Distribution Wiring: The temporary distribution wiring shall be adequate to provide whatever is required for the operation of 120 volts, single-phase portable tools and equipment not exceeding one horsepower; the distribution wiring shall provide a receptacle within 50 feet of all portions of the building area.
- C. Temporary Lighting: The Prime Contractor shall provide all wiring, light bulbs and fixtures necessary to furnish temporary lighting of one watt per sq. ft. of construction area, but provide a minimum of one light in each enclosed space. Keep such temporary lighting in operation during all working periods.
- D. Supervision: The Prime Contractor shall maintain strict supervision over the use of the temporary electrical service and shall be responsible for damages incurred by misuse.

1.05 TEMPORARY WATER SERVICE

- A. The Prime Contractor may use the Owner's existing water service for construction purposes. The Prime Contractor shall provide and maintain leak-free, all hoses, fitting, nozzles, and the like required to distribute water to points of usage. Maintain strict supervision over use and waste of water. Take care not to spill or run water in any part of the building. Repair, replace, or restore (whichever may be deemed necessary by the Architect/Engineer) at no additional cost to the Owner, all work, new or existing, including equipment, furnishings, machines, finished surfaces, and the like which may be damaged by water due to construction operations, and by the misuse of such temporary water service. At completion of the work remove all temporary water distribution items.

1.06 RESTROOM FACILITIES

- A. The Contractor shall be permitted to utilize the Owner's restroom facilities in lieu of providing temporary toilets. The Contractor shall exercise reasonable care so as not cause excess soiling or damage to the restroom facilities.
- B. Any Contractor abuse of the Owner's restrooms shall be just cause for the Owner to revoke the use of the restrooms for the duration of the Project.

1.07 TEMPORARY STORAGE

- A. The Prime Contractor and each of their Sub-Contractors shall be responsible for their own temporary storage.
- B. Provide secure areas as may be required for storage and protection of materials, tools and equipment.

1.08 SIGNS

- A. Identification Signs: No signs or advertisements shall be permitted on the project site or on temporary structures, except those which are required to conform to the safety requirements of the Contract Documents or those which are expressly permitted by the Architect/Engineer or specified herein.

01 50 10  
TEMPORARY FACILITIES - RENOVATION PROJECTS

1.09 TEMPORARY BARRIERS

- A. The Prime Contractor shall be responsible for seeing that all shafts and openings through the floors or roofs are adequately barricaded, marked, and lighted. They shall provide barriers, markers, or other provisions, or all, at all conditions, such as items protruding from the work, which might cause injury to persons. The design, locations, and requirements of protective barricades shall be subject to approval of the Architect/Engineer, but the Contractor shall be responsible for their adequacy. When such conditions no longer exist, barriers and the like shall be removed.

1.10 SITE SECURITY

- A. All temporary construction which may be required to maintain security of buildings or construction areas shall be provided by the Prime Contractor. At the end of each day's work, close all windows opened by construction personnel, and close all access doors to work areas. Work damaged in this regard shall be repaired or replaced to the satisfaction of the Architect/Engineer/Owner. Security guard service shall not be provided as a part of any Contract for this project for field office, storage sheds and storage areas, or for protection of construction tools, equipment, and materials. Such security may, at the Contractor's option, be provided at no additional cost to the Owner.

1.11 TRASH REMOVAL

- A. The Prime Contractor shall remove from the Construction site, and legally dispose of, all rubbish resulting from the work under his contract. Rubbish shall be removed daily and not be allowed to accumulate, other than the trash placed in trash containers outside the building.

1.12 RESTORATION OF TEMPORARY FACILITIES

- A. The Prime Contractor shall be responsible for his restoration of his own temporary facilities.
- B. Storage area and project offices: At completion of the work, remove from the project site all evidence of temporary services, field office, temporary sheds, covers, pallets, excess materials, scrap materials, equipment tools, waste, debris, and other foreign materials. Restore to the Architect/Engineer's satisfaction such area to its condition which existed prior to starting construction work, utilizing whatever methods are appropriate. Repair and patch to match all drive and parking lot surfaces damaged by construction processes; subject to the Architect/Engineer's approval. Fill, grade and reseed all lawn areas and replace all trees, plants or shrubs damaged by the construction process.

1.13 TEMPORARY CONSTRUCTION AREA ENCLOSURES/BARRIERS

- A. The Prime Contractor shall provide all temporary enclosures/barriers required to secure the construction area from the rest of the building.
- B. The enclosure/barrier shall be constructed in a manner to prevent unauthorized personnel from entering the construction area during non-hours of construction.
- C. The enclosure/barrier shall be constructed in a manner to limit the migration of construction dust and debris into adjacent non-construction areas.
- D. A lockable entrance assembly shall be installed in the designated point(s) of entry. The Prime Contractor shall supply their own locking mechanism for this entrance assembly. Furnish the Owner's representative(s) with a key for this locking mechanism for the duration of the Project.

PART 2 – NOT USED

PART 3 – NOT USED

END OF SECTION 01 50 10

01 50 10  
TEMPORARY FACILITIES - RENOVATION PROJECTS

Blank Page

01 60 00  
MATERIALS AND EQUIPMENT

PART 1 – GENERAL

1.01 MATERIALS HANDLING

- A. Delivery: Deliver materials and equipment to Project Site in unopened, undamaged dry containers, wrappings, cartons, crates, sacks, or the like, clearly labeled as to product and materials, and with the manufacturer's name or trademark or both. Materials delivered in other than such condition may be rejected by the Architect/Engineer.
- B. Storage: Suitably store materials and equipment in designated areas and in accordance with manufacturer's recommendations or in a manner approved by the Architect or both. Store such materials and equipment off the ground, totally protected from ground splash, mud, weather separation, intrusion of foreign materials, and other damage. Do not store materials, equipment, or tools on roofs, unless such materials are to be immediately installed during the current work day, and unless equipment and tools are being integrally used in the work. Do not store volatile materials such as solvents, gasoline, oil, fuels, and the like within the building. Immediately remove paper, rags, etc., which might become soaked with such materials when they must be taken into the building for use in the work. At the end of each work day, remove such "safety cans" of materials to their storage area outside the building. The Contractor shall, upon delivery of material and equipment to the project site, check to ascertain that all materials, parts, accessories, and other incidentals necessary for the installation of such materials and equipment have been delivered and received at the project site, so that no delays are caused in the work due to insufficient quantities of materials or missing parts.

1.02 INSTALLATIONS

- A. Materials: Materials and equipment shall be new and undamaged and shall be installed as indicated on the drawings. They shall fit accurately into adjacent work and shall be plumb, level, and true-to-line. All materials and equipment shall be anchored securely and rigidly in place, maintaining alignment with adjacent work. Where installation methods and techniques are not specifically covered by the drawings or the specifications, normal first-class trade practices and manufacturer's instructions and recommendations shall govern, providing that they are approved by the Architect/Engineer.
- B. "Not-In-Contract" Items: Materials, equipment, fixtures, devices and other items indicated on the drawings as "Not-In-Contract" or "N.I.C." shall in no way be a part of the Contract. Where such "Not-In-Contract" items are accompanied by an indication to be installed by the Contractor, the Contractor shall receive, store, protect, assemble, install, and connect such items in accordance with the best accepted practices of the trade or trades involved and with the provisions of the Specifications for similar items that are totally part of the Contract. The Contractor shall be responsible for obtaining such specific information for the installation and connection of such items.
- C. Reinstalling Existing Items: Where existing materials, equipment, fixtures, devices, and other items are indicated on the drawings to be removed, or received, and reinstalled under the Contract, treat such existing items as if they were new and install such existing items as shown on the drawings, in accordance with the best accepted practices of the trade or trades involved and with provisions of the specifications for similar new items.

1.03 REMOVAL AND RE-INSTALLATION OF EQUIPMENT

- A. The Owner is not responsible for the removal or re-installation of equipment necessitated by this work.
- B. All electrical disconnects and reconnects of equipment necessitated by this work shall be performed by a licensed bonded Electrical Contractor hired by the Contractor to perform this work. The Owner will assist in locating the power source but will not be responsible for the

01 60 00  
MATERIALS AND EQUIPMENT

actual performance the electrical work.

1.04 ACCESSIBILITY

- A. The Contractor shall locate all equipment which must be serviced, operated or maintained in fully accessible positions. Minor deviations from the contract drawings may be made to allow for better accessibility, but changes of magnitude or which involve extra cost shall not be made without approval.
- B. It is the Contractor's responsibility to provide access panels when serviceable parts of his installation are concealed by finished construction, unless access panels are specifically indicated on the Drawings or elsewhere in the Project Manual to be by others. Access panel data shall be submitted with the equipment Shop Drawings.
- C. Ample space shall be allowed for removal of all parts that may require replacement or service in the future. The service area is to be indicated on Shop Drawings.
- D. The Contractor shall extend all grease fittings to an accessible location.

PART 2 – NOT USED

PART 3 – NOT USED

END OF SECTION 01 60 00

01 73 10  
CUTTING AND PATCHING

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Requirements and limitations for cutting and patching of Work

1.02 RELATED SECTIONS

- A. Section 01 10 00 - Summary of Work: Work by Owner or by separate contractors
- B. Section 01 32 00 - Submittals and Substitutions
- C. Section 01 60 00 - Materials and Equipment
- D. Individual Product Specification Sections:
  - 1. Cutting and patching incidental to work of the section
  - 2. Advance notification to other sections of openings required in work of those sections
  - 3. Limitations on cutting structural members

1.03 SUBMITTALS

- A. Submit written request in advance of cutting or alteration which affects:
  - 1. Structural integrity of any element of Project
  - 2. Integrity of weather exposed or moisture resistant element
  - 3. Efficiency, maintenance, or safety of any operational element
  - 4. Visual qualities of sight exposed elements
  - 5. Work of Owner or separate contractor
- B. Include in request:
  - 1. Identification of Project
  - 2. Location and description of affected Work
  - 3. Necessity for cutting or alteration
  - 4. Description of proposed Work and Products to be used
  - 5. Alternatives to cutting and patching
  - 6. Effect on work of Owner
  - 7. Date and time work will be executed

PART 2 – PRODUCTS

2.01 MATERIALS

- A. Primary Products: Those required for original installation.

PART 3 – EXECUTION

3.01 RESPONSIBILITY

- A. Each respective Contractor is responsible for the required cutting and patching to complete his work.
- B. Each respective Contractor shall coordinate with the General Contractor and bear all costs associated with cutting and patching.

3.02 EXAMINATION

- A. Examine existing conditions prior to commencing Work, including elements subject to damage or movement during cutting and patching.

01 73 10  
CUTTING AND PATCHING

- B. After uncovering existing Work, assess conditions affecting performance of work.
- C. Beginning of cutting or patching means acceptance of existing conditions.

3.03 PREPARATION

- A. Provide temporary supports to ensure structural integrity of the Work. Provide devices and methods to protect other portions of Project from damage.
- B. Provide protection from elements for areas which may be exposed by uncovering work.
- C. Maintain excavations free of water.

3.04 CUTTING

- A. Execute cutting and fitting including excavation and fill to complete the Work.
- B. Uncover work to install improperly sequenced work.
- C. Remove and replace defective or non-conforming work.
- D. Remove samples of installed work for testing when requested.
- E. Provide openings in the Work for penetration of mechanical and electrical work.
- F. Employ original installer to perform cutting for weather exposed and moisture resistant elements, and sight-exposed surfaces.
- G. Cut rigid materials using masonry saw or core drill. Pneumatic tools not allowed without prior approval.

3.05 PATCHING

- A. Execute patching to complement adjacent Work.
- B. Fit Products together to integrate with other Work.
- C. Execute work by methods to avoid damage to other Work, and which will provide appropriate surfaces to receive patching and finishing.
- D. Employ original installer to perform patching for weather exposed and moisture resistant elements, and sight-exposed surfaces.
- E. Restore work with new Products in accordance with requirements of Contract Documents.
- F. Fit work air tight to pipes, sleeves, ducts, conduit, and other penetrations through surfaces.
- G. At penetrations of fire rated walls, partitions, ceiling, or floor construction, completely seal voids with fire rated material, to full thickness of the penetrated element.
- H. Refinish surfaces to match adjacent finish. For continuous surfaces, refinish to nearest intersection or natural break. For an assembly, refinish entire unit.

END OF SECTION 01 73 10

01 77 00  
CONTRACT CLOSEOUT

PART 1 – GENERAL

1.01 SUBSTANTIAL COMPLETION SUBMISSIONS

A. Record Drawings and Record Specifications:

1. The Contractor shall provide the final Field Record Drawings and Specifications which have been maintained and updated during the duration of the Project to the Architect/Engineer for review. Submit documents in paper form of each Drawing and Specification Division of the Work.
2. Certifications: The Prime Contractor and Subcontractors shall certify, by endorsement on the Record Drawings and Specifications that each of the revised sheets represents a complete and accurate record of the Work as executed.

B. Operations and Maintenance Data

1. Assemble a manual in electronic PDF format on USB Flash Drive indexed by Division of work Sub indexed by Specification of work, presenting for the Owner's guidance full details for care and maintenance of visible surfaces and of equipment included in the Work for review by the A/E.
  - a. Include a copy of the reviewed Architect/Engineer submittal and/or shop drawing. The Submittal and/or shop drawing shall be annotated by the Contractor indicating that the comments have been included in the document.
  - b. Include manufacturer's literature relating to motors and other equipment, catalog cut, parts lists, wiring diagrams, instruction sheets, and other pertinent information which will be useful to the Owner in overall operation and maintenance.
  - c. Include a list of installers and service representatives with company names and addresses, names of individuals to contact, and telephone numbers.
  - d. Include manuals called for in other Sections of the Specifications, in this manual.
2. Certifications: The Contractor shall certify, by endorsement of the manual, that the manual is complete and accurate.
3. On Projects where the Owner is the Architect/Engineer, submit to the Owner for review.

C. Warranties

1. Forms:
  - a. Extended Warranties: Provide a copy of the manufacturer's extended warranty, fill it out completely, sign it, and have it countersigned by the installer and manufacturer if required by the Contract Documents.
  - b. Manufacturers' Warranties: Manufacturer's warranty modified, when required to comply with requirements of the Contract Documents.
2. Starting Date: The starting date for warranties is the Date of Substantial Completion of the Work.
3. Submittal: At the time of Substantial Completion submit all warranties, including special warranties, required by the Contract Documents to the Architect/Engineer review.

D. Statement of Application

1. Submit Owner prepared fully executed Certificate of Substantial Completion.

E. Service and Maintenance Contracts

1. At the time of Substantial Completion submit executed contracts for extended service or maintenance required by the Contract Documents to the Architect/Engineer for review by the A/E.

01 77 00  
CONTRACT CLOSEOUT

2. Extended maintenance proposals where called for in the specification shall be submitted with the proposals for each trade at the time their portion of the work is bid. Furnish copies of the maintenance proposal to the Owner and Architect/Engineer for review prior to award of the subcontract for each portion of work.

1.02 FINAL CLEANING

- A. Responsibility: The Prime Contractor is responsible for the final cleaning of the Project and for the coordination and direction of cleaning by all trades.
- B. Materials:
  1. Use only cleaning materials recommended by the manufacturers of the surfaces to be cleaned.
  2. Use cleaning materials only on surfaces recommended by the cleaning materials manufacturers.
- C. Execution:
  1. Employ experienced workers, or professional cleaners, for final cleaning.
  2. Clean all surfaces whether exposed to view or not.
  3. Remove trash, rubbish, waste materials, tools, and equipment from the site.
  4. Remove grease, dust, dirt, plaster, mortar, fingerprints, and other foreign materials from interior and exterior surfaces exposed to view, e.g., the surfaces of structural steel, miscellaneous metal, woodwork, plaster, masonry, concrete, mechanical and electrical equipment, piping, duct work, and conduit; polish surfaces so designated to shine finish.
  5. Clean the electrical closets, pipe and duct shafts, chases, furred spaces, and similar spaces which are generally unfinished. Leave these spaces free from rubbish, loose plaster, mortar droppings, waste construction materials, dirt, and dust.
  6. The Architect/Engineer is to review items which the Prime Contractor proposes removing labels before they are removed.
  7. Maintain cleaning until date of Substantial Completion or the date of partial occupancy of the building, whichever is earlier. Re-cleaning will not be required after the Work has been inspected and accepted, unless later operations of the Contractor make re-cleaning of certain portions necessary.

1.03 PREPARATION OF FINAL RECORD DRAWINGS AND RECORD SPECIFICATIONS

- A. The Prime Contractor shall employ the Project A/E to re-draft, in CAD format, the paper copy Record Drawings onto the Bid Drawings to create the final Record Drawings.
- B. The Prime Contractor shall employ the Project A/E to retype the paper Record Specifications to indicate all revisions to the Bid Specifications. Items changed shall be marked by a double strike through and revised language inserted in red letters.
- C. An Allowance to cover the costs of the re-drafting of Drawings and revisions to the Specification will be provided and shall be included in the Prime Contractors Bid. Final Allowance cost payments will be based on actual documented A/E costs for their work. The Allowance payment will be adjusted accordingly. This Allowance shall be listed as a separate line item on the Schedule of Values.

01 77 00  
CONTRACT CLOSEOUT

1.04 FINAL CLOSEOUT

- A. Final Closeout date shall be as listed in Section 00 10 10 1.01
- B. At Final Closeout the Contractor shall submit to the Owner, via the Architect/Engineer if applicable:
  - 1. One (1) hard copy of the reviewed and accepted O&M Manual in 3-ring binder(s)
  - 2. One (1) copy on a USB Flash Drive of the complete Project Documentation in PDF format, except as noted in item "o" below, including but not limited to:
    - a. Design Meeting Notes (the Contractor shall coordinate with the A/E to obtain)
    - b. Pre-Bid meeting documents
    - c. The Contractor's Project Bidding Documents including Addenda.
    - d. Award documentation
    - e. Required submissions as detailed in the Award Letter
    - f. Pre-Construction meeting documents and
    - g. Progress meeting notes and Construction observation notes.
    - h. All Change items, e.g. ASI, RFI, RFQ, CP, CO, etc., with documentation
    - i. Pay Applications
    - j. Reviewed and accepted O&M Manual,
    - k. Warranties,
    - l. Extended Service and Maintenance Contracts
    - m. Record Specifications
    - n. A scanned copy of the marked-up Record Drawings
    - o. Record Drawings in both PDF and CAD format
  - 3. The Prime Contractor shall retain the paper copies of the Record Drawings and Record Specifications for a minimum of seven (7) years in a safe location and produce these documents upon request by the Owner.

PART 3 – NOT USED

END OF SECTION 01 77 00

01 77 00  
CONTRACT CLOSEOUT

Blank Page

02 41 14  
SELECTIVE DEMOLITION

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Removal of designated building equipment and fixtures.
- B. Removal of designated construction.
- C. Disposal or storage of removed materials.
- D. Identification of utilities.
- E. Refer to items as indicated.

1.02 SUBMITTALS FOR CLOSEOUT

- A. Project Record Documents: Accurately record actual locations of capped utilities and subsurface obstructions.

1.03 REGULATORY REQUIREMENTS

- A. Conform to applicable code for demolition work, safety of structure, dust control, products requiring electrical disconnection and re-connection.
- B. Obtain required permits from authorities.
- C. Do not close or obstruct egress width to any building or site exit.
- D. Do not disable or disrupt building fire or life safety systems without 3 days prior written notice to Owner.
- E. Conform to procedures applicable when hazardous or contaminated materials are discovered.

1.04 SCHEDULING

- A. Perform work between the hours of 7 a.m. and 4 p.m.

1.05 PROJECT CONDITIONS

- A. Conduct demolition to minimize interference with adjacent and occupied building areas.
- B. Cease operations immediately if structure appears to be in danger and notify Architect/Engineer. Do not resume operations until directed.
- C. Maintain protected egress and access to the Work.

PART 2 – NOT USED

PART 3 – EXECUTION

3.01 PREPARATION

- A. Provide, erect, and maintain temporary insulated partitions at required locations.
- B. Erect and maintain weatherproof closures for exterior openings.
- C. Erect and maintain temporary partitions to prevent spread of dust, odors, and noise to permit continued Owner occupancy.
- D. Protect existing materials which are not to be demolished.
- E. Prevent movement of structure; provide bracing and shoring.
- F. Notify affected utility companies before starting work and comply with their requirements.

02 41 14  
SELECTIVE DEMOLITION

- G. Mark location and termination of utilities.
- H. Provide appropriate temporary signage including signage for exit or building egress.

3.02 DEMOLITION

- A. Disconnect, remove, cap, and identify designated utilities within demolition areas.
- B. Demolish in an orderly and careful manner. Protect existing supporting structural members.
- C. Remove demolished materials from site except where specifically noted otherwise. Do not burn or bury materials on site.
- D. Remove materials as Work progresses. Upon completion of Work, leave areas in clean condition.
- E. Remove temporary Work.

3.03 PROTECTION OF SALVAGED ITEMS

- A. Remove, store and protect the materials and equipment scheduled to be re-used.

.

END OF SECTION 02 41 14

PART 1 – GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification sections, apply to work of this section.

1.02 INDUSTRY STANDARDS

- A. Publications of the following institutes, associations, societies, and agencies are referred to in this section.
  - 1. American Society for Testing & Materials, ASTM.

1.03 PRODUCT HANDLING

- A. Mortar materials, except sand, shall be delivered in full, unopened bags.
  - 1. Masonry cement shall be stored off the ground and shall be kept covered and protected from weather until used.

1.04 SUBMITTALS

- A. Where colored mortar is specified submit samples of colored mortar showing full extent of colors available.

PART 2 – PRODUCTS

2.01 MATERIALS

- A. Masonry cement shall comply with the requirements of ASTM C91 and shall be delivered in original bags bearing manufacturer's batch number, date of manufacture and product trade name.
  - 1. Masonry cement shall be non-staining type.
  - 2. Type M masonry cement shall be used on all walls below grade, all foundation walls, and all load bearing walls.
  - 3. Type N masonry cement shall be used on above grade, non-load bearing walls.
- B. Aggregates shall be natural sand in accordance with ASTM C144 and graded from No. 4 thru No. 200. Fineness modulus shall not vary more than 0.20.
- C. Water shall be clean, fresh, potable, and free of oils, acids, alkalies, salts, organic materials, or other substances that may be deleterious to mortar or any metal in the wall.
- A. within the limits given in Table 2 for masonry cement.

2.02 ADMIXTURES

- A. No admixtures of any kind or type shall be used without the written approval of the Architect.

PART 3 – EXECUTION

3.01 MIXING

- A. Mortar shall be mixed in compliance with the requirements of ASTM C270 and shall be proportioned

3.02 INSTALLATION

- A. All mortar joints in masonry units shall be tooled to concave unless otherwise noted.
- B. Mortar shall be installed in conformance with the other applicable sections.

END OF SECTION 04 05 13

04 05 13  
MORTAR

Blank Page

04 22 00  
UNIT MASONRY SYSTEM

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Concrete masonry units. (Standard gray color)
- B. Split-Faced CMU. (Color as selected by Architect)
- C. Reinforcement, anchorage, and accessories.

1.02 REFERENCES

- A. ACI 530- Building Code Requirements for Masonry Structures.
- B. ACI 530.1- Specifications for Masonry Structures.
- C. ASTM A615- Deformed and Plain Billet Steel Bars for Concrete Reinforcement.
- D. ASTM A641- Zinc-Coated (Galvanized) Carbon Steel Wire.
- E. ASTM C90- Load-Bearing Concrete Masonry Units.
- F. ASTM C129- Non-Load Bearing Concrete Masonry Units.
- G. IMIAC- International Masonry Industry All-Weather council: Recommended Practices and Guide Specification for Cold Weather Masonry Construction.
- H. UL- Fire Resistance Directory.

1.03 SUBMITTALS

- A. Submit under provisions of Section 01 32 00.
- B. Product Data: Provide data for masonry units and fabricated wire reinforcement.
- C. Samples: Submit two samples of split-faced block units to illustrate color, texture and extremes of color range.
- D. Manufacturer's Certificate: Certify that cement masonry units meet or exceed specified requirements.
- E. Test Reports: Submit test results indicating compressive strength, water absorption, saturation and suction.

1.04 QUALITY ASSURANCE

- A. Perform Work in accordance with ACI 530 and ACI 530.1.
- B. Fire Performance Characteristics: Where fire-resistance ratings are indicated, provide materials and construction which are identical to those of assemblies whose fire endurance has been determined by testing in compliance with ASTM E119 by a recognized testing and inspecting organization or by another means, as acceptable to authorities having jurisdiction.
- C. Single Source Responsibility for Masonry Units: Obtain exposed masonry units of uniform texture and color, or a uniform blend within the ranges accepted for these characteristics, from one manufacturer for each different product required for each continuous surface or visually related surfaces.

1.05 QUALIFICATIONS

- A. Manufacturer: Company specializing in manufacturing the Products specified in this section with minimum five years documented experience.

1.06 REGULATORY REQUIREMENTS

- A. Conform to applicable codes for UL Assemblies and requirements for fire rated masonry construction.

04 22 00  
UNIT MASONRY SYSTEM

1.07 DELIVERY, STORAGE, AND HANDLING

- A. Deliver, store, protect and handle products to site under provisions of Section 01600.
- B. Accept pre-faced units on site. Inspect for damage.

1.08 ENVIRONMENTAL REQUIREMENTS

- A. Cold Weather Requirements: IMIAC-Recommended Practices and Guide Specifications for Cold Weather Masonry Construction.
- B. Perform the following construction procedures while masonry work is progressing. Temperature ranges indicated below apply to air temperatures existing at time of installation except for grout. For grout, temperature ranges apply to anticipated minimum night temperatures. In heating mortar and grout materials, maintain mixing temperature selected within 10 degrees F (6 degrees C).
  - 1. 40 degrees F (4 degrees C) to 32 degrees F (0 degrees C):
    - a. Mortar: Heat mixing water to produce mortar temperature between 40 degrees F (4 degrees C) and 120 degrees F (49 degrees C).
    - b. Grout: Follow normal masonry procedures.
  - 2. 32 degrees F (0 degrees C) to 25 degrees F (-4 degrees C):
    - a. Mortar: Heat mixing water and sand to produce mortar temperatures between 40 degrees F (4 degrees C) and 120 degrees F (49 degrees C); maintain temperature of mortar on boards above freezing.
    - b. Grout: Heat grout materials to 90 degrees F (32 degrees C) to produce in-place grout temperature of 70 degrees F (21 degrees C) at end of work day.
  - 3. 25 degrees F (-4 degrees C) to 20 degrees F (-7 degrees C):
    - a. Mortar: Heat mixing water and sand to produce mortar temperatures between 40 degrees F (4 degrees C) and 120 degrees F (49 degrees C); maintain temperature of mortar on boards above freezing.
    - b. Grout: Heat grout materials to 90 degrees F (32 degrees C) to produce in-place grout temperature of 70 degrees F (21 degrees C) at end of work day.
    - c. Heat both sides of walls under construction using salamanders or other heat sources.
    - d. Use windbreaks or enclosures when wind is in excess of 15 mph.
  - 4. 20 degrees F (-7 degrees C) and below:
    - a. Mortar; heat mixing water and sand to produce mortar temperatures between 40 degrees F (4 degrees C) and 120 degrees F (49 degrees C).
    - b. Grout: Heat grout materials to 90 degrees F (32 degrees C) to produce in-place grout temperature of 70 degrees F (21 degrees C) at end of work day.
    - c. Masonry Units: Heat masonry units so that they are above 20 degrees F at time of laying.
    - d. Provide enclosure and auxiliary heat to maintain an air temperature of at least 40 degrees F for 24 hours after laying units.
    - e. Do not heat water for mortar and grout to above 160 degrees F.

04 22 00  
UNIT MASONRY SYSTEM

- C. Protect completed masonry and masonry not being work on in the following manner. Temperature ranges indicated apply to mean daily air temperatures except for grouted masonry. For grouted masonry temperature ranges apply to anticipated minimum night temperatures.
1. 40 degrees F (4 degrees C) to 32 degrees F (0 degrees C):
    - a. Protect masonry from rain or snow for at least 24 hours by covering with weather-resistive membrane.
  2. 32 degrees F (0 degrees C) to 25 degrees F (-4 degrees C):
    - a. Completely cover masonry with weather-resistive membrane for at least 24 hours.
  3. 25 degrees F (-4 degrees C) to 20 degrees F (-7 degrees C):
    - a. Completely cover masonry with weather-resistive insulating blankets or similar protection for at least 24 hours, 48 hours for grouted masonry.
  4. 20 degrees F (-7 degrees C) and below:
    - a. Except as otherwise indicated, maintain masonry temperature above 32 degrees F (0 degrees C) for 24 hours using enclosures and supplementary heat, electric heating blankets, infrared lamps or other methods proven to be satisfactory. For grouted masonry maintain heated enclosure to 40 degrees F (4 degrees C) for 48 hours.

1.09 COORDINATION

- A. Coordinate the masonry work with veneer, door and window frames, embedments and anchors for other work.

PART 2 – PRODUCTS

2.01 CONCRETE MASONRY UNITS.

- A. Hollow Load Bearing Block Units (CMU): ASTM C90, Type I-Moisture Controlled; light weight, standard gray color.
- B. Solid Load-Bearing Block Units (CMU): ASTM C90, Type I- Moisture Controlled; light weight, standard gray color.
- C. Hollow and Solid Non-Load Bearing Block Units (CMU): ASTM C129, Type I - Moisture Controlled; normal weight, standard gray color.
- D. Architectural Masonry Units (split-faced CMU): ASTM C 90, the maximum absorption shall not exceed 7.5%. Architectural masonry units shall be in the normal weight classification and shall not be less than 125 lbs./pcf. All units shall be tested in accordance with ASTM C 140.
- E. Size and Shape: Nominal modular size of 8" x 16" x 4", 6", 8", 12", inches. Provide special units for 90 degree corners, bond beams, lintels, and bullnosed corners.

2.02 REINFORCEMENT AND ANCHORAGE

- A. Single Wythe Joint Reinforcement: Truss type; steel wire, hot dip galvanized to ASTM A641 Class 3 after fabrication, 3/16 inch (4.8 mm) side rods with No. 9 cross ties.
  1. Manufacturers:
    - a. Dur-O-Wal, Inc.
    - b. Hohman & Barnard, Inc.
    - c. A-A Wire Products Co.
    - d. Heckman Building Products, Inc.

04 22 00  
UNIT MASONRY SYSTEM

PART 3 – EXECUTION

3.01 EXAMINATION

- A. Verify that field conditions are acceptable and are ready to receive work.
- B. Verify items provided by other sections of work are properly sized and located.

3.02 ARCHITECTURAL MASONRY UNITS (SPLIT-FACED)

- A. Manufactured with a chamfered edge to insure a straight break on the face shell of the masonry unit.
- B. Manufactured in one continuous run to achieve color consistency and compatible textures.
- C. A sample panel shall be constructed at the job site showing the range of color and texture, color of mortar and workmanship.

3.03 COURSING

- A. Establish lines, levels, and coursing indicated. Protect from displacement.
- B. Maintain masonry courses to uniform dimension. Form vertical and horizontal joints of uniform thickness.
- C. Concrete Masonry Units:
  - 1. Bond: Running.
  - 2. Coursing: One unit and one mortar joint to equal 8 inches (200 mm).
  - 3. Mortar Joints: Concave.

3.04 PLACING AND BONDING

- A. Lay solid masonry units in full bed of mortar, with full head joints, uniformly jointed with other work.
- B. Lay hollow masonry units with face shell bedding on head and bed joints.
- C. Buttering corners of joints or excessive furrowing of mortar joints are not permitted.
- D. Remove excess mortar as work progresses.
- E. Interlock intersections and external corners.
- F. Do not shift or tap masonry units after mortar has achieved initial set. Where adjustment must be made, remove mortar and replace.
- G. Perform job site cutting of masonry units with proper tools to provide straight, clean, unchipped edges. Prevent broken masonry unit corners or edges.
- H. Cut mortar joints flush where resilient base is scheduled.
- I. Isolate masonry partitions from vertical structural framing members with a control joint as indicated.
- J. Isolate top joint of masonry partitions from horizontal structural framing members and slabs or decks with compressible joint filler.
- K. Place precast sill as shown on drawings and mortar into place.

3.05 CUTTING AND FITTING

- A. Cut and fit for chases, pipes, conduit, sleeves, grounds. Coordinate with other sections of work to provide correct size, shape, and location.
- B. Obtain approval prior to cutting or fitting masonry work not indicated or where appearance or strength of masonry work may be impaired.

04 22 00  
UNIT MASONRY SYSTEM

3.06 FIELD QUALITY CONTROL

- A. Field testing will be performed under provisions of Section 01 40 00.
- B. Inspect all masonry.

3.07 CLEANING

- A. Clean work under provisions of Section 01 77 00.
- B. Remove excess mortar and mortar smears as work progresses.
- C. Replace defective mortar. Match adjacent work.
- D. Clean soiled surfaces with cleaning solution.
- E. Use non-metallic tools in cleaning operations.

3.08 PROTECTION OF FINISHED WORK

- A. Protect finished Work under provisions of Section 01 77 00.
- B. Without damaging completed work, provide protective boards at exposed corners which may be damaged by construction activities.

END OF SECTION 04 22 00

04 22 00  
UNIT MASONRY SYSTEM

Blank Page

05 41 00  
METAL STUDS FOR INTERIOR WALLS

PART 1 – GENERAL

1.01 PRODUCT HANDLING

- A. Protection: Use all means necessary to protect metal studs before, during and after installation and to protect the installed work and materials of all other trades.
- B. Replacements: In the event of damage, immediately make all repairs and replacements necessary to the approval of the Architect and at no additional cost to the Owner.

PART 2 – PRODUCTS

2.01 METAL STUDS

- A. Standards: All metal studs and accessories shall meet or exceed the minimum requirements of Federal Specifications QQS-698 and QQS-775d, class d, for the items and use intended.
- B. Materials:
  - 1. All metal studs and accessories, unless otherwise specifically approved by the Architects, shall be galvanized steel.
  - 2. Studs and runners shall be channel-type, roll-formed 20 gauge (standard) size.
  - 3. All furring channels shall be 25 gauge.
  - 4. Steel runners and hangers shall be sizes as indicated on the Drawings.
  - 5. Bridging requirements are to be designed by the supplier. Maximum spacing of bridging is to be 5'-0" o.c. All bridging is to be attached with gauge angles and screws. Minimum attachment to be 18 gauge short angle and (4) TEK screws.

2.02 OTHER MATERIALS

- A. All other materials, not specifically described but required for a complete and proper installation of metal studs, shall be new, first quality of their respective kinds, in strict accordance with the recommendations of the manufacturer of the metal studs used, and subject to approval of the Architect/Engineer.

PART 3 – EXECUTION

3.01 SURFACE CONDITIONS

- A. Inspection:
  - 1. Prior to all work of this section, carefully inspect the installed work of all other trades and verify that all such work is complete to the point where this installation may properly commence.
  - 2. Verify that metal studs may be installed in strict accordance with the original design and the manufacturer's recommendations.

3.02 INSTALLATION

- A. Erect framing and panels plumb, level and square in strict accordance with the approved shop drawings.
- B. Handling and lifting of prefabricated panels shall be done in a manner which will not cause distortion in any manner.
- C. Track shall be securely anchored to the supporting structure as shown on erection drawings. Concrete anchors shall be installed after full compressive strength has been achieved.
- D. At track butt joints, abutting pieces of track shall be securely anchored to a common structural element, or they shall be butt-welded or spliced together.

METAL STUDS FOR INTERIOR WALLS

- E. Studs shall be plumb, aligned and securely attached to the flange or webs of both upper and lower tracks.
- F. Jack studs or cripples shall be installed below window sills, above window and door heads, at free standing stair rails and elsewhere to furnish support, and shall be securely attached to supporting members.
- G. Wall stud bridging shall be attached in a manner to prevent stud rotation. Bridging rows shall be spaced according to the manufacturer's recommendations.
- H. Framed wall openings shall include headers and supporting studs as shown on the plans.
- I. Temporary bracing shall be provided until erection is complete.
- J. Provisions for structure vertical movement shall be provided at the top of each panel section and where indicated on the plans using a vertical slide clip or other means in accordance with the manufacturer's recommendations. Allow for a minimum of 1/2" structure deflection.
- K. Provide double studs at wall openings, door and window jambs and not more than 1 1/2" each side of openings and wall intersections.
- L. Coordinate erection of studs with requirements of door frame supports and attachments.

END OF SECTION 05 41 00

06 10 00  
ROUGH CARPENTRY

PART 1 – GENERAL

1.01 DESCRIPTION

- A. Section specifies wood blocking, framing, sheathing, furring, nailers, sub-flooring, rough hardware, and light wood construction.

1.02 RELATED WORK

- A. Milled woodwork: Section 06 20 00, FINISH CARPENTRY AND MILLWORK.
- B. Gypsum sheathing: Section 09 25 00, GYPSUM BOARD SYSTEM.

1.03 SUBMITTALS

- A. Submit in accordance with Section 01 32 00, SAMPLES AND SHOP DRAWINGS.
- B. Shop Drawings showing framing connection details, fasteners, connections and dimensions.

1.04 PRODUCT DELIVERY, STORAGE AND HANDLING

- A. Protect lumber and other products from dampness both during and after delivery at site.
- B. Pile lumber in stacks in such manner as to provide air circulation around surfaces of each piece.
- C. Stack plywood and other board products so as to prevent warping.
- D. Locate stacks on well drained areas, supported at least 6 inches above grade and cover with well ventilated sheds having firmly constructed over hanging roof with sufficient end wall to protect lumber from driving rain.

1.05 APPLICABLE PUBLICATIONS

- A. Publications listed below form a part of this specification to extent referenced. Publications are referenced in the text by basic designation only.
- B. American Forest and Paper Association (AFPA):
  - 1. National Design Specification for Wood Construction WCD Number 1-01 Conventional Wood Frame Construction
- C. American Institute of Timber Construction (AITC):

  7. D1760-01 Pressure Treatment of Timber Products D2559-00 Adhesives for Structural Laminated Wood Products for Use Under Exterior (Wet Use) Exposure Conditions
  8. D3498-01 Adhesives for Field-Gluing Plywood to Lumber Framing for Floor Systems F844-00 Washers, Steel, Plain (Flat) Unhardened for General Use
  9. F1667-01 Nails, Spikes, and Staples
- G. U.S. Department of Commerce Product Standard (PS)
1. PS 1-95 Construction and Industrial Plywood
  2. PS 20-70 (R86) American Softwood Lumber Standard
  3. PS 58-74 Basic Hardboard

PART 2 – PRODUCTS

2.01 LUMBER

- A. Unless otherwise specified, each piece of lumber bear grade mark, stamp, or other identifying marks indicating grades of material, and rules or standards under which produced.
4. Identifying marks in accordance with rule or standard under which material is produced, including requirements for qualifications and authority of the inspection organization, usage of authorized identification, and information included in the identification.
  5. Inspection agency for lumber approved by the Board of Review, American Lumber Standards Committee, to grade species used.
- B. Structural Members: Species and grade as listed in the AFPA, National Design Specification for Wood Construction having design stresses as shown.
- C. Lumber Other Than Structural:
1. Unless otherwise specified, species graded under the grading rules of an inspection agency approved by Board of Review, American Lumber Standards Committee.
  2. Framing lumber: Minimum extreme fiber stress in bending of 1100.
  3. Furring, blocking, nailers and similar items 4 inches and narrower Standard Grade; and, members 6 inches and wider, Number 2 Grade.
  4. Board Sub-flooring: Shiplap edge, 1 inch thick, not less than 8 inches wide.
- D. Sizes:
1. Conforming to Prod. Std., PS20.
  2. Size references are nominal sizes, unless otherwise specified, actual sizes within manufacturing tolerances allowed by standard under which produced.
- E. Moisture Content:
1. At time of delivery and maintained at the site.
  2. Boards and lumber 2 inches and less in thickness: 19 percent or less.
  3. Lumber over 2 inches thick: 25 percent or less.

06 10 00  
ROUGH CARPENTRY

F. Fire Retardant Treatment:

1. Mil Spec. MIL-L-19140 with piece of treated material bearing identification of testing agency and showing performance rating.
2. Treatment and performance inspection, by an independent and qualified testing agency that establishes performance ratings.

G. Preservative Treatment:

1. Do not treat Heart Redwood and Western Red Cedar.
2. Treat wood members and plywood exposed to weather or in contact with plaster, masonry or concrete, including framing of open roofed structures; sills, sole plates, furring, and sleepers that are less than 600 mm (24 inches) from ground; nailers, edge strips, blocking, crickets, curbs, cant, vent strips and other members used in connection with roofing and flashing materials.
3. Treat other members specified as preservative treated (PT).
4. Preservative treat by the pressure method complying with ASTM D1760, except any process involving the use of Chromated Copper arsenate (CCA) for pressure treating wood is not permitted.

2.02 PLYWOOD

A. Comply with Prod. Std., PS 1.

B. Bear the mark of a recognized association or independent inspection agency that maintains continuing control over quality of plywood which identifies compliance by veneer grade, group number, span rating where applicable, and glue type.

C. Sheathing:

1. APA rated Exposure 1 or Exterior; panel grade CD or better.
2. Wall sheathing:
  - a. Minimum 11/32 inch thick with supports 16 inches on center and 15/32 inch thick with supports 24 inches on center unless specified otherwise.
  - b. Minimum 48 inches wide at corners without corner bracing of framing.
3. Roof sheathing:
  - a. Minimum 11/32 inch thick with span rating 24/0 or 15/32 inch thick with span rating for supports 16 inches on center unless specified otherwise.
  - b. Minimum 19/32 inch thick or span rating of 40/20 or 23/32 inch thick or span rating of 48/24 for supports 24 inches on center.

D. Subflooring:

1. Under finish wood flooring or underlayment:
  - a. APA Rated sheathing, Exposure 1. panel grade CD.
  - b. Minimum 19/32 inch thick with span rating 32/16 or greater for supports at 16 inches on center and 23/32 inch thick with span rating 48/24 for supports at 24 inches on center.
2. Combination subflooring-underlayment under resilient flooring or carpet:
  - a. APA Rated Stud-I-Floor Exterior or Exposure 1, T and G.
  - b. Minimum 19/32 inch thick or greater, span rating 16, for supports at 16 inches on center; 23/32 inch thick or greater, span rating 24, for supports at 24 inches on center.

06 10 00  
ROUGH CARPENTRY

- c. Minimum 3/4-inch thick or greater, span rating 32, for supports at 32 inches on center; 1-1/8 inch thick, span rating 48 for supports at 48 inches on center.
- E. Underlayment:
  - 1. APA rated Exposure 1 or Exterior, panel grade C-C Plugged.
  - 2. Minimum 1/4 inch thick or greater over plywood subflooring and 3/8 inch thick or greater over board subflooring, unless otherwise shown.

2.03 STRUCTURAL-USE PANELS

- A. Comply with APA.
- B. Bearing the mark of a recognized association or independent agency that maintains continuing control over quality of panel which identifies compliance by end use, Span Rating, and exposure durability classification.
- C. Wall and Roof Sheathing:
  - 1. APA Rated sheathing panels, durability classification of Exposure 1 or Exterior Span Rating of 16/0 or greater for supports 16 inches on center and 24/0 or greater for supports 24 inches on center.
- D. Subflooring:
  - 1. Under finish wood flooring or underlayment:
    - a. APA rated sheathing panels, durability classification of Exposure 1 or Exterior.
    - b. Span Rating of 24/16 or greater for supports 16 inches on center and 24 or greater for supports 24 inches on center.
  - 2. Under resilient floor or carpet.
    - a. APA rated combination subfloor-underlayment grade panels, durability classification of Exposure 1 or Exterior T and G.
    - b. Span Rating of 16 or greater for supports 16 inches on center and 24 or greater for supports 24 inches on center.
- E. Underlayment:
  - 1. APA rated Exposure I.
  - 2. Minimum 1/4 inch thick or greater over subfloor.
- F. Wood "I" Beam Members:
  - 1. Size and Shape as shown.
  - 2. Cambered and marked "Top up".
  - 3. Plywood webs: PS-1, minimum 3/8 inch thick, unless shown otherwise.
  - 4. Flanges: Kiln dried stress rated dense lumber minimum 1-1/2 inch thick, width as shown.
  - 5. Plywood web fitted into flanges and joined with ASTM D2559 adhesive to form "I" beam section unless shown otherwise.
- G. Laminated Veneer Lumber (LVL):
  - 1. Bonded jointed wood veneers with ASTM D2559 adhesive.
  - 2. Scarf jointed wood veneers with grain of wood parallel.
  - 3. Size as shown.

06 10 00  
ROUGH CARPENTRY

2.04 ROUGH HARDWARE AND ADHESIVES

A. Anchor Bolts:

1. ASME B18.2.1 and ANSI B18.2.2 galvanized, 13 mm (1/2 inch) unless shown otherwise.
2. Extend at least 200 mm (8 inches) into masonry or concrete with ends bent 50 mm (2 inches).

B. Miscellaneous Bolts: Expansion Bolts: C1D, A-A-55615; lag bolt, long enough to extend at least 65 mm (2-1/2 inches) into masonry or concrete. Use 1/2 inch bolt unless shown otherwise.

C. Washers

1. ASTM F844.
2. Use zinc or cadmium coated steel or cast iron for washers exposed to weather.

D. Screws:

1. Wood to Wood: ANSI B18.6.1 or ASTM C1002.
2. Wood to Steel: ASTM C954, or ASTM C1002.

E. Nails:

1. Size and type best suited for purpose unless noted otherwise. Use aluminum-alloy nails, plated nails, or zinc-coated nails, for nailing wood work exposed to weather and on roof blocking.
2. ASTM F1667:
  - a. Common: Type I, Style 10.
  - b. Concrete: Type I, Style 11.
  - c. Barbed: Type I, Style 26.
  - d. Underlayment: Type I, Style 25.
  - e. Masonry: Type I, Style 27.
  - f. Use special nails designed for use with ties, strap anchors, framing connectors, joists hangers, and similar items. Nails not less than 1-1/4 inches long, 8d and deformed or annular ring shank.

F. Framing and Timber Connectors:

1. Fabricate of ASTM A446, Grade A; steel sheet not less than 0.052 inch thick unless specified otherwise. Apply standard plating to steel timber connectors after punching, forming and assembly of parts.
2. Framing Angles: Angle designed with bendable legs to provide three way anchors.
3. Straps:
  - a. Designed to provide wind and seismic ties with sizes as shown or specified.
  - b. Strap ties not less than 1-1/4 inches wide.
  - c. Punched for fastener.
4. Metal Bridging:
  - a. Optional to wood bridging.
  - b. V shape deformed strap with not less than 2 nail holes at ends, designed to nail to top and side of framing member and bottom and side of opposite member.

06 10 00  
ROUGH CARPENTRY

- c. Not less than 3/4 by 5 inches bendable nailing flange on ends.
  - d. Fabricated of 0.04 inch minimum thick sheet.
- 5. Joist Hangers:
  - a. Fabricated of 0.063 inch minimum thick sheet, U design unless shown otherwise.
  - b. Heavy duty hangers fabricated of minimum 0.108 inch thick sheet, U design with bent top flange to lap over beam.
- 6. Timber Connectors: Fabricated of steel to shapes shown.
- 7. Joist Ties: Mild steel flats, 3/16 by 1-1/4 inch size with ends bent about 30 degrees from horizontal, and extending at least 16 inches onto framing. Punch each end for three spikes.
- 8. Wall Anchors for Joists and Rafters:
  - a. Mild steel strap, 3/16 by 1-1/4 inch with wall ends bent 2 inches, or provide 3/8 by 5 inch pin through strap end built into masonry.
  - b. Strap long enough to extend onto three joists or rafters, and punched for spiking at each bearing.
  - c. Strap not less than 4 inches embedded end.
- 9. Joint Plates:
  - a. Steel plate punched for nails.
  - b. Steel plates formed with teeth or prongs for mechanically clamping plates to wood.
  - c. Size for axial eccentricity, and fastener loads.
- G. Adhesives:
  - 1. For field-gluing plywood to lumber framing floor or roof systems: ASTM D3498.
  - 2. For structural laminated Wood: ASTM D2559.

PART 3 – EXECUTION

3.01 INSTALLATION OF FRAMING AND MISCELLANEOUS WOOD MEMBERS

- A. General:
  - 1. Set rough carpentry to required levels and lines with members plumb, true to line, cut, and fitted.
  - 2. Fit rough carpentry to other construction; scribe and cope as needed for accurate fit.
  - 3. Locate furring, nailers, blocking, grounds and similar supports to comply with requirements for attaching other construction.
- B. Conform to applicable requirements of the following:
  - 1. AFPA National Design Specification for Wood Construction for timber connectors.
  - 2. AITC Timber Construction Manual for heavy timber construction.
  - 3. AFPA WCD-number 1, Manual for House Framing for nailing and framing unless specified otherwise.
  - 4. APA for installation of plywood or structural use panels.
  - 5. ASTM F 499 for wood underlayment.
  - 6. TPI for metal plate connected wood trusses.

06 10 00  
ROUGH CARPENTRY

- C. Apply field treatment complying with AWP to cut surfaces of preservative-treated lumber and plywood.

### 3.02 FASTNERS

#### A. Nails.

1. Nail in accordance with the Recommended Nailing Schedule as specified in AFPA Manual for House Framing where detailed nailing requirements are not specified in nailing schedule. Select nail size and nail spacing sufficient to develop adequate strength for the connection without splitting the members.
  - a. For sheathing and subflooring, select length of nails sufficient to extend 1 inch into supports.
  - b. Use eight penny or larger nails for nailing through 1 inch thick lumber and for toe nailing 2 inch thick lumber.
  - c. Use 16 penny or larger nails for nailing through 2 inch thick lumber.

#### B. Bolts:

1. Fit bolt heads and nuts bearing on wood with washers.
2. Countersink bolt heads flush with the surface of nailers.
3. Embed in concrete and solid masonry or use expansion bolts. Special bolts or screws designed for anchor to solid masonry or concrete in drilled holes may be used.
4. Use toggle bolts to hollow masonry or sheet metal.
5. Use bolts to steel over 0.112 inch, 11 gage in thickness. Secure wood nailers to vertical structural steel members with bolts, placed one at ends of nailer and 24 inch intervals between end bolts. Use clips to beam flanges.

#### C. Drill Screws to steel less than 0.112 inch thick.

1. ASTM C1002 for steel less than 0.033 inch thick.
2. ASTM C 954 for steel over 0.033 inch thick.

#### D. Power actuated drive pins may be used where practical to anchor to solid masonry, concrete, or steel.

#### E. Do not anchor to wood plugs or nailing blocks in masonry or concrete. Use metal plugs, inserts or similar fastening.

#### F. Screws to Join Wood:

1. Where shown or option to nails.
2. ASTM C1002, sized to provide not less than 1 inch penetration into anchorage member.
3. Spaced same as nails.

### 3.03 INSTALLATION PROCEDURES

#### A. Installation of Timber Connectors:

1. Conform to applicable requirements of the NFPA National Design Specification for Wood Construction.
2. Fit wood to connectors and drill holes for fasteners so wood is not split.

#### B. Set sills or plates level in full bed of mortar on masonry or concrete walls.

1. Space anchor bolts 4 feet on centers between ends and within 6 inches of end. Stagger bolts from side to side on plates over 7 inches in width.

06 10 00  
ROUGH CARPENTRY

2. Use shims of slate, tile or similar approved material to level wood members resting on concrete or masonry. Do not use wood shims or wedges.
  3. Closely fit, and set to required lines.
- C. Cut notch, or bore in accordance with NFPA Manual for House-Framing for passage of ducts wires, bolts, pipes, conduits and to accommodate other work. Repair or replace miscut, misfit or damaged work.
- D. Blocking Nailers, and Furring:
1. Install furring, blocking, nailers, and grounds where shown.
  2. Use longest lengths practicable.
  3. Use fire retardant treated wood blocking where shown at openings and where shown or specified.
  4. Layers of Blocking or Plates:
    - a. Stagger end joints between upper and lower pieces.
    - b. Nail at ends and not over 24 inches between ends.
    - c. Stagger nails from side to side of wood member over 5 inches in width.
- E. Floor and Ceiling Framing:
1. Set with crown edge up.
  2. Bear on not less than 4 inches on concrete and masonry, and 1-1/2 inches on wood and metal unless shown otherwise.
  3. Support joist, trimmer joists, headers, and beams framing into carrying members at same relative levels on joist hangers unless shown otherwise.
  4. Lap and spike wood joists together at bearing, or butt end-to-end with scab ties at joint and spike to plates. Scab tie lengths not less than 8 inches lap on joist ends. Install wood I beam joists as shown.
  5. Frame openings with headers and trimmer joist. Double headers carrying more than two tail joists and trimmer joists supporting headers carrying more than one tail joist unless otherwise shown.
  6. Drive nails through headers into joists using two nails for 2 inch by 6 inch; three nails for 2 inch by 8 inch and four nails for 2 inch by 10 inch and over in size.
  7. Install nearest joist to double headers and spike joist to both header members before trimmer joist is installed and secured together.
  8. Doubled joists under partitions parallel with floor joists.
  9. Where joists run perpendicular to masonry or concrete, anchor every third joist to masonry or concrete with one metal wall anchor. Securely spike anchors with three nails to side of joist near its bottom.
  10. Anchor joists running parallel with masonry or concrete walls to walls with steel flats spaced not over 6 feet apart. Extend steel flats over at least three joists and into masonry 4 inches with ends turned 2 inches; bolt to concrete. Set top of flats flush with top of joists, and securely nail steel flats to each joist.
  11. Hook ties at steel framing over top flange of steel members.
  12. Nonbearing partitions running parallel with ceiling joists, install solid 2 inch thick bridging same depth as ceiling joists cut to fit snug between joists for securing top plate of partitions. Securely spike bridging to joists. Space 4 feet on center.

06 10 00  
ROUGH CARPENTRY

13. Where ceramic tile finish floors are set in Portland cement mortar, nail continuous 2 inches by 3 inches ledgers to sides of joists to support subflooring flush with top of joist.

F. Bridging:

1. Use 1 inch by 3 inch lumber with ends beveled for slope. Option: Metal bridging may be used for wood bridging.
2. Install one row of bridging for joist spans over 8 feet, but less than 16 feet long; install two rows for spans over 16 feet long.
3. Install an extra row of bridging between trimmer and next two joists if header is more than 2 feet from end of trimmer or from regular row of bridging.
4. Secure with two nails at ends.
5. Leave bottom ends loose until after subflooring or roof sheathing is installed.
6. Install single row of bridging at centerline of span and two rows at the third points of span unless otherwise shown.

G. Roof Framing:

1. Set rafters with crown edge up.
2. Form a true plane at tops of rafters.
3. Valley, Ridge, and Hip Members:
  - a. Size for depth of cut on rafters.
  - b. Straight and true intersections of roof planes.
  - c. Secure hip and valley rafters to wall plates by using framing connectors.
  - d. Double valley rafters longer than the available lumber, with pieces lapped not less than 4 feet and spiked together.
  - e. Butt joint and scab hip rafters longer than the available lumber.
4. Spike to wall plate and to ceiling joists except when secured with framing connectors.
5. Frame openings in roof with headers and trimmer rafters. Double headers carrying more than one rafter unless shown otherwise.
6. Install 2 inch by 4 inch strut between roof rafters and ceiling joists at 4 feet on center unless shown otherwise.

H. Partition and Wall Framing:

1. Use 2 inch by 4 inch studs spaced 16 inches on centers; unless shown otherwise.
2. Install double studs at openings and triple studs at corners.
3. Installation of sole plate:
  - a. Anchor plates of walls or partitions resting on concrete floors in place with expansion bolts, one near ends of piece and at intermediate intervals of not more than 4 feet or with power actuated drive pins with threaded ends of suitable type and size, spaced 2 feet on center unless shown otherwise.
  - b. Nail plates to wood framing through subfloor as specified in nailing schedule.
4. Headers or Lintels:
  - a. Make headers for openings of two pieces of 2 inch thick lumber of size shown with plywood filler to finish flush with face of studs or solid lumber of equivalent size.

06 10 00  
ROUGH CARPENTRY

- b. Support ends of headers on top of stud cut for height of opening. Spike cut stud to adjacent stud. Spike adjacent stud to header.
- 5. Use double top plates, with members lapped at least 2-feet spiked together.
- 6. Install intermediate cut studs over headers and under sills to maintain uniformity of stud spacing.
- 7. Use single sill plates at bottom of opening unless shown otherwise. Toe nail to end stud, face nail to intermediate studs.
- 8. Install 2 inch blocking for firestopping so that maximum dimension of any concealed space is not over 8 feet in accordance with NFPA Manual for House Framing.
- 9. Install corner bracing when plywood or structured use panel sheathing is not used.
  - a. Let corner bracing into exterior surfaces of studs at an angle of approximately 45 degrees, extended completely over walls plates, and secured at bearing with two nails.
  - b. Use 1 inch by 4 inch corner bracing.
- I. Rough Bucks:
  - 1. Install rough wood bucks at opening in masonry or concrete where wood frames or trim occur.
  - 2. Brace and maintain bucks plumb and true until masonry has been built around them or concrete cast in place.
  - 3. Cut rough bucks from 2 inch thick stock, of same width as partitions in which they occur and of width shown in exterior walls.
  - 4. Extend bucks full height of openings and across head of openings; fasten securely with anchors specified.
- J. Subflooring:
  - 1. Subflooring may be either boards, structural-use panels, or plywood.
  - 2. Lay board subflooring diagonally, with close joints. Stagger end joints and make joints over supports. Bear each board on at least three supports.
  - 3. Provide a clearance of approximately 1/2 inch at masonry or concrete at walls.
  - 4. Apply plywood and structural-use panel subflooring with face grain or long dimension at right angles to the supports, with edges 1/4 inch apart at side joints, and 1/8 inch apart at end joints.
  - 5. Combination subfloor-underlayment:
    - a. A clearance of 1/4 inch at masonry on concrete at walls.
    - b. Stagger panel end joints and make over support.
- K. Underlayment:
  - 1. Where finish flooring of different thickness is used in adjoining areas, use underlayment of thickness required to bring finish flooring surfaces into same plane.
  - 2. Apply to dry, level, securely nailed, clean, wood subfloor without any projections.
  - 3. Fasten to subfloor as specified in ASTM F499.
  - 4. Plywood and particle underlayment may be glue-nailed to subfloor.

06 10 00  
ROUGH CARPENTRY

5. Butt underlayment panels to a light contact with a 1/32 inch space between plywood or hardboard underlayment panels and walls, and approximately 3/8 inch between particleboard underlayment panels and walls.
  6. Stagger underlayment panel end joints with respect to each other and offset joints with respect to joints in the subfloor at least 2 inches.
  7. After installation, avoid traffic on underlayment and damage to its finish surface.
- L. Sheathing:
1. Use plywood or structural-use panels for sheathing.
  2. Lay panels with joints staggered, with edge and ends 1/8 inch apart and nailed over bearings as specified.
  3. Set nails not less than 3/8 inch from edges.
  4. Install 2 inch by 4 inch blocking spiked between joists, rafters and studs to support edge or end joints of panels.
  5. Match and align sheathing which is an extension of work in place to existing.

END OF SECTION 06 10 00

06 10 00  
ROUGH CARPENTRY

Blank Page

06 10 40  
WOOD BLOCKING AND CURBING

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Blocking at wall and roof openings.
- B. Wood furring and grounds.
- C. Concealed wood blocking for support of wall cabinets, millwork, doors, window frames and other items.
- D. Telephone and electrical panel boards.

1.02 REFERENCES

- A. ALSC - American Lumber Standards Committee: Softwood Lumber Standards.
- B. APA: American Plywood Association.
- C. AWWA (American Wood Preservers Association) C1 - All Timber Products Preservative Treatment by Pressure Process.
- D. AWWA (American Wood Preservers Association) C20 - Structural Lumber Fire Retardant Treatment by Pressure Process.
- E. NFPA: National Forest Products Association.
- F. SPIB: Southern Pine Inspection Bureau.
- G. WCLIB: West Coast Lumber Inspection Bureau.
- H. WWPA: Western Wood Products Association.

1.03 QUALITY ASSURANCE

- A. Perform Work in accordance with the following agencies:
  - 1. Lumber Grading Agency: Certified by ALSC.
  - 2. Plywood Grading Agency: Certified by APA.

PART 2 – PRODUCTS

2.01 MATERIALS

- A. Lumber Grading Rules: NFPA, SPIB, WCLIB, WWPA
- B. Miscellaneous Framing: Yellow pine species, 19 percent maximum moisture content, pressure preservative treat.
- C. Plywood: APA Rated Sheathing; Exposure Durability 1; unsanded.

2.02 ACCESSORIES

- A. Fasteners and Anchors:
  - 1. Fasteners: Hot-dipped galvanized steel for high humidity and treated wood locations, unfinished steel elsewhere.
  - 2. Anchors: Toggle bolt type for anchorage to hollow masonry. Expansion shield and lag bolt type for anchorage to solid masonry or concrete. Bolt or ballistic fastener for anchorages to steel.

2.03 FACTORY WOOD TREATMENT

- A. Wood Preservative (Pressure Treatment): AWWA Treatment C1 using water borne preservative with 0.25 percent retainage.
- B. Wood Preservative (Surface Application): Clear, type, manufactured by Thompsons Waterseal.

06 10 40  
WOOD BLOCKING AND CURBING

PART 3 – EXECUTION

3.01 FRAMING

- A. Set members level and plumb, in correct position.
- B. Place horizontal member flat, crown side up.
- C. Space framing and furring 16 inches (400 mm) o.c.

3.02 SHEATHING

- A. Install telephone and electrical panel boards with plywood sheathing material where required. Over size the panel by 12 inches (300 mm) on all sides.

3.03 SITE APPLIED WOOD TREATMENT

- A. Apply preservative treatment in accordance with manufacturer's instructions.
- B. Brush apply two coats of preservative treatment on wood in contact with cementitious materials. Treat site-sawn cuts.
- C. Allow preservative to dry prior to erecting members.

END OF SECTION 06 10 40

06 20 00  
FINISH CARPENTRY

PART 1 – GENERAL

1.01 DESCRIPTION

- A. Work Included: Provide all labor, materials and equipment necessary to install finish carpentry required to satisfy the intent of the Contract Documents. This work shall include, but is not necessarily limited to, the following;
  - 1. Door Casings
  - 2. Window Frames
  - 3. Trim

1.02 INDUSTRY STANDARDS

- A. Publications of the following institutions, associations, societies and agencies are referred to in this section.
  - 1. Architectural Woodwork Institute, "Quality Standards Illustrated", AWI-QSI
  - 2. National Electric Manufacturers Association, NEMA.
  - 3. National Forest Products Association, NFPA.

1.03 QUALITY ASSURANCE

- A. Except as otherwise specified, the QUALITY STANDARDS of the Architectural Woodwork Institute, AWI-QSI, shall apply and by reference are hereby made a part of this specification. Any reference to Premium, Custom or Economy in this specification shall be as defined in the latest edition of the AWI-QSI.

1.04 SUBMITTALS

- A. Submit samples of all exposed lumber and plywood which is to receive transparent finish.

1.05 PRODUCT DELIVERY, STORAGE AND HANDLING

- A. Immediately upon delivery to job site, place materials in are protected from weather.
- B. Store materials a minimum of 6 inches above ground on framework or blocking and cover with protective waterproof covering providing for adequate air circulation or ventilation
- C. Do not store or install seasoned materials in wet or damp portions of building.

PART 2 – PRODUCTS

2.01 MATERIALS – INTERIOR

- A. Exposed lumber: Premium grade to match existing in accordance with AWI-QSI.
- B. Concealed lumber: Economy grade softwood in accordance with AWI-QSI.
- C. Finish per Section 09 90 10 and/or 09 91 23, Painting and Finishing.

2.02 FABRICATION

- A. Fabrication of all finish carpentry items using premium grade materials shall be premium grade and items using custom grade materials shall be custom grade in accordance with AWI-QSI.
- B. All exposed wood and plywood items shall be sanded and ready to be finished in the field.
- C. All corners at trim and base shall be mitered.

06 20 00  
FINISH CARPENTRY

PART 3 – EXECUTION

3.01 INSTALLATION

- A. Installation shall be by trained and thoroughly experienced mechanics.
  - 1. Work shall be set level and plumb. All joints where possible, shall be factory made. Where sections are too large to permit factory-made and factory-glued joints, same shall be cleated and bolted from behind, or held with patented metal fasteners. All joints shall be neat, clean and permanently held.
  - 2. Fastenings shall be concealed wherever possible. Where nails are necessary, they shall be as small as practicable and countersunk for puttying. Nailing shall be in accordance with the nailing recommendations in NFPA "Manual for House Framing".

END OF SECTION 06 20 00

07 21 16  
BATT INSULATION

PART 1 – GENERAL

1.01 DESCRIPTION

- A. Work Included: Provide all materials, labor, and equipment necessary to install fibrous insulation as required by the intent of the Contract Documents.

1.02 PRODUCT DELIVERY AND STORAGE

- A. Containers shall be factory marked to identify material, type, grade, and manufacturer.
- B. Protect the materials of this Section from exposure to the elements. Do not store on the ground.

PART 2 – PRODUCTS

2.01 MATERIALS

- A. Fibrous Insulation
  - 1. Material: Fiberglass
  - 2. Type: Batt or rolls - foil or reinforced paper faced vapor barrier on all exterior planes.
  - 3. Thickness: Shall be equal to the nominal thickness of the cavity in which it is placed, unless noted otherwise in the Contract Documents
  - 4. Standards: Federal Specification HH-I-521F & ASTM C665.
- B. Fibrous Insulation
  - 1. Material: Mineral Fiber
  - 2. Type: Batt-creased, unfaced, 3.0 pcf
  - 3. Thickness: 3"
- C. Standards:
  - 1. Thermafiber SAFB by USG Acoustical Products Company and Pyro-Fiber Sound Control Blanket by Johns Manville Company

PART 3 – EXECUTION

3.01 INSPECTION

- A. Prior to all work of this section, carefully inspect the installed work of all other trades and verify that all such work is complete to the point where this installation may properly commence.
- B. In the event of a discrepancy, immediately notify the Architect. Do not proceed with the installation until all discrepancies have been resolved.

3.02 INSTALLATION

- A. Install insulation in continuous unbroken plane as indicated on the drawings.
- B. Lap and seal all joints between batts or rolls and at ends of rolls or batts.
- C. Stuff all holes, cracks or recesses with insulation.
- D. Fit insulation tightly around all penetrations (pipes, conduits, joists, etc.) of the insulation plane.
- E. For vertical installation, staple, glue, or wire insulation in place.
- F. Except as otherwise specifically directed by the Architect, install all insulation in accordance with the manufacturer's recommendations.
- G. Kraft faced vapor barriers shall not be installed within any wall of fire-rated construction.

END OF SECTION 07 21 16

Blank Page

078413  
FIRESTOPPING

PART 1 – GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of Contract, including General and Supplementary Conditions and Division 01 Specification Section, apply to work specified in this section.

1.02 DEFINITIONS

- A. Firestopping: Material or combination of materials used to retain integrity of fire-rated construction by maintaining an effective barrier against the spread of flame, smoke, and hot gases through penetrations in fire rated wall and floor assemblies.

1.03 GENERAL DESCRIPTION OF THE WORK OF THIS SECTION

- A. Only tested firestop systems shall be used in specific locations as follows:
  - 1. Penetrations for the passage of duct, cable, cable tray, conduit, piping, electrical busways and raceways through fire-rated vertical barriers (walls and partitions), horizontal barriers (floor/ceiling assemblies), and vertical service shaft walls and partitions.
  - 2. Safing slot gaps between edge of floor slabs and curtain walls.
  - 3. Openings between structurally separate sections of wall or floors.
  - 4. Gaps between the top of walls and ceilings or roof assemblies.
  - 5. Expansion joints in walls and floors.
  - 6. Openings and penetrations in fire-rated partitions or walls containing fire doors.
  - 7. Openings around structural members which penetrate floors or walls.

1.04 RELATED WORK OF OTHER SECTIONS

- A. Coordinate work of this section with work of other sections as required to properly execute the work and as necessary to maintain satisfactory progress of the work of other sections, including:
  - 1. Section 03 30 00 – Cast-In-Place Concrete
  - 2. Section 07 92 00 – Joint Sealers
  - 3. Section 04 81 00 – Masonry Work
  - 4. Section 09 25 00 – Gypsum Drywall Systems
  - 5. Section 22 05 00 – Basic Mechanical Materials and Methods
  - 6. Section 23 05 00 – Basic Mechanical Materials and Methods
  - 7. Section 23 07 50 – Mechanical Insulation
  - 8. Section 21 91 50 – Fire Protection Sprinklers
  - 9. Section 22 40 00 – Plumbing
  - 10. Section 26 05 00 – Basic Electrical Materials and Methods
  - 11. Section 28 00 00 – Fire Detection Systems

1.05 REFERENCES

- A. Test Requirements: ASTM E-814, "Standard Method of Fire Tests of Through Penetration Fire Stops" (July 1997).
- B. Underwriters Laboratories (UL) of Northbrook, IL runs ASTM E-814 under their designation of UL 1479 and publishes the results in their "FIRE RESISTANCE DIRECTORY" that is updated annually.
  - 1. UL Fire Resistance Directory:
    - a. Firestop Devices (XHJI)
    - b. Fire Resistance Ratings (BXUV)
    - c. Through-Penetration Firestop Systems (XHEZ)
    - d. Fill, Voids, or Cavity Material (XHHW)
    - e. Forming Materials (XHKU)

078413  
FIRESTOPPING

- C. Test Requirements: UL 2079, "Tests for Fire Resistance of Building Joint Systems" (July 1998.)
- D. International Firestop Council Guidelines for Evaluating Firestop Systems Engineering Judgments
- E. ASTM E-84, Standard Test Method for Surface Burning Characteristics of Building Materials.
- F. All major building codes: ICBO, SBCCI, BOCA, and IBC.
- G. NFPA 70 - National Electric Code

1.06 QUALITY ASSURANCE

- A. A manufacturer's direct representative (not distributor or agent) to be on-site during initial installation of firestop systems to train appropriate contractor personnel in proper selection and installation procedures. This will be done per manufacturer's written recommendations published in their literature and drawing details.
- B. Firestop System installation must meet requirements of ASTM E-814, UL 1479 or UL 2079 tested assemblies that provide a fire rating equal to that of construction being penetrated.
- C. Proposed firestop materials and methods shall conform to applicable governing codes having local jurisdiction.
- D. Firestop Systems do not reestablish the structural integrity of load bearing partitions/assemblies, or support live loads and traffic. Installer shall consult the structural engineer prior to penetrating any load bearing assembly.
- E. For those firestop applications that exist for which no UL tested system is available through a manufacturer, an engineering judgment derived from similar UL system designs or other tests will be submitted to local authorities having jurisdiction for their review and approval prior to installation. Engineer judgment drawings must follow requirements set forth by the International Firestop Council (September 7, 1994, as may be amended from time to time).

1.07 SUBMITTALS

- A. Submit Product Data: Manufacturer's specifications and technical data for each material including the composition and limitations, documentation of UL firestop systems to be used and manufacturer's installation instructions to comply with Section 1300.
- B. Manufacturer's engineering judgment identification number and drawing details when no UL system is available for an application. Engineer judgment must include both project name and contractor's name who will install firestop system as described in drawing.
- C. Submit material safety data sheets provided with product delivered to job-site.

1.08 INSTALLER QUALIFICATIONS

- A. Engage an experienced Installer who is certified, licensed, or otherwise qualified by the firestopping manufacturer as having been provided the necessary training to install manufacturer's products per specified requirements. A supplier's willingness to sell its firestopping products to the Contractor or to an Installer engaged by the Contractor does not in itself confer qualification on the buyer.

1.09 DELIVERY, STORAGE, AND HANDLING

- A. Deliver materials undamaged in manufacturer's clearly labeled, unopened containers, identified with brand, type, and UL label where applicable.
- B. Coordinate delivery of materials with scheduled installation date to allow minimum storage time at job-site.
- C. Store materials under cover and protect from weather and damage in compliance with manufacturer's requirements, including temperature restrictions.

078413  
FIRESTOPPING

- D. Comply with recommended procedures, precautions or remedies described in material safety data sheets as applicable.
- E. Do not use damaged or expired materials.

1.10 PROJECT CONDITIONS

- A. Do not use materials that contain flammable solvents.
- B. Schedule installation of firestopping after completion of penetrating item installation but prior to covering or concealing of openings.
- C. Verify existing conditions and substrates before starting work. Correct unsatisfactory conditions before proceeding.
- D. Weather conditions: Do not proceed with installation of firestop materials when temperatures exceed the manufacturer's recommended limitations for installation printed on product label and product data sheet.
- E. During installation, provide masking and drop cloths to prevent firestopping materials from contaminating any adjacent surfaces.

PART 2 – PRODUCTS

2.01 FIRESTOPPING, GENERAL

- A. Provide firestopping composed of components that are compatible with each other, the substrates forming openings, and the items, if any, penetrating the firestopping under conditions of service and application, as demonstrated by the firestopping manufacturer based on testing and field experience.
- B. Provide components for each firestopping system that are needed to install fill material. Use only components specified by the firestopping manufacturer and approved by the qualified testing agency for the designated fire-resistance-rated systems.
- C. Firestopping Materials are either “cast-in-place” (integral with concrete placement) or “post installed.” Provide cast-in-place firestop devices prior to concrete placement.

2.02 ACCEPTABLE MANUFACTURERS

- A. Subject to compliance with through penetration firestop systems (XHEZ) and joint systems (XHBN) listed in Volume 2 of the UL Fire Resistance Directory, provide products of the following manufacturers as identified below:
  - 1. Hilti, Inc., Tulsa, Oklahoma
  - 2. Other manufacturers listed in the U.L. Fire Resistance Directory – Volume 2

2.03 MATERIALS

- A. Use only firestop products that have been UL 1479, ASTM E-814, or UL 2079 tested for specific fire-rated construction conditions conforming to construction assembly type, penetrating item type, annular space requirements, and fire-rating involved for each separate instance.
- B. Cast-in place firestop devices for use with non-combustible and combustible plastic pipe (closed and open piping systems) penetrating concrete floors, the following products are acceptable:
  - 1. Hilti CP 680 Cast-In Place Firestop Device
  - 2. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- C. Sealants, caulking materials, or foams for use with non-combustible items including steel pipe, copper pipe, rigid steel conduit and electrical metallic tubing (EMT), the following products are acceptable:
  - 1. Hilti FS-ONE Intumescent Firestop Sealant

078413  
FIRESTOPPING

2. Hilti CP 604 Self-leveling Firestop Sealant
  3. Hilti CP 620 Fire Foam
  4. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- D. Sealants or caulking materials for use with sheet metal ducts, the following products are acceptable:
1. Hilti CP 601s Elastomeric Firestop Sealant
  2. Hilti CP 606 Flexible Firestop Sealant
  3. Hilti FS-ONE Intumescent Firestop Sealant
  4. Hilti CP 604 Self-leveling Firestop Sealant
  5. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- E. Sealants, caulking or spray materials for use with fire-rated construction joints and other gaps, the following products are acceptable:
1. Hilti CP 672 Speed Spray
  2. Hilti CP 601s Elastomeric Firestop Sealant
  3. Hilti CP 606 Flexible Firestop Sealant
  4. Hilti CP 604 Self-leveling Firestop Sealant
  5. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- F. Pre-formed mineral wool designed to fit flutes of metal profile deck; as a backer for spray material.
1. Hilti CP 677 Speed Plugs
  2. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- G. Intumescent sealants, caulking materials or foams for use with combustible items (penetrants consumed by high heat and flame) including insulated metal pipe, PVC jacketed, flexible cable or cable bundles and plastic pipe, the following products are acceptable:
1. Hilti FS-ONE Intumescent Firestop Sealant
  2. Hilti CP 620 Fire Foam
  3. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- H. Intumescent sealants, foams, caulking or putty materials for use with flexible cable or cable bundles, the following products are acceptable:
1. Hilti FS-ONE Intumescent Firestop Sealant
  2. Hilti CP 618 Firestop Putty Stick
  3. Hilti CP 620 Fire Foam
  4. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- I. Non curing, re-penetrable intumescent sealants, caulking or putty materials for use with flexible cable or cable bundles, the following products are acceptable:
1. Hilti CP 618 Firestop Putty Stick
  2. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- J. Wall opening protective materials for use with U.L. listed metallic and specified nonmetallic outlet boxes, the following products are acceptable:
1. Hilti CP 617 Firestop Putty Pad

078413  
FIRESTOPPING

2. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 1
- K. Firestop collar or wrap devices attached to assembly around combustible plastic pipe (closed and open piping systems), the following products are acceptable:
  1. Hilti CP 642 Firestop Collar
  2. Hilti CP 643 Firestop Collar
  3. Hilti CP 645 Wrap Strips
  4. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- L. Materials used for complex penetrations made to accommodate cable trays, multiple steel and copper pipes, electrical busways in raceways, the following products are acceptable:
  1. Hilti FS 635 Trowelable Firestop Compound
  2. Hilti FS 657 FIRE BLOCK
  3. Hilti CP 620 Fire Foam
  4. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- M. Non curing, re-penetrable materials used for large size/complex penetrations made to accommodate cable trays, multiple steel and copper pipes, electrical busways in raceways, the following products are acceptable:
  1. Hilti FS 657 FIRE BLOCK
  2. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- N. Sealants or caulking materials used for openings between structurally separate sections of wall and floors, the following products are acceptable:
  1. Hilti CP 672 Speed Spray
  2. Hilti CP 601s Elastomeric Firestop Sealant
  3. Hilti CP 606 Flexible Firestop Sealant
  4. Hilti CP 604 Self-Leveling Firestop Sealant
  5. Equivalent products listed in the U.L. Fire Resistance Directory – Volume 2
- O. Provide a firestop system with a "F" Rating as determined by UL 1479 or ASTM E814 which is equal to the time rating of construction being penetrated.
- P. Provide a firestop system with an Assembly Rating as determined by UL 2079 which is equal to the time rating of construction being penetrated.

### PART 3 – EXECUTION

#### 3.01 PREPERATION

- A. Verification of Conditions: Examine areas and conditions under which work is to be performed and identify conditions detrimental to proper or timely completion.
  1. Verify penetrations are properly sized and in suitable condition for application of materials.
  2. Surfaces to which firestop materials will be applied shall be free of dirt, grease, oil, rust, laitance, release agents, water repellents, and any other substances that may affect proper adhesion.
  3. Provide masking and temporary covering to prevent soiling of adjacent surfaces by firestopping materials.
  4. Comply with manufacturer's recommendations for temperature and humidity conditions before, during and after installation of firestopping.
  5. Do not proceed until unsatisfactory conditions have been corrected.

078413  
FIRESTOPPING

3.02 COORDINATION

- A. Coordinate location and proper selection of cast-in-place Firestop Devices with trade responsible for the work. Ensure device is installed before placement of concrete.
- B. The Trade Contractor shall provide adequate spacing of field run pipes to allow for installation of cast-in-place firestop devices without interferences.

3.03 INSTALLATION

- A. Regulatory Requirements: Install firestop materials in accordance with UL Fire Resistance Directory.
- B. Manufacturer's Instructions: Comply with manufacturer's instructions for installation of through-penetration and construction joint materials.
  - 1. Seal all holes or voids made by penetrations to ensure an air and water resistant seal.
  - 2. Consult with mechanical engineer, project manager, and damper manufacturer prior to installation of UL firestop systems that might hamper the performance of fire dampers as it pertains to duct work.
  - 3. Protect materials from damage on surfaces subjected to traffic.

3.04 FIELD QUALITY CONTROL

- A. Examine sealed penetration areas to ensure proper installation before concealing or enclosing areas.
- B. Keep areas of work accessible until inspection by applicable code authorities.
- C. Perform under this section patching and repairing of firestopping caused by cutting or penetrating of existing firestop systems already installed by other trades.

3.05 ADJUSTING AND CLEANING

- A. Remove equipment, materials and debris, leaving area in undamaged, clean condition.
- B. Clean all surfaces adjacent to sealed holes and joints to be free of excess firestop materials and soiling as work progresses.

END OF SECTION 07 84 13

07 92 00  
SEALANTS

PART 1 – GENERAL

1.01 DESCRIPTION

A. Work Included:

1. The purpose of sealant in this work is to provide a positive barrier against penetration of moisture at joints between items where sealant is essential to the continued integrity of the barrier.
2. Such sealant may be performed under the work of various sections of these specifications, but must be performed in strict accordance with the provisions of this section.

B. Related Work Specified Elsewhere:

1. Section 09 26 00 Acoustical Treatment for Partitions/Ceilings

1.02 PRODUCT HANDLING

A. Use all means necessary to protect sealant materials before, during, and after installation and to protect the installed work and materials of all other trades.

B. Replacements: In the event of damage, immediately make all repairs and replacements necessary to the approval of the Architect and at no additional cost to the Owner.

C. Storage:

1. Store all sealant materials and equipment under conditions recommended by its manufacturer.
2. Do not use materials stored for a period of time exceeding the maximum recommended shelf-life of the material.

1.03 SUBMITTALS

A. Submit product literature to the Architect in accordance with Section 01 32 00 of these specifications.

PART 2 – PRODUCTS

2.01 MATERIALS

A. All sealant materials, unless otherwise specifically approved by the Architect, shall be single or double component, non-sagging type in neutral color or other color as approved by the Architect where exposed to view.

B. Sealants:

1. Acrylic Latex: One-part, gun-grade, nearly 100 percent recover from 100 percent elongation, excellent paintability, service temperature range zero to +180 degrees fahrenheit (such as Sonneborn Sonolac)
2. Urethane: Two part, gun-grade, such as Sonneborn Sonolastic NP-2
3. Silicone (exterior and interior): One part, gun-grade, such as Sonneborn Sonolastic Omniseal
4. Silicone (interior at areas where moisture is present): One part, gun-grade, mildew and fungus resistant, such as Sonneborn Sololastic Omnipus
5. Polyurethane: One part pourable, such as Sonneborn Sonolastic SL1
6. Polysulfide: Two-part gun grade; ANSI A116.1 and Thiokol Building-Trade Performance Specification (such as Sonneborne Sonolastic Two-Part)

C. Primers: Quick-drying, clear, as recommended by the sealant manufacturer.

07 92 00  
SEALANTS

- D. Backer Rods: Closed-cell polyethylene or urethane foam, polyvinyl chloride, or closed-cell neoprene; circular in cross section and of sizes to assure that they will stay in place under pressure of applying sealants.

2.02 EQUIPMENT

- A. All sealant equipment shall be only such equipment as is specifically recommended by the manufacturer of the sealant material being installed.

PART 3 – EXECUTION

3.01 SURFACE CONDITIONS

- A. Inspections:
  - 1. Prior to all work of this section, carefully inspect the installed work of all other trades and verify that all such work is complete to the point where this installation may properly commence.
  - 2. Verify that sealant may be installed in accordance with the manufacturer's recommendations.
- B. Discrepancies:
  - 1. In the event of discrepancy, immediately notify the Architect.
  - 2. Do not proceed with installation in areas of discrepancy until all such discrepancies have been fully resolved.

3.02 PREPARATION

- A. Primers: Where recommended or required by sealant manufacturer, prime joints with brushes that will reach all surfaces of joint. Mask adjacent surfaces that will not be covered with sealant and that are subject to staining or other damage by primers.
- B. Backer Rods: Install firmly and evenly in place where indicated or required to depths and contours recommended by sealant manufacturer. Use backer rods for all exterior caulking work.

3.03 SEALANT LOCATIONS

- A. Acrylic Latex: Interior work, where exposed to view; use at contacts of counter tops, backsplashes and endsplashes (where moisture is not present) and walls adjacent thereto; interior control joints and periphery joints at doors and windows. (Colors as selected by Architect).
- B. Silicone: Interior work, where not exposed to view; for all acoustical caulking, where acoustical drywall abuts floors and ceilings and where penetrations occur in such walls, such as electrical boxes, fire extinguishers, cabinets, etc.
- C. Silicone (exterior): One part, construction grade: metal flashings. (Color as selected by Architect).
- D. Silicone (interior where moisture is present): At countertops, backsplashes and endsplashes and walls adjacent thereto, and around all plumbing fixtures.
- E. Urethane, two-part, gun-grade: Exterior masonry and concrete work (except joints in horizontal concrete slabs); vertical control joints; color as selected by Architect.
- F. Polyurethane, one-part pourable: Exterior concrete flatwork.

3.04 APPLICATION

- A. Apply sealants with guns or other devices having nozzles of size to allow joints to be completely filled with single bead of material. Use sufficient pressure to drive materials completely and fully into joints so that joints are weathertight and watertight. Point joints at flush vertical surfaces slightly concaved; point joints at flush horizontal surfaces slightly

07 92 00  
SEALANTS

convexed so that moisture will not "pond" thereon; uniformly smooth and straight, free from wrinkles and sags. Finished installations of acoustical caulking shall maintain indicated STC ratings.

3.05 APPLICATION LIST

- A. Specific applications listed hereinafter are to be used as a bidding and application aid and are not intended to necessarily represent all required sealant applications.
1. Exterior and Interior control joints.
  2. Periphery joints at exterior steel frames, exterior aluminum frames, interior steel frames, interior aluminum frames, windows, louvers and similar wall penetrations.
  3. Plumbing fixture to wall joints.
  4. Counter top and counter top backsplash to wall joints.
  5. Exterior wall penetrations.
  6. Cut stone to cut stone joints and stone to brick joints.
  7. Perimeter stone to wall joints.
  8. All applications indicated on drawings, other locations standard to the industry and as directed by the Owner.

3.06 COMPLETION OF WORK

- A. Remove excess sealants from joints. Remove sealant deposits from surfaces not intended to be caulked and restore such surfaces to their original conditions.

END OF SECTION 07 92 00

07 92 00  
SEALANTS

Blank Page

08 11 13  
HOLLOW METAL DOORS AND FRAMES

PART 1 – GENERAL

1.01 WORK INCLUDED

- A. Furnish all labor, materials, services, equipment and apparatus whether necessary or incidental to complete installation of all hollow metal doors and frames required for the project as shown on the Drawings and specified herein.
- B. Non-rated steel doors

1.02 RELATED WORK SPECIFIED ELSEWHERE

- A. Division 00 - Bidding and Contract Requirements, including the General Conditions of the Contract
- B. Division 01 - General Requirements
- C. Section 06 10 00 - Rough Carpentry
- D. Section 07 92 00 - Joint Sealants
- E. Section 08 14 16 - Flush Wood Doors
- F. Section 08 71 00 - Finish Hardware
- G. Section 08 81 00 - Glass and Glazing
- H. Section 09 21 16 - Gypsum Wallboard Systems
- I. Section 09 91 23 - Painting and Finishing

1.03 SITE INSPECTION

- A. This Contractor shall visit the site and become thoroughly familiar with all conditions. Refer to Division 1 for site examination requirements and procedures.

1.04 REFERENCE STANDARDS

- A. ANSI/S.D.I. 100 - RECOMMENDED SPECIFICATIONS STANDARD STEEL DOORS AND FRAMES, Steel Door Institute.
- B. ANSI A115 - STANDARD SPECIFICATION FOR DOOR AND FRAME PREPARATION FOR HARDWARE, American National Standards Institute.
- C. Thermal rated assemblies ASTM C236-89 or ASTM C976-90

1.05 SUBMITTALS

- A. Manufacturer's written certification that materials meet Specification requirements
- B. Submit under provisions of Section 01 32 00
- C. Shop Drawings: Indicate door elevations, internal reinforcement, closure method, and cutouts for glazing, and finish.
- D. Product Data: Indicate door configurations, location of cut-outs for hardware reinforcement.
- E. Manufacturer's installation instructions: indicate special installation instructions.
- F. Manufacturer's certificate: Certify that products meet or exceed specified requirements.

1.06 QUALITY ASSURANCE

- A. Installer: Company specializing in hollow metal door and frame work of comparable scope with a minimum of three (3) years experience.

1.07 DELIVERY, STORAGE, AND HANDLING

- A. Deliver, store, protect, and handle products to site under provisions of Section 01600.
- B. Accept doors on site in manufacturer's packaging. Inspect for damage.

08 11 13  
HOLLOW METAL DOORS AND FRAMES

- C. Break seal on-site to permit ventilation.

1.08 FIELD MEASUREMENTS

- A. Verify that field measurements are as indicated on shop drawings.

1.09 COORDINATION

- A. Coordinate the work with door opening construction, door frame and door hardware installation.

PART 2 - PRODUCTS

2.01 MATERIALS - INTERIOR DOORS - GENERAL

- A. Sheet Steel: Commercial quality carbon steel, cold-rolled, annealed, and free from scale, pitting, rust or other defects - ASTM A366
  - 1. Gauges:
    - a. Interior frames - 18 gauge, mitered corners.
    - b. Interior doors - (Non-rated): SDI-100 Grade II, 18 gauge, heavy duty 1-3/4" (44mm) (Level B), Model 3 - Seamless .
    - c. Reinforcement for hardware - in accordance with Steel Door Institute Standard (S.D.I.) 100, Table IV.
    - d. Glass Moldings - 20 gauge.
- B. Primer:
  - 1. For non-galvanized steel, primer shall be manufacturer's standard rust-resistant metallic or phenol-resin primer.
  - 2. For galvanized steel, primer shall be zinc dust oxide primer, such as Porter No. 299 Zinc-dust Primer.
  - 3. Air dried.
- C. Core Filler Material:
  - 1. Non-insulated doors - manufacturer's standard cardboard honeycomb.
  - 2. Core material shall completely fill the inside of the door and be laminated to both inside faces of the panels.
- D. Acceptable manufacturers:
  - 1. Steelcraft of Masco Industries
  - 2. Republic Builders Products
  - 3. Ceco Corporation.
  - 4. Curries of L.B. Foster Co.
  - 5. Fenestra Corporation
  - 6. Emerson Engineering Company, Inc.

PART 3 – EXECUTION

3.01 FABRICATION

- A. Frames shall be set up, arc welded and ground smooth and shall have spreaders attached. Provide frame anchors of the proper type for adjoining construction. No less than three (3) wall anchors per jamb or frames to 7'-4" high, four (4) anchors per jamb for frames over 7'-4" high.

08 11 13  
HOLLOW METAL DOORS AND FRAMES

- B. Doors shall be full flush type, with seams finished so as to be invisible.
  - 1. Close top and bottom edges of door with steel channel, minimum 18 gauge, extending full width of door, and spot welded to both faces.
  - 2. Provide bevel on swing side.
  - 3. Provide adequate bracing.
  - 4. Fabricate doors with hardware reinforcement welded in place.
- C. Provide for hardware specified in Section 087100 - Finish Hardware. Provide reinforcing for hardware in accordance with ANSI A115.
- D. Provide UL labels of non-rusting metal attached with pop rivets on both doors and frames where indicated. Unless otherwise scheduled, "B label" shall be "1-1/2 hour B label".
- E. Provide screw-on glazing stops with mitered corners. Locate stops on non-security side of opening.
- F. Finishing:
  - 1. Thoroughly clean all contaminants from surface by washing with clean solvent and wiping with clean cloths.
  - 2. Treat non-galvanized items with phosphate pretreatment.
  - 3. All doors and frames shall receive a factory applied primer.
  - 4. All concealed parts of frames to be installed in masonry walls shall be coated with bituminous paint.
- G. Furnish galvanized steel shims as required to maintain 1/8" clearance between frame and door and between pairs of doors.
- H. Where indicated, provide inserted type sightproof stationary metal louvers.
- I. For openings which are to be equipped with electric door locks, modify standard frame and door construction as is necessary to accommodate the electric locks.
- J. Steel sheet: Galvanized to ASTM A525 G60.

3.02 INSTALLATION

- A. Anchor work securely to adjacent construction.
- B. Set frames accurately, plumb and square. Brace until attached to adjacent construction.
- C. Install doors in accordance with ANSI/SDI-100 and DHI.
- D. Do not use cardboard or other unspecified material for shims.
- E. Install metal doors and frames in accordance with the following standards published by the Steel Door Institute: Frames, SDI 105; Hardware, SDI 107; Doors, SDI 100.
- F. Frames installed in existing masonry walls shall be grouted in on both sides to provide a sealed installation. Grout used shall meet rating of the door and frame assembly.
- G. Coordinate installation of doors with installation of frames and hardware specified in Section 08 71 00.

3.03 DISPOSAL

- A. All waste materials shall be properly and legally recycled or disposed of off the site by the Contractor. Burning on the site will not be allowed.

3.04 EXAMINATION

- A. Verify substrate conditions.

08 11 13  
HOLLOW METAL DOORS AND FRAMES

- B. Verify that opening sizes and tolerances are acceptable. ERECTION TOLERANCES
- C. Maximum Diagonal Distortion: 1/16 inch (1.5 mm) measured with straight edge, corner to corner.

3.05 ADJUSTING

- A. Adjust work under provisions of Section 01 77 00.
- B. Adjust door for smooth and balanced door movement.

END OF SECTION 08 11 13

08 14 29  
FLUSH WOOD VENEER DOORS

PART 1 – GENERAL

1.01 SECTION INCLUDES

- A. Interior Flush Wood Veneer Doors
  - 1. 5-ply flush bonded particle-core doors.
  - 2. Flush fire-rated wood doors.
  - 3. Lead-lined doors.
  - 4. Sound-retardant doors.
  - 5. Profiled doors.

1.02 RELATED SECTIONS

- A. Section 08 11 13 – Metal Frames.
- B. Section 08 71 00 / 08 71 01 – Door Hardware/Hardware Specifications Guidelines.
- C. Section 08 81 00 – Glazing.
- D. Section 08 91 19 – Door Louvers.

1.03 REFERENCES

- A. ANSI A208.1 – Particleboard.
- B. ASTM E 90 – Standard Test Method for Laboratory Measurement of Airborne Sound Transmission Loss of Building Partitions and Elements.
- C. ASTM E 413 – Classification for Rating Sound Insulation.
- D. AWI Section 1300 – Architectural Flush Doors.
- E. UBC 7-2-1997/UL 10C – Positive Pressure Fire Tests of Door Assemblies.
- F. WDMA Finish System TR-6, transparent – Catalyzed Polyurethane.
- G. WDMA I.S.1-A – Architectural Wood Flush Doors.

1.04 SUBMITTALS

- A. Comply with Section 01 32 00 – Submittal Procedures.
- B. Product Data: Submit manufacturer's product data, including door construction description and WDMA I.S.1-A and AWI classifications.
- C. Schedules: Submit manufacturer's schedules, including door dimensions, cutouts, species, finish, and hardware. Reference individual door numbers as indicated on the Drawings.
- D. Samples: Submit manufacturer's door finish samples, showing range of color variation.
- E. Test Reports: Submit manufacturer's test results of STC ratings from testing performed by independent testing agency for sound-retardant doors.
- F. Manufacturer's Certification: Submit manufacturer's certification that doors comply with specified requirements and are suitable for intended application.
- G. Cleaning Instructions: Submit manufacturer's cleaning instructions for doors.
- H. Warranty: Submit manufacturer's standard warranty.

1.05 QUALITY ASSURANCE

- A. Tolerances for Warp, Telegraphing, Squareness, and Prefitting Dimensions: WDMA I.S.1-A.

08 14 29  
FLUSH WOOD VENEER DOORS

- B. Identifying Label: Each door shall bear identifying label indicating:
  - 1. Door manufacturer.
  - 2. Order number.
  - 3. Door number.
  - 4. Fire rating, if applicable.
- C. Fire-Rated Doors: Labeled by Intertek/Warnock Hersey.
  - 1. Construction Details and Hardware Application: Approved by labeling agency.
- D. Positive Pressure Opening Assemblies: UBC 7-2-1997/UL 10C.

1.06 DELIVERY, STORAGE AND HANDLING

- A. Delivery:
  - 1. Deliver doors to site in manufacturer's original, unopened containers and packaging, with labels clearly identifying product name and manufacturer.
  - 2. Package doors individually in polybags.
- B. Storage:
  - 1. Store doors in accordance with manufacturer's instructions.
  - 2. Store doors in clean, dry area indoors, protected from damage and direct sunlight.
  - 3. Store doors flat on level surface.
  - 4. Do not store doors directly on concrete.
  - 5. Keep doors completely covered. Use covering which allows air circulation and does not permit light to penetrate.
  - 6. Store doors between 50 and 90 degrees F (10 and 32 degrees C) and 25 to 55 percent relative humidity.
- C. Handling:
  - 1. Handle doors in accordance with manufacturer's instructions.
  - 2. Protect doors and finish during handling and installation to prevent damage.
  - 3. Handle doors with clean hands or clean gloves.
  - 4. Lift and carry doors. Do not drag doors across other doors or surfaces.

1.07 ENVIRONMENTAL REQUIREMENTS

- A. Do not subject doors to extreme conditions or changes in temperature or relative humidity in accordance with WDMA I.S.1-A.

1.08 WARRANTY

- A. Warrant solid core, interior doors for life of installation against warpage, delamination, and defects in materials and workmanship.
- B. Defects noted during warranty period shall be corrected at no cost to Owner. Corrective work shall include labor and material for repair, replacement, refinishing, and rehanging as required.

PART 2 – PRODUCTS

2.01 MANUFACTURER

- A. VT Industries, Inc.
- B. Algoma Hardwoods
- C. Eggers

08 14 29  
FLUSH WOOD VENEER DOORS

- D. Oshkosh
- E. Others must submit for approval

2.02 GENERAL

- A. Glass Mouldings:
  - 1. Non-rated Flush Doors: VT Industries Style VT1.
  - 2. Fire-Rated Doors: VT Industries Style 110, steel vision frame, beige finish.
- B. Glazing: As specified in Section 08 81 00
- C. Door Louvers: As specified in Section 08 91 19

2.03 5-PLY FLUSH BONDED PARTICLE-CORE DOORS

- A. 5-Ply Flush Bonded Particle-Core Doors:
  - 1. Compliance: WDMA I.S.1-A.
    - a. Quality Grade: Premium grade, extra heavy duty.
    - b. Type: PC-5ME.
  - 2. 7-Ply and Non-Bonded Core Construction: Not acceptable.
  - 3. Door Thickness: 1-3/4 inches.
  - 4. Stiles:
    - a. Inner Stiles: 1-3/8 inches wide, before prefitting.
    - b. Structural Composite Lumber (SCL) With Outer Stile: Same species as face veneer.
    - c. Outer Stile: Apply after beveling and before face application.
  - 5. Rails:
    - a. Structural composite lumber (SCL).
    - b. Minimum Width Before Prefitting: 1-3/8 inches.
  - 6. Core:
    - a. Material: Particleboard
    - b. Particleboard Compliance: ANSI A208.1, Grade 1-LD-2
  - 7. Door Assembly:
    - a. Glue stiles and rails to core.
    - b. Sand entire assembly flat as a unit to ensure minimal telegraphing of core components through face veneers.
  - 8. Composite Crossbands:
    - a. Apply to core before application of matching hardware stiles.
    - b. Exposed Crossbanding: Not allowed along stile edges.
  - 9. Veneers:
    - a. Apply to crossbanded core in hot press using Type I, exterior, water-resistant adhesive.
    - b. 5-ply construction.
  - 10. Face Veneers:
    - a. Plain Sliced Red Oak (ISU Standard)
    - b. Others as selected by the Architect/Owner
    - c. Minimum Thickness Before Sanding: 1/42 inch.

2.04 FLUSH FIRE-RATED WOOD DOORS

- A. Flush Fire-Rated Wood Doors:
  - 1. Compliance: WDMA I.S.1-A.
    - a. Quality Grade: Premium.
    - b. Type: FD-5.
  - 2. Door Thickness: 1-3/4 inches.

08 14 29  
FLUSH WOOD VENEER DOORS

3. Outer Stiles: Same species as face veneer.
4. Inner Stiles:
  - a. Noncombustible material, 60- and 90-minute rated
  - b. Warranted for use with standard-weight mortise butt hinges and No. 12, 1-1/4-inch steel threaded-to-head screws.
5. Rails:
  - a. Noncombustible material, 60- and 90-minute rated
  - b. Width: Manufacturer's standard width.
6. Core:
  - a. Non-combustible mineral board
  - b. Weight: 30.8 pcf to 34.7 pcf
  - c. Does not contain asbestos or added urea formaldehyde.
7. Composite Crossbands:
  - a. Apply to core before application of matching hardware stiles.
  - b. Exposed Crossbanding: Not allowed along stile edges.
8. Face Veneers:
  - a. Plain Sliced Red Oak (ISU Standard)
  - b. Others as selected by the Architect/Owner
  - c. Minimum Thickness Before Sanding: 1/42 inch.
9. Positive Pressure:
  - a. Where UBC 7-2-1997/UL 10C standards for positive pressure apply, doors shall be constructed in accordance with Category A guidelines as published by Intertek/Warnock Hersey.
  - b. Smoke Gasketing: Apply smoke gasketing around frame perimeter to meet S-rating.
  - c. Intertek/Warnock Hersey Category B Guidelines: Edge sealing systems not allowed on frames.

2.05 SOUND-RETARDANT DOORS

- A. Sound-Retardant Doors:
  1. Compliance: WDMA I.S.1-A.
    - a. Quality Grade: Premium.
  2. Testing Methods: ASTM E 90 and E 413.
  3. Door Thickness: 1-3/4 inches.
  4. STC Rating: 45
  5. Core: Sound absorbent material encapsulated by stiles, rails, crossbands, and face veneers.
  6. Perimeter Gasketing and Drop Seals: To achieve STC ratings.
  7. Face Veneers and Vertical Stile Edges: Compatible with non-rated fire-rated doors.
  8. Acoustical Lite Kit if required shall be provided.

2.06 FABRICATION

- A. Prefit Doors:
  1. Prefit and bevel doors at factory to fit openings.
  2. Prefit Tolerances: WDMA I.S.1-A and AWI Section 1300.
- B. Factory-machine doors for mortised hardware, including pilot holes for hinge screws and lock fronts.

2.07 FINISHES

- A. Doors shall receive factory finishing.

08 14 29  
FLUSH WOOD VENEER DOORS

- B. Factory Finishing: WDMA System TR-6, catalyzed polyurethane, premium grade. WDMA finish Types 2 and 3 are not acceptable.
  - 1. Stain coat. (if specified) Stain Color to be selected
  - 2. Sealer: 3 coats.
  - 3. Sanding: 320-grit sandpaper.
  - 4. Topcoat: 2 coats.
- C. Top and Bottom Rails: Factory sealed with wood sealer.

**PART 3 – EXECUTION**

**3.01 EXAMINATION**

- A. Examine locations to receive doors. Notify Architect of conditions that would adversely affect installation or subsequent use. Do not begin installation until unacceptable conditions are corrected.
- B. Ensure frames are solidly anchored, allowing no deflection when doors are installed.
- C. Ensure frames are plumb, level, square, and within tolerance.

**3.02 PREPARATION**

- A. Allow doors to become acclimated to building temperature and relative humidity for a minimum of 24 hours before installation.

**3.03 INSTALLATION**

- A. Install doors in accordance with manufacturer's instructions.
- B. Install doors at locations indicated on the Door Schedule or Drawings.
- C. Install doors plumb, level, square, true to line, without warp or rack.
- D. Seal exposed surfaces with a minimum of 2 coats of polyurethane within 4 days of fitting each door.
- E. Install door hardware as specified in Section 08 71 00 and 08 71 01.

**3.04 ADJUSTING**

- A. Adjust doors to swing freely, without binding in frame.
- B. Adjust hardware to operate properly.
- C. Repair minor damages to finish in accordance with manufacturer's instructions and as approved by Architect.
- D. Remove and replace damaged doors that cannot be successfully repaired, as determined by Architect.

**3.05 CLEANING**

- A. Clean doors promptly after installation in accordance with manufacturer's instructions.
- B. Do not use harsh cleaning materials or methods that could damage finish.

**3.06 PROTECTION**

- A. Protect installed doors from damage during construction.
- B. Place polybags over doors after adjusting and cleaning.

END OF SECTION 08 14 29

Blank Page

08 71 00  
FINISH HARDWARE

PART 1 – GENERAL

1.01 SUMMARY

- A. Section Includes: Basic finish hardware requirements.
- B. Related Sections:
  - 1. Section 06 20 00 - Finish Carpentry: Installation of finish hardware.
  - 2. Section 08 11 13 - Hollow Metal Doors and Frames.
  - 3. Section 08 14 16 - Wood Doors.
  - 4. Section 08 14 29 - Veneer Wood Doors
  - 5. Section 08 71 01 - Hardware Specification Guidelines
- C. Specific Omissions: Hardware for the following is specified or indicated elsewhere.
  - 1. Windows
  - 2. Cabinets of all kinds, including open wall shelving and locks.
  - 3. Signs, except as noted.
  - 4. Toilet accessories of all kinds including grab bars.
  - 5. Rough hardware.
  - 6. Folding partitions, except cylinders where detailed.
  - 7. Sliding aluminum doors.
  - 8. Angle sill threshold.
  - 9. Corner guards.

1.02 SUBMITTALS

- A. Submit in electronic format (PDF) the hardware schedule at earliest possible date prior to delivery of hardware. Organize schedule into "Hardware Sets" with an index of doors and heading, indicating complete designations of every item required for each door or opening. Include the following information:
  - 1. Type, style, function, size, quantity and finish of each hardware item.
  - 2. Name, part number and manufacturer of each item.
  - 3. Location of hardware set cross referenced to indications on drawings both on floor plans and in door schedule.
  - 4. Explanation of all abbreviations, symbols, and codes contained in schedule.
  - 5. Mounting locations for hardware.
  - 6. Door and frame sizes and materials.
  - 7. Submit manufacture's technical data and installation instructions for the electronic hardware.
  - 8. Provide samples of hardware for Owner review.
  - 9. Catalog cuts.
- B. Templates: Where required, furnish hardware templates to each fabricator of doors, frames and other work to be factory-prepared for the installation of hardware.

1.03 QUALITY ASSURANCE

- A. Qualifications:
  - 1. Obtain each kind of hardware (latch and locksets, exit devices, hinges, and closers) from only one manufacturer, although several may be indicated as offering products complying with requirements.
  - 2. Hardware supplier shall be a direct factory contract supplier who has in his employment a certified architectural hardware consultant (AHC) who is available at all reasonable times

08 71 00  
FINISH HARDWARE

during the course of the Work, and for project hardware consultation to the Owner, Architect, and Contractor.

- B. Schedule Designations: Except as otherwise indicated, the use of one manufacturer's numeric designation system in schedules does not imply that another manufacturer's products will not be acceptable, unless they are not equal in design, size, weight, finish function, or other quality of significance. See 1.02 A for substitutions.
- C. Exit Doors: Openable at all times from the inside without the use of a key or any special knowledge or effort.
- D. Fire-rated openings: Provide hardware for fire-rated openings in compliance with NFPA Standard No. 80. This requirement takes precedence over other requirements for such hardware. Provide only such hardware which has been tested and listed by UL for the type and size of door required, and complies with the requirements of the door and the door frame labels. Latching hardware, door closers, ball bearing hinges, and seals are required whether or not listed in the Hardware schedule.
  - 1. Where panic exit devices are required on fire-rated doors, provide supplementary marking on door UL label on exit device indicating "Fire Exit Hardware."

1.04 DELIVERY, STORAGE, AND HANDLING

- A. Acceptance at the Site: Individually package each unit of finish hardware complete with proper fastening and appurtenances, clearly marked on the outside to indicate contents and specific locations in the Work.
- B. Deliver packaged hardware items at the times and to the locations (shop or field) for installation, as directed by the Contractor.

1.05 PROJECT CONDITIONS

- A. Coordination: Coordinate hardware with other work. Furnish hardware items of proper design for use on doors and frames of the thickness, profile, swing security and similar requirements indicated, as necessary for the proper installation and function, regardless of omissions or conflicts in the information on the Contract Documents.
- B. Upon request, check the Shop Drawings for doors and entrances to confirm that adequate provisions will be made for the proper installation of hardware.

1.06 PRE-INSTALLATION MEETING

- A. Schedule a hardware pre-installation meeting on site and discuss the installation of all types of hardware on the Project.
- B. Meeting attendees shall be notified seven (7) days in advance and shall include the Architect, Contractor Hardware Installers, all Manufacturers Representative, any other effected sub-contractor or supplier and the Owner's Locksmith.

1.07 WARRANTY

- A. Provide guarantee from hardware supplier as follows:
  - 1. Closers: Ten years; except electronic closers: Two years.
  - 2. Exit Devices & Locksets: Three years
  - 3. All other Hardware: Two years.

PART 2 – PRODUCT

2.01 MANUFACTURERS

- A. The approved Manufacturers are listed in every item of this Part 2 Specification Section. These Manufacturers are based on Owner's building standards for door hardware. The Owner maintains this hardware and is currently stocking replacement parts.
- B. All others must submit for approval a minimum of ten (10) calendar days prior to Bid Date.

2.02 HANGING DEVICES

A. Mortise Hinge

- 1. Heavy Weight Exterior
  - a. Stanley FBB199
  - b. McKinney TA3386
  - c. Hager BB1199
- 2. Standard Weight Exterior
  - a. Stanley FBB191
  - b. McKinney TA2314
  - c. Hager BB1191
- 3. Heavy Weight Interior
  - a. Stanley FBB168
  - b. McKinney TA3786
  - c. Hager BB1168
- 4. Standard Weight Interior
  - a. Stanley FBB179
  - b. McKinney TA2714
  - c. Hager BB1279

**Notes:**

- Provide DHI recommended size for height and width of door.
- Provide proper quantity of hinges for height of door.
- NRP (Non Removable Pin) at Reverse bevel locked Doors.
- Hinge tips to match existing for additions and alterations to existing buildings.
- Field verify size and finish of existing for door only replacement projects.

B. Continuous Hinge

- 1. Full Surface
  - a. Stanley 664HD
  - b. Select SL21HD
  - c. Hager 780-057HD
  - d. Pemko \_ FS
- 2. Full Mortise- Hollow Metal Doors
  - a. Stanley 662HD
  - b. Select SL24HD
  - c. Hager 780-224HD
  - d. Pemko \_ FM

08 71 00  
FINISH HARDWARE

3. Full Mortise- Wood Doors

- a. Stanley 661HD
- b. Select SL11HD
- c. Hager 780-111HD
- d. Pemko FM \_ SLF / SLI

**Notes:**

- Continuous hinges are to be used at exterior openings and vestibule entrances only.
- Continuous hinges are NOT to be used at interior openings other than vestibules for exterior entrances
- Use continuous hinges on perimeter doors unless there is an historic requirement.
- Use continuous hinges on interior high cycle openings.
- Field verify requirements for Pivots and Floor Closers for additions and alterations to existing buildings.
- Avoid floor closers and pivots on new construction.

2.03 LOCKSETS

A. Mortise Lock

- 1. Best Series 45H (*No Substitutions*)
  - a. Design 15J Full Escutcheon
  - b. Design 15H Sectional Trim
- 2. Function Designation
  - a. Passage Best: N
  - b. Office Best: AT
  - c. Privacy Best: LT
  - d. Privacy – Staff Best: H-VIN
  - e. Storeroom Best: D

**Note:** Provide lock functions as required for project and space as appropriate

B. Electronic Mortise Lock

- 1. Best Series 45HW (*No Substitutions*)
  - a. Design 15J Full Escutcheon
  - b. Design 15H Sectional Trim
- 2. Function Designation
  - a. Fail Secure Best: DEU
  - b. Fail Safe Best: DEL

**Note:** Specify quick connect wire connections for low voltage terminations.

Best "C"

Corbin Russwin "Lynx"

C. Cylindrical Lock

- 1. Best Series 9K (*No Substitutions*)
  - a. Design 15D Flat Lever w/Return
  - b. Design 16D Straight Lever

08 71 00  
FINISH HARDWARE

2. Function Designation

- a. Passage Best: N
- b. Office Best: AB
- c. Privacy Best: L
- d. Privacy – Staff Best: H
- e. Storeroom Best: D

**Note:** Provide lock functions as required for project and space as appropriate

D. Electronic Cylindrical Lock

- 1. Best Series 9K (No Substitutions)
  - a. Design 15D Full Escutcheon
  - b. Design 16D Sectional Trim
- 2. Function Designation
  - a. Fail Secure Best: DEU
  - b. Fail Safe Best: DEL

**Note:** Specify quick connect wire connections for low voltage terminations.  
Best "C"

E. Cylinders

- 1. Best Mortise Cylinders 1E Series (*No Substitutions*)
- 2. Rim Cylinders 12E Series (*No Substitutions*)

**Note:** Provide as necessary to operate locking hardware

F. Key System

- 1. Best (*No Substitutions*)
  - a. Small Format Interchangeable Core
  - b. 7-pin Best SFIC

**Note:** Cores must be supplied as part of the construction hardware

2.04 EXIT DEVICES

A. Exit Devices

1. Precision Apex Series 2000

- |   |        |
|---|--------|
| a. Rim Device                                   | 2100   |
| b. Rim Device–Fire Rated                        | FL2100 |
| c. Surface Vert Rod Device                      | 2200   |

3. **Panic Device Function Designation**

a. Exit Only	Precision: 01	Von Duprin: EO
b. Pull Only	Precision: 02	Von Duprin: DT
c. Key Retracts Latch Bolt	Precision: 03	Von Duprin: NL
d. Lever Locked / Unlocked	Precision: 08	Von Duprin: L
e. Lever Always Free	Precision: 15	Von Duprin: L-BE

**Note:** Precision Apex 2000 Series

- For use on new construction projects.
- "A" Lever design on interior applications.
- "A" Pull design on exterior applications.
- Field verify existing pull design on projects where there is an historic requirement.
- Hex Key Dogging on Non-Fire Rated applications.
- Single Doors – Rim style device preferred over mortise panics
- Pairs of Doors – (2) Rim style devices and a Mullion.
- Mullions to be Key Removable.
- Latch bolts on Electrified Exit Devices to use Motor retraction not solenoid retraction unless matching existing

B. Exit Device Accessories

1. Lockdown Panic Button
  - a. Trimco LDH100

**Note:** Must be used in conjunction with all non-fire rated exit devices

2.05 MECHANICAL CLOSING DEVICES

A. Surface Closer

1. Dorma 8900
2. LCN 4040XP
3. Stanley/Dormakaba Commercial Hdw QDC100

**Note:**

- Proper Arm as Required.
- Provide heavy duty EDA Parallel arms.
- Provide SNB at All closers.
- All door frames to be reinforced.

08 71 00  
FINISH HARDWARE

B. Concealed Closers

1. Dorma RTS88 series
  - a. RTS25 model – Aluminum Storefront Openings
  - b. RTS27 model - Hollow Metal Openings
2. LCN 2000 series
  - a. 2010/2030 models

2.06 AUTOMATIC OPERATORS

A. Low Energy- Automatic Operator

1. Dorma ED900
2. LCN 4642

**Note:**

- Push Plate Actuation
- Provide where noted ADA required on drawings

2.06 STOPS & HOLDERS

A. Door Stops

1. Trimco
2. Rockwood
3. Hager
4. Ives
5. Design Hardware

**Note:**

- Allow for maximum swing of door.
- Can use both floor stops and wall stops
- Backing required at wall stop.

B. Overhead Stops

1. Dorma 700 / 900
2. Rixon 6-x / 9-x
3. Rockwood OH100 / OH900
4. Glynn Johnson 90 / 100

2.07 TRIM & ACCESSORIES

A. For the following items all Manufacturers are approved using their standard product for the item listed.

- |                  |  |
|------------------|--|
| 1. Flat Goods    | Hager, Ives, Rockwood, Design Hardware       |
| 2. Threshold     | National Guard, Pemko, Zero, Design Hardware |
| 3. Weather Seals | National Guard, Pemko, Zero, Design Hardware |
| 4. Door Sweeps   | National Guard, Pemko, Zero, Design Hardware |
| 5. Smoke Seals   | National Guard, Pemko, Zero, Design Hardware |

2.08 ELECTRONIC COMPONENTS

A. Power Transfer

1. Precision EPT-12C
2. Securitron EL-CEPT
3. Von Duprin EPT-10 CON

**Note:** Specify quick connect wire connections for low voltage terminations.

08 71 00  
FINISH HARDWARE

B. Door Position Switches

1. Sargent 3280
2. Security Door Controls DPS
3. Securitron DPS
4. RCI 9540

C. Power Supplies

1. Alarm Controls APS
2. Security Door Controls 630
3. Von Duprin PS
4. Precision PS/RPS series
5. RCI 10-series

2.09 ELECTRIC STRIKES

A. Electric Strikes

1. Dorma
2. Best
3. RCI
4. Von Duprin

2.10 MISCELLANEOUS

A. Pad Locks

1. Best 21B series

**Note:** Weather Cover Required for Exterior Applications

2.11 MATERIALS

- A. Locksets: All locksets and latchsets shall be extra-heavy-duty cylindrical with Best 7-pin interchangeable core. Lockset and Cores to be of the same manufacturer to maintain complete lockset warranty. Locks to have solid shank with no opening for access to keyed lever keeper. Keyed lever to be protected by means of a break-away mechanism to prevent forced entry, when excessive torque is applied, a replaceable part will shear. Lock chassis must be through-bolted (outside of the lock chassis prep to prevent rotation of chassis after installation. Lock manufacturer shall provide a three-year warranty, in writing, to the Owner, along with three copies of the lock service manual. Strikes shall be 16 gauge curved brass, bronze or stainless steel with a 1" deep box construction, and have sufficient length to clear trim and protect clothing.
- B. Mortise type Locks and Latches shall be heavy-duty with hinged, anti-friction, 3/4 inch throw latchbolt with anti-friction piece made of self lubricating stainless steel. Functions and design as indicated on the hardware groups. Deadbolt functions shall be 1 inch projection made of hardened stainless steel. both deadbolt and latchbolt are to extend into the case a minimum of 3/8 inch when fully extended. Furnish locksets and latchsets with sufficient curved strike lip to protect door trim. Provide locksets with 7-pin interchangeable core cylinders. All mortise cylinders shall have a concealed internal set screw for securing the cylinder to the lockset. The internal set screw will be accessible only by removing the core from the cylinder body. Locksets and latchsets to have self-aligning, thru-bolted trim. Auxiliary deadlatch to be made of one piece stainless steel, permanently lubricated. Lever handles must be of forged or cast brass, bronze or stainless steel construction. Levers which contain a hollow cavity are not acceptable. Spindle to be such that if forced it will twist first, then break, thus preventing forced entry. Levers to be operated with a roller bearing spindle hub mechanism.
1. Grade 1 Cylindrical Locks shall have minimum 9/16 throw. All deadbolts shall have 1-inch minimum throw.

08 71 00  
FINISH HARDWARE

PART 3 – EXECUTION

3.01 BASIC REQUIREMENTS

- A. Furnish all items of hardware required to complete the work in accordance with specifications and plans.
- B. Carefully inspect Project for the extent of the finish hardware required to complete the Work. Where there is a conflict between these Specification and the existing hardware furnish finish hardware to specification.
- C. Door and frame prep
  - 1. Before hardware installation, verify that all doors and frames are properly prepared to receive the specified hardware. Hollow metal frames shall be prepared for ANSI strike plates per A115.1-2 (4-7/8" high); hinge preps will be mortised and reinforced with a minimum of 10 gauge reinforcement material; minimum of 14 gauge reinforcement material for closer and all surface mounted hardware. Hollow metal doors shall be properly prepared and reinforced with a minimum of 16 gauge material for either mortised or cylindrical locks as specified. All hollow metal doors receiving door closers or other surface mounted hardware to have 14 gauge reinforcement. The use of sex bolts is mandatory. Wood doors shall be factory prepared to receive the scheduled hardware.
- D. Hardware Finishes
  - 1. The finish for the hardware items will be project specific. Field verification is required for additions and alterations of existing buildings.
- E. Hardware installation
  - 1. The manufacturer's representative for the locking devices and closing devices must inspect and approve, in writing, the installation of their products. Hardware installed incorrectly must be reported to the architect prior to the architect's final punch list.
  - 2. Install each hardware item per manufacturer's instructions and recommendations. Do not install surface mounted items until finishes have been completed on the substrate. Set units level, plumb and true to line and location. Adjust and reinforce the attachment substrate as necessary for proper installation and operation.
  - 3. Installation shall conform to local governing agency security ordinance.

3.02 KEYING REQUIREMENTS

- A. Provide construction cores and keys during the construction period. Construction control and operating keys and core shall not be part of the Owner's permanent keying system or furnished on the same keyway (or key section) as the Owner's permanent keying system. Permanent cores and keys (prepared according to the accepted keying schedule) will be furnished by the Best factory representative as part of the hardware package to the General or Prime Contractor for delivery to the Owner a minimum of two (2) weeks prior to occupancy.
- B. All cylinders shall be Best 7-pin, interchangeable core.
- C. Furnish two (2) key blanks per core provided in the proper keyway configuration as directed by the University Locksmith
- D. The Owner, or the Owner's agent, will install permanent cores and return the construction cores to the Best Access Systems Factory Representative. All Construction cores and control keys remain the property of Best Access Systems.

08 71 00  
FINISH HARDWARE

3.03 HARDWARE LOCATION

- A. Hinges:
  - 1. Bottom Hinge: 10 inches from door bottom to bottom of hinge.
  - 2. Top Hinge: 5 inches from door top to top of hinge.
  - 3. Center Hinge: Center between top and bottom hinge.
  - 4. Extra Hinge: 6 inches from bottom of top hinge to top of extra hinge.
- B. Lock: 38 inches from finished floor to center of lever or knob.
- C. Push Bar: 44 inches from bottom of door to center of bar.
- D. Push Plate: 44 inches from bottom of door to center of plate.
- E. Pull Plate: 42 inches from bottom of door to center of pull.
- F. Exit Device: 39-13/16 inches from finished floor to center of pad.
- G. Deadlock Strike: 44 inches from floor, centered.

3.04 ADJUSTING

- A. Adjust and check each operating item of hardware and each door to ensure proper operation or function of every unit. Replace units which cannot be adjusted to operate freely and smoothly.
- B. Inspection: Hardware supplier shall inspect all hardware furnished within 10 days of contractor's request and include with his guarantee a statement that this has been accomplished. Inspector or Contractor shall sign off the hardware as being complete and correctly installed and adjusted. Further corrections of defective material shall be the responsibility of his representative.

3.05 ADJUSTMENTS AND CLEANING

- A. At final completion, and when HVAC is operational and balanced, installer shall make final adjustment to and verify proper operation of all door closers and other hardware. Lubricate moving parts with type lubrication recommended by the manufacturer.
- B. All hardware shall be left clean and in good condition. Hardware found to be disfigured, defective or inoperative shall be repaired or replaced.

END OF SECTION 08 71 00

PART 1 – GENERAL

1.01 DESCRIPTION

- A. Work Included: Provide all labor, materials and equipment necessary to install glazing necessary to satisfy the intent of the Contract Documents. This work shall include but shall not necessarily be limited to the following:
  - 1. Windows
  - 2. Doors
  - 3. Sidelites, transoms and interior window lites.
- B. Work Not Included:
  - 1. Unit Skylights
- C. Related Work Specified Elsewhere:
  - 1. Section 08 13 13 Metal Doors
  - 2. Section 08 14 16 Wood Doors
  - 3. Section 08 14 29 Flush Veneer Wood Doors
  - 4. Section 08 51 13 Aluminum Windows

1.02 INDUSTRY STANDARDS

- A. Publications of the following institutes, associations, societies and agencies are referred to in this section.
  - 1. Flat Glass Jobbers Association, FGJA.
  - 2. Underwriter's Laboratories, Inc., U.L.

1.03 SUBMITTALS

- A. Submit 4 x 8 inch samples of each type of glazing and one labeled unit of each glazing material to the Architect for approval.
- B. Furnish full size installation drawings in electronic format (PDF) of each type of glazing rabbet to the Architect for approval prior to fabrication or installation of any glass.

PART 2 – PRODUCTS

2.01 MATERIALS

- A. Insulating Glass (standard double glazed units):
  - 1. Exterior light: 1/4" tinted, solar bronze, float glass.(Tint shall match ISU Standard)
  - 2. Interior light:1/4" clear, float glass
  - 3. Unit Thickness: 1"
  - 4. Standards:
    - a. TWINDOW by PPG Industries, Inc.
    - b. THERMOPANE by Libbey-Owens-Ford Company
    - c. INSULATED GLAZING by Glasmont Corporation
- B. Insulating Glass (special double glazed units as noted on drawings):
  - 1. Exterior Light: 2 layers of 1/8" float glass with .060 vinyl laminate between (Exterior layer shall be tinted to match ISU Standard, interior layer shall be clear.)

08 81 00  
GLAZING

2. Interior Light: 2 layers of 1/8" clear float glass with .060 vinyl laminate between
  3. Unit thickness: 1"
  4. Standards:
    - a. TWINDOW by PPG Industries, Inc.
    - b. THERMOPANE by Libbey-Owens-Ford Company
    - c. INSULATED GLAZING by Glasmont Corporation
- C. Laminated Plate
1. Unit Thickness: 1/4" or as indicated on the Drawings
  2. Standards:
    - a. SAFLEX by Monsanto
    - b. Laminated by L.O.F.
- D. Tempered Plate (Clear or Tinted)
1. Unit Thickness: 1/4" or as indicated on the Drawings
  2. Standards:
    - a. TRU-TEMP FLOAT by ASG Industries
    - b. TUF-FLEX FLOAT by Libbey-Owens-Ford
    - c. HERCULITE FLOAT by PPG Industries
- E. Clear Float Glass
1. Unit thickness: 1/4" or as indicated on the Drawings
  2. Standards:
    - a. PPG Industries
    - b. Libbey-Owens-Ford Company
- F. Welded Wire Float Glass, U.L. Listed
1. Unit thickness: 1/4"
  2. Standards:
    - a. Polished Nu-Weld by ASG Industries
    - b. Baroque polished wire by Libbey-Owens-Ford
    - c. Polished baroque by Mississippi Wire Glass
  3. Wire shall be vertical and horizontal in the glass.
- G. Spandrel Insulated Glazing
1. Exterior Light: 1/4" tinted, solar bronze (Tint shall match ISU Standard), heat-strengthened spandrel coating to be on Surface #2.)
  2. Unit thickness: 1"
  3. Standards:
    - a. Virginia Glass
    - b. Hordis Glass Products
  4. Spandrel coating color to be selected by Architect from manufacturer's standard colors.
- H. Glazing Compound, Standards:
1. FLEXIGLAZE
  2. M-251 by Pecora
  3. CHANNEL GLAZING COMPOUND By Tremco

08 81 00  
GLAZING

PART 3 – EXECUTION

3.01 INSTALLATION

- A. Install in accordance with manufacturer's recommendations and as indicated in the drawings.
- B. All glazing scheduled for doors sidelights and transoms shall be of wire glass in label bearing doors/frames. Otherwise, provide laminated plate per U.B.C. requirements.

END OF SECTION 08 81 00

GLAZING

Blank Page

09 21 16  
GYPSUM WALLBOARD SYSTEMS

PART 1 – GENERAL

1.01 DESCRIPTION

- A. Work Included: Gypsum Wallboard is required on all interior walls and ceiling surfaces in this work as indicated on the Drawings.

1.02 PRODUCT HANDLING

- A. Delivery and Handling:
  - 1. Deliver materials to the project site with manufacturer's labels intact and legible.
  - 2. Handle materials with care to prevent damage.
  - 3. Deliver fire-rated materials bearing testing agency label and required fire classification numbers.
- B. Storage:
  - 1. Store materials inside under cover, stack flat, off floor.
  - 2. Stack wallboard so that long lengths are not over short lengths.
  - 3. Avoid over-loading floor system.
  - 4. Store adhesives in dry area. Provide protection against freezing at all times.
- C. Protection: Use all means necessary to protect the materials of this section before, during and after installation, and to protect the installed work of other trades.
- D. Replacements: In the event of damage, immediately make all repairs and replacements necessary to the approval of the Architect, and at no additional cost to the Owner.

1.03 QUALITY ASSURANCE

- A. Use only qualified journeymen. In the acceptance or rejection of installed gypsum wallboard, no allowance will be made for lack of skill on the part of the drywall Subcontractor.
- B. Where fire-resistive gypsum wallboard assemblies are required, adhere to assemblies and guidelines as published by the Gypsum Association in the current edition of the Gypsum Association's Fire Resistance Design Manual.

1.04 REFERENCES/STANDARDS

- A. ASTM C36 -Gypsum Wallboard
- B. ASTM C79 -Gypsum Sheathing Board
- C. ASTM C442 -Gypsum Backing Board and Core Board
- D. ASTM C514 - Nails for the Application of Gypsum Wallboard
- E. ASTM C645 - Non-Load (Axial) Bearing Steel Studs, Runners (Track) and Rigid Furring Channels for Screw Application of Gypsum Board
- F. ASTM C754 - Installation of Framing Members to Receive Screw Attached Gypsum Wallboard, Backing Board or Water Resistant Backing Board
- G. ASTM C840 - Application and Finishing of Gypsum Board
- H. ASTM C1002 - Steel Drill Screws for the Application of Gypsum Board
- I. ASTM E119 - Fire Tests of Building Construction and Materials
- J. GA-201 - Gypsum Board for Walls and Ceilings
- K. GA-216 - Recommended Specifications for the Application and Finishing of Gypsum Board
- L. GA-600 - Fire Resistance Design Manual

09 21 16  
GYPSUM WALLBOARD SYSTEMS

1.05 JOB CONDITIONS

A. Environmental Conditions:

1. Temperature: During cold weather, in areas receiving wallboard installation, maintain temperature storage between 55 degrees F. to 70 degrees F. (13 degrees C. to 21 degrees C.) for 24 hours before, during, and after gypsum wallboard and joint treatment application.
2. Ventilation:
  - a. Provide ventilation during and following adhesives and joint treatment application.
  - b. Protect installed materials from drafts during hot, dry weather.

B. Protection: Protect adjacent surfaces against damage and stains.

PART 2 – PRODUCTS

2.01 MATERIALS

A. Gypsum Wallboard

1. Water resistant board shall be in thicknesses and locations as indicated on the drawings.
2. Regular board shall be in thickness as indicated on the drawings.

B. Concrete GFR wallboard

1. All surfaces to receive ceramic tile finish shall be covered with 7/16" concrete glass-fiber-reinforced wallboard.

C. Fasteners:

1. Gypsum wallboard screws
2. Screw length for wood or metal stud application:
  - a. Single layer 5/8" wallboard application: 1 5/8", Bugle head screw.

D. Grillage:

1. Running Channels: 1 1/2" cold rolled galvanized steel.
2. Cross furring channels: 3/4" cold rolled galvanized steel.
3. Hangers: Minimum of No. 12 gauge galvanized annealed wire.
4. Note: Gypsum wallboard lath suspension system 650 by Chicago Metallic Corporation is an acceptable equal.

E. Accessories:

1. Drywall Reveal Molding: Style WOM-625-75 by Fry Reglet Corporation.
2. Surface-Mounted Corner Guard: Type CGS-3 by Balco, Inc.
3. Color to be selected by Architect.

PART 3 – EXECUTION

3.01 INSPECTION

- A. Check framing for accurate spacing and alignment.
- B. Verify that spacing of installed framing does not exceed maximum allowable of thickness of wallboard to be used.
- C. Verify that door frames are set for thickness of wallboard to be used.

09 21 16  
GYPSUM WALLBOARD SYSTEMS

- D. Do not proceed with installation of wallboard until deficiencies are corrected and surfaces to receive wallboard are acceptable.

3.02 APPLICATION

A. General:

1. Use wallboard of maximum lengths to minimize end joints.
2. Stagger end joints when they occur.
3. Locate end joints as far as possible from center of wall or ceiling.
4. Abut wallboards without forcing.
5. Neatly fit ends and edges of wallboard.
6. Support ends and edges of wallboard panels on framing or furring members.
7. Follow manufacturer's installation recommendations.
8. Stagger vertical joints on opposite side of partition to occur on different
9. Place all board so that all joints occur at center of studs or furring channels.
10. Make all joints tight and accurate, keeping adjacent boards in flush planes.
11. Cut and fit boards neatly and accurately around electrical boxes, light fixtures, grilles, registers, diffusers, and similar items so that evidence of cutting and fitting will be concealed by cover plates, flanges, or trim.
12. Seal cut edges where such cuts occur in water-resistant board according to the manufacturer's recommendations.
13. Where full height walls and walls containing acoustic or thermal insulation are indicated on the drawings, install sealant at the perimeter of such gypsum drywall surfaces and around all items protruding through such surfaces. Refer to Section 09260, Acoustical Treatment for Partitions/Ceilings, for specific information.
14. Provide control joints in continuous runs of wall exceeding 30'-0" (vertical or horizontal). Coordinate the location of all control joints with the Architect prior to installation.
15. Provide control joints at all locations where secured to structural steel to provide isolation from wallboard secured to partition framing.

B. Single Layer Application:

1. Vertical surfaces: Space screws a maximum 8" o.c. in field of panel and 8" o.c. along vertical abutting edges. Stagger screws on abutting edges or ends.
2. Horizontal surfaces: Space screws maximum 6" o.c. in field of panel and 6" o.c. along abutting end joints. Stagger screws on abutting edges or ends.

C. Joint System

1. Prefill:
  - a. Fill "V" grooves formed by abutting rounded edges of wallboard with prefill joint compound.
  - b. Fill "B" joint flush and remove excess compound beyond groove.
  - c. Leave clear depression to receive tape.
  - d. Permit prefill joint compound to harden prior to application of tape.

09 21 16  
GYPSUM WALLBOARD SYSTEMS

2. Taping and finishing joints:
    - a. Taping or embedding joints:
      - 1) Apply compound in thin uniform layer to all joints and edges to be reinforced.
      - 2) Apply reinforcing tape immediately.
      - 3) Center tape over joint, and seat tape into compound.
      - 4) Leave approximately 1/64" (0.05mm) to 1/32" (.1mm) compound under tape to provide bond.
      - 5) Apply skim coat immediately following tape embedment, but not to function as fill or second coat.
      - 6) Fold tape and embed in angles to provide true angle.
      - 7) Dry embedding coat prior to application of fill coat.
    - b. Filling:
      - 1) Apply joint compound over embedding coat.
      - 2) Fill taper flush with surface.
      - 3) Apply fill coat to cover tape.
      - 4) Feather out fill coat beyond tape and previous joint compound line.
      - 5) Do not apply fill coat on interior angles.
      - 6) Allow fill coat to dry prior to application of finish coat.
    - c. Finishing:
      - 1) Spread joint compound evenly over and beyond fill coat on all joints.
      - 2) Feather to smooth uniform finish.
      - 3) Apply finish coat to taped angles to cover tape and taping compound.
      - 4) Sand final application of compound to provide surface ready for decoration.
  3. Filling and finishing depressions:
    - a. Apply joint compound as first coat to fastener depressions.
    - b. Apply at least two additional coats of compound after first coat is dry.
    - c. Leave filled and finished depressions level with plane of surface.
  4. Finished beads and trim:
    - a. First fill coat:
      - 1) Apply joint compound to bead and trim.
      - 2) Feather out from ground to plane of the surface.
      - 3) Dry compound prior to application of second fill coat.
    - b. Second fill coat:
      - 1) Apply joint compound in same manner as first fill coat.
      - 2) Extend beyond first coat onto face of wallboard.
      - 3) Dry compound prior to application of finish coat.
    - c. Finish coat:
      - 1) Apply joint compound to bead and trim.
      - 2) Extend beyond second fill coat.
- D. Metal Trim:
1. The drawings do not propose to show all metal trim required; verify with the Architect the precise locations and types of trim to be used.
  2. Provide metal trim at all junctures of gypsum wallboard and dissimilar materials.

09 21 16  
GYPSUM WALLBOARD SYSTEMS

3. Carefully inspect the drawings and verify location of all metal trim required.
  4. Install all trim in strict accordance with the manufacturer's recommendations, paying particular attention to make all trim installation plumb, level, and true-to-line with firm attachment to supporting members.
- E. Grillages: Spacing of furring channels and runner channels, and the spacing and spans of runners shall not exceed the limits given for each shape in the "Metal Lath Association Specifications".
1. Running channels shall be spaced not over 3 feet on center and spans shall not exceed 4 feet (2 feet at light fixtures).
  2. Suspend running channels directly from structure with 12 gauge hanger wire.
  3. Cross furring channels shall be spaced not over 13-1/2" on center.
  4. Hangers shall be spaced as specified above and within 6" of the ends of main runner runs and of boundary walls, girders, or similar interruptions of ceiling continuity. Main runner shall be properly positioned and leveled, and hangers shall be saddle tied along runner. Main runners shall not be let into nor come in contact with abutting masonry walls. Runner channels shall be located within 6" of the walls to channels shall be securely saddle tied with two strands of 16 gauge tie wire to main runners and shall not be let into or come in contact with abutting masonry walls. All openings shall be formed with carrying channels. All offsets and isolated areas shall be securely braced against sway.
- 3.03 ADJUST AND REPAIR
- A. "Nail Pop":
1. When face paper is punctured, drive new screw approximately 1-1/2" (38mm) from defective fastening and remove defective fastening.
  2. Fill damaged surface with compound.
- B. Ridging:
1. Do not repair ridging until condition has fully developed - approximately 6 months after installation or one heating season.
  2. Sand ridges to reinforcing tape without cutting through tape.
  3. Fill concave areas on both sides of ridge with topping compound.
  4. After fill is dry, blend in topping compound over repaired area.
- C. Cracks:
1. Fill cracks with compound and finish smooth and flush.

END OF SECTION 09 21 16

Blank Page

09 51 13  
SUSPENDED ACOUSTICAL CEILINGS

PART 1 -GENERAL

1.01 SECTION INCLUDES

- A. Suspended metal grid ceiling system and perimeter trim.
- B. Acoustical tile and panels.
- C. Non-fire rated assembly.
- D. Supplementary acoustical insulation over system units.

1.02 REFERENCES

- A. ASTM C635 - Metal Suspension Systems for Acoustical Tile and Lay-in Panel Ceilings.
- B. ASTM C636 - Installation of Metal Ceiling Suspension Systems for Acoustical Tile and Lay-in Panels.
- C. ASTM E580 - Practice for Application of Ceiling Suspended Systems for Acoustical Tile and Lay-in panels in areas requiring seismic restraint.
- D. ASTM E1264 - Classification of Acoustical Ceiling Products.
- E. Ceilings and Interior Systems Contractors Association (CISCA) - Acoustical Ceilings: Use and Practice.

1.03 SUBMITTALS

- A. Submit under provisions of Section 01 32 00.
- B. Shop Drawings: Indicate grid layout and related dimensioning, junctions with other work or ceiling finished, interrelation of mechanical and electrical items related to system and wall layouts.
- C. Product Data: Provide data on metal grid system components, acoustical units and accessories.
- D. Samples: Submit two samples full size illustrating material and finish of acoustical units.
- E. Samples: Submit two samples each, 12 inches (300 mm) long, of suspension system main runner, cross runner, edge trim, and hold down clips.
- F. Manufacturer's Installation Instructions: Indicate special procedures, perimeter conditions requiring special attention.

1.04 QUALIFICATIONS

- A. Grid Manufacturer: Company specializing in manufacturing the Products specified in this section with minimum three years documented experience.
- B. Acoustical Unit Manufacturer: Company specializing in manufacturing the Products specified in this section with minimum three years documented experience.

1.05 REGULATORY REQUIREMENTS

- A. Conform to applicable code for combustibility requirements for materials.

1.06 ENVIRONMENTAL REQUIREMENTS

- A. Maintain uniform temperature of minimum 60 degrees F (16 degrees C), and maximum humidity of 40 percent prior to, during, and after acoustical unit installation.

1.07 SEQUENCING

- A. Sequence work to ensure acoustical ceilings are not installed until building is enclosed, sufficient heat is provided, dust generating activities have terminated, and overhead work is completed, tested, and approved.
- B. Install acoustical units after interior wet work is dry.

09 51 13  
SUSPENDED ACOUSTICAL CEILINGS

1.08 EXTRA MATERIALS

- A. Furnish under provisions of Section 01 77 00.
- B. Provide 10 percent of total acoustical unit area of extra tile panels to Owner.

PART 2 – PRODUCTS

2.01 MANUFACTURERS - SUSPENSION SYSTEM

- A. Chicago Metallic Corp.
- B. Armstrong Contract Interiors.
- C. Donn by U.S.G. Interiors, Inc.

2.02 SUSPENSION SYSTEM MATERIALS

- A. Non-fire Rated Grid: ASTM C635, heavy duty; exposed T as indicated: components die cut and interlocking.
- B. Grid Materials: Commercial quality cold rolled steel with galvanized coating.
- C. Exposed Grid Surface Width: 15/16 inch (24 mm).
- D. Grid Finish: White and color as indicated.
- E. Accessories: Stabilizer bars clips splices edge moldings hold down clips and for suspended grid system.
- F. Support Channels and Hangers: Galvanized steel; size and type to suit application, seismic requirements, a ceiling system flatness requirement specified.

2.03 MANUFACTURERS - ACOUSTICAL UNITS

- A. U.S.G. Interiors, Inc. Product as schedule.
- B. Armstrong Contract Interiors Product as scheduled.
- C. Celotex Building Products Product as scheduled.

2.04 ACOUSTICAL UNIT MATERIALS

- A. Armstrong Type 737
  - 1. Recessed Angular Tegular
  - 2. Size: 24" x 24" x 5/8"
  - 3. Grid: 15/16" DX
  - 4. Color: White

2.05 ACCESSORIES

- A. Touch-up Paint: Type and color to match acoustical and grid units.

PART 3 – EXECUTION

3.01 EXAMINATION

- A. Verify site conditions.
- B. Verify that layout of hangers will not interfere with other work.

3.02 INSTALLATION - LAY IN GRID SUSPENSION SYSTEM

- A. Install suspension system in accordance with manufacturer's instructions and as supplemented in this section.
- B. Install system in accordance with ASTM E580.

09 51 13  
SUSPENDED ACOUSTICAL CEILINGS

- C. Install system capable of supporting imposed loads to a deflection of 1/240 maximum.
- D. Lay out system as indicated on reflected ceiling plans.
- E. Supply hangers or inserts for installation with instructions for their correct placement.
- F. Install after major above ceiling work is complete. Coordinate the location of hangers with other work.
- G. Provide hanger clips during steel deck erection. Provide additional hangers and inserts as required.
- H. Hang suspension system independent of walls, columns, ducts, pipes and conduit. Where carrying members are spliced, avoid visible displacement of face plane of adjacent members.
- I. Where ducts or other equipment prevent the regular spacing of hangers, reinforce the nearest affected hangers and related carrying channels to span the extra distance.
- J. Do not support components on main runners or cross runners if weight causes total dead load to exceed deflection capability. Support fixture loads by supplementary hangers located within 6 inches (150 mm) of each corner; and support components independently.
- K. Do not eccentrically load system, or produce rotation of runners.
- L. Install edge molding at intersection of ceiling and vertical surfaces, using longest practical lengths. Miter corners. Provide edge moldings at junctions with other interruptions.
- M. Form expansion joints as required. Maintain visual closure.

**3.03 INSTALLATION - CONCEALED GRID SUSPENSION SYSTEM**

- A. Install suspension system in accordance with manufacturer's instructions and as supplemented in this section.
- B. Install system in accordance with ASTM E580.
- C. Install system capable of supporting imposed loads to a deflection of 1/240 maximum.
- D. Lay out system to a balanced grid design as indicated on reflected ceiling plans and/or electrical lighting plans.
- E. Install after major above ceiling work is complete. Coordinate the location of hangers with other work.
- F. Supply hangers or inserts for installation with instructions for their correct placement.
- G. Provide hanger clips during steel deck erection. Provide additional hangers and inserts as required.
- H. Hang suspension system independent of walls, columns, ducts, pipes and conduit. Where carrying members are spliced, avoid visible displacement of face plane of adjacent members.
- I. Where ducts or other equipment prevent the regular spacing of hangers, reinforce the nearest affected hangers and related carrying channels to span the extra distance.
- J. Do not support components on main runners or cross runners if weight causes total dead load to exceed deflection capability. Support fixture loads by supplementary hangers located with 6 inches (150 mm) of each corner; and support components independently.
- K. Do not eccentrically load system, or produce rotation of runners.
- L. Install edge molding at intersection of ceiling and vertical surfaces, using longest practical lengths. Miter corners. Provide edge moldings at junctions with other interruptions.
- M. Form expansion joints as required. Maintain visual closure.

09 51 13  
SUSPENDED ACOUSTICAL CEILINGS

3.04 INSTALLATION - ACOUSTICAL UNITS

- A. Install acoustical units in accordance with manufacturer's instructions.
- B. Fit acoustical units in place, free from damaged edges or other defects detrimental to appearance and function.
- C. Lay directional patterned units one way with pattern parallel to shortest room axis. Fit border trim neatly against abutting surfaces.
- D. Install units after above ceiling work is complete.
- E. Install acoustical units level, in uniform plane, and free from twist, warp and dents.
- F. Cut tile panels to fit irregular grid and perimeter edge trim. Field rabbett tile panel edge. Double cut and field paint exposed edges of tegular units.
- G. Where bullnose concrete block corners round obstructions occur, provide preformed closers to match edge molding.
- H. Lay acoustical insulation for a distance of 48 inches (1 200 mm) either side of acoustical partitions.
- I. Install hold-down clips to retain panels tight to grid system within 20 ft (6 m) of an exterior door.

3.05 ERECTION TOLERANCES

- A. Maximum Variation from Flat and Level Surface: 1/8 inch in 10 feet (3 mm in 3 m).
- B. Maximum Variation from Plumb Grid Members Caused by Eccentric Loads: 2 degrees.

END OF SECTION 09 51 13

09 65 13  
RESILIENT WALL BASE AND ACCESSORIES

PART 1 – GENERAL

1.01 SUMMARY

- A. This Section includes resilient wall base and flooring accessories.
- B. See Division 09 Sections "Resilient Tile Flooring".

1.02 SUBMITTALS

- A. Product Data: For each product indicated.
- B. Below assumes manufacturer's standard-size Samples are acceptable. Revise to suit Project.
- C. Samples: For each product and for each color, pattern, and texture required.

1.03 PROJECT CONDITIONS

- A. Maintain a temperature of not less than 70 deg F (21 deg C) or more than 95 deg F (35 deg C) in spaces to receive resilient accessories for at least 48 hours before installation, during installation, and for at least 48 hours after installation, unless manufacturer's written recommendations specify longer time periods.
- B. After installation, maintain a temperature of not less than 55 deg F (13 deg C) or more than 95 deg F (35 deg C).
- C. Install resilient accessories after other finishing operations, including painting, have been completed.

1.04 EXTRA MATERIALS

- A. Extra materials may not be allowed for publicly funded projects.
- B. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents. Furnish not less than 10 linear feet (3 linear m) of each different type, color, pattern, and size of resilient product installed.

PART 2 – PRODUCTS

2.01 WALL BASE

- A. See "Listed Manufacturers" Article in the Evaluations for cautions about naming manufacturers and products.
- B. Retain above for nonproprietary or below for semiproprietary specification. Refer to Division 01 Section "Product Requirements."
- C. Products: Subject to compliance with requirements, provide one of the following:
  - 1. Armstrong World Industries, Inc.
  - 2. Roppe Corporation.
  - 3. Johnsonite, Division of Duramax, Inc.
  - 4. Others as approved equal.
- D. For proprietary or semiproprietary specification, delete descriptive wall base requirements below that are determined by product designations inserted above.
- E. Wall Base: Rubber, FS SS-W-40, Type I.
  - 1. Color and Pattern: As selected from manufacturer's full range.
  - 2. Style: Cove with top-set toe
  - 3. Minimum Thickness: 1/8 inch

RESILIENT WALL BASE AND ACCESSORIES

4. Height: 6 inches
5. Lengths: Coils in lengths standard with manufacturer, but not less than 96 feet
6. Outside Corners: Job formed.
7. Inside Corners: Job formed.
8. Surface: Smooth.

## 2.02 RESILIENT ACCESSORY MOLDING

- A. See "Listed Manufacturers" Article in the Evaluations for cautions about naming manufacturers and products.
- B. Retain above for nonproprietary or below for semiproprietary specification. Refer to Division 01 Section "Product Requirements."
- C. Products: Subject to compliance with requirements, provide one of the following:
  1. Johnsonite, Division of Duramax, Inc.
  2. Roppe Corporation.
  3. Others as approved equal.
- D. For proprietary or semiproprietary specification, delete descriptive requirements below that are determined by product designations inserted above.
- E. Description: Carpet edge for glue-down applications, reducer strip for resilient flooring.
  1. Material: Rubber.
  2. Color: As selected from manufacturer's full range.
  3. Profile and Dimensions: as required for application.

## 2.03 INSTALLATION ACCESSORIES

- A. Trowelable Leveling and Patching Compounds: Latex-modified, portland cement-based or blended hydraulic cement-based formulation provided or approved by resilient product manufacturer for applications indicated.
- B. Adhesives: Water-resistant type recommended by manufacturer to suit resilient products and substrate conditions indicated.

## PART 3 – EXECUTION

## 3.01 INSTALLATION

- A. Before installing resilient wall base and accessories:
  1. Remove coatings, including curing compounds, and other substances that are incompatible with adhesives and that contain soap, wax, oil, or silicone, using mechanical methods recommended by manufacturer. Do not use solvents.
  2. Move resilient products and installation accessories into spaces where they will be installed at least 48 hours before installation, unless longer conditioning periods are recommended in writing by manufacturer. Install products only after they are at the same temperature as the space where they are to be installed.
- B. Use trowelable leveling and patching compounds to fill cracks, holes, and depressions in substrates.
  1. Broom and vacuum clean substrates to be covered immediately before installing resilient products. After cleaning, examine substrates for moisture, alkaline salts, carbonation, or dust. Proceed with installation only after unsatisfactory conditions have been corrected.

RESILIENT WALL BASE AND ACCESSORIES

2. Adhesively install resilient wall base and accessories. Place resilient products so they are butted to adjacent materials.
3. Apply resilient wall base to walls, columns, pilasters, casework and cabinets in toe spaces, and other permanent fixtures in rooms and areas where base is required.
4. Install wall base in lengths as long as practicable without gaps at seams and with tops of adjacent pieces aligned.
5. Tightly adhere wall base to substrate throughout length of each piece, with base in continuous contact with horizontal and vertical substrates.
6. Do not stretch base during installation.
7. On masonry surfaces or other similar irregular substrates, fill voids along top edge of resilient wall base with manufacturer's recommended adhesive filler material.
8. Form outside corners on job, from straight pieces of maximum lengths possible, without whitening at bends. Shave back of base at points where bends occur and remove strips perpendicular to length of base that are only deep enough to produce a snug fit without removing more than half the wall base thickness.
9. Form inside corners on job, from straight pieces of maximum lengths possible, by cutting an inverted V-shaped notch in toe of wall base at the point where corner is formed. Shave back of base where necessary to produce a snug fit to substrate.
10. Install reducer strips at edges of flooring that otherwise would leave exposed edges.
  - a. At doors, install reducer strips to be hidden by the closed door.
11. Immediately after installing resilient products, remove adhesive and other surface blemishes using cleaner recommended by resilient product manufacturers.

END OF SECTION 09 65 13

09 65 13  
RESILIENT WALL BASE AND ACCESSORIES

Blank Page

09 65 19  
RESILIENT TILE FLOORING

PART 1 – GENERAL

1.01 DESCRIPTION

- A. Work Included: Resilient tile flooring required for this work is indicated on the Finish Schedule in the Drawings and includes:

1. Vinyl composition tile
2. Flexible base

1.02 QUALITY ASSURANCE

- A. Manufacturer's Recommendations: The manufacturer's recommended methods of installation, when approved by the Architect, shall be the basis of acceptance or rejection of actual installation methods used on this work.

1.03 SUBMITTALS

- A. Submit color samples of the flexible base to the Architect for approval and selection.
- B. Submit color samples of the vinyl composition tile to the Architect for approval and selection. Each sample shall include two pieces, showing the extreme ranges of color and marblization.
- C. Accompanying the samples, submit two copies of the manufacturer's current recommended method of installation for each item.

1.04 PRODUCT DELIVERY, STORAGE & HANDLING

- A. Store all materials off the ground under watertight cover and away from sweating walls and other damp surfaces until ready for use. All rooms, subfloors, tiles and adhesives shall be maintained at a minimum temperature of 70 degrees F. for at least 48 hours before commencing work. Temperature shall be maintained during installation and for at least 48 hours after completion. Remove damaged or deteriorated material from the premises.

1.05 PROTECTION

- A. Protect finished work installed by other trades prior to work under this Section. Any work damaged by workers of this trade shall be replaced without cost to the Owner.

PART 2 - PRODUCTS

2.01 VINYL COMPOSITION FLOOR TILES

- A. General: All vinyl composition floor tiles shall be the product of one manufacturer and shall, to the maximum extent possible, be of a single batch number.
- B. Standard tile:
1. Types: STANDARD EXCELON, IMPERIAL TEXTURE, by Armstrong
  2. Size: 12" x 12" x 1/8"
  3. Reference Specification: SS-T-312 B (1), Type IV
- C. Refer to Room Finish Schedule on the Drawings for specific locations of each material type.

2.02 FLEXIBLE BASE

- A. General: All flexible base shall be the product of one manufacturer and shall be coved in all areas receiving.
- B. Work Included: Furnish and install flexible base around walls, columns, casework, equipment, and similar built-in items by other as shown on the Room Finish Schedule. Do not install flexible base behind such built-in items, unless the backs of such items will be exposed in the completed work.

09 65 19  
RESILIENT TILE FLOORING

C. Materials:

1. Flexible base shall be 1/8" thick X height as shown on the drawings, solid rubber or vinyl with ribbed backs and smooth faces. Base shall conform to Federal Specifications SS-W-40a.
2. Pre-formed end stops shall be 1/8" thick X heights required by the size of the base, solid rubber or vinyl to match base.
3. Standards: Armstrong, VPI

2.03 OTHER MATERIALS

- A. Adhesive shall be as recommended by the manufacturer of sheet vinyl flooring, vinyl composition tile and flexible base and shall be highly resistant to frequent washings and scrubbing.
1. Note: Adhesives must be as recommended by manufacturer for use on existing substrate. These include existing concrete slabs below grade as well as above grade applications and including priming. Other conditions may exist and all should be reviewed in the field. Submit to the Architect the Manufacturer's letter of recommendation.
- B. Edge Strips shall be 1/8" thick x 1" wide, lengths as required and factory-waxed. One long edge shall be square edged and the other long edge shall be beveled.
1. Vinyl composition shall conform to Federal Specifications SS-T-312 Type IV.
- C. Provide Transition Moldings by Mercer. Verify with the Architect prior to installation.

PART 3 - EXECUTION

3.01 SURFACE CONDITIONS

- A. Inspection:
1. Prior to all work of this section, carefully inspect the installed work of other trades to the point where walls, subfloors, ceilings and other similar work occurring within the areas to receive resilient tile flooring are completely installed and finished before work described in this section can begin.
  2. Verify that resilient tile flooring may be installed in accordance with the original design and the manufacturer's recommendations.
  3. Commencement of the work in this section shall mean acceptance of the subfloor by the installer.
  4. In the event of discrepancy or unacceptable surface conditions, immediately notify the Architect.
  5. Do not proceed with installation in areas of discrepancy until all such discrepancies have been fully resolved.

3.02 PREPARATION

- A. The room shall be kept at a temperature of not less than 65 degrees F. for at least 24 hours before, after, and during installation.
- B. All materials shall be stored for a period of not less than 24 hours in an area that ambient temperature of which is not less than 70 degrees F.
- C. Subfloors: Neatly patch, fill, or otherwise repair all cracks, marks, irregularities, and other conditions in the subfloor that may telegraph through the finished installation and so that they will properly bond with the concrete subfloors.
- D. Remove all paint from the subfloor to assure permanent bond of the sheet flooring to the subfloor. Obtain an inspection from the manufacturer's representative to approve the condition of the subfloor to receive the sheet flooring prior to installation.

09 65 19  
RESILIENT TILE FLOORING

3.03 INSTALLATION FOR VINYL TILE

- A. After preparation of surfaces, apply adhesive in a thin film and spread evenly with a serrated trowel with notches 1/16th" x 1/16", 1/8' apart. Lay tile in a square pattern, without special borders, symmetrical about the axis of the room or space.
- B. Direction of graining shall be in the same direction. Lay out work so that, as far as practicable, no piece of tile shall be less than 5" wide, particularly at doors.
- C. All joints shall be tight, in true alignment, and as inconspicuous as possible. Where two colors meet at door openings or where tile terminates at doors to rooms having exposed concrete floors, provide a 1"-wide feature strip directly under the door. Architect shall have the option of selecting different colors in different areas or rooms.
- D. Tile shall be continuous under all plastic laminate-faced bookcases shown on the Drawings.
- E. Cut and fit tile sufficiently close to walls, columns, etc., so that joint will be covered by the base, where installed. At other fixed surfaces, including thresholds, pipes, removable covers, floor outlets and permanent built-in cabinets and equipment, scribe and accurately fit tile as required.
- F. Provide tile inserts at removable floor outlet covers. Remove excess adhesive from all surfaces immediately. Seal joints at pipes with waterproof cement.
- G. Provide underlayment as required to bring resilient tile surface to the same level as abutting ceramic tile, or other flooring.

3.04 INSTALLATION FOR FLEXIBLE BASE

- A. After preparation of wall surfaces, apply adhesive to back of base, leaving top 1/4" free of adhesive. Press base firmly against the walls sliding horizontally into place, making sure toe is tight to the floor and against the wall. Roll the entire surface of the base with a hand roller and press the top of the base against the wall with a straight edge. Remove excess adhesive immediately. Install preformed corners at all outside corners. Cope at internal corners. Where base terminates at projections, install end-caps.

3.05 CLEANING AND PROTECTION

- A. Cleaning
  - 1. After preparation of wall surfaces, apply adhesive to back of base, leaving top 1/4" free of adhesive. Press base firmly against the walls sliding horizontally into place, making sure toe is tight to the floor and against the wall. Roll the entire surface of the base with a hand roller, and press the top of the base against the wall with a straightedge. Remove excess adhesive immediately. Install preformed corners at all outside corners. Cope at internal corners. Where base terminates at projections install end-caps.
  - 2. Upon completion of the installation, immediately remove all surplus adhesive from adjacent surfaces.
  - 3. As soon as possible after installation, and in accordance with the timing recommended by the manufacturers, clean the entire resilient tile flooring surface using the materials recommended for that purpose by the manufacturers of the materials being cleaned.

3.06 EXTRA MATERIAL

- A. Provide the Owner with the following extra materials for use in maintenance work:
  - 1. Deliver to the Owner unused remaining vinyl tile & base.

09 65 19  
RESILIENT TILE FLOORING

Blank Page

09 68 13  
CARPET - CARPET SQUARES

PART 1 - GENERAL

1.01 SECTION INCLUDES

- A. Carpet squares with adhesive back.
- B. Accessories

1.02 REFERENCES

- A. ASTM D2859 - Test method for flammability of finished textile floor covering materials.
- B. ASTM E84 - Surface burning characteristics of building materials.
- C. ASTM E648 - Critical Radiant flux of floor covering systems using a radiant heat energy source.
- D. NFPA 253 - Test for critical radiant flux of floor covering systems.

1.03 SUBMITTALS

- A. Submit under provisions of Section 01 32 00.
- B. Shop Drawings: Indicate seaming plan, method of joining seams, direction of carpet.
- C. Product Data; Provide data on specified products, describing physical and performance characteristics; sizes, patterns, colors available, and method of installation, and layout of flat wire system.
- D. Samples: Submit two samples 18 x 18 inch (450 x 450 mm) in size illustrating color and pattern for each carpet material specified.
- E. Submit two, 12 inch (300 mm) long samples of edge strip, material for each color specified.
- F. Manufacturer's Installation Instructions: Indicate special procedures, perimeter conditions requiring special attention.

1.04 QUALIFICATIONS

- A. Manufacturer: Company specializing in manufacturing specified carpet with minimum three years documented experience.
- B. Installer: Company specializing in installing carpet with minimum three years documented experience.

1.05 REGULATORY REQUIREMENTS

- A. Conform to applicable code for flame/smoke rating requirements in accordance with ASTM E84.
- B. Conform to NFPA 253, ASTM E648, Class I for flooring radiant panel test.
- C. Conform to ASTM D2859 for surface flammability ignition test.

1.06 ENVIRONMENTAL REQUIREMENTS

- A. Store materials for 3 days prior to installation in area of installation to achieve temperature stability.
- B. Maintain minimum 70 degrees F (21 degrees C) ambient temperature 3 days prior to, during and 24 hours after installation.

1.07 MAINTENANCE DATA

- A. Submit under provisions of Section 01 77 00.
- B. Maintenance Data: Include maintenance procedures, recommended maintenance materials, and suggested schedule for cleaning.

09 68 13  
CARPET - CARPET SQUARES

1.08 EXTRA MATERIAL

- A. Furnish under provisions of Section 01 77 00.
- B. Provide 10% extra of carpet squares, but not less than 8, of each type, color, and pattern specified.

PART 2 – PRODUCTS

2.01 ACCEPTABLE MANUFACTURERS – CARPET SQUARES

- A. Mohawk
- B. Shaw
- C. Milliken
- D. All others must submit for approval

2.02 MATERIALS - CARPET

- A. Refer to the Room Finish Schedule for Carpet Material for this Project

2.03 ACCESSORIES

- A. Sub-Floor Filler: White premix latex; type recommended by adhesive material manufacturer.
- B. "Pressure Sensitive Adhesive" designed for use with carpet squares

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Verify that surfaces are smooth and flat with maximum variation of ¼ inch in 10 ft. (6 mm in 3 m), and are ready to receive work.
- B. Verify concrete floors are dry to a maximum moisture content of 7 percent; and exhibit negative alkalinity, carbonization, or dusting.

3.02 PREPARATION

- A. Vacuum clean substrate.
- B. Remove sub-floor ridges and bumps. Fill minor or local low spots, cracks, joints, holes, and other defects with sub-floor filler.
- C. Prime any patched areas, dirty, dusty or porous floors with a latex milk additive such as Parachem 615 or 620.

3.03 ADHESIVE APPLICATION

- A. Adhesive must be used in a full spread application
- B. Apply with a 1/16 x 1/16 x 1/16 square notched trowel. Do not apply with a paint roller.
- C. Allow adhesive to dry to a clear and tacky state before laying carpet squares.

3.04 INSTALLATION

- A. Install carpet squares per Manufacturer's instructions.
- B. Install tiles immediately after adhesive has dried
- C. Lay carpet squares tight and flat on subfloor.
- D. Fit carpet squares tight to intersection with vertical surfaces without gaps.
- E. Where wall bases are scheduled, cut carpet squares tight to walls.
- F. Fit carpet squares tight to vertical surfaces to form base.
- G. Carpet squares shall be installed in a quarter turn configuration.

09 68 13  
CARPET - CARPET SQUARES

3.05 CLEANING

- A. Clean work under provisions of 01 77 00.
- B. Remove excess adhesives without damage, from floor, base, and wall surfaces.
- C. Clean and vacuum carpet surfaces.

END OF SECTION 09 68 13

09 68 13  
CARPET - CARPET SQUARES

Blank Page

GENERAL PAINTING AND FINISHING REQUIREMENTS

## PART 1 – GENERAL

## 1.01 DESCRIPTION

## A. Work Includes But Not Limited To-

1. Finishing elements of the building shown on attached Finish Schedule or specified below.
2. Back prime work to be installed against concrete or masonry or subjected to moisture.
3. Paint mechanical and electrical items located in classrooms as determined by Owner.

## B. The type of material to be used and the number of coats to be applied are listed in the Part 2 of this Section or as noted on the Drawings.

## C. Prepare and paint or finish surfaces as hereinafter described, including, but not limited to the following:

1. Concrete Unit Masonry
2. Gypsum plaster
3. Cement plaster
4. Wood doors, finish wood carpentry, and trim
5. Hollow metal doors, frames

## D. Other exposed surfaces that are not specifically indicated to be factory finished or finished by others.

## E. It is the intent of this Specification to require all existing painted wall surfaces, except those explicitly exempted herein, to be painted under this contract.

## F. Related Documents-

1. Documents affecting work of this Section include, but are not necessarily limited to, General Conditions, Supplementary Conditions, and Section in Division 01, General Requirements, of these Specifications.

## 1.02 SUBMITTALS

## A. Product Data-

1. Written list of specific products proposed along with Manufacturer's certification that products meet specified requirements. Before any paint materials are delivered to the job site, submit to the Architect in accordance with the provisions of Section 01 32 00 of these specifications a complete list of all materials proposed to be furnished and installed under this portion of the work.
  - a. Data shall be specific as to Manufacturer's brand name and identifying numbers.
  - b. Samples: Accompanying the materials list, submit to the Architect two copies of the full range colors available in each of the proposed products.
  - c. Indicate square footage to be covered by each product, Manufacturer's recommended coverage rates, and amount of product required based on average coverage.
  - d. Indicate items to be finished as work of each painting Section.
  - e. Outline, preparation and application procedures to be followed including application methods, time between coats, and environment
  - f. Provide Manufacturer's cut sheets which indicate paint components. As a minimum, specification requirements for paint composition shall be given on cut sheets submitted.
2. Color selection data.
3. Maintenance instructions.

GENERAL PAINTING AND FINISHING REQUIREMENTS

## B. Samples-

1. Provide paint card for each color and for each paint system. Card to show each component of system as well as total system.

## 1.03 QUALITY ASSURANCE

## A. Pre-installation Meeting-

1. Schedule meeting after delivery of paint but prior to application of field samples or paint.

## B. Field Samples-

1. Prior to application of any paint system meet on Project site with Owner's representative. Owner may select one surface for application of each paint system specified.
2. Apply paint systems to surfaces indicated following procedures outlined in Contract Documents and Product Data submission specified above.
3. After approval of samples, proceed with application of paint system throughout Project.

## C. Applicator shall have experience in application of specified products for five years minimum and be acceptable to Owner and Manufacturer.

## 1.04 DELIVERY, STORAGE, &amp; HANDLING

## A. Deliver specified products in original containers with labels intact on each container. Deliver amount of material indicated on submittal for Project in single shipment. Notify Owner two working days prior to delivery.

## B. Store materials in single place.

## C. Keep storage area clean and rectify any damage to area at completion of work of this Section.

## D. Replacements: In the event of damage, immediately make all repairs and replacements necessary to the approval of the Architect and at no additional cost to the Owner.

## 1.05 PROJECT/SITE CONDITIONS

## A. Environmental Conditions-

1. Maintain temperature of paint storage area at 55 deg. F minimum.
2. Perform painting operations at temperature conditions recommended by Manufacturer for each operation.

## 1.06 SCHEDULING

## A. Coordinate by room painting schedules with Owner.

## B. Examine Contract Documents for painting requirements of other trades. Become familiar with their painting provisions and the painting of finish surfaces left unfinished by the requirements of other Sections.

## C. Contractor may work in facilities during normal hours of 6 a.m. to 6 p.m., or with approval of Owner after 6 p.m.

## 1.07 MAINTENANCE

## A. Extra Materials-

1. Provide one gallon of each finish coat material in Manufacturer's original container in each color used. Provide one gallon of each primer and of each undercoat in each color used.
2. The paint containers shall be clearly identified with the paint color number and name.

GENERAL PAINTING AND FINISHING REQUIREMENTS

## PART TWO – PRODUCTS

## 2.01 MATERIALS

## A. Manufacturer

1. All paint materials selected for coating systems for each type of surface shall be the product of a single manufacturer.
2. Primers shall be by the same manufacturer as the paint used for the final coats and shall be of the type recommended by that manufacturer for the particular application.
3. Thinners, when used, shall be only those thinners recommended for that purpose by the manufacturer of the material to be thinned.

## B. Standards:

1. Sherwin-Williams
2. M.A.B.
3. Porter Paint
4. Devoe Paint

## C. Linseed oil, shellac, turpentine, and other painting materials shall be pure, of highest quality, and bear identifying labels on containers.

## D. Tinting color shall be best grade of type recommended by Manufacturer of paint or stain used on Project.

## E. Paint compositions shall not only meet specified requirements but also contain sufficient miscellaneous components to promote proper drying and performance during and after application.

## 2.02 GUIDE TO APPROVED PRODUCTS

## A. General: The following list of manufacturers and products is approved by the Architect for use on the project. Such a list shall serve as a guide to the quality of the types of materials to be used and shall not be construed as a basis for limiting competition.

## B. Materials list:

1. Metal Primer:
  - a. Sherwin-Williams - Kemk Kromik Metal Primer
  - b. Or equal
2. Metal Finish coat:
  - a. Sherwin-Williams - Pro-Mar Alkyd
  - b. Or equal
3. Latex Wall and Ceiling Primer:
  - a. Sherwin-Williams - Pro-Mar Latex Wall Primer
  - b. Or equal
4. Semi-Gloss Finish:
  - a. Sherwin-Williams - Style Perfect Latex Semi-Gloss Enamel
  - b. Or equal
5. Flat Finish:
  - a. Sherwin-Williams - Pro-Mar 400 Latex Wall
  - b. Or equal
6. Wood Varnish:
  - a. Sherwin-Williams - S-W Oil Base Gloss Varnish
  - b. Sherwin-Williams - S-W Oil Base Satin Finish
  - c. Or equal

GENERAL PAINTING AND FINISHING REQUIREMENTS

7. Wood Stain Interior:
  - a. Sherwin-Williams - S-W Interior Wood Stain
  - b. Or equal
8. Paste Filler:
  - a. Sherwin-Williams - S-W Paste Wood Filler
  - b. Or equal
9. Galvanized Metal Primer:
  - a. Sherwin-Williams - S-W Galvanized Iron Primer
  - b. Or equal
10. Galvanized Metal Finish Coat:
  - a. Sherwin-Williams - Pro-Mar Alkyd Semi-Gloss Enamel
  - b. Or equal

C. Finish color as Scheduled or selected by Owner

## PART THREE – EXECUTION

## 3.01 INSPECTION

- A. Prior to all work of this section, carefully inspect the installed work of all other trades and verify that all such work is complete to the point where this installation may properly commence.
- B. Verify that paint finishes may be applied in strict accordance with all pertinent codes and regulations and the requirements of these specifications is complete to the point where this installation may properly commence.
- C. Prior to installation of work of this Section, inspect spaces to verify that spaces are ready for commencing painting.
- D. In the event of discrepancy, immediately notify the Architect. Do not proceed with installation in areas of discrepancy until all such discrepancies have been fully resolved.
- E. If inspection reveals deficiencies in work areas such that painting cannot be successfully completed, for not proceed with work of this Section in area of deficiency until resolved.
- F. Starting painting work will be construed as acceptance of surfaces and conditions within any particular area.

## 3.02 PREPARATION OF SURFACES, GENERAL

- A. Protection: Prior to all surface preparation and painting operations, completely mask, remove, or otherwise adequately protect all hardware, accessories, machined surfaces, nameplates, U.L. labels lighting fixtures, and similar items in contact with painted surfaces but not scheduled to receive paint.
- B. Smoothing: Unless specifically noted to be left rough, smooth all finished wood surfaces exposed to view, using the proper sandpaper.
- C. Dryness: Unless specifically approved by the Architect, do not proceed with the painting of wood surfaces until the moisture content of the wood is 12% or less.
- D. Surfaces to be painted shall be clean and free of loose dirt. Clean and dust surfaces before painting or finishing.
- E. Do no exterior painting while surface is damp, unless recommended by Manufacturer, nor during rainy or frosty weather. Interior surfaces shall be dry before painting.
- F. Apply barrier coats over incompatible primers.

GENERAL PAINTING AND FINISHING REQUIREMENTS

- G. Remove hardware, electrical device covers, lighting fixtures, and similar in place work or provide surface applied protection prior to surface preparation and painting. After completion of painting, reinstall any removed work.
- H. Fill holes and cracks in surfaces to receive paint or stain.

**3.03 PREPARATION OF METAL SURFACES****A. Galvanized Metal:**

1. Clean all surfaces thoroughly with solvent until they are completely free from dirt, oil, and grease.
2. Thoroughly treat the cleaned surface with phosphoric acid etch.
3. Remove all excess etching solution and allow to dry completely before application of paint.

**B. Other Metals:**

1. Thoroughly clean all surfaces until they are completely free from rust, dirt, oil, and grease.
2. Allow to dry thoroughly before application of paint.

**3.04 PREPARATION OF GYPSUM DRYWALL**

- A. Remove dirt, dust, and other foreign matter. Smooth all apparent deposits of spackling compound, taking care not to damage the paper cover of the gypsum drywall.

**3.05 PREPARATION OF WOOD SURFACES**

- A. Cleaning: Clean all wood surfaces until they are free from dirt, oil, and all other foreign substance.

**B. Knots:**

1. On small, dry, seasoned knots, thoroughly scrape and clean the surface and apply one coat of good quality knot-sealer before application of the priming coat.
2. On large, open, unseasoned knots, scrape off all pitch and thoroughly clean the area, followed by an application of one coat of good quality knot-sealer.
3. Remove and treat all pitch surface as required for large knots.

- C. Dryness: Unless specifically approved by the Architect, do not proceed with the painting of wood surfaces until the moisture content of the wood is 12% or less.

**3.06 PREPARATION OF MASONRY SURFACES**

- A. Cleaning: Cleaning all masonry surfaces until they are free from dirt, oil, and all other foreign substances.

- B. Spot prime existing masonry as required for complete coating.

**3.07 PAINT APPLICATION****A. General:**

1. Paint all surfaces except glass, copper, bronze, chromium plate, nickel, stainless steel, anodized aluminum, or monel metal except as explicitly specified.
2. and similar items not finished and not called out for as unfinished.
3. Paint all grilles and other pre-finished items where the factory finish is not in accordance with the "Painting Schedule".
4. Carefully follow Specifications and color schedule, painting complete all surfaces to be painted.
5. Spread materials smoothly and evenly.

GENERAL PAINTING AND FINISHING REQUIREMENTS

6. Putty nail holes in wood after application of first finish coat using natural colored type to match wood finish. Bring putty flush with adjoining surfaces.
  7. Finished work shall be uniform, of approved color, smooth, and free from runs, sags, defective brushing, rolling, clogging, and excessive flooding.
  8. Read color schedule for rooms before priming walls. Tint priming coat and undercoat to approximate shade of final coat, but with enough difference so it is possible to check application of specified number of coats.
  9. Touch up suction spots after application of first coat.
  10. Use fine sandpaper between coats as necessary to produce even, smooth surfaces.
  11. Paint shall be thoroughly dry and surfaces clean before applying succeeding coats.
  12. Make edges of paint adjoining other materials or colors clean, sharp, and without overlapping.
  13. All painting of mechanical piping shall be by the Mechanical Prime Contractor.
- B. Drying:
1. Allow sufficient drying time between coats.
  2. Modify the periods as recommended by the material manufacturer to suit adverse weather conditions.
  3. Oil-base and oleo-resinous solvent-type paints shall be considered dry for recoating when the paint feels firm, does not deform or feel sticky under moderate pressure of the thumb, and the application of another coat of paint does not cause lifting or loss of adhesion of the undercoat.
- C. Environmental Conditions:
1. Comply with the Manufacturers recommendations as to environmental conditions under which the coating systems may be applied.
  2. Do not apply paint in areas where dust is being generated.
- D. Moisture Content:
1. Use a moisture meter approved by the Architect to test surfaces.
  2. Do not apply the initial coating until moisture meter reading is within limits recommended by the paint materials manufacturer.
- E. Defects: Sand and dust between coats to remove all defects visible to the unaided eye from a distance of five feet.
- F. Color of undercoats: Slightly vary the color of succeeding coats.
- 3.08 INSPECTION
- A. General: Do not apply additional coat until completed coat has been inspected and approved by the Architect.
- B. Number of coats: Only inspected and approved coats of paint will be considered in determining the number of coats applied.
- 3.09 ADJUSTMENT
- A. At completion of Project, touch up work to match specified finish. Repaint are damaged during construction with specified finish at no additional cost to Owner.
- 3.09 CLEANING UP
- A. General:
1. During progress of the work, do not allow the accumulation of empty containers or other excess items except in areas specifically set aside for that purpose.

GENERAL PAINTING AND FINISHING REQUIREMENTS

2. Remove all oily rags and waste from building each night. Take every precaution to avoid danger of fire.
  3. Prevent accidental spilling of paint materials and, in event of such spill, immediately remove all spilled material and the waste or other equipment used to clean up the spill, and wash the surfaces to their original undamaged condition, all at no additional cost to the Owner.
- B. Prior to final inspection: Upon completion of this portion of the work, visually inspect all surfaces and remove all paint and traces of paint from surfaces not scheduled to be painted.
- C. Upon completion of work of this Section, remove paint spots from floors, walls, glass, or other surfaces and leave work clean, orderly, and in acceptable condition. Remove debris caused by work of this Section from premises.

END OF SECTION 099010

GENERAL PAINTING AND FINISHING REQUIREMENTS

Blank Page

PLASTIC LAMINATE CASEWORK AND COUNTERTOPS

## PART 1 – GENERAL

## 1.01 SECTION INCLUDES

- A. Cabinets and counter tops.
- B. Casework hardware.

## 1.02 REFERENCES

- A. Countertop Standard: ANSI A161.2
- B. Catalog Standards: Manufacturer's catalog numbers may be shown on drawings or in equipment schedule for convenience in identifying certain cabinet work. Unless modified by notation on drawings or otherwise specified, catalog description for indicated number constitutes requirements for each such cabinet.

## 1.03 SUBMITTALS

- A. Submit under provisions of Section 01 32 00.
- B. Shop Drawings: Indicate casework locations, large scale plans, elevations, rough-in and anchor placement dimensions and tolerances, clearances required.
- C. Product Data: Provide component dimensions, configurations, construction details and joint details.
- D. Samples: Submit two samples, minimum size 3 x 6 inches (75 x 150 mm) of each color of finish.

## 1.04 QUALITY ASSURANCE

- A. Perform Work in accordance with ANSI 161.1.

## 1.05 QUALIFICATIONS

- A. Manufacturer: Company specializing in manufacturing the Products specified in this section with minimum three years documented experience.

## 1.06 FIELD MEASUREMENTS

- A. Verify that field measurements are as indicated on shop drawings.

## PART 2 – PRODUCTS

## 2.01 MANUFACTURERS

- A. Stevens Cabinet Company, Inc. Product Architectural Designer Series.
- B. L.S.I. Corp. of America, Inc.
- C. Trimline Product.
- D. Custom fabricated per enclosed specifications.
- E. Or approved equal

## 2.02 BASIC MATERIALS

- A. Particleboard: ANSI A208.1 mat. formed particleboard, Grade 1-M- with minimum density of 40 lbs. per cu. ft., internal bond of 60 psi; and minimum screw holding capacity of 225 lbs. on faces and 200 lbs. on edges.
- B. Plastic Laminate: NEMA LD-3, of thickness, type and grade designation indicated; in colors or patterns and finishes indicated or, if not indicated, as selected by Architect from manufacturer's standard range.
- C. Exposed Surfacing Material of Doors, Drawer Fronts, Fixed Panels, Toeboards and Ends: High pressure decorative laminate, 0.028" thick, General Purpose Type (GP-28).

PLASTIC LAMINATE CASEWORK AND COUNTERTOPS

- D. Semi-Exposed Surfacing Material and Doors: High pressure plastic laminate, 0.020" thick, Cabinet Liner Type (CL-20), in color or pattern and finish matching interior of cabinets, unless otherwise indicated.
- E. Remaining Semi-Exposed Materials: Decorative boards, General Purpose type, conforming to NEMA LQ-1 with decorative faces in patterns or colors and finish indicated or, if not indicated, as selected by Architect from manufacturer's standard range.
- F. Concealed Materials: Any sound dry solid lumber, plywood or particleboard or combination thereof; without defects affecting strength, utility or stability. On concealed surfaces of portions constructed of decorative boards, provide decorative or cabinet liner laminate backing (Light-Duty Type).
- G. Core Material for Plastic Laminates: Industrial Grade Particleboard conforming to ANSI A20B.1, Grade 1-M-2.
- H. Treatment of Exposed and Semi-Exposed Edges: Edges of doors and drawer fronts shall have GP-28 plastic laminate to match fronts.
- I. Cabinet Construction
  - 1. Sides, dividers, tops, bottoms, shelves and stretchers: Not less than 1/2" thick. Provide stretchers at top of base cabinet.
  - 2. Backs: Not less than 3/8" thick for unexposed backs. Exposed backs are to be 3/4" thick panels of balanced construction tenoned into cabinet ends.
  - 3. Drawers
    - a. Sides, subfronts and backs: not less than 1/2" thick.
    - b. bottoms: not less than 1/4" thick particleboard or provide solid wood sides and back.
    - c. Provide box type construction with front, bottom and back rabbeted in sides.
    - d. All joints secured with glue and mechanical fasteners.
    - e. All drawers must be suspended on extension drawer slides.
  - 4. Joinery
    - a. Rabbet backs flush into end panels and secure with concealed mechanical fasteners.
    - b. Connect wall cabinet tops and bottoms and base cabinet bottoms and stretchers to ends and dividers by means of mechanical fasteners.
    - c. Rabbet tops, bottom and backs into end panels or cabinetry corner joints to incorporate fluted dowel pin construction.
  - 5. Subbase: Not less than 3/4" thick, of height and relationship to cabinet fronts and exposed ends as indicated. Rubber base furnished and applied continuously per Section 09650.
  - 6. Toe Board: Not less than 3/4" thick, attached to subbase with concealed fasteners.

**2.03 COUNTERTOPS**

- A. Exposed Surfacing Material: High pressure plastic laminate, 0.050" thick, General Purpose Type (GP-50); except 0.042" thick, Postforming Type (PF-42), where postformed countertop configuration is indicated.
- B. Substrate (Core) for Exposed Surfacing Material: Particleboard.
- C. Countertop Configuration: Provide self-edge countertops with continuous 4" backsplash.
- D. Countertop Thickness: As indicated or, if not indicated, not less than 1-1/4" thick, and unless otherwise indicated, with substrate (core) not less than 3/4" thick.

PLASTIC LAMINATE CASEWORK AND COUNTERTOPS**2.04 CABINET AND CASEWORK HARDWARE AND ACCESSORIES**

- A. General: Provide manufacturer's standard hardware and accessory units of type, size and finish indicated, complying with ANSI A156.9 or, if not indicated, as selected by Architect from manufacturer's standard range.
- B. Hinge: Institutional type, 5 knuckle with 270 degree swing. Provide one pair for doors less than 4 ft. high and 1-1/2 pair for doors over 4 ft.
- C. Pulls: Selected from manufacturer's standard. Provide 2 pulls for drawers over 24" wide.
- D. Door Catches: Nylon roller spring catch or dual self-aligning permanent magnet type. Provide 2 catches on doors over 4 ft. high.
- E. Drawer Slides: Steel slides with ballbearing nylon rollers. 100# rating. File drawers shall have full extension drawer slides for full access to drawer.
- F. Drawer and Cupboard Locks: Half-mortise type, 5-disc tumbler and dead bolt, round cylinder only exposed, die cast with plated finish.
  - 1. Key each cabinet in room alike.
  - 2. Key each room differently.
  - 3. Provide one master key.
  - 4. Provide two keys each.
- G. Sliding Door Hardware Sets: Manufacturer's standard to suit type and size of sliding door units.
- H. Shelf Support Clips: One-piece molded nylon.
- I. Sinks and Faucets: As specified in Division 22.
- J. Finish: Unless otherwise indicated, provide hardware units with manufacturer's standard, satin finish.

**2.05 FABRICATION**

- A. Shop assemble casework for delivery to site in unit easily handled and to permit passage through building openings.
- B. Fabricate corners and joints without gaps or inaccessible spaces or areas where dirt or moisture could accumulate.
- C. Fabricate each unit rigid, not dependent on building structure adjacent units for rigidity.
- D. Apply laminate backing sheet to reverse side of plastic laminate finished surfaces.
- E. Form edges smooth. Form material for counter tops, facing, shelves, and linings from continuous sheets.
- F. Provide cutouts for plumbing fixtures, appliances, fixtures and fittings. Prime paint contact surfaces of cut edges.
- G. When necessary to cut and fit on site, provide materials with ample allowance for cutting. Provide trim for scribing and site cutting.

**2.06 FINISHES**

- A. Exposed To View Surfaces: Plastic Laminate of color and pattern as selected.
- B. Interior Surfaces: Plastic Laminate of color and pattern as selected.

12 32 16  
PLASTIC LAMINATE CASEWORK AND COUNTERTOPS

PART 3 – EXECUTION

3.01 EXAMINATION

- A. Verify existing conditions.
- B. Verify adequacy of support framing.

3.02 INSTALLATION

- A. Install casework, components and accessories in accordance with manufacturer's instruction.
- B. Use anchoring devices to suit conditions and substrate materials encountered.
- C. Set casework items plumb and square, securely anchored to building structure.
- D. Carefully scribe casework abutting other components, with maximum gaps of 1/32 inch (1 mm). Use filler strips not additional overlay trim for this purpose.
- E. Close ends of units, back splashes, shelves and bases.
- F. Sequence installation to ensure utility connections are achieved in an orderly and expeditious manner.

3.03 ADJUSTING

- A. Adjust work under provisions of Section 01 77 00.
- B. Adjust doors, drawers, hardware, fixtures, and other moving or operating parts to function smoothly.

3.04 CLEANING

- A. Clean work under provisions of 01 77 00.
- B. Clean casework, counters, shelves and hardware.

3.05 PROTECTION OF FINISHED WORK

- A. Protect finished Work under provisions of Section 01 77 00.
- B. Do not permit finished casework to be exposed to continued construction activity.

3.06 SCHEDULES

- A. See Plans and Details.

END OF SECTION 12 32 16

12 36 61  
QUARTZ COUNTER TOPS

PART 1 – GENERAL

1.01 SUMMARY

A. Section Includes: Quartz surfacing for:

1. Countertops.
2. Other interior applications as shown on Drawings.

B. Related Sections:

1. Section 06 20 00 – Finish Carpentry: Provide framing and blocking to support quartz surfacing within specified tolerances and in accordance with manufacturer's instructions.
2. Section 07 92 00 - Joint Sealers: Sealers between quartz surfacing and work of other Sections
3. Templates showing cutouts required for installation of items installed on or penetrating through quartz surfacing shall be provided under Sections where items are specified.

1.02 REFERENCES

A. ASTM International:

1. ASTM C97 – Absorption and Bulk Specific Gravity of Dimension Stone.
2. ASTM C99 – Modulus of Rupture of Dimension Stone.
3. ASTM C170 – Compressive Strength of Dimension Stone.
4. ASTM C217 – Weather Resistance of Slate.
5. ASTM C482 – Bond Strength of Ceramic Tile to Portland Cement.
6. ASTM C484 – Thermal Shock Resistance of Glazed Ceramic Tile.
7. ASTM C501 – Relative Resistance to Wear of Unglazed Ceramic Tile by the Taber Abraser.
8. ASTM C531 – Linear Shrinkage and Coefficient of Thermal Expansion of Chemical-Resistant Mortars, Grouts, Monolithic Surfacing, and Polymer Concretes.
9. ASTM C880 – Flexural Strength of Dimension Stone.
10. ASTM C1028 – Static Coefficient of Friction of Ceramic Tile and Other Like Surfaces by the Horizontal Dynamometer Pull-Meter Method.
11. ASTM D256 – Izod Pendulum Impact Resistance of Plastics.
12. ASTM D2047 – Static Coefficient of Friction of Polish-Coated Floor Surfaces by the James Machine.
13. ASTM D2299 – Relative Stain Resistance of Plastics.
14. ASTM E84 – Surface Burning Characteristics of Building Materials.

B. International Organization for Standardization:

1. ISO 9002 – Quality systems -- Model for Quality Assurance in Production, Installation and Servicing.
2. ISO 14001 – Environmental Management Systems
3. NSF

12 36 61  
QUARTZ COUNTER TOPS

1.03 SUBMITTALS

A. Product Data:

1. Quartz Surfacing: Submit manufacturer's product data, and fabrication and installation instructions.
2. Accessories: Submit manufacturer's product data and installation instructions.

B. Shop Drawings: Show field-verified dimensions, quartz surfacing dimensions, locations and dimensions of cutouts, required locations of support and blocking members, edge profiles, and installation details and methods. Identify color[s] and finish[es].

C. Samples:

1. Samples for Color Selection: Submit two sets of manufacturer's standard colors and finishes.
2. Samples for Color Approval: Submit two samples 10 x 10 inches (250 x 250 mm) of each color and finish selected.
3. Stone Adhesive: Submit two samples of an adhesive joint for each color quartz surfacing selected. Show color match of adhesive.

D. Fabricator Qualifications: Submit evidence of fabricator's qualifications.

E. Closeout Submittals: Submit completed warranty form.

1.04 DELIVERY, STORAGE, AND HANDLING

- A. Packaging, Shipping, Handling, and Unloading: Observe manufacturer's recommendations and handle in manner to prevent breakage or damage. Brace parts if necessary. Transport in the near-vertical position with finished face toward finished face. Do not allow finished surfaces to rub during shipping or handling.
- B. Storage and Protection: Store in racks in near-vertical position. Prevent warpage and breakage. Store inside away from direct exposure to sun. Store between 25 and 130 °F (-4 and 54 °C). Store with finished face toward finished face.

1.05 WARRANTY

- A. Provide a manufacturer's ten-year limited warranty against product defects when installed by a certified fabricator.

PART 2 – PRODUCT

2.01 MANUFACTURERS

- A. Qualifications: Manufacturer shall be ISO 9002 and ISO 14001 certified.
- B. Acceptable Manufacturer: Provide CaesarStone Quartz Surfacing distributed by U.S. Quartz Products Inc (CaesarStone U.S.A., Inc.); Van Nuys, CA; phone 877-9-QUARTZ; [www.caesarstoneus.com](http://www.caesarstoneus.com).
- C. Substitutions: Zodiac manufactured by DuPont may be substituted.
- D. All others must submit for approval seven (7) working days prior to Bid.

2.02 QUARTZ SURFACING

- A. Composition: 93 percent crushed quartz aggregate combined with resins and pigments and fabricated into slabs using a vacuum vibro-compaction process. Material can be fabricated in larger sized pieces due to its superior flexural strength compared to natural stone. This may reduce the number of joints in an installation and permit more economical and better looking jobs. It may also allow the use of thinner material, producing additional economies and weight reductions.

12 36 61  
QUARTZ COUNTER TOPS

B. Dimensions:

1. Thickness: Nominal 1-1/4 inches (30 mm) As shown on Drawings.
2. Size: Slabs shall be not less than 56.5 x 120 inches (1.44 x 3.05 m) to minimize number of joints in installation. The back of each slab shall be imprinted with a trademarked zigzag pattern to simplify jobsite identification.

C. Identification: Material shall be labeled with batch number and imprinted on back with manufacturer's identifying mark.

D. Performance:

1. Flexural Strength: 7,420 psi, ASTM C880.
2. Compressive Strength: ASTM C-170
  - a. Dry: 10,430 psi average.
  - b. Wet: 11,265 psi average.
3. Izod Impact Strength: 0.361ft. lbs./inch of notch average; ASTM D256.
4. Bond Strength: 205 psi; ASTM C482 modified.
5. Modulus of Rupture: 2,110 average, ASTM C99.
6. Mohs Hardness: 6.5-7.5; scratch test.
7. Absorption: 0.022%; ASTM C97.
8. Stain and Acid Resistance: Not affected; ASTM D2299.
9. Surface Burning Characteristics: Flame spread = 10, smoke density = 195; ASTM E84.
10. Thermal Shock Resistance: Passes 5 cycles, 75°F-295°F; ASTM C484.
11. Coefficient of Thermal Expansion: 1.36x10 inch per °F.; ASTM C531.
12. Weathering Resistance: Not affected after seven days in 1% sulfuric acid; ASTM C217.
13. Freeze-Thaw Resistance: No visible damage or discoloration after 25 cycles (-45°C to 23°C); S.L.P. with ASTM C62 as guide.
14. Wear Resistance: 36.12 gram average; ASTM C501, tested with 1 kg. load, 1000 cycles at 70 r.p.m. The static coefficient of friction, below, is important for traffic-bearing surfaces and can be deleted when specifying other applications.
15. Static Coefficient of Friction:
  - a. Polished Finish: 0.68 average by ASTM D2047, James Machine; 0.87 average (dry) and 0.54 average (wet) by ASTM C1028, Dynamometer Pull Method.
  - b. Honed Finish: 0.69 average by ASTM D2047, James Machine; 0.73 average (dry) and 0.68 average (wet) by ASTM C1028, Dynamometer Pull Method.

E. Color and Finish:

1. Provide color and finish selected by Architect from manufacturer's stocked standards. Allow for selection of up to two colors.
2. Provide custom color and finish to match sample in Architect's office. All standard colors are available with polished finish. See color charts or samples for availability of honed finish.
  - a. Polished Surface shall have gloss greater than or equal to 35% at 50°.
  - b. Honed Surface shall have a matte finish.

12 36 61  
QUARTZ COUNTER TOPS

F. Exposed Edges and Corners:

1. Countertops:
  - a. Edges: Beveled

2.03 ACCESSORIES

A. Mounting Adhesives:

1. Provide structural-grade silicone or epoxy adhesives of type recommended by manufacturer for application and conditions of use.
2. Acceptable Silicone Manufactures:
  - a. Dow Corning.
  - b. GE Sealants and Adhesives.
3. Acceptable Epoxy Manufacturers:
  - a. Akemi North America.
  - b. Bonstone Material Corporation.
  - c. Tenax USA.
4. Provide spacers, if required, of type recommended by adhesive manufacturer.

B. Stone Adhesive:

1. Provide epoxy or polyester adhesive of type recommend by manufacturer for application and conditions of use.
2. Acceptable Manufacturers:
  - a. Akemi North America.
  - b. Bonstone Material Corporation.
  - c. Tenax USA.
3. Color: Adhesive which will be visible in finished work shall be tinted to match quartz surfacing. In most countertop and interior cladding applications, CaesarStone can be installed with structural adhesive. Where required, however, CaesarStone can also be set in grout or installed with ties, clips, or other types of hardware recommended for thin stone veneers. Edit below and coordinate Section as required.
4. Clear silicone sealant of type recommended by manufacturer for application and conditions of use.
5. Provide anti-bacterial type in food preparation areas,
6. Acceptable Manufactures:
  - a. Dow Corning.
  - b. GE Sealants and Adhesives.

E. Solvent: Product recommended by adhesive manufacturer to clean surface of quartz surfacing to assure adhesion of adhesives [and sealants].

F. Cleaning Agents: Non-abrasive, soft-scrub type kitchen cleansers.

2.04 FABRICATION

- A. Fabricator: Firm shall have five years experience fabricating architectural stone and shall have water-cooled cutting tools. Firm shall be authorized in writing by manufacturer.
- B. Shop Assembly: Observe proper safety procedures and comply with manufacturer's instructions.

12 36 61  
QUARTZ COUNTER TOPS

- C. Layout: Layout joints to minimize joints and to avoid L-shaped pieces of quartz surfacing.
- D. Inspect Material:
  - 1. Inspect material for defects prior to fabrication.
  - 2. Color Match: Materials throughout Project shall be from the same batch and shall bear labels with same batch number. Visually inspect materials to be used for adjacent pieces to assure acceptable color match. Inspect in lighting conditions similar to those on Project.
  - 3. Variation in distribution of aggregates in quartz surfacing which are within manufacturer's tolerances is not a defect.
- E. Tools: Cut and polish with water-cooled power tools.
- F. Cutouts:
  - 1. Cutouts shall have 3/8 inches (10 mm) minimum inside corner radius. Inside corners shall be reinforced in an acceptable manner to prevent cracking.
  - 2. Where edges of cutout will be exposed in finished work, polish edges.
  - 3. If the remaining material outside a cutout is less than three inches (76 mm) inches wide, reinforce area by laminating it with a strip of quartz surfacing.
- G. Laminations: Laminate layers of quartz surfacing as required to create built-up edges.

**PART 3 – EXECUTION**

**3.01 ACCEPTABLE INSTALLER**

- A. Installer: Firm shall have five years experience installing architectural stone.

**3.02 EXAMINATION**

- A. Site Verification:
  - 1. Verify dimensions by field measurements prior to fabrication.
  - 2. Verify that substrates supporting quartz surfaces are plumb, level, and flat to within 1/16 inch in ten feet (1.6 mm in 3000 mm) and that necessary supports and blocking are in place.
  - 3. Base Cabinets: Cabinet units shall be securely fixed to adjoining units and back wall.
- B. Inspect finished surfaces for damage. Do not install until damage materials have been repaired in an acceptable manner or replaced.

**3.03 PREPARATION**

- A. Protect finished surfaces against scratches. Apply masking where necessary. Guard against grit, dust, and other trades.

**3.04 INSTALLATION**

- A. Install materials in accordance to manufacturer's recommendations. Lift and place to avoid breakage.
- B. Preliminary Installation and Adjustment: Position materials to verify that materials are correctly sized and prepared. Make necessary adjustments.
  - 1. If jobsite cutting, grinding, or polishing is required, use water-cooled tools. Protect jobsite and surfaces against dust and water. Perform work away from installation site if possible.
  - 2. Countertops: Gypsum drywall back walls which are not fire or acoustically rated may be routed up to half the thickness of the drywall to allow countertop to fit.

12 36 61  
QUARTZ COUNTER TOPS

3. Allow gaps for expansion of not less than 1/16 inch (1.5 mm) per five feet when installed between walls or other fixed conditions.
  4. Drainage: Adjacent to sinks and where drainage is required, shim countertops slightly to insure positive drainage.
- C. Permanent Installation:
1. After verifying fit, remove quartz surfacing from position, clean substrates of dust and contamination, and clean quartz surfacing back side and joints with solvent.
  2. Apply sufficient quantity of mounting adhesive in accordance with adhesive manufacturer's recommendations to provide permanent, secure installation.
- D. Joints:
1. Joints Between Adjacent Pieces of Quartz Surfacing:
    - a. Joints shall be flush, tight fitting, level, and neat.
    - b. Securely join with stone adhesive. Fill joints level with quartz surfacing.
    - c. Clamp or brace quartz surfacing in position until adhesive sets.
- 3.05 REPAIR
- A. Repair or replace damaged materials in a satisfactory manner.
- 3.06 CLEANING
- A. Remove masking and excess adhesives and sealants. Clean exposed surfaces.
- 3.07 PROTECTION
- A. Protect surfacing from damage by other Sections.

END OF SECTION 12 36 61

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

PART 1 - GENERAL

1.01 SUMMARY

- A. Section includes, but is not limited to, following basic provisions, materials, and methods common to various plumbing work, to complement other Division 22 Sections and govern respective Division 22 work, where applicable, the same as if repeated in respective Sections:
  - 1. Quality Assurance requirements.
  - 2. Equipment Selection requirements.
  - 3. Delivery, Storage, and Handling requirements.
  - 4. Sequencing and Scheduling requirements.
  - 5. Method of listing and referencing Acceptable Manufacturers.
  - 6. No shrink grout for equipment installations.
  - 7. Rough-In and Installation requirements common to equipment and systems.
  - 8. Field-fabrication of metal and wood equipment supports.
  - 9. Cutting and patching requirements.
  - 10. Fire stopping coordination requirements (Complement to Division 07) and/or NFPA.
- B. Other basic mechanical materials and methods which complement this Section and govern respective Division 22 work are specified in respective complementary Sections immediately following this Section and in Sections designated "General". Refer to Project Manual "Table of Contents" for respective Section numbers and titles.
- C. Particular products and systems are specified in respective Sections. Refer to Project Manual "Table of Contents" for respective Section numbers and titles.

1.02 DEFINITIONS

- A. Concealed Exterior Installations: Concealed from view and protected from weather conditions and physical contact by building occupants, but subject to outdoor ambient temperatures. Examples include installations within unheated shelters.
- B. Concealed Interior Installations: Concealed from view and protected from physical contact by building occupants. Examples include above ceilings and in duct shafts.
- C. Exposed Exterior Installations: Exposed to view outdoors and subject to outdoor ambient temperatures and weather conditions. Examples include rooftop locations, outdoors on grade, attached to exterior building walls etc.
- D. Exposed Interior Installations: Exposed to view indoors. Examples include finished occupied spaces and mechanical equipment rooms.
- E. Finished Spaces: Spaces other than mechanical and electrical equipment rooms, furred spaces, pipe and duct shafts, unheated spaces immediately below the roof, spaces above ceilings, unexcavated spaces, crawl spaces, and tunnels.
- F. Installer: Respective tradesperson or subcontractor responsible for respective work.
- G. Supplier: Respective manufacturer or his authorized distributor or representative.

1.03 SUBMITTALS, GENERAL

- A. Submit prescribed submittal items for materials and products to be installed on this Project, when requested and as called for in respective Section or on Drawings and when space or sequencing coordination is required.

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

1.04 QUALITY ASSURANCE, GENERAL

- A. Quality assurance requirements for mechanical work are included in "Quality Assurance, Basic Provisions" and complimented for particular work in respective product and system Sections.
- B. Prior to ordering and rough-in, coordinate mounting, fit, trim, etc., of respective furnished items with design and construction of adjoining equipment and construction. Take special care to coordinate design of trim, flanges, attachments, etc., with related construction.

1.05 EQUIPMENT SELECTION AND SUITABILITY

- A. Following provisions complement requirements of respective Sections in Division 1 which govern material and equipment selection.
- B. Product Substitutions: Governed by "Substitutions" in "Instructions to Bidders". Burden of proof of equality of products is on the Contractor.
- C. Drawings indicate capacities, sizes, and dimensional requirements of system components. Equipment, specialties, and accessories are based on specific types, manufacturers, and models indicated. Components having equal performance characteristics that deviate from indicated size and dimensions may be considered provided deviations do not change the design concept or intended performance as judged by A/E/D.
- D. Mention of a specific product, by name or model number, in Contract Documents does not negate requirements for that particular product to meet physical and performance criteria set forth in the Contract Documents.
  - 1. References to specific products are to establish general design and a level of quality.
  - 2. Furnished products shall possess all required features and be coordinated with conditions affecting the work.
  - 3. Actual rough-in and connection requirements and locations for referenced items may not be the same as the typical arrangements represented on Drawings. Equipment rough-in and connections are subject to manufacturer's standards for items furnished. Piping, conduit, wiring, etc., shall be coordinated with furnished products and installed accordingly, without added cost to Owner.
- D. Equipment of greater or larger power, dimensions, capacities, and ratings may be furnished provided such proposed equipment is approved in writing and connecting mechanical and electrical facilities (services, circuit breakers, conduit, motors, bases, equipment spaces, etc.) are increased. No additional costs will be approved for these increases, if larger equipment is approved. If equipment minimum energy ratings or efficiencies are specified, furnished equipment must meet specified design requirements and commissioning requirements.

1.06 DELIVERY, STORAGE, AND HANDLING, GENERAL

- A. Deliver products to site and properly store and protect under applicable provisions of Division One, requirements herein, and requirements in respective product and system Sections.
  - 1. Properly identify products on outside of container with names, model numbers, types, grades, compliance labels, and other information needed for identification. Include project name, drawing reference designation, room number, etc. to aid distribution at job site.
- B. Schedule deliveries, coordinated with construction progress, so that materials will be available when needed. When possible, schedule deliveries of large equipment items for a time when respective items can be moved directly into installation location from delivery vehicle, thereby avoiding storage on site.
- C. Handle products, components, and accessories carefully to prevent damage. Comply with respective manufacturer's rigging and installation instructions for unloading and moving products. Do not install damaged items; replace with new.

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

- D. Store products in original container, protective wrap, etc. and protect from weather and construction work traffic. Where possible, store indoors; when necessary to store outdoors, store above grade and enclose with weatherproof wrapping.

1.07 SEQUENCING AND SCHEDULING, GENERAL

- A. Coordinate installation of mechanical equipment, materials, and systems with other building components and construction progress.
- B. Arrange for chases, slots, and openings in building structure during progress of construction, to allow for mechanical installations.
- C. Coordinate respective installation provisions, as applicable:
  - 1. Sleeves and inserts in poured-in-place concrete, etc.
  - 2. Layout of supports and roof penetrations for roof mounted work.
  - 3. Size and location of concrete equipment bases.
  - 4. Rough-in of piping and electrical provisions for equipment.
- E. Sequence, coordinate, and integrate installation of mechanical materials and equipment for efficient flow of the Work. Coordinate installation of large equipment requiring positioning prior to closing in the building.
- F. Coordinate connection of mechanical systems with exterior utilities and services. Comply with requirements of governing regulations, franchised service companies, and controlling agencies.

PART 2 – PRODUCTS

2.01 MANUFACTURERS, GENERAL

- A. Subject to compliance and requirements, manufacturers offering products that may be incorporated in the work including but not limited to manufacturers included in respective Contract Documents in one of the following forms:
  - 1. Named (Referenced) Products: Where proprietary names, names of particular manufacturers or vendors and catalog/model numbers, etc. are referenced in Specifications, on Drawings, etc.; specific item referenced shall be understood as establishing general type, function, approximate dimensions, appearance, and quality desired. Products furnished shall be configured and equipped, with alterations when and as required, to provide all features and functions specified or shown and to conform to all conditions effecting incorporation of the product into the work.
    - a. Actual manufacturer's ordering numbers denoting configuration, features, capacities, etc. specified or required shall be determined by Contractor and supplier, through comparison of respective manufacturer's specifications and options with Project Specifications and Drawings (schedules, notes, details, etc.), job conditions, and applicable codes and regulations.
  - 2. Listed (Acceptable) Manufacturers: Manufacturers listed as "acceptable" in specifications are believed to have the ability to manufacture products which are equivalent to the product described and referenced (named) in respective Specifications or on Drawings. Contractor has the option to furnish products that are manufactured by one of the listed acceptable manufactures provided that products furnished comply with respective product specifications and are suitable for the application and intent of design.
- B. Subject to compliance with requirements, manufacturers not referenced or listed in Specifications or on Drawings who offer products equivalent to referenced products may be acceptable if proposed substitution is requested ten (10) working days prior to bidding and approved in compliance with provisions of "Substitutions" in "Instructions to Bidders".

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

2.02 GROUT

- A. Non-shrink, Non-metallic Grout: ASTM C 1107, Grade B.
- B. Characteristics: Post-hardening, volume adjusting, dry, hydraulic -cement grout, non-staining, non-corrosive, non-gaseous, and recommended for interior and exterior applications, design mix to be 5000 PSI, 28-day compressive strength with premixed factory packaged.

2.03 PLUMBING VENT FLASHING

- A. Vent flashing shall be fabricated from four (4) lb. lead sheet.
- B. Pre-formed rubber boot flashing

2.04 THERMOSTATIC MIXING VALVES (TMV)

- A. Provide in location shown or required on each water system.
  - 1. TMV must have integral check valves, stop valves, strainer and adjustable temperature settings, 2" diameter thermometer in discharge line and same size as service line valved by pass all mounted inside a surface mounted cabinet as manufactured by Lawler series 800.

2.05 REDUCED PRESSURE BACKFLOW PREVENTER (BFP)

- A. Provide as required by the serving utility and or code on the main building service and at any point of water connection to mechanical or other equipment.
  - 1. BFP is to be bronze construction with stainless steel internal parts, bronze strainer, shut-off isolation valves, test cocks, and pressure differential relief valve located between two positive seating check valves as manufactured by Watts series 909 with USC approval for cross connection control.
  - 2. Install BFP with unions for easy removal all over a stainless steel drain pan with a ¾" line to a floor drain.

2.06 WALL HYDRANTS

- A. Provide where shown on the drawings
  - 1. Recessed box with locking bronze chrome plated cover
  - 2. Hose connection, vacuum breaker and "T" handle operator
  - 3. Acceptable Manufacturers: Smith 5509 or equal by Wade or Woodford.
    - a. Cast iron body with flashing clamp
    - b. Cast iron strainer hinged with sediment bucket
    - c. Acceptable Manufacturers: JR Smith 2415 with 4595 P-trap and 4103 cleanout or approved equal by Wade, Watts or Zurn or as specified on drawings.

PART 3 – EXECUTION

3.01 CORRELATION OF WORK WITH DRAWING AND SPECIFICATION DISPARITY

- A. If specifications for a particular product, process, material, or installation differ from representations on Drawings, respective product, material, or process utilized shall comply with the more comprehensive quality and quantity requirements and the more restrictive limits, unless directed otherwise by A/E/D.
  - 1. Verify governing requirements for respective installation with A/E/D prior to ordering respective product or performing respective work.
- B. Work which meets the less comprehensive requirements or the less restrictive limits may be provided for an installation if both of the following two (2) conditions are met:

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

1. A/E/D shall have determined that the more comprehensive requirements or the more restrictive limits are not required for the particular installation and confirmed the determination in writing.
2. Contractor shall give Owner a credit for the cost difference, if any, between the subject variant material or method requirements; credited by change order or other acceptable means.

3.02 EXAMINATION, GENERAL

- A. Examine areas and conditions under which work is to be installed. Do not proceed with work until unsatisfactory conditions have been corrected in a manner acceptable to Installer.

3.03 ROUGH-IN, GENERAL

- A. Verify required rough-in nature, size, and locations for actual equipment to be connected and coordinate field measurements. Respective rough-in provisions are specified in respective equipment and system Sections and indicated necessary on Drawings.

3.04 PLUMBING INSTALLATIONS, GENERAL

- A. All work must be adequately supported and secured in place and performed in a craftsman like manner adjudged by the A/E/D and by using acceptable approved hardware, hangers, carriers etc. designed and appropriate for the respective installation.
- B. Adjust all operating parts and packing nuts of valves, faucets, etc. to operate freely without any leakage and adjust all manual and automatic flush valves and faucets for correct operation.
- C. Adjust all pop up waste stops to close effectively and retain water in bowl and adjust all flow and temperature regulators to required flow rates and operating ranges.
- D. Sequence, coordinate, and integrate the various elements of mechanical systems, materials, and equipment.
  1. Coordinate mechanical systems, equipment, and materials installation with other building components. Verify all dimensions by field measurements.
  2. Arrange for chases, slots, and openings in other building components during progress of construction, to allow for mechanical installations. Coordinate penetrations with fire stopping work.
  3. Coordinate the installation of required supporting devices and sleeves to be set in poured-in-place concrete and other structural components, as they are constructed.
  4. Sequence, coordinate, and integrate delivery and installation of mechanical materials and equipment for efficient flow of the work. Give particular attention to large equipment requiring positioning prior to closing in the building.
- E. Work shall be performed by fully qualified respective trade craft-persons skilled in execution of the respective tasks; following industry standard practices, in compliance with applicable codes, regulations, specified methods and procedures, and respective manufacturer's instructions.
- F. All systems and equipment shall be installed complete and fully operable, unless specifically instructed otherwise for a particular system or item.
  1. Provide appropriate automatic control devices compatible with existing controls and systems, installed and arranged as required to operate and sequence respective equipment and systems to maintain intended conditions.
  2. Provide proper type and capacity safety and relief devices, installed where required, in compliance with applicable codes and regulations.

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

3. Provide appropriate interface devices (valves, unions, stops, arresters, vacuum breakers, traps, expansion and contraction devices etc., strainers) and fittings, installed at each piping termination (plumbing fixture, item of equipment, outlet, etc.).
  - G. Where mounting heights are not dimensioned or detailed, install systems, materials, and equipment to provide maximum possible headroom.
  - H. Install systems, materials, and equipment generally to conform to arrangements indicated by Contract Documents and approved submittal data, including coordination drawings, to greatest extent possible. Where coordination requirements conflict with individual system requirements, refer conflict to A/E/D.
    1. Install work level and plumb, parallel and perpendicular to other building systems and components where exposed in finished spaces, except where indicated otherwise. Give right-of-way priority to systems required to be installed at a specified slope.
  - I. In addition to conforming to these general provisions, install respective products and systems in compliance with provisions in respective Sections and on respective Drawings. Refer to Project Manual "Table of Contents" for respective Section numbers and titles.
  - J. Electrical Work provided as a Part of Mechanical Work: Comply with applicable requirements of Division 26.
  - K. Provide access panels or doors where concealed equipment, devices, etc., are not accessible through accessible ceiling or are not accessible by other appropriate acceptable access means.
  - L. Provide identification specified in Section "Mechanical Identification" Section 22 05 53.
- 3.05 EQUIPMENT POSITIONING AND CONNECTIONS, GENERAL
- A. Provide complete wiring and piping diagrams of each piece of equipment. Furnish diagrams to other trades involved, with all of manufacturer's requirements and recommendations included.
  - B. Where equipment piping details are not shown on Drawings, manufacturers' recommendations plus code requirements shall be considered to be minimum requirements.
  - C. Position and connect all equipment for convenient servicing. Extend grease fittings to an accessible location. Prior to final hook-up and demonstrate that there is room to remove and service all respective components (coils, burners, tube bundles, filters, pumps, motors, controls, etc.).
- 3.06 ERECTION OF METAL AND WOOD SUPPORTS AND ANCHORAGE
- A. Cut, fit, and place supports and anchorage accurately in location, alignment, and elevation; sized and arranged to adequately support and anchor respective mechanical materials and equipment. Attach to substrates as required to support applied loads. Make tight connections between members.
  - B. Metal Supports and Anchorage: Appropriate miscellaneous metal. Field welding shall comply with AWS D1.1.
  - C. Wood Supports and Anchorage: Grounds, nailers, blocking, anchorage, etc.
- 3.07 Select fastener size that will not penetrate through members where opposite side will be exposed to view or will receive finish materials. Install fasteners without splitting wood members.
- 3.08 CUTTING AND PATCHING, GENERAL
- A. Division 1 Section "Cutting and Patching" governs respective work.
  - B. Coordinate timing of mechanical work installation with related construction to eliminate the need for cutting and patching as much as possible.

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

- C. Cut, channel, chase, and drill floors, walls, partitions, ceilings, and other surfaces necessary for mechanical installations. Skilled mechanics of the trades involved shall perform cutting. Repair cut surfaces to match material and finish of adjacent surfaces.

**3.09 GROUTING**

- A. Install non-metallic, no shrink, grout for mechanical equipment base bearing surfaces, pump and other equipment base plates, and anchors. Mix grout according to manufacturer's printed instructions.
- B. Clean surfaces that will come into contact with grout and provide forms for placement of grout, as required.
- C. Avoid air entrapment when placing grout and place grout completely filling equipment bases.
- D. Place grout on concrete bases to provide a smooth bearing surface for equipment.
- E. Place grout around anchors and cure placed grout according to manufacturer's printed instructions.

**3.10 FIRESTOPPING**

- A. Fire stopping will be performed by Mechanical Contractor or Installer responsible for Division 7 Section "Fire Stopping". Refer to "Fire Stopping" Section, if used in this manual, for requirements for fire stopping through-penetrations in fire-resistance-rated construction, smoke barriers, etc.
- B. Cooperate with Fire Stopping Installer and coordinate mechanical installation work with fire stopping materials and work. Keep Fire Stopping Installer informed of mechanical installation progress so fire stopping preparation and work may be performed in a timely manner.
- C. Arrange mechanical installations so that respective fire stopping can be installed in compliance with governing requirements. Coordinate hole sizes, locations, arrangements, sleeves, etc. with respective mechanical items and fire stopping materials and methods.

**3.11 PLUMBING PIPE MATERIAL SCHEDULE**

Service	Material	Joint
Gravity waste inside above ground	Cast Iron (SV or NH)	Compression gasket
	PVC Schedule 40	Primed and solvent weld
Gravity sewer outside below ground	Cast Iron (SV or NH)	Compression gasket
	PVC Schedule 40	Primed and solvent weld
Domestic Water Supply above and below ground	Type "L" copper	Brazed
Roof drains and vents	PVC Schedule 40	Primed and solvent weld
Low pressure steam supply	Steel schedule 40	screwed or welded
Low pressure steam condensate	Steel schedule 80	Screwed or welded
Heating supply and return	Type "L" copper	soldered

22 05 00  
COMMON WORK RESULTS FOR PLUMBING

3.12 VALVE SCHEDULE

Service	Size	Type	Joint	Reference Product
Heating/Cooling and Domestic Water	0-2"	Ball Valve	Screwed or Soldered Flanged	Crane Series 9400 Notes 1,2 & 3
Heating/Cooling and Domestic Water	2½" – Up	Butterfly Valve	Flanged	Crane Series 2200 Notes 1,2 & 3
Low Pressure Steam and Condensate	0 – 2"	Gate Valve	Screwed or Flanged	Crane 430
Low Pressure Steam and Condensate	2½" - Up	Gate Valve	Flanged	Crane 461
High Pressure Steam and Condensate	0 – 2"	Globe Valve	Screwed or Flanged	Crane 1 Nibco 211
High Pressure Steam and Condensate	2 ½" – Up	Globe Valve	Flanged	Crane 351 Nibco 718

- Notes:1. Provide memory stop when used for balance purposes.  
2. Gate valve may be used on domestic cold water incoming service.  
3. No-lead silver solder is to be used on domestic water lines.

END OF SECTION 22 05 00

22 05 01  
GENERAL PLUMBING REQUIREMENTS

PART 1 – GENERAL

1.01 SCOPE

- A. This section is coordinated with and complementary to the 22 05 00 Common Work Results for Plumbing wherever applicable to plumbing work. Where items of the General Conditions or Supplementary General Conditions are repeated in this section of the Specifications, it is intended to call particular attention to or qualify them; it is not intended that any other parts of the General Conditions or Supplementary General Conditions shall be assumed to be omitted if not repeated herein.
- B. This section applies equally and specifically to all Trades supplying labor and/or equipment, and/or materials as required under the plumbing section of the specifications.
- C. It is the intention of these plans and specifications to call for finished work, completely tested and ready for the Owner's operation. The Contractor shall submit before bidding the project a detailed description of any problems to the Bid Documents for any reason whatsoever: i.e., materials or apparatus believed unsuitable or inadequate, violation of codes, ordinances, rules or regulations, items of work omitted, incorrect service locations or condition etc. The absence of such written notice shall indicate agreement that all cost of any such required changes have been anticipated and included in the Bid.

1.02 INTERFACE

- A. Refer to drawings and specifications for other Divisions of work to determine materials and conditions of other work where Division 22 work meets or connects to such other work. Coordinate respective Division 22 work with work of other Divisions.

1.03 DEFINITIONS

- A. The following list of words is defined to amplify their meaning whenever used on the Plumbing drawings, or in Division 22 of these specifications. Those definitions supersede any other definitions, given or inferred by the General Provisions, Supplementary Conditions or any (Webster) standard definitions for usage in Division 22 only:
  - 1. Furnish - to supply (only) to another party for their use or installation, with all cost of delivery to job site.
  - 2. Install - to unload, distribute, uncrate, assemble and fix into the intended final position, the installer to provide all miscellaneous hardware required to anchor and/or support securely, clean up and dispose of rubbish.
  - 3. Connect - to bring service(s) to point of installation and make all final connections of the service(s) to the installed equipment, and provide all miscellaneous auxiliary appurtenances necessary to make operable for its intended final use.
  - 4. Provide - to furnish, install and connect operating and complete.
  - 5. The "Contractor" means specifically the Contractor and/or Subcontractor working under his respective section of the specifications.
  - 6. "Piping" includes, in addition to pipe, all fittings, valves, hangers, insulation and other accessories relating to such piping.
  - 7. "Concealed" means hidden from sight in trenches, chases, furred spaces, shafts, hung ceiling, embedded in construction, or in crawl spaces.
  - 8. "Equal" means any equipment or material which, in the opinion of the Architect/ Engineer/ Designer, is equal in quality, durability, appearance, strength, design and performance to the equipment or material specified and will function adequately in accordance with the general design.

GENERAL PLUMBING REQUIREMENTS

9. The General, Mechanical (Plumbing and HVAC), Electrical and Temperature Control Contractor's are referred to herein and on the drawings as G.C., M.C., E.C. and T.C.C. respectively.

10. The Architect/Engineer/Designer shall be referred to as A/E/D.

**1.04 CONTRACT DOCUMENTS**

- A. The accompanying drawings and these specifications are complementary each to the other and what is called for on one shall be as binding as if called for by both. The drawings being more specific with quantity, the specifications more specific with quality.
- B. This Contractor is requested and shall be held to having examined all drawings and specifications for all trades, such as Architectural, Structural, Plumbing, Electrical, Heating, Site, etc., in order to familiarize himself with the requirements of all of the trades as applied to this Contractor's work. No allowances will be made for deviations from work shown to coordinate this Contractor's work with work of other Contractors.
- C. Any doubt as to the intent of the drawings and/or specifications shall be submitted to the A/E/D in writing, requesting an interpretation. Interpretation will be by Addendum only, issued by the A/E/D. The person submitting the request will be responsible for its delivery.
- D. Under no circumstances shall any sizes be decreased or radical changes in any part of the installation be made without the written consent of the A/E/D.
- E. Elevations and grades shown on drawings are approximate only. This Contractor shall verify same on premises and shall take all measurements and determine all final elevations and be responsible for same applying to his work.

**1.05 EQUIPMENT LIST AND SUBSTITUTIONS**

- A. Each Bidder shall prepare a list covering typical important items of equipment involved in his portion of the Contract. A sub-contractor and material list is to be provided with the Bid. This may or may not also be in the front portion of this Specification.
- B. Certain manufactured articles specified herein are mentioned under one or more trade or manufacturer's names. These manufactured articles, as specified and detailed on drawings, shall form the basis of the Contractor's Bid. Additional products or product manufacturers will be permitted by addendum only.
- C. Articles of other manufacturers, of equivalent design, quality and capacity, as adjudged by the A/E/D will be considered no later than ten (10) working days prior to bid date. Establishing proof of the equality of the product to that specified shall be the responsibility of the bidder. Determination of equality of all products is vested in the A/E/D whose decision shall be final and binding upon all concerned. No substitutions will be allowed after the Contract is awarded.
- D. Where a Contractor proposes to use an item of equipment other than that as designed and detailed on the drawings (even though listed as an acceptable manufacturer) which requires purchase of additional and/or specific equipment, more space, or any re-design of any other part of the mechanical, electrical or architectural layout, all such re-design and all new drawings required shall be prepared by the Contractor, at his own expense. And, should this re-design require additional cost to other Contractors, this expense shall be borne by the Contractor making such changes. All changes must be approved by A/E/D. The Contractor and manufacturer and/or representative shall be responsible to coordinate physical limitations of equipment prior to bidding. No requests for extras will be allowed due to changes required by equipment substitutions.

**1.06 CODES, LAWS, ORDINANCES, PERMITS AND FEES**

- A. Plumbing installation shall comply with all requirements of the State Board of Health, and the Indiana Plumbing Code with all their respective amendments.

GENERAL PLUMBING REQUIREMENTS

- B. Plumbing installation shall comply with the International Mechanical Code with Indiana amendments and Indiana Plumbing Codes in effect at the time of Construction.
- C. Underground water mains and associated installations shall conform to the AWWA Standards and the National Fire Protection Association "NFPA" Pamphlet No. 24.
- D. Pipe welding shall conform to "Welding Code for Steel and Wrought Iron Pipe" of the "Heating, Piping, and Air Conditioning Contractors' National Associations."
- E. All installations shall comply with the latest editions, issues or supplements of all applicable codes, ordinances, regulations and requirements without increase in contract price. Such provision, rules, regulations and ordinances are to be considered as much a part of these specifications as if repeated herein or attached hereto. All changes or modifications required to conform to such codes, regulations, or requirements must be reviewed, the same as Shop Drawings, by the A/E/D.
- F. The Contractor shall give all necessary notices, obtain and pay all utility company bills or governmental taxes, fees for connections, water taps and other costs in connection with his work; and he shall also maintain and pay special charges, overtime, or provide any special protection, barricades, lights, personnel as may be required by the State, County, Owner or City in the performance of the contract requirements, as well as providing the necessary equipment to dig or drive and provide de-watering or shoring by any means designated so as to comply with the governing bodies' procedures.
- G. All materials furnished and all work installed shall comply with the rules and recommendations of the National Fire Protection Association, with all requirements of the local utility companies, with the recommendations of the Owner's fire insurance rating organization having jurisdiction, and with the requirements of all governmental departments having jurisdiction.
- H. This Contractor shall assume all responsibility of proper installation of services to meet all rules and regulations of the utility or governmental agent involved and pay all fees or charges required.
- E. All details shall be verified before bidding with each utility or agency and no allowances will be made in the Contract to properly or differently than detailed install any service.

**1.07 SITE VERIFICATION**

- A. This Contractor is directed to visit the premises and make him self thoroughly familiar with the general layout of the building site and the location of present lines to which connections shall be made. He shall also check present grades, ditches, pavements, sewers, and/or all other conditions affecting the service installations contemplated under this Contract. Such offsets as may be required to leave new work clear, etc. must be included in the Contractor's proposal, and the Contractor must assume the full responsibility for having made a proper and thorough investigation of these requirements. The contractor is to review the construction documents and visit the premises prior to bidding. Visits to the facility by the prospective contractors must be coordinated with the A/E/D.
- B. No extras will be allowed subsequently to the successful Contractor to cover any such error, omission and/or oversight on the part of the contractor for not having made a thorough inspection of the grounds, facilities, building conditions, proposed drawings etc.
- C. Contractor shall further inspect the site and see for himself the available storage space, trucking facilities for bringing materials into the building/area and must assume responsibility for receiving, unloading, storing freight, demurrage, theft and any and all other factors influencing the work under this specification.

**1.08 COORDINATION OF WORK**

- A. Locations of various parts of the equipment, ductwork, services and piping shown by Mechanical Plans are diagrammatic and approximately correct. Exact location shall be

22 05 01  
GENERAL PLUMBING REQUIREMENTS

determined on job and governed by structural conditions of the building and work of other Contractors, subject to decision of A/E/D, who reserves the right to make any reasonable change in locations indicated without extra charge to Owner.

- B. Contractor shall study and become familiar with contract drawings of other trades and A/E/D's drawings in order to obtain all necessary information in order that all interferences with work of other trades may be avoided. Cooperate with all other workmen and install work in such a way that all interferences are avoided. All work shall be installed so that all parts required are readily accessible for inspection, operation, removal, maintenance and repair.
- C. All pipe, apparatus, appliances or other items interfering with proper placement of other work, as indicated on the drawings, specified, or required, shall be removed and shall be re-located and re-connected without extra cost. All damage to other work caused by this Contractor, his Subcontractors or his workmen, by reason of neglect, accident or any cause whatsoever, shall be repaired and made good in the same manner as specified for new work of the same character.
- D. Openings and chases shall be left in new walls for this Contractor's work when so requested before general work so affected is completed. Where this Contractor has failed to make such request at proper time, he shall pay for all cutting, patching, etc., of the building required for this work.

1.09 LAYING OUT

- A. This Contractor shall take all measurements necessary for his work and shall assume responsibility for their accuracy. This Contractor shall not scale Mechanical Drawings but shall obtain all dimensions from building and the Construction Drawings unless specified herein or shown on drawings.

1.12 PROTECTION

- A. The Contractor shall be responsible for the maintenance and protection of all equipment, materials, and tools supplied by him and stored or installed on the job site from loss, theft, vandalism or damage until final acceptance by the Owner.
- B. The Contractor shall be responsible for the protection of Owner's materials and equipment, and any finished work of other trades from damage or defacement by his operations and must remedy any such injury at his own expense.
- C. Openings in exterior walls, and roofs, particularly at or below grade, shall be kept properly plugged at all times. After completion of work, openings for which the Contractor is responsible shall be permanently sealed and caulked in the manner approved by the A/E/D.

1.13 SHOP DRAWINGS

- A. Contractor shall submit a electronic copy in PDF Format of each shop drawing to A/E/D and Owner for review before commencing any work or providing materials. Review of shop drawing does not relieve contractor of correct ordering and installations. Electronic shop drawing systems may be employed and will be detailed at the on set if allowed.
- B. Drawings submitted shall bear the stamp of approval of the Contractor as evidence that the drawings have been checked by the Contractor and comply with the requirements of the contract drawings and specifications. Any drawings submitted without this stamp of approval will not be considered and will be returned to the Contractor for resubmission. If the drawings submitted show variations from the requirements of the Contract, the Contractor shall make specific mention of such variations in his letter of transmittal in order that, if acceptable, suitable action may be taken for proper adjustment, otherwise, the Contractor will not be relieved of the responsibility of executing the work in accordance with the Contract even though such drawings have been reviewed.
- C. The A/E/D and Owner's reviewing of the Contractor's and Subcontractor's Drawings or Equipment Details does not relieve the Contractor from responsibility for errors, omissions, or

GENERAL PLUMBING REQUIREMENTS

equipment capacities which may exist or develop even though work is done and equipment furnished in accordance with such checked or reviewed drawings.

- D. The reviewing of Contractor's and Subcontractor's drawings or equipment details by the A/E/D is a gratuitous assistance and the A/E/D does not thereby assume responsibility for errors or omissions. Where such errors or omissions are discovered later, they shall be made good by the Contractor irrespective of any review by the A/E/D.
- E. Review by A/E/D and Owner applies only to capacity, quality, general arrangement, design and type. Approval does not apply to quantities, dimensions, connection locations and similar. In all cases, Contractors shall be responsible for furnishing the proper quantities of equipment and/or materials required, that all equipment fits the available space in satisfactory manner and that all piping, electrical and other connections are suitably located.
- F. Review by A/E/D and Owner will not modify or nullify any provisions of Contract Documents which include Drawings and Specifications, nor will approval relieve Contractor from responsibility for error, omissions and deviations from Contract Documents.

#### 1.14 RECORD DRAWINGS

- A. The Contractor shall keep an accurate, current and progressive record of all installed work, including all changes and deviations from the design drawings. Recordings shall be made on prints kept in good condition at the job site as the work progresses and before any work is covered. Detail drawings shall be made if necessary for clarity.
- B. Recordings shall be made on prints kept in good condition at the job site as the work progresses and before any work is covered. The field drawings are to be brought to the construction progress meetings for periodic checks.
- C. Upon completion of the contract work, the Contractor shall deliver the marked-up prints to the A/E/D with a signed certification by a principal of the contracting firm, that all work was installed as shown.
- D. All labor and material costs incurred in the accomplishment of the foregoing requirements shall be borne by the Contractor. Final approval of the work and final payment shall be withheld until after receipt of the marked as built prints.

#### 1.15 FIELD INSTRUCTIONS

- A. During construction, the A/E/D shall observe the work and give written field instructions as required without invalidating the Contract. Such field instruction shall not be construed as authority to change the terms of the Contract.
- B. In cases where extra cost or reductions in cost of the Contract are involved, the Contractor shall notify the A/E/D in writing at the time of such instructions and shall establish cost difference and shall receive written approval before proceeding. The Contractor shall not be reimbursed for extra work unless this procedure has been followed.

#### 1.16 CLEAN-UP

- A. Contractor shall remove from site, and legally dispose of, rubbish resulting from the work under his Contract. Rubbish shall be removed daily and not be allowed to accumulate. Owner has first right of salvage. Owner salvaged items shall be delivered to Owner by the Contractor at specified locations.

### PART 2 – PRODUCTS

#### 2.01 PRODUCT WARRANTY

- A. All work shall be guaranteed (parts and labor) for a period of one (1) year.
- B. Warranty shall run from written date of substantial completion of the work, not from date of installation of a device or piece of equipment, nor from any date set by the equipment supplier relative to his equipment.

22 05 01  
GENERAL PLUMBING REQUIREMENTS

2.02 PLUMBING REFERENCE SYMBOLS, DETAILS AND DRAWINGS

- A. Symbols used are diagrammatic are generally generic in nature.
- B. Details and Drawings are typical in nature and are subject to variations to suit specific products and project conditions and available space

PART 3 – EXECUTION

3.01 WORKMANSHIP

- A. All work is to be performed in a craftsman like manner as judged by the A/E/D and conform to the Trade Association Standard of Installation.

3.02 INSTALLATION

- A. Whenever necessary, the Contractor shall provide all bases and supports not part of the building structure, of required size, type and strength, as approved by the A/E/D for all equipment and materials furnished by him. When earthquake loads are applicable in accordance with the Building Code, mechanical system supports shall be designed and installed for the seismic forces in accordance with the Building Code. Generally all Mechanical systems are to be supported in accordance with the Mechanical Code.
- B. Escutcheons shall be installed on pipes wherever they pass through floors, ceiling, walls or partitions.
  - 1. Escutcheons for pipes passing through floors shall be split-hinged, cast-brass type, designed to fit pipe on one end and cover sleeve projecting through floor on the other end.
  - 2. Escutcheons for pipes passing through interior walls, partitions and ceilings shall be split-hinged, cast-brass, chromium-plated type.

3.03 CLEANING

- A. Piping and equipment shall be thoroughly cleaned of all foreign substance inside and out before being placed in operation.
  - 1. All piping to be flushed with water and run to drain until water leaving the pipe systems is free of all oil, dirt, and scale; and all new potable water piping shall be cleaned as installed, and in addition, domestic piping shall be sterilized, using pressure sterilization in accordance with the recommendation of the State Department of Health. See Section 22 11 17 Disinfection of Domestic Water Piping.
  - 2. Hydronic systems are to be flushed free of dirt, oil, scale and waste etc. with water. Run water to waste until it runs clear.
  - 3. Domestic water systems are to be sterilized as specified in Section 22 11 17 Disinfection of Domestic Water Piping.
- B. All pipe strainers are to be cleaned prior to testing and balancing and cleaned again just prior to turning project over to Owner. Remove screens, clean screens and interior of strainer bodies and reinstall screens
- C. All equipment and premises are to be thoroughly cleaned.

3.04 RESPONSIBILITIES

- A. The Prime Contractor shall be responsible to coordinate with his subcontractors and to pursue all job problems concerning repair, replacement or proper operation of all systems.
- B. It shall be the Contractor's responsibility to determine, in conjunction with the A/E/D if required, the source of any problems and obtain solution and correction of same with all expediency.

GENERAL PLUMBING REQUIREMENTS**3.05 EQUIPMENT ACCESSIBILITY AND SPACE COORDINATION AND PER-BID VERIFICATION REQUIREMENTS**

- A. Physical size and arrangement of proposed equipment and apparatus must be suitable for the space available. Maintain required clearances and allow space for proper maintenance and placing in the facility and removing from the facility.
  - 1. Prior to bidding project each Contractor and equipment representative must review the installation, arrangement, space available and verify that the proposed installation will retain required clearance and maintain accessibility. Maintenance space must be demonstrated by Contractor.
  - 2. Any deviations required to accommodate equipment etc. must be coordinated by Contractor with A/E/D before bids are accepted on the project. After bids are accepted such work will be part of the Contractor's work and will add no additional expense to the project.
- B. Contractor is responsible for furnishing equipment which is suitable for the space available and must bear the costs for all modifications to his work and the work of others required to accommodate his equipment both the installing and moving into place.

**3.06 EQUIPMENT SERVICE AND CONNECTION REQUIREMENTS COORDINATION AND PRE-BID VERIFICATION REQUIREMENTS**

- A. Service and connection requirements of proposed equipment and apparatus must be compatible with the respective services available as required to accommodate the intent of the design.
- B. Mechanical and electrical service connection requirements of a manufacturer's equipment, even if listed as acceptable, may not be the same as the requirements as the product specified or shown on the construction drawings. Contractor is to make adjustments as required. All connections are to be made complete to accommodate the intent of the design.
  - 1. Prior to bidding the project, each bidding Contractor and respective equipment manufacturer's representative must review the installation arrangement and mechanical and electrical service connections indicated on the Construction Drawings and verify that installation of the proposed equipment will be compatible with the Construction Drawing's, available space and actual conditions.
- C. The Contractor is responsible for furnishing equipment etc. which is suitable for the existing or proposed space and services. The Contractor must bear the costs for all modifications to his work and the work of others required to accommodate equipment furnished by the Contractor.

**3.07 MARKING UNDERGROUND UTILITIES**

- A. Install an appropriate 6" wide plastic marker tape a minimum of 12" above any direct buried utility line.
- B. Concrete encased utility lines shall have the concrete dyed or painted the appropriate color for the particular utility.

**3.08 TESTING AND ADJUSTING**

- A. Thoroughly test for leaks and operate each system device and item of equipment installed as part of this project and cooperate with the Testing and Balancing Agency performing the final testing and adjusting of the respective systems.
- B. Notify A/E/D 48 hours previous to all testing, adjusting or balancing. Tests must be conducted in the presence of a representative of the A/E/D and a written report is to be provided.
- C. System testing and balancing is to be performed after the respective systems have been deemed by the Contractor to be complete and operating in full working order.

22 05 01  
GENERAL PLUMBING REQUIREMENTS

END OF SECTION 220501

22 05 02  
PAINTING OF PLUMBING

PART 1 - GENERAL

1.01 SUMMARY

- A. Section includes provisions for painting to complement Division 09 Section "Finishes" and Section 22 05 00 "Common Work Results for Plumbing" and govern painting of plumbing work.
- B. Applicable provisions of Division 09 Section "Finishes" and Section 22 05 00 govern work of this Section.
- C. Protective painting of plumbing work in hidden spaces (chases, plenums, etc.) and Mechanical Areas shall be performed as part of respective plumbing work.
- D. Mechanical Identification is specified in Section 22 05 53. If painting is required as part of an identification system, it is specified with respective identification systems. Verify applicable provisions of Section 22 05 53.

1.02 DEFINITIONS

- A. Hidden Spaces - Chases, plenums, spaces above ceilings, crawl spaces, tunnels, etc.
- B. Mechanical Areas - Areas within a building solely assigned for mechanical and electrical equipment.
- C. Pre-Finished - Equipment and materials specified to have factory finish.
- D. Shop Prime Coated - Shop painted equipment and materials not specified to have factory finish.

PART 2 – PRODUCTS

2.01 PAINTING MATERIALS

- A. Specified in Division 09 Section "Painting".

PART 3 – EXECUTION

3.01 PAINTING, GENERAL

- A. Division 09 Section "Finishes" governs painting materials, methods and procedures.

3.02 PAINTING SCHEDULE

- A. Paint ferrous metal mechanical work not provided with a protective factory finish in hidden spaces.
- B. Refinish, to original condition, surfaces marred or damaged due to mechanical work.

3.03 TOUCH-UP

- A. "Touch-Up" marred (scratched, stained, etc.) factory finished surfaces on mechanical equipment to satisfaction of A/E/D.
- B. Spray cans of touch-up paint furnished to Owner as "Extra Materials" (Section 15057) shall not be used for this touch-up.

3.04 ITEMS NOT PAINTED

- A. Following items shall not be painted:
  - 1. Valve wheels and stems, valve operators.
  - 2. Equipment specified and supplied with a "factory finish".
  - 3. Items having chrome plated finish.
  - 4. Equipment and motor nameplates.
  - 5. Temperature control operators and devices.

22 05 02  
PAINING OF PLUMBING

6. Temperature and pressure relief valves.

B. Following items do not need to be finish painted: (Provide protective finish on ferrous metal.)

1. Brass valve bodies.
2. Galvanized and nonferrous metal ductwork in unfinished spaces.
3. Ductwork foil faced external insulation in unfinished spaces.

3.05 PAINTING COLOR SCHEDULE

A. The following is the ISU color schedule for pipe painting:

Service	Color
Fire Protection Lines	Red
Natural Gas Piping	Yellow
Chilled Water Lines	Green
Condenser Water Lines	Orange
Heating Water Lines	
Steam Lines	
High Pressure Condensate Return Lines	
Low Pressure Condensate Return Lines	
Compressed Air Lines	
Domestic Water Lines	Blue
Sanitary Sewer Lines	
Storm Sewer Lines	

END OF SECTION 22 05 02

22 05 23  
GENERAL DUTY VALVES

PART 1 – GENERAL

1.01 SUMMARY

- A. Section includes general duty valves common to various Mechanical piping systems and general provisions which govern valves in general, to complement Section 22 05 00. Applicable provisions of Section 22 05 00 govern work of this Section.
- B. Utilize general duty valves specified in this Section for respective applications in the various Mechanical piping systems as scheduled in respective System Sections and where indicated on Drawings. Applicable general specifications and requirements herein govern specific application valves specified in other Sections.
- C. General installation requirements, methods, and procedures in this Section govern installation of valves in general. Specific duty valves to be used in particular Mechanical piping systems are specified in respective System or Specialties Section or indicated on Drawings for respective work. Provisions in specific duty valve specifications have precedence over similar provisions in this Section. Refer to Project Manual "Table of Contents" for respective System Section titles.
- D. Requirements, methods, and procedures particular to installation of valves for individual systems are included in respective System Sections or on Drawings for respective work.
- E. Valve Tags and Valve Schedules are specified in Section 22 05 53 Plumbing Identification.

1.02 SUBMITTALS

- A. Submit product data for each type and style of valve to be installed on this Project.

1.03 QUALITY ASSURANCE

- A. All valves of same use and function shall be from one manufacturer.
- B. Agency Compliance: Comply with applicable standards and specifications of ANSI (American National Standards Institute), ASME (American Society of Mechanical Engineers), ASTM (American Society for Testing and Materials), and MSS (Manufacturers Standardization Society of the Valve and Fittings Industry).

1.04 DELIVERY, STORAGE, AND HANDLING

- A. Deliver products to site, properly store, and protect under provisions of Section 22 05 00 and this Section.
- B. Preparation for Transport: Prepare valves for shipping as follows:
  - 1. Ensure valves are dry and internally protected against rust and corrosion.
  - 2. Protect valves ends against damage to threads, flange faces, and weld end preps.
  - 3. Set valves in best position for handling. Set globe and gate valves closed to prevent rattling; set ball and plug valves open to minimize exposure of functional surfaces; set butterfly valves closed or slightly open; and block swing check valves in either closed or open position.
- C. Storage: Use the following precautions during storage:
  - 1. Do not remove valve end protectors unless necessary for inspection; then reinstall for storage.
  - 2. Protect valves from weather. Store valves indoors. Maintain valve temperature higher than the ambient dew point temperature. If outdoor storage is necessary, support valves off the ground or pavement in watertight enclosure.

22 05 23  
GENERAL DUTY VALVES

1.05 EXTRA MATERIALS

- A. Service Parts: Provide valve packing materials to pack a minimum of 3 valves for each type of valve to Owner.

PART 2 – PRODUCTS

2.01 MANUFACTURERS

- A. Acceptable Manufacturers of General Duty Valves: Subject to compliance with requirements. Some listed manufacturers do not produce all types of general duty valves.
  - 1. Bray Controls with Nylon 11
  - 2. Conbraco Ind., Inc. "Apollo"
  - 3. Crane
  - 4. Grinnell Supply Sales Co.
  - 5. Lunkenheimer
  - 6. Nibco Inc
  - 7. Stockham Valves & Fittings
  - 8. Victaulic Co. of America.
  - 9. Red-White Valve Corp.
  - 10. Appolo

2.02 VALVE FEATURES, GENERAL

- A. Valve Component Materials, Design, and Rating: Suitable for respective system media and pressures involved; in compliance with respective applicable standards and specifications.
- B. Valve Ends: As dictated by respective system piping joints.
  - 1. Threaded Joint Pipe: Screwed pattern.
  - 2. Welded Joint Pipe: Flanged.
  - 3. Soldered Joint Pipe: Solder type.
  - 4. Brazed Joint Pipe: Screwed pattern threaded ends, installed with an adapter and union adapter.
- C. Valve Design: Arranged so that valve position is obvious from outside the valve (rising stem, handle position, etc.).
- D. Pressure/Temperature Rating: Suitable for respective system media, pressure, and temperature.
- E. Valve Packing: Appropriate material for respective service conditions.
- F. Valves That Will be Insulated: Equipped with extended stems and necks.

2.03 GENERAL DUTY VALVES

- A. Ball Valves: ASTM B-62 bronze body; rated 150 psi; equipped with quarter turn handles, "Teflon" or "PTFE" seats and seals, chrome-plated brass ball, blowout proof valve stems. Memory stop: Provide on valves used for balancing service.
- B. Butterfly Valves: MSS SP-67; rated 200 psi; cast iron full lug or grooved body conforming to ASTM A 126, Class B, drilled and tapped; equipped with a full circle field replaceable EPDM seat; ASTM B-148 aluminum bronze discs, stainless steel shafts. Wafer valves are not acceptable. Memory stop: Provide on valves used for balancing service.
  - 1. Lever operator with locks on valves smaller than 6 inches.

22 05 23  
GENERAL DUTY VALVES

- C. Globe Valves 2-Inch and Smaller: MSS SP-80; Class 150 for heating applications, Class 125 for other applications; ASTM B-62 cast bronze body and screwed bonnet; copper-silicon alloy rising stem; renewable bronze disc and metal seat; brass packing gland, "Teflon" impregnated packing; malleable iron hand wheel.
- D. Globe Valves 2-1/2-Inch and Larger: MSS SP-85; Class 125; ASTM A-126, Class B iron body and bolted bonnet with outside screw and yoke; copper silicon alloy rising stem; renewable bronze disc and metal seat; two-piece bronze packing gland assembly, "Teflon" impregnated packing; malleable iron hand wheel.
- E. Gate Valves 2-Inch and Smaller: MSS SP-80; Class 150 for heating applications, Class 125 for other applications; ASTM B-62 cast bronze body and bonnet; copper-silicon alloy rising stem; solid bronze disc; bronze packing gland, "Teflon" impregnated packing.
- F. Gate Valves 2-1/2-Inch and Larger: MSS SP-70; Class 125; ASTM A-126, Class B iron body and bonnet; copper-silicon alloy rising stem; solid bronze disc; two-piece bronze packing gland assembly, "Teflon" impregnated packing.

2.04 DRAIN VALVES

- A. Ball type, 3/4-inch, rated 400 psig WOG, equipped with garden hose thread end and captive brass cap with gasket.

2.05 CHECK VALVES

- A. Check Valves for Particular Applications: Specified in respective System or Specialties Sections.
- B. Check Valves 2-Inch and Smaller: Swing check design; ASTM B-62 bronze threaded type valve bodies with screwed cap, brass disc holder, synthetic rubber renewable disc and brass side plug; Class scheduled for respective application.
- C. Check Valves 2-1/2-Inch and Larger: Center guided non-slam disc, flanged body design; ASTM B-148 aluminum bronze or ASTM A-48 cast iron valve bodies and seal housing; ASTM-145-4A bronze disc; Buna-N O-ring seals, arranged for combination metal and soft seal seating; ASTM B166 Inconel or Type 302 stainless steel springs; Class scheduled for respective application.

PART 3 – EXECUTION

3.01 VALVE DUTY AND PRESSURE/TEMPERATURE CLASSIFICATION

- A. Scheduled in Part 3 of 22 05 00 Basic Plumbing Materials and Methods.

3.02 APPLICATION OF GENERAL DUTY VALVES

- A. Refer to respective piping system specification Sections and Drawings for specific valve applications and arrangements.
- B. Provide respective type general duty valves for respective applications in following locations, unless a specific duty valve is specified or indicated on Drawings for a particular application:
  - 1. Shut-Off Valves: Gate, ball, and butterfly.
    - a. In branch lines serving two or more devices; locate near main.
    - b. In inlet and outlet connections of each piece of equipment.\*
    - c. Immediately upstream of dielectric unions.
    - d. Wherever indicated on Drawings.

\*(with flange or union on equipment side of valves at equipment.)
  - 2. Throttling Valves: Globe, ball, and butterfly.
    - a. To regulate flow where specific duty or special balancing valves are not specified for a particular application. As required and wherever indicated on Drawings.
- C. Provide Drain Valves at low points in water lines.

22 05 23  
GENERAL DUTY VALVES

- D. Valve Sizes: Full size of upstream line in which they are mounted, unless noted otherwise.

### 3.03 EXAMINATION

- A. Examine valve interior through the end ports for cleanliness, freedom from foreign matter, and corrosion. Remove special packing materials, such as blocks used to prevent disc movement during shipping and handling.
- B. Actuate valve through an open-close and close-open cycle. Examine functionally significant features, such as guides and seats made accessible by such actuation. Following examination, return the valve closure member to the shipping position.
- C. Examine threads on both the valve and the mating pipe for form (i.e., out of-round or local indentation) and cleanliness.
- D. Examine mating flange faces for conditions that might cause leakage. Check bolting for proper size, length, and material. Check gasket material for proper size, material composition suitability for service, and freedom from defects and damage.
- E. Prior to valve installation, examine piping for cleanliness, freedom from foreign materials, and proper alignment. Replace defective valves with new valves.

### 3.04 INSTALLATION OF VALVES, GENERAL

- A. Do not use wrenches having serrated tooth jaws on valves. Installed valves bearing marks from wrench teeth will not be accepted and such valves shall be replaced with new unmarred valves.
  - 1. Use wrench only on valve end into which pipe is being threaded.
- B. Install valves and unions, in accessible locations, arranged to permit easy removal of fixtures and equipment served without system shutdown. Unions are not required with flanged devices. Provide separate support where necessary.
  - 1. Provide access panels and doors where required. Coordinate valve locations and arrangement so valves will be accessible through respective access means.
- C. Install valves in a position that will allow full stem movement.
- D. Valves in Brazed Tubing: Utilize threaded end valves, installed with an adapter and a union adapter. Soldered Valves: Install with internal parts removed. Do not overheat. Install internals only after body has cooled and been cleaned.
- E. Arrange globe valves to close against flow pressure, with flow against bottom of plug.
- F. Install valves opened to fully open position. Close valves only when assured that sealing parts are free from foreign materials. Valve stems shall be positioned up.
- G. Weld scale, or other foreign materials, found embedded in sealing surfaces will require installation of new trim or complete new valve.

### 3.05 FIELD QUALITY CONTROL

- A. After piping systems have been tested and put into service, but before final adjusting and balancing, inspect valves for leaks. Adjust or replace packing to stop leaks; replace valves if leaks persist.

### 3.06 CLEANING

- A. Clean mill scale, grease, and protective coatings from exterior of valves and prepare valves to receive finish painting or insulation when applicable.

### 3.07 IDENTIFICATION OF VALVES

- A. Install valve tags and schedules as specified in Section 22 07 50 Plumbing Identification.

END OF SECTION 22 05 23

22 05 29  
PIPE SUPPORTS AND ANCHORS

PART 1 – GENERAL

1.01 SUMMARY

- A. Section includes provisions for pipe and equipment supports and anchors to complement Section 22 05 00. Applicable provisions of Section 22 05 00 govern Work of this Section.
- B. Pipe hangers and supports are not normally shown on Drawings, however, appropriate hangers and supports shall be provided at proper intervals in compliance with provisions of this Section and applicable code requirements. Provide equipment supports and anchors in compliance with provisions of this Section, applicable code requirements, and respective provisions in specifications and on Drawings.
- C. Support and anchor provisions applicable to particular systems or equipment are specified with respective system or equipment, or indicated on Drawings. Grout is specified in Section 220500.

1.02 REFERENCES

- A. American Society for Testing and Materials (ASTM)
  - 1. ASTM A 36 Specification for Structural Steel.
  - 2. ASTM A 780 Practice for Repair of Damaged Hot-Dipped Galvanized Coatings.

- E. Steel Structures Painting Council (SSPC)
  - 1. SSPC-PA-1 Shop, Field, and Maintenance Painting.
- F. (SMACNA) Seismic Restraint Manual.

1.03 TERMINOLOGY

- A. Terminology used in this Section is defined in MSS SP-90.

1.04 QUALITY ASSURANCE

- A. Hangers and Support Devices: Designed, suitable, and appropriate for respective application, installed in compliance with manufacturer's recommendations.
- B. Comply with applicable plumbing and mechanical codes pertaining to product materials and installation of supports and anchors.
- C. Hangers and supports used as a component of a fire protection system shall comply with NFPA Standard No. 13 and be listed and labeled by UL and FM
- D. The SMACNA hazard level assigned to this building is ("A") ("B") ("C")

22 05 29  
PIPE SUPPORTS AND ANCHORS

PART 2 – PRODUCTS

2.01 ACCEPTABLE MANUFACTURERS

- A. B-Line Systems, Inc.
- B. Elcen Metal Products Co.
- C. Fee & Mason Manufacturing Co.
- D. Grinnell Supply Sales Co.
- E. Michigan Hanger Co.
- F. PHD Manufacturing, Inc.

2.02 MANUFACTURED UNITS

- A. Hangers and Support Components: Factory fabricated of materials, design, and manufacturer complying with MSS SP-58.
  - 1. Components: Galvanized where installed for piping and equipment that will not have field-applied finish.
  - 2. Piping Attachments in Direct Contact With Copper Pipe: Provided with nonmetallic coating for electrolytic protection.
- B. Thermal Hanger Shield Inserts: 100-psi average compressive strength, waterproofed calcium silicate, encased with a sheet metal shield. Insert and shield shall cover entire circumference of the pipe and shall be of length indicated by manufacturer for pipe size and thickness of insulation.

2.03 STEEL PLATES, SHAPES, AND BARS

- A. ASTM A 36.

2.04 PIPE ALIGNMENT GUIDES

- A. Factory fabricated of cast semi-steel or heavy fabricated steel, consisting of bolted two-section outer cylinder and base with two-section guiding spider that bolts tightly to pipe. Length of guides as recommended by manufacturer to allow indicated travel.

PART 3 – EXECUTION

3.01 EXAMINATION

- A. Examine substrates and conditions under which supports and anchors are to be installed. Do not proceed with installation until unsatisfactory conditions have been corrected.

3.02 PREPARATION

- A. Coordinate locations of inserts, anchors, clamps, etc. with other work and related supports. Contractor shall be responsible for correcting omissions and conflicts that are due to his failure to coordinate his hanger and support work.

3.03 INSTALLATION OF HANGERS AND SUPPORTS

- A. General: Install hangers, supports, clamps, and attachments to support piping properly from building structure; comply with MSS SP-69 and SP-89.
  - 1. Do not support hangers from roof deck. Arrange for grouping of parallel runs of horizontal piping supported together on field-fabricated, heavy-duty trapeze hangers where possible.
  - 2. Install supports with maximum spacing(s) complying with MSS SP-69, except where other spacing is required by governing code or is specified for a particular installation. Where piping of various sizes is supported together by trapeze hangers, space hangers for smallest pipe in the group or install intermediate supports for the smaller diameter

PIPE SUPPORTS AND ANCHORS

pipe. Hanger location and spacing for pipe with grooved or push-on fittings shall comply with fittings manufacturer's recommendations.

- B. Install building attachments within concrete or to structural steel. Space attachments within maximum piping span length indicated in MSS SP69. Install additional attachments at concentrated loads, including valves, flanges, guides, strainers, expansion joints, and at changes in direction of piping. Install concrete inserts before concrete is placed; fasten inserts to forms. Where concrete with compressive strength less than 2,500 PSI is indicated, install reinforcing bars through openings at top of inserts.
  - 1. Provide pipe hangers located on both sides of products (equipment, valves, accessories, etc.) which have separable pipe connections (flange, union, etc.), arranged to maintain proper support and alignment of related piping in the event of product removal for servicing, etc.
- C. Install hangers and supports complete with necessary inserts, bolts, rods, nuts, washers, and other accessories.
- D. Field-Fabricated, Heavy-Duty Steel Trapezes: Fabricate from steel shapes selected for loads required; weld steel in accordance with AWS D1.1.
- E. Horizontal piping with a centerline elevation of less than 4 feet shall be supported from the floor or with wall brackets if near a suitable wall.
- F. Vertical Piping: Support at every other floor, except cast iron pipe shall be supported at each floor and copper pipe or tubing shall be supported at each floor or at maximum intervals of 10 feet.
- G. Install hangers and supports arranged to allow controlled movement of piping systems, to permit freedom of movement between pipe anchors, and to facilitate action of expansion joints, expansion loops, expansion bends, and similar units.
- H. Load Distribution: Install hangers and supports so that piping live and dead loading and stresses from movement will not be transmitted to connected equipment.
- I. Pipe Slopes: Install hangers and supports to provide required pipe slopes, and so that maximum pipe deflection allowed by ASME B31.9 is not exceeded
- J. Pipe hangers and supports shall have some adjustment in each direction available after installation.
- K. Insulated Piping: Comply with following Installation requirements:
  - 1. Clamps: Attach clamps, including spacers (if any), to piping with clamps projecting through insulation do not exceed pipe stresses allowed by ASME B31.9.
  - 2. Saddles: Install protection saddles MSS Type 39 where insulation without vapor barrier is indicated. Fill interior voids with segments of insulation that match adjoining insulation.
  - 3. Shields: Install protective Type 40 on cold and chilled water piping that has vapor barrier. Welds shall span an arc of 180degrees and have dimensions in inches not less than the following:

<u>NPS</u>	<u>LENGTH</u>	<u>THICKNESS</u>
1/4 through 3-1/2	12	0.048
4	12	0.060

- 4. Thermal Hanger Shields: Install where required, with insulation of same thickness as piping insulation.

PIPE SUPPORTS AND ANCHORS

- L. Refer to Chapter 3, General Requirements, of the SMACNA - Seismic Restraint Manual, page 3.2., for the General Requirements for Bracing at Pipe.

**3.04 INSTALLATION OF PIPE ANCHORS**

- A. Install pipe anchors at proper locations to prevent stresses from exceeding those permitted by ASME B31.9 and to prevent transfer of loading and stresses to connected equipment. Fabricate and install anchors by welding steel shapes, plates, and bars to piping and to structure. Comply with ASME B31-9 and with AWS Standard D1.1.
- B. Anchor Spacing(s): Where not otherwise indicated, install anchors at ends of principal pipe runs and at intermediate points in pipe runs between expansion loops and bends. Make provisions for preset of anchors as required to accommodate both expansion and contraction of piping while allowing no sag.

**3.05 EQUIPMENT SUPPORTS**

- A. Fabricate structural steel supports and stands to suspend equipment from structure above or support equipment above floor as indicated or required.
- B. Grouting: Place grout under supports for piping and equipment.

**3.06 METAL FABRICATION**

- A. Cut, drill, and fit miscellaneous metal fabrications for pipe anchors and equipment supports. Install and align fabricated anchors in indicated locations. Fit exposed connections together to form hairline joints. Field weld connections that cannot be shop welded because of shipping size limitations.
- B. Field Welding: Comply with AWS D1.1 for procedures of manual shielded metal-arc welding, appearance and quality of welds made, methods used in correcting welding work, and the following:
  - 1. Use materials and methods that minimize distortion and develop strength and corrosion resistance of base metals and obtain fusion without undercut or overlap.
  - 2. Remove welding flux immediately. Finish welds at exposed connections so that no roughness shows after finishing, and so that contours of welded surfaces match adjacent contours.

**3.07 ADJUSTING**

- A. Hanger Adjustment: Adjust hangers to distribute loads equally on attachments and to achieve indicated slope of pipe.
- B. Touch-Up Painting: Immediately after erection of anchors and supports, clean field welds and abraded areas of shop paint and paint exposed areas with same material used for shop painting to comply with SSPC-PA-1 requirements for touch-up of field-painted surfaces.
  - 1. Apply by brush or spray to provide a minimum dry film thickness of 2.0 mils.
  - 2. Galvanized Surfaces: Clean welds, bolted connections, and abraded areas and apply galvanizing repair paint to comply with ASTM A 780.

END OF SECTION 22 05 29

## PART 1 – GENERAL

### 1.01 QUALITY ASSURANCE

- A. Do not install sleeves through structural columns, beams, etc.
- B. Coordinate sleeve size and location with reinforcing in slabs and walls.
- C. Coordinate sleeve size and arrangement with fire stopping requirements.
- D. Sleeve Material, Size, Location, and Arrangement: Appropriate for the respective application.

## PART 2 – PRODUCTS

### 2.01 SLEEVE MATERIALS

- A. One of the following as specified in Part 3 for respective location:
  - 1. Steel Sheet-Metal: 24 gage or heavier, galvanized sheet metal, round tube closed with welded longitudinal joint.
  - 2. Steel Pipe: ASTM A 53, Type E, Grade A, Schedule 40, galvanized, plain ends.
  - 3. "Wall Pipes": Cast or fabricated equivalent to ductile-iron pressure pipe, having plain ends and integral water stop, except where other features are specified.
  - 4. Cast Iron Sleeve Fittings: Commercially-made, sleeve having integral clamping flange, with clamping ring, bolts, and nuts for membrane flashing.

### 2.02 FABRICATION TOLERANCES

- A. Pipe Sleeve Size: Large enough to allow for movement of pipe due to expansion and contraction; large enough for pipe insulation to pass continuous through sleeve where pipe is insulated; large enough to provide ¼ inch annular clear space between sleeve and pipe or pipe insulation.
- B. Coordinate sleeve size with respective fire stopping arrangement, seal, etc, as required for respective installation.

### 2.03 MECHANICAL SLEEVE SEAL

- A. Consist of interlocking links shaped to continuously fill annular space between pipe and sleeve; molded of synthetic rubber material suitable for a temperature range of – 40 deg.F. to 250 deg. F. secured in place by bolted pressure plates which expand links between pipe and sleeve as manufactured by Thunderline Corp. "Link-Seal".

## PART 3 – EXECUTION

### 3.01 APPLICATION OF PIPE SLEEVES

- A. Interior Locations: Provide pipe sleeves for pipes which pass through concrete and masonry walls, gypsum-board partitions, concrete floor and roof slabs, and where indicated, unless specifications or notes on Drawings specifically state that sleeves are not required for a particular installation:
  - 1. Sleeve Materials:
    - a. Steel Pipe Sleeves: For pipes smaller than 6 inches
    - b. Steel Sheet-Metal Sleeves: For pipes 6 inches and larger and pipes penetrating gypsum-board partitions.
    - c. Sleeve Fittings: For floors having membrane waterproofing. Secure flashing between clamping flanges. Install section of cast-iron soil pipe to extend sleeve to 2 inches above finished floor.

22 05 30  
PIPE SLEEVES

2. Cut sleeve length to be flush with both surfaces, except sleeves through floors of mechanical equipment areas and other wet areas shall be equipped with floor leak plate and arranged to extend 2 inches above finished floor.
  - B. Above Grade, Exterior Wall, Pipe Penetrations: Seal penetrations using sleeves and mechanical sleeve seals. Size sleeve for 1-inch annular clear space between pipe and sleeve for installation of mechanical seals.
    1. Install steel pipe for sleeves smaller than 6 inches.
    2. Install "wall pipes" for sleeves 6 inches and larger.
    3. Assemble and install mechanical seals according to manufacturer's printed instructions.
  - C. Below Grade, Exterior Wall, Pipe Penetrations: Install "wall pipes" for sleeves. Seal penetrations using mechanical sleeve seals. Size sleeve for 1-inch annular clear space between pipe and sleeve for installation of mechanical seals. Assemble and install mechanical seals according to manufacturer's printed instructions.
- 3.02 INSTALLATION OF SLEEVES
- A. Build sleeves into new floors, walls, etc., as work progresses. Coordinate with appropriate trades to ensure proper location and size for installation. Correcting omissions shall be the full responsibility of Division 22 Contractor.

END OF SECTION 22 05 30

## PART 1 - GENERAL

### 1.01 SUMMARY

- A. Section includes following mechanical identification materials and devices to complement Section 220500 "Basic Plumbing Materials and Methods": Applicable provisions of Section 220500 govern Work of this Section.
  - 1. Equipment Nameplates.
  - 2. Piping System Labeling and Identification.
  - 3. Valve Tags, Identification, and Schedules.
  - 4. Equipment Labeling and Identification.
- B. Provide specified identification for respective installations.
- C. Underground Piping Identification Tape is specified in Section 22 05 01.
- D. Mechanical painting provisions related to plumbing identification are included in Division 09 Finishes and Section 22 05 02.

### 1.02 SUBMITTALS

- A. Submit descriptive data and samples of identification materials and products to be installed on this Project. Include specific label wording, lettering style, and other graphic representation for respective applications.
- B. Submit valve schedules for each piping system. Furnish extra copies (in addition to mounted copies) in Maintenance Manuals specified in Division 01 Section 01 77 00 "Project Closeout".

### 1.03 QUALITY ASSURANCE

- A. Comply with ASME (American Society of Mechanical Engineers) A13.1 Scheme for the Identification of Piping Systems for lettering size, length of color field, colors, and viewing angles of identification devices.
- B. Location of identification devices for equipment in finished spaces shall be approved by A/E/D.

### 1.04 SEQUENCING AND SCHEDULING

- A. Coordinate installation of identifying devices after completion of covering and painting where devices are applied to respective surfaces. Install identifying devices prior to installation of acoustical ceilings and similar concealment.

## PART 2 – PRODUCTS

### 2.01 IDENTIFYING DEVICES AND LABELS, GENERAL

- A. Utilize manufacturer's standard products of categories and types required for each application as referenced herein and in respective equipment or system Section. Where more than a single type is specified for listed application, selection is Installer's option, but a single selection shall be provided for each category.
- B. Lettering and Graphics: Coordinate names, abbreviations, and other designations used in mechanical identification, with corresponding designations indicated. Use numbers, letters and terms indicated for proper identification, operation, and maintenance of mechanical systems and equipment.

### 2.02 EQUIPMENT NAMEPLATES

- A. Respective Manufacturer: Permanently fasten metal nameplate to equipment, engraved or stamped with data.

22 05 53  
PLUMBING IDENTIFICATION

- B. Data: Manufacturer, product name, model number, serial number, capacity, operating and power characteristics, labels of tested compliances, and essential data.
- C. Location: Accessible and visible.

2.03 STENCILS

- A. Standard stencils with letter size conforming to ASME A13.1
- B. Minimum Letter Height: 1-1/4-inches for ducts, 3/4-inch for access door signs and similar operational instructions.
- C. Stencil Material: Brass or fiberboard.
- D. Stencil 1 Paint: Exterior, oil 1 -based alkyd enamel; colors according to ASME 13.1, except where indicated otherwise.
- E. Stenciled Lettering: Coordinated with corresponding specification and Drawing designation terms, approved by A/E/D.
- F. Stenciled Arrows: Arranged to indicate direction of flow.

2.04 PIPE MARKERS

- A. Markers: Manufacturer's standard pre-printed, color coded; conform to ASME A13.1; one of the following:
  - 1. Semi-rigid snap-on.
  - 2. Pressure-sensitive vinyl, with permanent adhesive.
- B. Pipes Smaller Than 6 Inches (including insulation): Full-band marker, extending 360 degrees around pipe at each location.
- C. Lettering: Manufacturer's standard pre-printed terms, selected by A/E/D.
- D. Arrows: Either integral with system service lettering or a separate unit, arranged to indicate direction of flow.

2.05 ENGRAVED PLASTIC-LAMINATE SIGNS

- A. Signs: ASTM D 709, Type I, cellulose, paper-base, phenolic-resin-laminate engraving stock; Grade ES-2, black surface, black phenolic core, with white (letter color) melamine subcore, except where other colors are indicated. Fabricate in sizes required for message. Provide holes for mechanical fastening.
- B. Engraving: Standard letter style, of specified sizes and with terms to match equipment identification.
- C. Thickness: 1/16-inch, for units up to 20 square inches or 8-inches length; 1/8-inch for larger units.
- D. Fasteners: Self-tapping stainless steel screws or contact type permanent adhesive.

2.06 EQUIPMENT SIGNS

- A. Equipment Signs: Engraved plastic-laminate signs; white with black lettering.
- B. Terminology: Following, matching schedules as closely as possible:
  - 1. Name and plan number.
  - 2. Equipment service.

2.07 PLASTIC TAPE

- A. Tape: Manufacturer's standard vinyl, color-coded, pressure-sensitive, self-adhesive, at least 3-mils thick.

PLUMBING IDENTIFICATION

- B. Width: 1-112 inches on pipes with outside diameters (including insulation) less than 6 inches; 2-112 inches for larger pipes.
- C. Color: Per ASME A13.1, except where indicated otherwise.

**2.08 VALVE TAGS**

- A. Tags: Stamped or engraved with 1/4-inch letters for piping system abbreviation and 1/2-inch sequenced numbers; have hole for fastener.
- B. Material: 19 gage brass or 0.032-inch thick aluminum.
- C. Size: 1-1/2-inch minimum, except where indicated otherwise.
- D. Tag Shape: Different distinctive shape for each respective system, approved by A/E/D.
- E. Tag Fasteners: Brass or stainless steel wire link or bead chain.

**2.09 ACCESS PANEL MARKERS**

- A. 1/16-inch thick engraved plastic-laminate, with abbreviated terms and numbers corresponding to concealed item; 1/8-inch center attachment hole.

**2.10 VALVE SCHEDULES**

- A. Reproduce valve schedules for each piping system on standard-size bond paper. Tabulate valve number, piping system, system abbreviation (as shown on tag), location of valve (room or space), and variations for identification. Mark valves intended for emergency shutoff and similar special uses.

**PART 3 – EXECUTION****3.01 LABELING AND IDENTIFYING PIPING SYSTEMS**

- A. Install pipe markers on each system. Use one type of marker throughout. Include arrows showing normal direction of flow.
- B. Stenciled Markers: Painted on painted color-coded bands or rectangles.
  - 1. Lettering size, length of color field, and colors per ASME A13.1.
  - 2. Paint color-coded bands on pipe smaller than 6-inches..
- C. Plastic Markers: Applied by one of the specified methods.
  - 1. Fasten markers on pipes smaller than 6-inches by one of following methods:
    - a. Snap-on application of pre-tensioned semi-rigid plastic pipe marker.
    - b. Adhesive lap joint in pipe marker overlap.
    - c. Laminated or bonded application of pipe marker to pipe (or insulation).
    - d. Taped to pipe (or insulation) with color-coded plastic adhesive tape, not less than 3/4-inch wide, lapped 1-1/2-inches minimum at both ends of pipe marker, and covering full circumference of pipe.
- D. Locate pipe markers and color bands as follows wherever piping is exposed in finished spaces, machine rooms, accessible maintenance spaces (shafts, tunnels, plenums) and exterior non-concealed locations.
  - 1. Near each valve and control device.
  - 2. Near each branch connection, excluding short take-offs for fixtures and terminal units. Mark each pipe at branch, where flow pattern is not obvious.
  - 3. Near penetrations through walls, floors, ceilings, or where entering non-accessible enclosures.

PLUMBING IDENTIFICATION

4. At access doors, manholes, and similar access points that permit view of concealed piping.
5. Near major equipment items and other points of origination and termination.
6. Spaced at a maximum of 50-feet intervals along each run. Reduce intervals to 25-feet in congested areas.
7. On piping above removable acoustical ceilings, except omit intermediately spaced markers.

**3.02 LABELING AND IDENTIFYING VALVES**

- A. Install valve tag on valves and control devices in piping systems, except check valves, valves within factory-fabricated equipment units, plumbing fixture supply stops, shut-off valves, faucets, convenience and lawn watering hose bibbs, and HVAC terminal devices and similar roughing-in connections of end-use fixtures and units. List tagged valves in valve schedules.
- B. Provide access panel markers for valves concealed behind access panels and above lay-in ceiling. Locate markers on access doors and ceiling T-bars.

**3.03 LABELING AND IDENTIFYING EQUIPMENT**

- A. Provide identification signs on all primary equipment (boilers, pumps, heat exchangers, etc.).
- B. Lettering Size: Minimum 1/4-inch for name of unit where viewing distance is less than 2-feet, 1/2-inch for distances up to 6-feet, and proportionately larger lettering for greater distances. Provide secondary lettering 2/3 to 3/4 of size of principal lettering.
- C. Optional Sign Types: Stencil signs may be provided in stead of engraved plastic, at Installer's option, where lettering larger than 1-inch high is needed for proper identification because of distance from normal location of required identification.
- D. Terms on Signs: In addition to name of identified unit, distinguish between multiple units; indicate operational requirements, indicate safety and emergency precautions, and warn of hazards and improper operations.
- E. Provide access panel markers where equipment to be identified is concealed above acoustical ceiling, behind access panel, or similar concealment.

END OF SECTION 22 05 53

22 07 00  
PLUMBING INSULATION-GENERAL.

PART I - GENERAL

1.01 SUMMARY

- A. Section includes general provisions common to mechanical insulation work.
- B. Applicable general provisions in this Section govern insulation work the same as if repeated in respective complementary Sections.
- C. Provide materials, transportation, labor, and services and insulate respective mechanical work in compliance with provisions herein and in respective system and equipment Insulation Sections and in compliance with notes on Drawings.
- D. Fire stopping provisions in Section 22 05 00 and Division 07 govern fire stopping at mechanical work penetrations of fire resistive and fire rated construction.

1.02 REFERENCES

- A. Following standards form a part of mechanical insulation specifications to the extent indicated by references made thereto:
  - 1. American Society of Testing Materials (ASTM).
  - 2. Underwriters' Laboratories (UL).

1.03 SUBMITTALS

- A. Submit product data for insulation, jackets, coverings, adhesives, sealants, cements and other materials to be installed on this Project. List materials and thickness for each service application.
- B. Provide shop and installation drawings of field fabricated covers. Samples of products may be required at A/E/D's request.

1.04 QUALITY ASSURANCE

- A. Applicator: A company specializing in, and experienced in mechanical equipment and systems insulation application. (Insulation Contractor)
- B. Fire Performance Characteristics: Insulation, facings, cements, and adhesives shall have 25/50 maximum flame spread/smoke developed rating in accordance with ASTM E84, except insulation outside may be rated 75/150 maximum. Insulation shall be tested by and bear label of U.L. or other testing organization acceptable to authority having jurisdiction.

1.05 DELIVERY, STORAGE, AND HANDLING

- A. Store products in unopened factory packaging.
- B. Protect adhesives, mastics, cements, etc., from freezing.
- C. Protect insulating materials from moisture.

1.06 ENVIRONMENTAL REQUIREMENTS

- A. Ambient temperatures and conditions during installation operations, and curing period when applicable, shall comply with manufacturer's requirements for respective product (adhesives, mastics, insulation cements, etc.).

PART 2 – PRODUCTS

2.01 MANUFACTURERS

- A. Referenced or listed in respective complementary Insulation Section.

2.02 MATERIAL

- A. Specified in respective complementary Insulation Section.

22 07 00  
PLUMBING INSULATION-GENERAL.

2.03 INSULATION SCHEDULE

A. Pipe

SERVICE	MATERIAL	JACKET
Domestic Hot & Cold Water 1 ¼" to 4"	½" thick. 3 ½ lb. fiberglass 1' thick 3 ½ lb. fiberglass	ASJ
Roof Drains	1" thick. 3 ½ lb. fiberglass	ASJ
Refrigerant Lines	Foamed plastic Armaflex per manufacture's recommendations	None

\* ASJ = All Service Jacket – fire resistant white craft paper, glass reinforcing and aluminum foil.

PART 3 - EXECUTION

3.01 EXAMINATION AND PREPARATION

- A. Before installing insulation, verify that respective work to be insulated is complete, has been tested and cleaned, and is ready to be insulated. Use tarpaulins or other coverings to protect equipment, uncovered piping, ductwork, etc. from dirt and rubbish which may be caused by insulation installation operations.
- B. Prior to starting insulation installation operations and while performing work, verify that environmental conditions are within manufacturer's recommendations for sealants, tapes, and other adhesives to be used.

3.02 INSTALLATION OF INSULATION, GENERAL

- A. Insulation Work: Performed by qualified tradesmen, following manufacturer's written instructions for respective products, in compliance with applicable building codes and industry standards. (Insulation Contractor).
- B. Install insulation over clean, dry surfaces only.

END OF SECTION 22 07 00

22 07 19  
PIPING INSULATION

PART 1 – GENERAL

1.01 SUMMARY

- A. Section includes pipe external insulation, jackets, and accessories to complement Section 22 07 00 Plumbing Insulation, General and 23 07 13 Duct Insulation.
- B. Provisions of Section 22 07 00 Plumbing Insulation General govern work of this Section.

PART 2 – PRODUCTS

2.01 MANUFACTURERS

- A. Acceptable Manufacturers: Subject to compliance with requirements.
  - 1. CertainTeed Corp.
  - 2. Knauf Fiberglass GmbH.
  - 3. Manville
  - 4. Owens-Corning Fiberglas Corp.

2.02 INSULATION SCHEDULE

SERVICE	PIPE SIZE	THICKNESS	MATERIAL	JACKET
Chilled Water	All	1"	3½ lb fiberglass	ASJ
Domestic hot & cold water	½" – 1"	½"	3½ lb fiberglass	ASJ
Domestic hot & cold water	1¼" – 4"	1"	3½ lb fiberglass	ASJ
Roof Drain (Storm Water)	All	1"	3½ lb fiberglass	ASJ
Hot Water Supply & Return (Heating)	Up to 2"	1"	3½ lb fiberglass	ASJ
Hot Water Supply & Return (Heating)	2½" – 3"	1½"	3½ lb fiberglass	ASJ
Hot Water Supply & Return (Heating)	3½" up	2"	3½ lb fiberglass	ASJ
High Pressure Steam & Condensate	Up to 2"	1"	3½ lb fiberglass	Glass Cloth
High Pressure Steam & Condensate	2½" – 3"	2½"	3½ lb fiberglass	Glass Cloth
High Pressure Steam & Condensate	3½" up	3"	3½ lb fiberglass	Glass Cloth
Low Pressure Steam & Condensate	Up to 1½"	1"	3½ lb fiberglass	Glass Cloth
Low Pressure Steam & Condensate	2" to 6"	1½"	3½ lb fiberglass	Glass Cloth
Cooling Coil Condensate	All	--	flexible elastomeric	None

22 07 19  
PIPING INSULATION

PART 3 – EXECUTION

3.01 EXAMINATION, PREPARATION, AND INSTALLATION, GENERAL

- A. Governed by Section 220820 Plumbing Insulation General.

END OF SECTION 22 07 19

22 11 13  
PIPE AND PIPE FITTINGS-GENERAL

PART 1 - GENERAL

1.01 SUMMARY

- A. Section includes general use pipe, pipe fittings, and accessories common to various Mechanical piping systems and general provisions which govern piping in general, to complement Section 22 05 00.
- B. Applicable provisions of Section 22 05 00 and other Sections which complement that Section govern Work of this Section. Applicable general installation requirements, methods, and procedures in this Section govern piping work in general.
- C. Utilize basic products specified in this Section for respective applications in the various Mechanical piping systems as scheduled, referenced, or specified in respective system Sections and where indicated on Drawings. Piping generally used only for a particular system is specified in respective system Section or on Drawings for respective work. Refer to Project Manual "Table of Contents" for respective System Section numbers and titles.
- D. Requirements, methods, and procedures particular to installation of piping for individual systems are included in respective System Sections or on Drawings for respective work. Some related work is included in following Divisions and Sections:
  - 1. Pipe Sleeves - Section 22 05 30.
  - 2. Pipe Hangers and Supports - Section 22 05 29.

1.02 REFERENCES

- A. Standards and documents referenced in the text of this Section shall be the edition current at the date the Project Manual was issued.
- B. ASME (American Society of Mechanical Engineers)
  - 1. ASME B1.20.1 - Pipe Threads, General Purpose.
  - 2. ASME B16.3 - Malleable Iron Threaded Fittings, Class 150 and 300. ASME B16.4 - Cast Iron Threaded Fittings.
  - 3. ASME B16.5 - Pipe Flanges & Flanged Fittings, Steel Nickel Alloy & Other Special Alloys
  - 4. ASME B16.18 - Cast Copper Alloy Solder Joint Pressure Fitting.
  - 5. ASME B16.22 - Wrought Copper and Copper Alloy Solder Joint Fittings. ASME B16.24 - Bronze Pipe Flanges and Flanged Fittings.
  - 6. ASME B16.39 - Malleable Iron Threaded Pipe Unions.
  - 7. ASME B31 Series - Code for Pressure Piping.
- C. ASTM (American Society for Testing and Materials)
  - 1. ASTM A 47 - Ferritic Malleable Iron Castings.
  - 2. ASTM A 53 - Pipe, Steel, Black & Hot-Dipped Zinc Coated, Welded & Seamless.
  - 3. ASTM A 75 - Seamless Copper Tube.
  - 4. ASTM A 536 - Ductile Iron Castings.
  - 5. ASTM A 584 - Copper Alloy Sand Castings for General Applications.
  - 6. ASTM B 32 - Specification for Solder Metal.
  - 7. ASTM B 88 - Seamless Copper Water Tube.
  - 8. ASTM D - 26665 Schedule 40 polyvinylchloride pipe

PIPE AND PIPE FITTINGS-GENERAL

9. ASTM 1785 Schedule 80 polyvinylchloride pressure pipe

D. AWS (American Welding Society)

1. AWS A5.8 - Brazing Filler Metal.

2. AWS D10.12 - Recommended Practices and Procedures for Welding Low Carbon Steel Pipe.

### 1.03 QUALITY ASSURANCE

A. Pipe and Pipe Fittings: Suitable for respective system media, pressures involved, and environment where installed.

B. Service Class: Appropriate for respective system characteristics as indicated or required.

### 1.04 DELIVERY, STORAGE AND HANDLING

A. Deliver pipes and tubes with factory-applied end-caps. Maintain end-caps through shipping, storage, and handling to prevent pipe-end damage and prevent entrance of dirt, debris, and moisture. Protect stored pipes and tubes from moisture and dirt. Elevate above grade. When stored inside, do not exceed structural capacity of floor.

B. Protect flanges, fittings, and piping specialties from moisture and dirt. Store plastic pipes protected from direct sunlight. Support to prevent sagging and bending.

## PART 2 – PRODUCTS

### 2.01 PIPE AND PIPE FITTINGS, GENERAL

A. Pipe and Pipe Fittings: Manufactured and prepared in conformance with respective applicable standards.

B. Pipe Sizes: Sizes used in Project Documents are nominal pipe size (NPS) .

C. Piping materials and methods which are particular to individual systems are included in respective Piping System Sections or noted on Drawings.

### 2.02 STEEL PIPE AND FITTINGS

A. Black Steel: ASTM A 53, Schedule 40 or 80 as designated for respective system.

B. Galvanized Steel ASTM A 53, Schedule 40 or 80 as designated for respective system.

C. Fittings for Steel Pipe: Galvanized where used with galvanized pipe.

1. 2 Inches and Smaller: Threaded, one of the following as designated for respective application: ASME B16.4, Classes 125 and 250 cast iron, or ASME B16.3, Classes 150 and 300 malleable iron.

### 2.03 COPPER PIPE AND FITTINGS

A. Type "K" Soft Copper Pipe: ASTM B 88.

B. Type "L" Rigid Copper Pipe: ASTM B 88.

C. Type "L" Soft Copper Pipe: ASTM B 88.

D. Copper Pipe Fittings: ASME B16.22, wrought copper.

### 2.04 ALLOY PIPE AND FITTINGS

A. Alloy Pipe: Nickel copper alloy steel, equal to or exceeding ASTM A 53.

B. Welding Fittings: Nickel copper alloy steel, equal to or exceeding ASTM A 53.

C. Threaded Fittings: Malleable iron, ASME B16.3.

22 11 13  
PIPE AND PIPE FITTINGS-GENERAL

2.05 PIPE JOINTS

- A. Pipe Joints: As scheduled or specified for respective pipe material, size, and location in respective System Section; except where specified, or indicated, otherwise for particular applications.
- B. Pipe Threads: ASME B1.20.1 for factory threaded pipe and pipe fittings.

2.06 PIPE UNIONS, COUPLINGS, AND FLANGES

- A. Unions for Threaded Ferrous Pipe: ASME B16.39, Classes 150 and 300 malleable iron, ball-and-socket joint, metal-to-metal brass or bronze seat, female threaded ends.
- B. Unions for Copper Tube or Pipe: ASME B16.18, copper or bronze, with ball-and-socket joint, metal to metal seat; ends solder joint, threaded, or solder joint and threaded, as required.
- C. Couplings for Copper Tube or Pipe: ASME B16.22, wrought copper.
- D. Flanges for Copper Pipe Over 2 Inches: ASME B16.24, Classes 125 and 150, cast copper or bronze, solder joint.
- E. Flanges for Steel Pipe 2 Inch and Larger: ASME B16.5, Classes 125 and 300, raised face, forged steel butt weld neck; utilize material group 1.1 bolts, nuts, and gaskets.
- F. Polyvinylchloride pipe to be primed and solvent welded.

2.07 DIELECTRIC UNIONS AND FLANGES

- A. Pipe Sizes 2 Inch and Smaller: Bronze body unions, with water impervious isolation barrier and required combination of galvanized or plated steel threaded end(s) or copper solder end(s).
- B. Pipe Sizes 2-1/2 Inches and Larger: Forged steel butt weld flanges for ferrous pipe; bronze solder flanges for copper pipe.

2.08 SOLDER

- A. Solder: ASTM B 32, not contain more than 0.20-percent lead with potable water piping; one of the following as designated for respective application:
  - 1. Alloy Sb5, 95% tin and 5% antimony.
  - 2. Alloy Sn50, 50% tin and 50% lead.

2.09 BRAZING ALLOY

- A. Brazing Alloy: AWS A5.8; one of the following as designated for respective application:
  - 1. Alloy BCuP series, copper-phosphorus.
  - 2. Alloy BAgl, silver.

2.10 WELDING MATERIALS

- A. Welding Filler Metals: AWS D10.12, of composition appropriate for respective pipe and fitting material(s) and wall thickness.

2.11 COUPLINGS FOR GROOVED PIPE

- A. Couplings: Bolted rigid type, incorporating a synthetic rubber gasket o a central cavity pressure -responsive design in a cast metal housing designed to connect grooved end pipe, utilizing nuts and bolts to secure unit together; acceptable equivalent to Victaulic Style 07.
  - 1. Coupling Housing: Cast malleable iron conforming to ASTM A 47 ductile iron conforming to ASTM A 536, coated with alkyd enamel.

PIPE AND PIPE FITTINGS-GENERAL

2. Gasket: Molded of synthetic rubber in a central cavity, pressure responsive configuration conforming to the pipe size outside diameter and coupling housing, of elastomers having properties designated in ASTM D-2000, of following compound for respective service:
  - a. Water to 230°F: Grade "E" EPDM compound, color coded green.
  - b. Other Than Water: As recommended by coupling manufacturer.

## 2.12 SPECIALTY FITTINGS

- A. Special purpose fittings, devices, and accessories not specified or noted in Project Documents shall not be incorporated into the Work, unless approved by A/E/D prior to installation.
- B. Prohibited Branch Outlet Devices: "One Nut Outlet" devices, Victaulic Style 923 and 924 or equivalent, are not acceptable and shall not be installed in piping on this Project.

## PART 3 – EXECUTION

## 3.01 APPLICATION OF PIPE AND PIPE FITTINGS

- A. Types of pipe and fittings to be utilized in subject piping systems are scheduled or referenced in respective piping system Sections or on Drawings for respective work.

## 3.02 PREPARATION FOR INSTALLATION OF PIPING

- A. Coordinate pipe routing and locations with other pipe, ductwork, etc.
- B. Install sleeves, inserts, anchors, etc. for piping, concurrent with construction of respective building components where penetrations and attachments are required.

## 3.03 INSTALLATION OF PIPING - COMMON REQUIREMENTS

- A. Refer to respective Piping System Sections and Drawings for installation provisions particular to respective systems.
- B. Support pipe in accordance with applicable provisions of Section 22 05 29
  1. Arrange hanger spacing for grooved joint pipe in accordance with coupling Manufacturer's recommendations.
- C. Use fittings for all changes in direction and all branch connections. Make reductions in pipe sizes using eccentric reducer fittings.
- D. Provide non-conducting dielectric connections where pipes of dissimilar metals are joined.
- E. Install unions adjacent to each valve, at final connections to each piece of equipment, and elsewhere as indicated. Unions are not required with flanged connections.
- F. Fire Barrier Penetrations: Where pipes pass through fire rated walls, partitions, ceilings, floors, etc. cooperate with firestopping Installer in preparation of piping penetrations for firestopping in compliance with firestopping provisions and related requirements in Section 220500 "Basic Plumbing Materials and Methods".
- G. Route piping in an orderly manner, held level except where pitch is specified or shown on drawings. Maintain gradient of pitched lines. Provide drain valves at low points and air vents at high points.
- H. Run piping square, plumb, and free of sags or bends; as high as possible; tight to slabs, beams, joists, columns, walls, etc.; grouped at common elevation wherever practical. Provide space to accommodate insulation installations, with 1" clearance outside of insulation. Allow sufficient space above removable ceiling panels to allow for panel removal.
- I. Location and Arrangement: Drawings (plans, schematics, and diagrams) indicate size, general location, and arrangement of piping. So far as practical, install piping as indicated. If it is necessary to locate piping other than as shown, locate pipe to conserve building space,

PIPE AND PIPE FITTINGS-GENERAL

not interfere with use of space, and pass obstructions; all without extra charge. For piping located other than as shown, give consideration to pipe sizing, friction loss, expansion, pump sizing, etc. Indicated pipe size shall not be changed without written instructions from the A/E/D.

1. Arrange piping so that valves and fittings are accessible.
  2. Provide clearance for installation of insulation.
- J. Do not run piping exposed, except in equipment, utility, mechanical or similar rooms, or where so indicated on Drawings. Wherever possible, run piping concealed above ceilings, in pipe spaces, and always on the warm side of the building insulation etc. Piping shall be in place and tested before respective spaces are closed off. Pipe connections to terminal units and devices shall be run concealed.
1. Install exposed piping at right angles or parallel to building walls. Diagonal runs are not permitted, unless expressly indicated.
- K. Unrelated pipe shall not pass through hazardous areas or rooms containing liquid sensitive equipment such as electrical switchgear rooms, etc., unless another routing is not possible. An attempt was made to avoid routing piping through such spaces when drawings were prepared.
1. Route piping to avoid these types of spaces if at all possible, even if it was inadvertently shown in such location on Drawings. Prior to installation of pipe, advise A/E/D of proposed routing outside of subject area.
  2. If it is necessary to route piping through this type of area, piping shall be installed in a conduit, with welded joints, run full length of the room or area. Support pipe, centered, inside of conduit with supports that do not inhibit air movement inside conduit around pipe. Vent conduit, or each end of conduit may be left open if permitted by code. Where insulated piping passes through conduit, insulation shall be run through conduit uninterrupted.
- L. Install wells, immersion sockets, etc. furnished under the various respective Sections.
- M. Install drains at low points in mains, risers and branch lines.
- N. Clean piping. Comply with provisions for respective Piping System Section, when applicable.
- O. Provide protective finish on respective piping where required.
- 3.04 PREPARATION AND ASSEMBLY OF PIPE AND TUBE JOINTS
- A. Cut pipe and tube square and true with tools specifically designed for cutting respective product.
- B. Ream pipe and tube ends to remove burrs.
- C. Remove scale and dirt, on inside and outside, before assembly.
- D. Threaded Connections:
1. Cut all threads full and true. Piping shall make up to line.
  2. Coat threaded ends with non-toxic joint compound applied to male threads only.
  3. Make up threaded connections so that no more than two full threads are exposed at completed joint.
- E. Welded Connections: Make up by certified welders, following AWS recommendations.
1. Branch Connections: Make up with welded fittings.

PIPE AND PIPE FITTINGS-GENERAL

2. Joints: Fusion weld by experienced skilled tradesmen, using specified standard catalog product welding fittings and welding materials, following industry standard welding practices:
  3. All Pipe Ends: Bevel at 45 degrees to within 1/16 inch of inside wall. Sufficiently separate abutting edges to provide for expansion. Run welds continuous around pipe, made of sound metal, thoroughly fused into ends of pipe to bottom of "V", and built up to a depth of 1-1/4 times wall thickness.
- F. Brazed Connections: Make up by experienced skilled tradesmen, using specified standard catalog products, in compliance with procedures in AWS "Brazing Manual".
1. Solder joints will not be accepted where brazed joints are specified
  2. Perform work in accordance with Copper Development Association Copper Tube Handbook.
  3. Do not use more heat than is required to ensure a sound joint. Burned valve bodies, fittings, pipe, etc., will not be accepted.
- G. Soldered Connections: Make up by experienced skilled tradesmen, using specified standard catalog products, in compliance with procedures in AWS "Soldering Manual". Copperized flux soldering methods and materials may be used for joints in water lines operating at 250OF or less.
1. Solder used for potable water piping shall not contain more than 0.20 percent lead.
  2. Do not use solder joints where brazed joints are specified.
  3. Take special care to ensure that pipe is not forced out of round during cutting. Surfaces to receive solder shall be cleaned bright with emery cloth.
  4. Do not use more heat than is required to ensure a sound joint. Burned valve bodies, fittings, pipe, etc., will not be accepted.
- 3.05 APPLICATION OF PIPE UNIONS, FLANGES, AND ADAPTERS
- A. Unions or Flanges: Provide downstream of valves, at equipment or apparatus connections, and where shown on Drawings.
  - B. Flanges: Provide as specified for respective system and pipe size and in welded piping systems where piping connects to equipment and devices.
  - C. Dielectric or Cast Bronze Unions: Provide where pipes of different metals are joined.
  - D. Brass Male Adapters: Provide on each side of valves in copper pipe.
- 3.06 APPLICATION OF COUPLINGS FOR GROOVED PIPE
- A. Utilize grooved pipe couplings where indicated in system specifications on Drawings, or where acceptable as Contractor's option.
  - B. Contractor Option: In lieu of welded, threaded, and flanged joints, water piping systems operating at from 30F. to 230F. may, if indicated in system specifications, as Contractor option, be installed using grooved piping system couplings and full flow fittings manufactured by Victaulic Company of America or acceptable equivalent.
- 3.07 INSTALLATION OF MECHANICAL PIPE COUPLINGS FOR GROOVED PIPE
- A. Pipe and Tube Preparation and Assembly: In accordance with coupling manufacturer's applicable published instructions.
  - B. Check pipe and tube preparation to ensure that it is in accordance with coupling manufacturer's preparation standards (e.g., sufficiently free of imperfections, ends are square cut, etc.).

22 11 13  
PIPE AND PIPE FITTINGS-GENERAL

- C. Check gasket style and elastomeric material grade to be certain gasket supplied is suitable for intended service.
- D. Lubrication: Always use manufacturer approved lubricant for proper coupling/fitting assembly.

3.08 TESTING

- A. Before concealed piping spaces are closed off and before buried piping is covered, test respective piping systems in compliance with respective system specifications.

3.09 CLEANING PIPING

- A. Clean and flush piping systems. Remove, clean, and replace strainer screens.
- B. As a minimum, flush piping to remove oil and foreign material (metal cuttings, joint compound, etc.). Utilize detergent or appropriate chemicals as required.
- C. When applicable, perform cleaning operations specified in respective Piping System Section.

3.10 CLEANING PIPE EXTERIOR

- A. Clean oil, joint compound, etc. from installed piping systems.
- B. Clean piping that is to be field painted with appropriate chemicals or detergent as preparation for painting. Division 9 Section "Painting."

3.11 IDENTIFICATION

- A. Provide identification on respective piping, where applicable.

END OF SECTION 22 11 13

Blank Page

221116  
DOMESTIC WATER PIPING

PART 1 – GENERAL

1.01 SUMMARY

- A. Section includes provisions for potable water distribution piping system, including domestic cold and hot water supply.
- B. Basic materials and plumbing products for Interior Domestic Water System are specified in the following Sections:
  - 1. 22 05 29 Pipe and Equipment Supports and Anchors
  - 2. 22 11 19 Piping Specialties, General
- C. Utilize basic materials and products specified in respective Sections as scheduled for respective applications at end of this Section.
- D. Install products as specified in respective Sections and herein:
- E. Disinfection of piping system is included in Section 22 11 17.
- F. Exterior Water Distribution System is specified in Division 33.

1.02 SYSTEM DESCRIPTION

- A. Interior domestic water piping system includes all respective piping inside the building.

1.03 SUBMITTALS

- A. Submit record drawings in accordance with requirements in Division 01 Section 01 77 00 "Project Closeout" and Section 22 05 01 "General Plumbing Requirements."

1.04 QUALITY ASSURANCE

- A. Conform to requirements of regulatory agencies, as called for in General Conditions.
- B. Installation shall comply with applicable requirements of governing agencies, including but not limited to the following:
  - 1. Indiana State Board of Health
  - 2. Local Regulatory Agency
  - 3. Local Water Utility

PART 2 – PRODUCTS

2.01 INTERIOR DOMESTIC WATER PIPING, GENERAL

- A. Piping, Pipe Fittings and Joints: Specified in Section 22 11 13 and scheduled in Part 3 of that Section.

2.02 GENERAL DUTY VALVES

- A. Specified in Section 22 05 23.
- B. Duty and Pressure/Temperature Classification: Scheduled in Part 3 of this Section.

PART 3 – EXECUTION

3.01 PREPARATION AND ASSEMBLY OF JOINTS

- A. Prepare and assemble pipe and fittings in accordance with applicable requirements in Section 22 11 13 Pipe and Pipe Fittings General.

3.02 INSTALLATION OF INTERIOR DOMESTIC WATER PIPING SYSTEM

- A. Applicable requirements in Section 22 05 00 govern piping installations in general. Requirements herein are in addition to those requirements and shall have precedence over similar general requirements.

221116  
DOMESTIC WATER PIPING

- B. Interface With Exterior Water Distribution System: Coordinate elevations of respective underground piping with outside piping to ensure cover not less than specified Division 33.

3.03 VALVE APPLICATIONS

- A. General Duty Valves: Where specific valve types are not indicated on Drawings or specified, provide respective application general duty valves specified in Section 22 05 23 and scheduled in Part 3 of that Section.
- B. Sectional Valves: Install close to main at each branch and riser serving two or more plumbing fixtures or equipment connections and where indicated.
- C. Shutoff Valves: Install on inlet to each plumbing equipment item, on each supply to each plumbing fixture not having stops on supplies and where indicated.
- D. Drain Valves: Install on each plumbing equipment item, located to drain equipment for service or repair; at base of each riser; at low points of horizontal runs; and where required to drain water distribution piping system.

3.04 ROUGH-IN OF FIXTURE AND EQUIPMENT SERVICE CONNECTIONS

- A. Provide rough-in and final connections as indicated on Drawings or required..
- B. Obtain dimensioned shop drawings from equipment suppliers before performing roughing-in for equipment.
- C. Stub rough-in piping out three inches from finished building surfaces. Temporarily plug and cap piping until equipment is ready for final connections.

3.05 TESTING DOMESTIC WATER SYSTEMS

- A. Before piping is built-in, test Domestic Water Systems hydrostatically at 100 PSIG for six (6) hours.
- B. System will be considered satisfactory only if there is no loss of water or leakage for duration of test period.

3.06 CLEANING AND DISINFECTION OF DOMESTIC WATER PIPING SYSTEM

- A. Before water system is turned over for use, clean and flush system, and disinfect entire system in accordance with provisions in Section 22 11 17.

3.07 IDENTIFICATIO

- A. Provide identification specified in Section 22 05 53.

END OF SECTION 22 11 16

22 11 17  
DISINFECTION OF DOMESTIC WATER PIPING

PART 1 – GENERAL

1.01 SUMMARY

- A. Section includes provisions for disinfection of potable water distribution piping system.
- B. Prior to use, clean and disinfect new potable water distribution systems and parts of existing potable water systems that have been involved in the work (altered, extended, repaired, etc.). Ensure that entire system is disinfected prior to use.

1.02 SUBMITTALS

- A. Furnish to A/E/D a certificate stating disinfection was conducted in accordance with specifications and all authorities. Provide water sample analysis report from Board of Health.

1.03 QUALITY ASSURANCE

- A. Disinfection shall comply with applicable requirements of governing agencies, including but not limited to the following:
  - 1. Indiana State Board of Health
  - 2. Local Regulatory Agency
  - 3. Local Water Utility

1.04 EXTRA DISINFECTION

- A. If domestic water piping is modified or extended after disinfection has been performed, clean and disinfect portions that have been modified or added and submit certification and analysis report(s) for respective portions.

PART 2 – NOT USED

PART 3 – EXECUTION

3.01 EXAMINATION

- A. Prior to starting disinfection operations, verify that domestic water piping system has been completely installed.

3.02 PREPARATION

- A. Test, clean, and flush all system piping prior to starting disinfection operations.

3.03 POSTING OF SIGNS

- A. Post warning signs at each outlet and fixture prior to starting disinfection and keep signs in place during disinfecting period.
- B. Signs: Clearly warn that water should not be drawn or consumed.

3.04 DISINFECTION PROCEDURE

- A. Entire system may be disinfected at one time or system may be disinfected in parts, in a manner that will ensure entire system is disinfected.
- B. Introduce chlorine solution through gravity injection or suitable pump feeder at the meter of at least 50 parts per million strength for 24 hours; 100 parts per million for 12 hours; 200 parts per million for 6 hours.
- C. Open faucets, hydrants, etc. at fixtures and ends of branches until solution is distributed throughout entire system and is obtained at all outlets, faucets, fixtures, hydrants, etc. Obtained ppm shall be approximately the same as injected.
- D. Solution shall stand in system for 8 hours or more and then be flushed out of all lines until not over .2 ppm residual remains.

DISINFECTION OF DOMESTIC WATER PIPING

3.05 TESTS

- A. After disinfecting and final flushing, several samples from various ends of lines shall be drawn and submitted for testing by State Board of Health, local health authority or an independent laboratory approved by Board of Health.
- B. Repeat sampling and testing three times at 24 hour intervals. Repeat disinfection until findings of all three tests are satisfactory and approved in writing by Board of Health.

END OF SECTION 22 11 17

## PART 1 – GENERAL

### 1.01 SUMMARY

- A. Section includes escutcheons, strainers, and pressure relief valves to complement Section 220500. Applicable provisions of Section 22 05 00 govern work of this Section.
- B. Utilize basic products specified in this Section for respectable applications in the various Mechanical piping systems and where indicated on Drawings, unless a special purpose specialty is specified or indicate for a particular application.
- C. Specialties and accessories generally used only in particular Mechanical piping systems are specified in respective System or Specialties Section or on Drawings for respective work.
- D. Plumbing Specialties and Accessories are specified in Section 22 05 25. Hydronic Valves, Specialties, and Accessories are specified in Section 22 05 23.

### 1.02 REFERENCES

- A. ASME Boiler and Pressure Vessel Code.

### 1.03 DELIVERY, STORAGE, AND HANDLING

- A. Deliver products to site, properly store, and protect under provisions of Section 22 05 00.

### 1.04 OPERATING AND MAINTENANCE DATA

- A. Submit operating and maintenance data for respective specialties and accessories.

### 1.05 QUALITY ASSURANCE

- A. Specialties and Accessories: Suitable for respective system media and pressures involved; comply with respective applicable ASTM Standards.

### 1.06 EXTRA MATERIALS

- A. Service Parts: Provide to Owner, in factory sealed containers, service parts specified with respective products. Clearly identify service parts with part number and related product name, catalog number, project designation, etc.

## PART 2 – PRODUCTS

### 2.01 MANUFACTURERS

- A. Acceptable Manufacturers: Subject to compliance with requirements; listed with respective products
- B. Reference Product(s): Named in respective product specification.

### 2.02 PIPE ESCUTCHEONS

- A. Manufactured wall, ceiling, and floor plates; cast brass, polished chromium plated, with set-screw; deep-pattern type, where required to conceal protruding fittings and sleeves.
- B. Inside Diameter: Closely fit around pipe, tube, and insulation of insulated piping.
- C. Outside Diameter: Completely cover opening.
- D. One piece design for piping to plumbing fixtures and to equipment in finished spaces.
- E. Split, concealed hinge type for piping not serving plumbing fixtures or equipment in finished spaces.

### 2.03 WATER RELIEF VALVES

PIPING SPECIALTIES-GENERAL

- A. Designed, manufactured, tested and labeled in accordance with requirements of Section IV of the ASME Boiler and Pressure Vessel Code; rated for 125 psig working pressure and 250 degrees F maximum operating temperature; ASME certified and labeled.
  - 1. 1-1/4 Inch and Smaller: All bronze threaded constructions; equipped with stainless steel seats and discs, stainless steel spring, and all bronze hardware.
- B. Select valve to suit actual system pressure and BTU capacity, sized and set to pressure indicated on drawings.
- C. Acceptable Manufacturers:
  - 1. ITT Bell & Gossett
  - 2. Fisher Controls International, Inc.
  - 3. Taco, Inc.
  - 4. Watts Regulator Co.

## PART 3 – EXECUTION

## 3.01 PIPING SPECIALTIES AND ACCESSORIES INSTALLATION, GENERAL

- A. Installed piping specialties and accessories shall be fully accessible without removing building components, equipment, etc. Provide access panels for specialties and accessories no accessible through lift-up ceiling tile or other acceptable means.

## 3.02 APPLICATION OF PIPE ESCUTCHEONS

- A. Provide escutcheons on exposed piping that passes through walls, floors, ceilings, and partitions in finished spaces and mechanical and electrical equipment rooms.
- B. Provide escutcheons on both sides of walls and partitions, except in concealed spaces.

## 3.03 APPLICATION AND INSTALLATION OF RELIEF VALVES.

- A. Provide relief valves on pressure tanks, low pressure side of pressure reducing valves, heat exchangers, compression tanks, where required by applicable code (s), and where indicated on Drawings.
- B. Relief Valve Capacity:
  - 1. System Relief Valve: Capacity greater than makeup water pressure reducing valve capacity.
  - 2. Equipment relief Valve: Capacity that exceeds rating of respective connected equipment.
- C. Pipe relief valve discharge, full size of outlet, to nearest floor drain, arranged to prevent damage to furnishings and injury to personnel.

END OF SECTION 22 11 19

22 42 00  
PLUMBING FIXTURES AND TRIM

PART 1 – GENERAL

1.01 QUALITY ASSURANCE

- A. All units of each individual type of item must be from one manufacturer.

PART 2 – PRODUCTS

2.01 TRIM AND ACCESSORIES

- A. Carriers must be specifically designed for the fixture supported and appropriate for the installation.
- B. Shut off valves are to be chrome plated with wheel handles and supplies to fixtures are to be chrome plated and flexible with stop valves, threaded nipples and escutcheons at wall or floor.
- C. Traps for fixtures are to be chrome plated, 17 gauge adjustable ground joint swivel pattern P-Trap with cleanout, tube outlet with chrome plated escutcheon at wall or floor. In general all exposed hardware and trim to be chrome plated. Traps are to be insulated per ADA where appropriate.
- D. Faucet trim must have a removable operating unit or cartridge consisting of all wearing parts complete with seat.
- E. Water closet seats, unless otherwise specified on the construction drawings, are to be white plastic, open front equipped with check hinges as manufactured by Olsonite # 95.

2.02 PLUMBING FIXTURES

- A. The following American Standard or Zurn Plumbing fixtures are to be used:
1. Water Closets Aftwall (wall mounted) are to be with top spud for flushvalve, 4 bolt hole, siphon jet elongated bowl # 3351.001 1.6 gpf. Install ADA bowl at 18" above floor. All other bowls 15" above floor. (White) Seat to be open front white plastic as Olsonite # 95. (White) or Zurn #Z 5615.213.01 EcoVantage 1.28 gpf wall hung top spud flushvalve system with open S.S. Hinged seat. (White)
  2. Urinals Allbrook (wall mounted) top spud low consumption .7 gpf as #6541.132 (White) with wall hanger or Zurn #Z5798 .125 gpf EcoVantage system.
  3. Lavatories Murro (wall mounted) are to be 22"X 21 1/4" X W , with 4"center faucet holes # 0954.000 with knee shroud # 0059.020. Top of front rim mounted 34" above floor. Concealed arm supports. (White) or Zurn # Z5324-PED 23"x20" with #Z8946-3-NT trap protector. (White). Both with wall carriers.
  4. Lavatories Aqualyn (counter top) are to be 20"X 17"X5 7/8" deep, with 4"center faucet holes # 0476.028. (White) or Zurn #Z5114 23"x 20" (White) or Zurn #Z5114 23"x20" (White)
  5. Kitchenette Sinks are to 18 gauge stainless steel 20"X17"X10 1/2" deep with 4"center faucet holes "Just" # SLX-2017-A-GR.
  6. Water Closets Madera (ADA floor mounted) flush valve with elongated bowl,# 3043.102, 1.6 gpf, rim 17 1/4" above floor. (White) Seat to be open front white plastic as Olsonite # 95. (White) or Zurn #5665 1.28 gpf HET series. (White).
  7. Water Closets Champion (ADA floor mounted) tank type with elongated bowl # 2002.014 Chamion 4 1.6 gpf, rim 16 1/2" above floor. (White) Seat to be open front plastic as Olsonite # 95. (White)
  8. Water Closets Aftwall (ADA wall mounted retrofit) are to be where applicable, flush valve with elongated bowl, # 2294.011, 1.6 gpf, rim 16 1/2" above floor. (White) Seat to be open front white plastic as Olsonite # 95. (White)

22 42 00  
PLUMBING FIXTURES AND TRIM

9. Kitchen Sinks are to be 18 gauge stainless steel 19"X 33"X 7 ½" deep with 8" center faucet holes "Just" DL – 1933-A-GR double bowl.
10. Wheelchair Showers (ADA ) are to be nominal 62"L x 36"D x 74 7/8"H white "Lasco" 1603-BFST acrylic units with folding seat, hand held spray with adjustable height mounting bar, L- shaped grab bar and chrome curtain rod.
11. Private Showers are to be nominal 36" x 36" x 72"H white "Lasco" 1363 – 2P acrylic unit with aluminum framed shower doors.
12. Electric Water Cooler (ADA dual unit) are to be UL listed and rated for 80 deg. F. inlet, 90 deg. F. ambient, 50 deg. F. drinking water at 8 gph capacity. Unit to have a hermetically sealed compressor, 115 volt wired or plugged into a GFI circuit, self closing adjustable angle bubbler, 17 ga. tube trap with cleanout, angle valve and 3/8" flexible supply, lead out filter inside cabinet with stainless tops and adjustable water temperature as manufactured by "Halsey Taylor" # HAC8 BL-Q.
13. Wall Mounted Laundry/Utility Sink "Mustee" Utilatub 16 molded utility sink. 12 gal capacity or Zurn #M 2620-W. Provide strainer, cleanable trap and hanger.
14. Floor Mounted Mop Sink "Swanstone" MS -2424 24" x 24" fiberglass with removable stainless steel strainer.

2.03 STRAINERS

- A. Strainers must be "Y" pattern and full line size with stainless steel screens with 3/64" perforations, rated at 125 PSI working pressure and have a centered blow-down.

2.04 FLOOR DRAINS

- A. Finished Areas
  1. Drain to be same size as connected piping.
  2. Epoxy coated cast iron body with anchorage flange, weep holes, seepage collection sump and 1/2" polished nickel bronze strainer as "Watts" # FD – 200 or Zurn #Zn415. Trap by contractor in piping.
- B. Utility, Mechanical, Equipment Rooms and Unfinished Areas
  1. Drain to be same size as connected piping (minimum 3")
  2. Cast Iron body, caulked outlet, flashing clamp, and cast iron hinged square grate inlet. Trap to have removable sediment bucket as "J.R. Smith" 2425 flanged.
- C. Trap Seal Primers are to be installed where called for on the construction drawings. Piping and valve location is to be determined by contractor and approved by A/E/D /ISU. Valve to be as manufactured by Precision Products Inc.

2.05 FLOOR CLEANOUTS

- A. Finished Areas
  1. Cleanout to be same size as connected piping.
  2. Round scoriated cover screwed to a cast iron body. Cover to be satin nickel bronze as "Watts" CO-100 or equivalent by Zurn. Use tile or carpet covers as required.

2.06 DOMESTIC WATER HEATERS

- A. Electric Water Heater
  1. Capacity, voltage and wattage as specified on construction drawings.
  2. Heater to be glass lined steel tank, factory insulated, UL approved suitable for 300psi test and 150psi working pressure, utilizing two (2) heating elements, di-electric nipples, have

22 42 00  
PLUMBING FIXTURES AND TRIM

sacrificial anodes and have ASME temperature relief valve. Unit as Manufactured by "A.O. Smith" or "Lochinvar" high efficiency series.

B. Gas Fired Water Heater

1. Capacity, flue size, combustion air requirements and fuel type as specified on construction drawings.
2. Heater to be glass lined steel tank, factory insulated with minimum of 2" fiberglass insulation, be approved by A.G.A. and meet or exceed ASHRAE Standard 90 for high efficiency. Heater must be suitable for 300 psi test and 150 psi working pressure, utilizing di-electric nipples and ASME temperature relief valve. Unit as manufactured by "A.O. Smith" or "Lochinvar" high efficiency series.

C. Controls and Warranty

1. Water heaters must be complete with all thermostatic and safety controls and have a complete 5 year warranty.

D. Tank Construction Rating

1. Heaters with 65 gal. holding capacity or larger or have a burner rating above 199,999 BTU must have an ASME rated tank.

2.07 WALL HYDRANTS

- A. Recessed bronze box with chrome plated face, locking cover, bronze non-freeze hydrant and casing, hose connector with vacuum breaker, "T" handle key "WATER" cast on the cover as manufactured by Smith # 5509 or equivalent by Zurn.

2.08 PLUMBING TRIM

- A. Water Closets "Sloan Royal" # 111 with dual filtered by pass, 1 ½" flush valve mounted 18" above water closet with a Sloan side mounted battery operated flush #EBV-89-M with courtesy flush button or Zurn #ZTS6200EV.
- B. Urinals (other than self contained units) "Sloan Royal" # 186.1 top spud ¾" flush valve with a Sloan side mount battery operated flush unit # EBV-89-M with courtesy flush button, American Standard #6063.051 Selectronic FloWise flush valve .5 gpf with manual flush option or Zurn # ZER6003AV.
- C. Lavatories "American Standard" Heritage series faucet # 5402.002 with .172H ADA handles, 4" centers, Sloan battery operated faucet # EBF-650-A-Z, American Standard Selectronic 6058.105, or single lever American Standard Colony soft 2175.209 with pop up and drain or Zurn #Z8100-P, (Adjust if pop up not required).
- D. Showers "American Standard" pressure balance mixing valve #1480.501.002 with trim kit or Zurn #ZZ7300-SS-MT. Shower head to be Sloan AC-51 205 gpm, American Standard FloWise 1660.717 2.0 gpm or Zurn #Z 7000-S8.
- E. Kitchenette Sink "American Standard" Heritage series faucet # 7490.002 with .172H ADA handles and 9" gooseneck, 4" centers OR Zurn #Z812A4-17.
- F. Kitchen Sink "American Standard" Heritage series # 6270.002 with .172H ADA handles, 8" centers or Zurn #Z8771G4-17F.
- G. Wall mounted hand sink (ADA) "American Standard" Heritage #7809.002 with H172 wrist blades. 4" centers or Zurn # Z81104-P-3M.
- H. Wall mounted laundry/utility sink and floor mounted mop sink "American Standard" 8344.112.004 with bucket hook, vacuum breaker and wall support or equivalent by Zurn.

22 42 00  
PLUMBING FIXTURES AND TRIM

PART 3 – EXECUTION

3.01 GENERAL REQUIREMENTS FOR INSTALLATIONS

- A. Shut – off valves are to be installed in each supply to every fixture or piece of equipment. All fixtures, equipment and apparatus are to be secured firmly in place and be adequately supported with hardware designed and appropriate for the use.
- B. Contractor to furnish counter top templates to respective cabinet manufacturer or installer to allow for fixtures to be installed in counters.
- C. Contractor to neatly caulk with water proof non-hardening caulking compound around all fixtures and must cover and protect all fixtures and trim from damage and stains until time of acceptance.
- D. Fixture colors to be white unless specifically noted otherwise. Fixtures are to be set level and parallel with building lines
- E. Contractor must verify locations, mounting heights of (fixtures and trim) and verify with A.E./Owner, all applicable codes and standard usage and report any conflicts prior to installation.
- F. Final connections to fixtures, shall be a minimum unless otherwise shown on the drawings:

Equipment	Hot Water	Cold Water	Waste	Vent
Water Closet (Flush Valve)		1"	4"	2"
Urinal		3/4"	2"	1-1/2"
Lavatory and sinks	1/2"	1/2"	1-1/2"	1-1/2"
Mop Basin	3/4"	3/4"	3"	1-1/2"
Electric Water Cooler		1/2"	1-1/2"	1-1/2"
Interior Hose Bibb		3/4"		
Non-Freeze Wall Hydrant		3/4"		
Floor Drain (See Drawings for pipe size)				
Shower	1/2"	1/2"	2"	

END OF SECTION 22 40 00

23 05 00  
BASIC HVAC MATERIALS AND METHODS

PART 1 - GENERAL

1.01 SUMMARY

- A. Section includes, but is not limited to, following basic provisions, materials, and methods common to various mechanical work, to complement other Division 23 Sections and govern respective Division 23 work, where applicable, the same as if repeated in respective Sections:
  - 1. Quality Assurance requirements.
  - 2. Equipment Selection requirements.
  - 3. Delivery, Storage, and Handling requirements.
  - 4. Sequencing and Scheduling requirements.
  - 5. Method of listing and referencing Acceptable Manufacturers.
- B. Other basic mechanical materials and methods which complement this Section and govern respective Division 23 work are specified in respective complementary Sections immediately following this Section and in Sections designated "General". Refer to Project Manual "Table of Contents" for respective Section numbers and titles.
- C. Particular products and systems are specified in respective Sections. Refer to Project Manual "Table of Contents" for respective Section numbers and titles.

1.02 SUBMITTALS, GENERAL

- A. Submit prescribed submittal items for materials and products to be installed on this Project, when requested and as called for in respective Section or on Drawings and when space or sequencing coordination is required.

1.03 QUALITY ASSURANCE, GENERAL

- A. Quality assurance requirements for mechanical work are included in "Quality Assurance, Basic Provisions" and complimented for particular work in respective product and system Sections.
- B. Prior to ordering and rough-in, coordinate mounting, fit, trim, etc., of respective furnished items with design and construction of adjoining equipment and construction. Take special care to coordinate design of trim, flanges, attachments, etc., with related construction.

1.04 EQUIPMENT SELECTION AND SUITABILITY

- A. Following provisions complement requirements of respective Sections in Division 1 which govern material and equipment selection.
- B. Product Substitutions: Governed by "Substitutions" in "Instructions to Bidders". Burden of proof of equality of products is on the Contractor.
- C. Drawings indicate capacities, sizes, and dimensional requirements of system components. Equipment, specialties, and accessories are based on specific types, manufacturers, and models indicated. Components having equal performance characteristics that deviate from indicated size and dimensions may be considered provided deviations do not change the design concept or intended performance as judged by A/E/D.
- D. Mention of a specific product, by name or model number, in Contract Documents does not negate requirements for that particular product to meet physical and performance criteria set forth in the Contract Documents.
  - 1. References to specific products are to establish general design and a level of quality.

23 05 00  
BASIC HVAC MATERIALS AND METHODS

2. Furnished products shall possess all required features and be coordinated with conditions affecting the work.
  3. Actual rough-in and connection requirements and locations for referenced items may not be the same as the typical arrangements represented on Drawings. Equipment rough-in and connections are subject to manufacturer's standards for items furnished. Piping, conduit, wiring, etc., shall be coordinated with furnished products and installed accordingly, without added cost to Owner.
  - D. Equipment of greater or larger power, dimensions, capacities, and ratings may be furnished provided such proposed equipment is approved in writing and connecting mechanical and electrical facilities (services, circuit breakers, conduit, motors, bases, equipment spaces, etc.) are increased. No additional costs will be approved for these increases, if larger equipment is approved. If equipment minimum energy ratings or efficiencies are specified, furnished equipment must meet specified design requirements and commissioning requirements.
- 1.05 DELIVERY, STORAGE, AND HANDLING, GENERAL
- A. Deliver products to site and properly store and protect under applicable provisions of Division One, requirements herein, and requirements in respective product and system Sections.
    1. Properly identify products on outside of container with names, model numbers, types, grades, compliance labels, and other information needed for identification. Include project name, drawing reference designation, room number, etc. to aid distribution at job site.
  - B. Schedule deliveries, coordinated with construction progress, so that materials will be available when needed. When possible, schedule deliveries of large equipment items for a time when respective items can be moved directly into installation location from delivery vehicle, thereby avoiding storage on site.
  - C. Handle products, components, and accessories carefully to prevent damage. Comply with respective manufacturer's rigging and installation instructions for unloading and moving products. Do not install damaged items; replace with new.
  - D. Store products in original container, protective wrap, etc. and protect from weather and construction work traffic. Where possible, store indoors; when necessary to store outdoors, store above grade and enclose with weatherproof wrapping.

1.06 SEQUENCING AND SCHEDULING, GENERAL

- A. Coordinate installation of mechanical equipment, materials, and systems with other building components and construction progress.
- B. Arrange for chases, slots, and openings in building structure during progress of construction, to allow for mechanical installations.
- E. Sequence, coordinate, and integrate installation of mechanical materials and equipment for efficient flow of the Work. Coordinate installation of large equipment requiring positioning prior to closing in the building.
- F. Coordinate connection of mechanical systems with exterior utilities and services. Comply with requirements of governing regulations, franchised service companies, and controlling agencies.

PART 2 – PRODUCTS

2.01 MANUFACTURERS, GENERAL

- A. Subject to compliance and requirements, manufacturers offering products that may be incorporated in the work including but not limited to manufacturers included in respective Contract Documents in one of the following forms:
  1. Named (Referenced) Products: Where proprietary names, names of particular manufacturers or vendors and catalog/model numbers, etc. are referenced in

23 05 00  
BASIC HVAC MATERIALS AND METHODS

Specifications, on Drawings, etc.; specific item referenced shall be understood as establishing general type, function, approximate dimensions, appearance, and quality desired. Products furnished shall be configured and equipped, with alterations when and as required, to provide all features and functions specified or shown and to conform to all conditions effecting incorporation of the product into the work.

- a. Actual manufacturer's ordering numbers denoting configuration, features, capacities, etc. specified or required shall be determined by Contractor and supplier, through comparison of respective manufacturer's specifications and options with Project Specifications and Drawings (schedules, notes, details, etc.), job conditions, and applicable codes and regulations.
2. Listed (Acceptable) Manufacturers: Manufacturers listed as "acceptable" in specifications are believed to have the ability to manufacture products which are equivalent to the product described and referenced (named) in respective Specifications or on Drawings. Contractor has the option to furnish products that are manufactured by one of the listed acceptable manufactures provided that products furnished comply with respective product specifications and are suitable for the application and intent of design.
- B. Subject to compliance with requirements, manufacturers not referenced or listed in Specifications or on Drawings who offer products equivalent to referenced products may be acceptable if proposed substitution is requested ten (10) working days prior to bidding and approved in compliance with provisions of "Substitutions" in "Instructions to Bidders".

**PART 3 – EXECUTION**

**3.01 CORRELATION OF WORK WITH DRAWING AND SPECIFICATION DISPARITY**

- A. If specifications for a particular product, process, material, or installation differ from representations on Drawings, respective product, material, or process utilized shall comply with the more comprehensive quality and quantity requirements and the more restrictive limits, unless directed otherwise by A/E/D.
  1. Verify governing requirements for respective installation with A/E/D prior to ordering respective product or performing respective work.
- B. Work which meets the less comprehensive requirements or the less restrictive limits may be provided for an installation if both of the following two (2) conditions are met:
  1. A/E/D shall have determined that the more comprehensive requirements or the more restrictive limits are not required for the particular installation and confirmed the determination in writing.
  2. Contractor shall give Owner a credit for the cost difference, if any, between the subject variant material or method requirements; credited by change order or other acceptable means.

**3.02 EXAMINATION, GENERAL**

- A. Examine areas and conditions under which work is to be installed. Do not proceed with work until unsatisfactory conditions have been corrected in a manner acceptable to Installer.

**3.03 ROUGH-IN, GENERAL**

- A. Verify required rough-in nature, size, and locations for actual equipment to be connected and coordinate field measurements. Respective rough-in provisions are specified in respective equipment and system Sections and indicated necessary on Drawings.

**3.04 HVAC INSTALLATIONS, GENERAL**

- A. Sequence, coordinate, and integrate the various elements of mechanical systems, materials, and equipment.

23 05 00  
BASIC HVAC MATERIALS AND METHODS

1. Coordinate mechanical systems, equipment, and materials installation with other building components. Verify all dimensions by field measurements.
  2. Arrange for chases, slots, and openings in other building components during progress of construction, to allow for mechanical installations. Coordinate penetrations with fire stopping work.
  3. Coordinate the installation of required supporting devices and sleeves to be set in poured-in-place concrete and other structural components, as they are constructed.
  4. Sequence, coordinate, and integrate delivery and installation of mechanical materials and equipment for efficient flow of the work. Give particular attention to large equipment requiring positioning prior to closing in the building.
- B. Work shall be performed by fully qualified respective trade craft-persons skilled in execution of the respective tasks; following industry standard practices, in compliance with applicable codes, regulations, specified methods and procedures, and respective manufacturer's instructions.
- C. All systems and equipment shall be installed complete and fully operable, unless specifically instructed otherwise for a particular system or item.
1. Provide appropriate automatic control devices compatible with existing controls and systems, installed and arranged as required to operate and sequence respective equipment and systems to maintain intended conditions.
  2. Provide an appropriate air device (diffuser, grille, register, etc.), installed at every duct termination, unless specifically noted otherwise for a particular location.
- D. Where mounting heights are not dimensioned or detailed, install systems, materials, and equipment to provide maximum possible headroom.
- E. Install systems, materials, and equipment generally to conform to arrangements indicated by Contract Documents and approved submittal data, including coordination drawings, to greatest extent possible. Where coordination requirements conflict with individual system requirements, refer conflict to A/E/D.
1. Install work level and plumb, parallel and perpendicular to other building systems and components where exposed in finished spaces, except where indicated otherwise. Give right-of-way priority to systems required to be installed at a specified slope.
- F. In addition to conforming to these general provisions, install respective products and systems in compliance with provisions in respective Sections and on respective Drawings. Refer to Project Manual "Table of Contents" for respective Section numbers and titles.

END OF SECTION 23 05 00

23 05 01  
GENERAL HVAC REQUIREMENTS

PART 1 – GENERAL

1.01 SCOPE

- A. This section is coordinated with 23 05 00 Common Work Results for HVAC and Supplementary General Conditions wherever applicable to HVAC work. Where items of the General Conditions or Supplementary General Conditions are repeated in this section of the Specifications, it is intended to call particular attention to or qualify them; it is not intended that any other parts of the General Conditions or Supplementary General Conditions shall be assumed to be omitted if not repeated herein.
- B. This section applies equally and specifically to all Trades supplying labor and/or equipment, and/or materials as required under the HVAC sections of the specifications.
- C. It is the intention of these plans and specifications to call for finished work, completely tested and ready for the Owner's operation. The Contractor shall submit before bidding the project a detailed description of any problems to the Bid Documents for any reason whatsoever: i.e., materials or apparatus believed unsuitable or inadequate, violation of codes, ordinances, rules or regulations, items of work omitted, incorrect service locations or condition etc. The absence of such written notice shall indicate agreement that all cost of any such required changes have been anticipated and included in the Bid.
- D. Work described and referenced in Division 23 of the project manual and on the drawings noted 'HVAC' shall be the responsibility of the contractor for respective Division 23 work unless the work is specifically assigned to another contractor or party

1.02 DEFINITIONS

- A. The following list of words is defined to amplify their meaning whenever used on the mechanical drawings, or in Division 23 of these specifications. Those definitions supersede any other definitions, given or inferred by the General Provisions, Supplementary Conditions or any (Webster) standard definitions for usage in Division 23 only:
  - 1. Furnish - to supply (only) to another party for their use or installation, with all cost of delivery to job site.
  - 2. Install - to unload, distribute, uncrate, assemble and fix into the intended final position, the installer to provide all miscellaneous hardware required to anchor and/or support securely, clean up and dispose of rubbish.
  - 3. Connect - to bring service(s) to point of installation and make all final connections of the service(s) to the installed equipment, and provide all miscellaneous auxiliary appurtenances necessary to make operable for its intended final use.
  - 4. Provide - to furnish, install and connect operating and complete.
  - 5. The "Contractor" means specifically the Contractor and/or Subcontractor working under his respective section of the specifications.
  - 6. "Piping" includes, in addition to pipe, all fittings, valves, hangers, insulation and other accessories relating to such piping.
  - 7. "Concealed" means hidden from sight in trenches, chases, furred spaces, shafts, hung ceiling, embedded in construction, or in crawl spaces.
  - 8. "Equal" means any equipment or material which, in the opinion of the Architect/ Engineer/ Designer, is equal in quality, durability, appearance, strength, design and performance to the equipment or material specified and will function adequately in accordance with the general design.

23 05 01  
GENERAL HVAC REQUIREMENTS

9. The General, Mechanical (Plumbing and HVAC), Electrical and Temperature Control Contractor's are referred to herein and on the drawings as G.C., M.C., E.C. and T.C.C. respectively.

10. The Architect/Engineer/Designer shall be referred to as A/E/D.

**1.03 CONTRACT DOCUMENTS**

- A. The accompanying drawings and these specifications are complementary each to the other and what is called for on one shall be as binding as if called for by both. The drawings being more specific with quantity, the specifications more specific with quality.
- B. This Contractor is requested and shall be held to having examined all drawings and specifications for all trades, such as Architectural, Structural, Plumbing, Electrical, Heating, Site, etc., in order to familiarize himself with the requirements of all of the trades as applied to this Contractor's work. No allowances will be made for deviations from work shown to coordinate this Contractor's work with work of other Contractors.
- C. Any doubt as to the intent of the drawings and/or specifications shall be submitted to the A/E/D in writing, requesting an interpretation. Interpretation will be by Addendum only, issued by the A/E/D. The person submitting the request will be responsible for its delivery.
- D. Under no circumstances shall any sizes be decreased or radical changes in any part of the installation be made without the written consent of the A/E/D.
- E. Elevations and grades shown on drawings are approximate only. This Contractor shall verify same on premises and shall take all measurements and determine all final elevations and be responsible for same applying to his work.

**1.04 EQUIPMENT LIST AND SUBSTITUTIONS**

- A. Each bidder shall prepare a list covering typical important items of equipment involved in his portion of the Contract. A sub-contractor and material list is to be provided with the Bid. This may or may not also be in the front portion of this Specification.
- B. Certain manufactured articles specified herein are mentioned under one or more trade or manufacturer's names. These manufactured articles, as specified and detailed on drawings, shall form the basis of the contractor's bid. Additional products or product manufacturers will be permitted by addendum only.
- C. Articles of other manufacturers, of equivalent design, quality and capacity, as adjudged by the A/E/D will be considered no later than ten (10) working days prior to bid date. Establishing proof of the equality of the product to that specified shall be the responsibility of the bidder. Determination of equality of all products is vested in the A/E/D whose decision shall be final and binding upon all concerned. No substitutions will be allowed after the Contract is awarded.
- D. Where a Contractor proposes to use an item of equipment other than that as designed and detailed on the drawings (even though listed as an acceptable manufacturer) which requires purchase of additional and/or specific equipment, more space, or any re-design of any other part of the mechanical, electrical or architectural layout, all such re-design and all new drawings required shall be prepared by the Contractor, at his own expense. And, should this re-design require additional cost to other Contractors, this expense shall be borne by the Contractor making such changes. All changes must be approved by A/E/D. The Contractor and manufacturer and/or representative shall be responsible to coordinate physical limitations of equipment prior to bidding. No requests for extras will be allowed due to changes required by equipment substitutions.

**1.05 CODES, LAWS, ORDINANCES, PERMITS AND FEES**

- A. HVAC installation shall comply with all requirements of the State Board of Health, and the Indiana Mechanical Code with all their respective amendments.

23 05 01  
GENERAL HVAC REQUIREMENTS

- B. Mechanical installation shall comply with the International Mechanical Code with Indiana Amendments in effect at the time of Construction.
  - C. Pipe welding shall conform to "Welding Code for Steel and Wrought Iron Pipe" of the "Heating, Piping, and Air Conditioning Contractors' National Associations."
  - D. All installations shall comply with the latest editions, issues or supplements of all applicable codes, ordinances, regulations and requirements without increase in contract price. Such provision, rules, regulations and ordinances are to be considered as much a part of these specifications as if repeated herein or attached hereto. All changes or modifications required to conform to such codes, regulations, or requirements must be reviewed, the same as Shop Drawings, by the A/E/D.
  - E. The Contractor shall give all necessary notices, obtain and pay all utility company bills or governmental taxes, fees for connections, water taps and other costs in connection with his work; and he shall also maintain and pay special charges, overtime, or provide any special protection, barricades, lights, personnel as may be required by the State, County, Owner or City in the performance of the contract requirements, as well as providing the necessary equipment to dig or drive and provide de-watering or shoring by any means designated so as to comply with the governing bodies' procedures.
  - F. All materials furnished and all work installed shall comply with the rules and recommendations of the National Fire Protection Association, with all requirements of the local utility companies, with the recommendations of the Owner's fire insurance rating organization having jurisdiction, and with the requirements of all governmental departments having jurisdiction.
  - G. This Contractor shall assume all responsibility of proper installation of services to meet all rules and regulations of the utility or governmental agent involved and pay all fees or charges required.
  - H. All details shall be verified before bidding with each utility or agency and no allowances will be made in the Contract to properly or differently than detailed install any service.
- 1.06 SITE VERIFICATION
- A. This Contractor is directed to visit the premises and make him/her self thoroughly familiar with the general layout of the building site and the location of present lines to which connections shall be made. He shall also check present grades, ditches, pavements, sewers, and/or all other conditions affecting the service installations contemplated under this Contract. Such offsets as may be required to leave new work clear, etc. must be included in the Contractor's proposal, and the Contractor must assume the full responsibility for having made a proper and thorough investigation of these requirements. The contractor is to review the construction documents and visit the premises prior to bidding. Visits to the facility by the prospective contractors must be coordinated with the A/E/D.
  - B. No extras will be allowed subsequently to the successful Contractor to cover any such error, omission and/or oversight on the part of the contractor for not having made a thorough inspection of the grounds, facilities, building conditions, proposed drawings etc.
  - C. Contractor shall further inspect the site and see for himself the available storage space, trucking facilities for bringing materials into the building/area and must assume responsibility for receiving, unloading, storing freight, demurrage, theft and any and all other factors influencing the work under this specification.
- 1.07 INTERFACE
- A. Refer to drawings and specifications for other Divisions of work to determine materials and conditions of other work where Division 23 work meets or connects to such other work. Coordinate respective Division 23 work with work of other Divisions.

23 05 01  
GENERAL HVAC REQUIREMENTS

1.08 COORDINATION OF WORK

- A. Locations of various parts of the equipment, ductwork, services and piping shown by Mechanical (HVAC) Plans are diagrammatic and approximately correct. Exact location shall be determined on job and governed by structural conditions of the building and work of other Contractors, subject to decision of A/E/D, who reserves the right to make any reasonable change in locations indicated without extra charge to Owner.
- B. Contractor shall study and become familiar with contract drawings of other trades and A/E/D's drawings in order to obtain all necessary information in order that all interferences with work of other trades may be avoided. Cooperate with all other workmen and install work in such a way that all interferences are avoided. All work shall be installed so that all parts required are readily accessible for inspection, operation, removal, maintenance and repair.
- C. All pipe, apparatus, appliances or other items interfering with proper placement of other work, as indicated on the drawings, specified, or required, shall be removed and shall be re-located and re-connected without extra cost. All damage to other work caused by this Contractor, his Subcontractors or his workmen, by reason of neglect, accident or any cause whatsoever, shall be repaired and made good in the same manner as specified for new work of the same character.
- D. Openings and chases shall be left in new walls for this Contractor's work when so requested before general work so affected is completed. Where this Contractor has failed to make such request at proper time, he shall pay for all cutting, patching, etc., of the building required for this work.

1.09 LAYING OUT

- A. This Contractor shall take all measurements necessary for his work and shall assume responsibility for their accuracy. This Contractor shall not scale Mechanical Drawings but shall obtain all dimensions from building and the Construction Drawings unless specified herein or shown on drawings.

1.12 PROTECTION

- A. The Contractor shall be responsible for the maintenance and protection of all equipment, materials, and tools supplied by him and stored or installed on the job site from loss, theft, vandalism or damage until final acceptance by the Owner.
- B. The Contractor shall be responsible for the protection of Owner's materials and equipment, and any finished work of other trades from damage or defacement by his operations and must remedy any such injury at his own expense.
- C. Openings in exterior walls, and roofs, particularly at or below grade, shall be kept properly plugged at all times. After completion of work, openings for which the Contractor is responsible shall be permanently sealed and caulked in the manner approved by the A/E/D.

1.13 SHOP DRAWINGS

- A. Contractor shall submit electronically in PDF Format shop drawing to A/E/D for review before commencing any work or providing materials. Review of shop drawing does not relieve contractor of correct ordering and installations. Electronic shop drawing systems may be employed and will be detailed at the onset if allowed.
- B. Drawings submitted shall bear the stamp of approval of the Contractor as evidence that the drawings have been checked by the Contractor and comply with the requirements of the contract drawings and specifications. Any drawings submitted without this stamp of approval will not be considered and will be returned to the Contractor for resubmission. If the drawings submitted show variations from the requirements of the Contract, the Contractor shall make specific mention of such variations in his letter of transmittal in order that, if acceptable, suitable action may be taken for proper adjustment, otherwise, the Contractor will not be

23 05 01  
GENERAL HVAC REQUIREMENTS

relieved of the responsibility of executing the work in accordance with the Contract even though such drawings have been reviewed.

- C. The A/E/D's reviewing of the Contractor's and Subcontractor's Drawings or Equipment Details does not relieve the Contractor from responsibility for errors, omissions, or equipment capacities which may exist or develop even though work is done and equipment furnished in accordance with such checked or reviewed drawings.
- D. The reviewing of Contractor's and Subcontractor's drawings or equipment details by the A/E/D is a gratuitous assistance and the A/E/D does not thereby assume responsibility for errors or omissions. Where such errors or omissions are discovered later, they shall be made good by the Contractor irrespective of any review by the A/E/D.
- E. Review by A/E/D applies only to capacity, quality, general arrangement, design and type. Approval does not apply to quantities, dimensions, connection locations and similar. In all cases, Contractors shall be responsible for furnishing the proper quantities of equipment and/or materials required, that all equipment fits the available space in satisfactory manner and that all piping, electrical and other connections are suitably located.
- F. Review by A/E/D will not modify or nullify any provisions of Contract Documents which include Drawings and Specifications, nor will approval relieve Contractor from responsibility for error, omissions and deviations from Contract Documents.

**1.14 RECORD DRAWINGS**

- A. The Contractor shall keep an accurate, current and progressive record of all installed work, including all changes and deviations from the design drawings. Recordings shall be made on prints kept in good condition at the job site as the work progresses and before any work is covered. Detail drawings shall be made if necessary for clarity.
- B. Recordings shall be made on prints kept in good condition at the job site as the work progresses and before any work is covered. The field drawings are to be brought to the construction progress meetings for periodic checks.
- C. Upon completion of the contract work, the Contractor shall deliver the marked-up prints to the A/E/D with a signed certification by a principal of the contracting firm, that all work was installed as shown.
- D. All labor and material costs incurred in the accomplishment of the foregoing requirements shall be borne by the Contractor. Final approval of the work and final payment shall be withheld until after receipt of the marked as built prints.

**1.15 FIELD INSTRUCTIONS**

- A. During construction, the A/E/D shall observe the work and give written field instructions as required without invalidating the Contract. Such field instruction shall not be construed as authority to change the terms of the Contract
- B. In cases where extra cost or reductions in cost of the Contract are involved, the Contractor shall notify the A/E/D in writing at the time of such instructions and shall establish cost difference and shall receive written approval before proceeding. The Contractor shall not be reimbursed for extra work unless this procedure has been followed.

**1.16 CLEAN-UP**

- A. Contractor shall remove from site, and legally dispose of, rubbish resulting from the work under his Contract. Rubbish shall be removed daily and not be allowed to accumulate. Owner has first right of salvage. Owner salvaged items shall be delivered to Owner by the Contractor at specified locations.

23 05 01  
GENERAL HVAC REQUIREMENTS

PART 2 – PRODUCTS

2.01 PRODUCT WARRANTY

- A. All work shall be guaranteed (parts and labor) for a period of one (1) year.
- B. Warranty shall run from written date of substantial completion of the work, not from date of installation of a device or piece of equipment, nor from any date set by the equipment supplier relative to his equipment.

2.02 MECHANICAL REFERENCE SYMBOLS, DETAILS AND DRAWINGS

- A. Symbols used are diagrammatic are generally generic in nature.
- B. Details and Drawings are typical in nature and are subject to variations to suit specific products and project conditions and available space.

PART 3 – EXECUTION

3.01 WORKMANSHIP

- A. All work is to be performed in a craftsman like manner as judged by the A/E/D and conform to the Trade Association Standard of Installation.

3.02 INSTALLATION

- A. Whenever necessary, the Contractor shall provide all bases and supports not part of the building structure, of required size, type and strength, as approved by the A/E/D for all equipment and materials furnished by him. When earthquake loads are applicable in accordance with the Building Code, mechanical system supports shall be designed and installed for the seismic forces in accordance with the Building Code. Generally all Mechanical systems are to be supported in accordance with the International Mechanical Code with Indiana Amendments.

3.03 RESPONSIBILITIES

- A. The Contractor shall be responsible to coordinate with his subcontractors and to pursue all job problems concerning repair, replacement or proper operation of all systems.
- B. It shall be the Contractor's responsibility to determine, in conjunction with the A/E/D if required, the source of any problems and obtain solution and correction of same with all expediency.

3.04 EQUIPMENT ACCESSIBILITY AND SPACE COORDINATION AND PER-BID VERIFICATION REQUIREMENTS

- A. Physical size and arrangement of proposed equipment and apparatus must be suitable for the space available. Maintain required clearances and allow space for proper maintenance and placing in the facility and removing from the facility.
  - 1. Prior to bidding project each Contractor and equipment representative must review the installation, arrangement, space available and verify that the proposed installation will retain required clearance and maintain accessibility. Maintenance space must be demonstrated by Contractor.
  - 2. Any deviations required to accommodate equipment etc. must be coordinated by Contractor with A/E/D before bids are accepted on the project. After bids are accepted such work will be part of the Contractor's work and will add no additional expense to the project.
- B. Contractor is responsible for furnishing equipment which is suitable for the space available and must bear the costs for all modifications to his work and the work of others required to accommodate his equipment both the installing and moving into place.

3.05 EQUIPMENT SERVICE AND CONNECTION REQUIREMENTS COORDINATION AND PRE-BID VERIFICATION REQUIREMENTS

23 05 01  
GENERAL HVAC REQUIREMENTS

- A. Service and connection requirements of proposed equipment and apparatus must be compatible with the respective services available as required to accommodate the intent of the design.
- B. Mechanical and electrical service connection requirements of a manufacturer's equipment, even if listed as acceptable, may not be the same as the requirements as the product specified or shown on the construction drawings. Contractor is to make adjustments as required. All connections are to be made complete to accommodate the intent of the design.
  - 1. Prior to bidding the project, each bidding Contractor and respective equipment manufacturer's representative must review the installation arrangement and mechanical and electrical service connections indicated on the Construction Drawings and verify that installation of the proposed equipment will be compatible with the Construction Drawing's, available space and actual conditions.
- C. The Contractor is responsible for furnishing equipment etc. which is suitable for the existing or proposed space and services. The Contractor must bear the costs for all modifications to his work and the work of others required to accommodate equipment furnished by the Contractor.

3.06 TESTING AND ADJUSTING

- A. Thoroughly test for leaks and operate each system device and item of equipment installed as part of this project and cooperate with the Testing and Balancing Agency (Section 15950) performing the final testing and adjusting of the respective systems.
- B. Notify A/E/D 48 hours previous to all testing, adjusting or balancing. Tests must be conducted in the presence of a representative of the A/E/D and a written report is to be provided.
- C. System testing and balancing is to be performed after the respective systems have been deemed by the Contractor to be complete and operating in full working order.

3.07 CLEANING

- A. All equipment and premises are to be thoroughly cleaned.
- B. Air filters for air handling units are to have one set of filters installed at start up. The second set is to be installed just before Air Balance and the third set is to be awarded to Owner for future installation.

END OF SECTION 23 05 01

23 05 01  
GENERAL HVAC REQUIREMENTS

Blank Page

23 05 93  
TESTING, ADJUSTING AND BALANCING

PART 1 – GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and 23 05 01 HVAC General Requirements, 23 05 00 Common Work Results for HVAC, all General and Supplementary conditions and Division 01 Sections shall apply to this Section.

1.02 SUMMARY

- A. This Section includes testing, adjusting and balancing HVAC and Plumbing and Hydronic Systems to produce the design objectives, including the following:
  - 1. Balancing air flow and water flow within distribution systems including sub- mains, branches and terminals to indicated quantities.
  - 2. Adjusting the total HVAC systems to provide indicated requirements and desired results as judged by the A/E/D.
  - 3. Measuring electrical performance of HVAC equipment.
  - 4. Verifying that all automatic control devices installed by the M.C. and T.C.C. are functioning as intended and are properly installed.
  - 5. Providing a written report of the results of the activities and procedures specified in this Section.

1.03 DEFINITIONS

- A. Adjust: To regulate fluid rate and air patterns at the terminal equipment, such as to reduce fan speed or regulate a damper.
- B. Balance: To proportion flows within the distribution system including sub-mains, branches and terminals according to the design quantities.
- C. Draft: A current of air, when referring to localized effect, caused by one or more factors of high air velocity, low ambient temperature, or direction of air flow, whereby more heat is withdrawn from a person's skin than is normally dissipated. Generally air velocity over persons shall not exceed 50 FPM.
- D. Procedure: An approach to and execution of a sequence of work operations.
- E. Report form: Test data sheets for recording test data in logical order.
- F. Static head: The pressure due to the weight of the fluid above the point of measurement expressed in PSI or feet of water column.
- G. Suction head: The height of fluid surface above the centerline of the pump on the suction side usually expressed in feet of water column.
- H. System effect: A phenomenon that can create undesired or unpredicted conditions that result in reduced capacities in a part or all of the system.
- I. System effect factors: Allowances used to calculate a reduction of performance of a fan or pump etc. installed under different conditions than those used for the design or the manufacturer's performance testing.
- J. Terminal: A point where the control medium, such as fluid or energy enters or leaves the distribution system.
- K. Test: A procedure to positively determine quantitative performance of a system or system component.
- L. Testing and adjusting and balancing agent: The entity responsible for performing and reporting all testing, adjusting and balancing.

TESTING, ADJUSTING AND BALANCING

- M. Accepted associations: AABC – Associated Air Balance Council, AMCA – Air movement and Control Council, NEBB – National Environmental Balancing Bureau and SMACNA – Sheet Metal and Air Conditioning Contractor's National Association.

## 1.04 QUALITY ASSURANCE

- A. Agent qualifications: Contractor must be a qualified testing adjusting and balancing contractor presently certified by AABC or NEBB.
- B. Testing and balancing agencies:
  - Gibson Services
  - Fluid Engineering Services (Johnson Controls Inc.)
  - Mechanical Systems Balancing
  - Bledsoe
- C. Balancing Contractor (B.C.) to use standard forms from AABC or NEBB.
- D. B.C. to comply with all standards and procedures described in NEBB's "Procedural Standards for Testing, Adjusting and Balancing of environmental Systems."
- E. Instruments are to be calibrated at least every 6 months.
- F. M.C., E.C. and T.C.C. to provide support and coordinated effort to the B.C. in order to achieve the most accurate testing, adjusting and balancing possible. M.C. to provide volume dampers, deflectors, splitters, valves, test ports, cocks, gauges, thermometers etc. as directed by the B.C.
- G. B.C. to provide minimum of 48 hours notice to A/E/D and Owner before testing is performed. All testing is to be performed after air and water tests have been completed by M.C.
- H. Negative or positive air pressure relationships between rooms and areas, as indicated on the Drawings, must be adhered to above exact air quantities.
- I. Generally, all listed quantities must be balanced within 10% of the listed flow. B.C. to halt balance and notify A/E/D should irresolvable discrepancies arise. A/E/D is to provide direction to B.C. and M.C. as to how to proceed with balance.
- J. B.C. to verify air handling equipment has clean filters installed, belts are aligned and tight and bearings greased etc. before beginning balance and testing.
- K. B.C. to verify all piping strainers are clean, valves are installed correctly, coils have correct piping and straight fins, air has been removed from piping systems and all space and equipment control devices and sensors are installed correctly.
- L. B.C. to verify all interlock systems are operating correctly.
- M. M.C. to install dampers, regulators and valves as directed by B.C. required to achieve a proper testing, adjusting and balancing.

## PART 2 – PRODUCTS (Not Applicable)

## PART 3 – GENERAL TESTING AND BALANCING PROCEDURES

## 3.01 PERFORMANCE

- A. Perform testing, adjusting and balancing procedures on all and each system in accordance with the procedures detailed in AABC national standards, or NEBB's performance procedures.
- B. Cut duct's, pipe's and equipment cabinet's insulation etc. as required for test ports and probes etc. After testing and balancing close holes and patch insulation with new materials like those removed. Restore all vapor barriers complete.

TESTING, ADJUSTING AND BALANCING

- C. Mark equipment settings with paint or permanent marker to provide a resilient identification for damper positions, valve indicators, fan speed controls, levers and such control devices to show final settings. Set and lock all memory stops.
- D. Verify that all variable flow systems track true and in proper proportion to system requirements and in correct response to the respective control.

## 3.02 INSTALLATION TOLERANCES

- A. Air handling systems are to be adjusted within plus or minus 10% of design flow for supply, relief and return air. Supply air would preferably be set high before low with other air flows proportional.

## 3.03 AIR SYSTEM PROCEDURE

- A. Contractor shall provide test and balance of existing RTU serving the project area. Verify total airflow of the RTU, outside airflow, and external static pressure. Balance diffusers to CFM's indicated on the drawings. Ensure that sheet metal contractor has installed new filters in the RTU prior to test and balance of system.
- B. Adjust air handling and distribution systems to provide required design supply, return, outside air and exhaust air quantities and static pressures.
- C. Measure air quantities at air inlets and outlets.
- D. Adjust distribution system to obtain uniform space temperatures free from objectionable drafts and noise while maintaining air pressure relationships specified or displayed on drawings.
- E. Use volume control devices to regulate air quantities only to extend that adjustments do not create objectionable air motion or sound levels. Effect volume control by duct internal devices such as dampers and splitters.
- F. Vary total system air quantities by adjustment of fan speeds. Provide drive changes required. Vary branch air quantities by damper regulation.
- G. Provide system schematic with design and actual air quantities recorded at each outlet or inlet. Measure static air pressure conditions on air supply units, including filter and coil pressure drops, and total pressure across the fan. Final adjustment to make allowance for filters being 50% loaded.
  - 1. System diagrams to include layouts of air and hydronic distribution presented with single line drawings which include the following data:
    - a. Quantities of outside, supply, relief (exhaust) airflows
    - b. Duct outlet/inlet sizes and flows

END OF SECTION 23 05 93

Blank Page

23 07 00  
HVAC INSULATION-GENERAL.

**PART I - GENERAL**

**1.01 SUMMARY**

- A. Section includes general provisions common to mechanical insulation work.
- B. Applicable general provisions in this Section govern insulation work the same as if repeated in respective complementary Sections.
- C. Provide materials, transportation, labor, and services and insulate respective mechanical work in compliance with provisions herein and in respective system and equipment Insulation Sections and in compliance with notes on Drawings.
- D. Fire stopping provisions in Section 23 05 00 Common Work Results for HVAC and 23 05 01 HVAC General Requirements govern fire stopping at mechanical work penetrations of fire resistive and fire rated construction.

**1.02 REFERENCES**

- A. Following standards form a part of mechanical insulation specifications to the extent indicated by references made thereto:
  - 1. American Society of Testing Materials (ASTM).
  - 2. Underwriters' Laboratories (UL).

**1.03 SUBMITTALS**

- A. Submit product data for insulation, jackets, coverings, adhesives, sealants, cements and other materials to be installed on this Project. List materials and thickness for each service application.
- B. Provide shop and installation drawings of field fabricated covers. Samples of products may be required at A/E/D's request.

**1.04 QUALITY ASSURANCE**

- A. Applicator: A company specializing in and experienced in HVAC equipment and systems insulation application. (Insulation Contractor)
- B. Fire Performance Characteristics: Insulation, facings, cements, and adhesives shall have 25/50 maximum flame spread/smoke developed rating in accordance with ASTM E84, except insulation outside may be rated 75/150 maximum. Insulation shall be tested by and bear label of U.L. or other testing organization acceptable to authority having jurisdiction.

**1.05 DELIVERY, STORAGE, AND HANDLING**

- A. Store products in unopened factory packaging.
- B. Protect adhesives, mastics, cements, etc., from freezing.
- C. Protect insulating materials from moisture.

**1.06 ENVIRONMENTAL REQUIREMENTS**

- A. Ambient temperatures and conditions during installation operations, and curing period when applicable, shall comply with manufacturer's requirements for respective product (adhesives, mastics, insulation cements, etc.).

**PART 2 – PRODUCTS**

**2.01 MANUFACTURERS**

- A. Referenced or listed in respective complementary Insulation Section.

**2.02 MATERIAL**

- A. Specified in respective complementary Insulation Section.

23 07 00  
HVAC INSULATION-GENERAL.

2.03 INSULATION SCHEDULE

A. Ductwork

SERVICE	MATERIAL	JACKET
Supply & Return Air Duct	1½" thick foil faced 3/4lb density fiberglass wrap	Seal joints with foil faced tape
Outside Air Intake Duct	2" thick foil faced 3/4lb density fiberglass wrap	Seal joints with foil faced tape
Plenums and Ducts above un-heated space	2" thick foil faced 3/4lb density fiberglass wrap	Seal joints with foil faced tape

PART 3 - EXECUTION

3.01 EXAMINATION AND PREPARATION

- A. Before installing insulation, verify that respective work to be insulated is complete, has been tested and cleaned, and is ready to be insulated. Use tarpaulins or other coverings to protect equipment, uncovered piping, ductwork, etc. from dirt and rubbish which may be caused by insulation installation operations.
- B. Prior to starting insulation installation operations and while performing work, verify that environmental conditions are within manufacturer's recommendations for sealants, tapes, and other adhesives to be used.

3.02 INSTALLATION OF INSULATION, GENERAL

- A. Insulation Work: Performed by qualified tradesmen, following manufacturer's written instructions for respective products, in compliance with applicable building codes and industry standards. (Insulation Contractor).
- B. Install insulation over clean, dry surfaces only.

END OF SECTION 23 07 00

23 07 13  
DUCT INSULATION

PART 1 – GENERAL

1.01 SCOPE

- A. Furnish and install duct insulation as shown on the Contract Documents.

1.02 SUBMITTALS

- A. Submit descriptive literature for approval.
- B. Submit samples if requested.

PART 2 – PRODUCTS

2.01 MANUFACTURERS

- A. Acceptable Manufacturers:
  - 1. Schuller,
  - 2. Owens Corning,
  - 3. Armstrong,
  - 4. Certain-Teed
  - 5. Knauf.

2.02 INSULATION

- A. Blanket glass fiber insulation thickness shall be minimum 1-1/2" thickness for supply and return and 2" thick for outside air intake with a thermal conductivity of 0.30 at 75° F differential; vapor barrier shall be combination aluminum foil reinforced with glass fiber yarn mesh and laminated to 40 lb. flame resistant Kraft paper having 2" tab.
- B. All insulation inside building shall be UL listed and have composite UL flame spread and smoke developed ratings not exceeding 25 and 50. Accessories such as adhesives, mastics, cements, tapes, glass, fabric, etc., shall have same component ratings as insulation.

2.03 ACCESSORIES

- A. Sealants, mastics and adhesives shall be as recommended by insulation manufacturer and shall be vermin proof.

PART 3 – EXECUTION

3.01 PREPERATION

- A. Prior to beginning work, verify that duct surfaces are clean, sealed, and dry. Carefully inspect the work of all other trades and verify that all such work is complete to the point where this installation may properly commence.

3.02 REQUIREMENTS

- A. Exposed fabricated unlined sheet metal plenums, unlined housings, unlined outside air ductwork and rectangular air conditioning supply in equipment rooms shall be externally insulated with rigid board glass fiber insulation.
- B. Ductwork shall be externally insulated with blanket glass fiber insulation as indicated above and on drawings.

3.03 INSTALLATIONS

- A. Cover all joints on external insulation with 3" wide foil reinforced kraft tape specifically manufactured for this application.
- B. All insulation shall be installed with edges tightly butted. Any insulation which is not so installed or shows evidence of leaking, sagging, buckling or sweating shall be replaced in its

23 07 13  
DUCT INSULATION

entirety at no additional cost. All defective insulation shall be remade in its entirety with new materials.

- C. All insulation shall be continuous through wall and ceiling openings and sleeves, except at fire or smoke walls or ceilings.
- D. Vapor barrier jackets shall be applied with a continuous, unbroken vapor seal. Hangers, supports, anchors, etc., that are secured directly to cold surfaces shall be insulated and vapor sealed to prevent condensation.
- E. Secure insulation tightly to ductwork with all joints tightly butted. Secure insulation to ductwork by using mechanical fasteners which do not pierce duct. Fasteners shall be adhered to ductwork with adhesive and shall be installed on 12" centers in both directions. All joints and penetration of the vapor barrier shall be sealed with 3" pressure seal aluminum foil tape. All cuts or tears shall be sealed with strips of the aluminum foil tape.

END OF SECTION 23 07 13

PART 1 – GENERAL

1.01 DESCRIPTION

- A. Ductwork and accessories for HVAC including the following:
  - 1. Supply air, return air and exhaust air systems.
- B. Definitions:
  - 1. SMACNA Standards as used in this specification means the HVAC Duct Construction Standards, Metal and Flexible.
  - 2. Seal or Sealing: Use liquid or mastic as an additional sealant, with or without compatible tape overlay or gasketing of flanged joints, to keep air leakage at duct joints, seams and connections to an acceptable minimum.
  - 3. Duct Pressure Classification: SMACNA HVAC Duct Construction Standards, Metal and Flexible.
  - 4. Exposed Duct: Exposed to view in a finished room.

1.02 QUALITY ASSURANCE

- A. Fire Safety Code: Comply with NFPA 90A.
- B. Duct System Construction and Installation: Referenced SMACNA Standards are the minimum acceptable quality.
- C. Duct accessories exposed to the air stream, such as dampers of all types (except smoke dampers) and access openings, shall be of the same material as the duct or provide at least the same level of corrosion resistance.

1.03 SUBMITTALS

- A. Coordinate with administrative requirements for submittal procedures.
- B. See Section 01 32 00

1.04 APPLICABLE PUBLICATIONS

- A. The publications listed below form a part of this specification to the extent referenced. The publications are referenced in the text by the basic designation only.
- B. Air Diffusion Council Test Code:
  - 1. 1062R4 Certification, Rating, and Test Manual (1977)
- C. Air Moving and Conditioning Association (AMCA):
  - 1. 500-75 Test Method and Louvers, Dampers and Shutters
- D. American Society for Testing and Materials (ASTM):
  - 1. A527-90 Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) by the Hot-Dip Process, Lock-Forming Quality
  - 2. A569-91 Standard Specification for Steel, Carbon (0.15 Maximum, Percent), Hot-Rolled Sheet and Strip, Commercial Quality
- E. National Fire Protection Association (NFPA):
  - 1. 90A-96 Standard for the Installation of Air Conditioning and Ventilating Systems
- F. Sheet Metal and Air Conditioning Contractors National Association (SMACNA):
  - 1. HVAC Duct Construction Standards, Metal and Flexible, 2nd Edition-1995
  - 2. HVAC Air Duct Leakage Test Manual, 1st Edition, 1985

G. Underwriters Laboratories, Inc. (UL):

1. 33-87 UL Standard for Safety Heat Responsive Links for Fire Protection Service.
2. 181-90 UL Standard for Safety Factory-Made Air Ducts and Connectors.
3. 555-90 UL Standard of Fire Dampers
4. 555S-83 UL Standard for Safety Leakage Rated Dampers for Use in Smoke Control Systems.

PART 2 – PRODUCTS

2.01 DUCT MATERIALS AND SEALANT

- A. General: Except for systems specified otherwise, construct ducts, casings, and accessories of galvanized sheet steel, ASTM A527, coating G90; or, aluminum sheet, ASTM B209, alloy 1100, 3003 or 5052.
- B. Joint Sealing: Refer to SMACNA Standards, paragraph S1.8 and S1.9.
  1. Sealant: Elastomeric compound, gun or brush grade, maximum 25 flame spread and 50 smoke developed (dry state) compounded specifically for sealing ductwork as recommended by the manufacturer. Generally provide liquid sealant, with or without compatible tape, for low clearance slip joints and heavy, permanently elastic, mastic type where clearances are larger. Oil base caulking and glazing compounds are not acceptable because they do not retain elasticity and bond.
  2. Tape: Use only tape specifically designated by the sealant manufacturer and apply only over wet sealant. Pressure sensitive tape shall not be used on bare metal or on dry sealant.
- C. Approved factory made joints by Pittsburgh Lock may be used Snap or Button Lock is not acceptable.

2.02 DUCT CONSTRUCTION AND INSTALLATION

- A. Follow SMACNA HVAC Duct Construction Standards. Acceptable connection to be Pittsburgh Lock Joints. (Snap Lock is not acceptable)
- B. Duct Pressure Classes:
  1. Supply and return ductwork: 2" Pressure Class
- C. Seal Classes: In accordance with SMACNA HVAC Air Duct Leakage Test Manual.
- D. Volume Dampers: Single blade or opposed blade, multi-louver type as detailed in SMACNA Standards.
- E. Duct Hangers and Supports: Refer to SMACNA Standards Section IV. Avoid use of trapeze hangers for round duct.

2.03 DUCT ACCESS DOORS, PANELS AND SECTIONS

- A. Provide access doors, sized and located for maintenance work, upstream, in the following locations:
  1. Each duct mounted smoke/heat detector and fire/smoke dampers.
- B. Openings shall be as large as feasible in small ducts, 16 inch by 16 inch minimum where possible. Access sections in insulated ducts shall be double-wall, insulated. Transparent shatterproof covers are preferred for un-insulated ducts.

2.04 FLEXIBLE AIR DUCT CONNECTORS

- A. General: Factory fabricated, complying with NFPA 90A for connectors not passing through

23 31 13  
DUCTWORK

- floors of buildings. Flexible ducts shall not penetrate any fire or smoke barrier which is required to have a fire resistance rating of one hour or more. Flexible duct length shall not exceed 4 feet. Provide insulated acoustical air duct connectors in supply air duct systems and elsewhere as shown.
- B. Flexible ducts shall be listed by Underwriters Laboratories, Inc., complying with UL 181. Ducts larger than 8 inches in diameter shall be Class 1. Ducts 8 inches in diameter and smaller may be Class 1 or Class 2.
  - C. Insulated Flexible Air Duct: Factory made including mineral fiber insulation with maximum C factor of 0.25 at 24°C (75°F) mean temperature, encased with a low permeability moisture barrier outer jacket, having a puncture resistance of not less than 50 Beach Units. Acoustic insertion loss shall not be less than 3 dB per foot of straight duct, at 500 Hz, based on 6 inch duct, of 2500 fpm.
  - D. Application Criteria:
    - 1. Temperature range: 0 to 200°F internal.
    - 2. Maximum working velocity: 2500 feet per minute.
    - 3. Maximum working pressure, inches of water gage: 2 inches positive, 1 inches negative.
  - E. Duct Clamps: 100 percent nylon strap, 175 pounds minimum loop tensile strength manufactured for this purpose or stainless steel strap with cadmium plated worm gear tightening device. Apply clamps with sealant and as approved for UL 181, Class 1 installation.

## 2.05 FLEXIBLE CONNECTIONS

- A. Where duct connections are made to fans and air handling units, install a non-combustible flexible connection of 29 ounce neoprene coated fiberglass fabric approximately 6 inches wide.
- B. For connections exposed to sun and weather provide hypalon coating in lieu of neoprene. Burning characteristics shall conform to NFPA 90A.
- C. Allow at least one inch slack to insure that no vibration is transmitted.

## PART 3 – EXECUTION

### 2.01 INSTALLATION

- A. Comply with provisions of Section 23 05 00 Common Work Results for HVAC and 23 05 01 Basic HVAC Requirements, particularly regarding coordination with other trades and work in existing building.
- B. Fabricate and install ductwork and accessories in accordance with referenced SMACNA Standards:
  - 1. Drawings show the general layout of ductwork and accessories but do not show all required fittings and offsets that may be necessary to connect ducts to equipment, boxes, diffusers, grilles, etc., and to coordinate with other trades. Fabricate ductwork based on field measurements. Provide all necessary fittings and offsets at no additional cost to the Owner. Coordinate with other trades for space available and relative location of HVAC equipment and accessories in and above ceiling grid. Duct sizes on the drawings are inside dimensions which may be altered by Contractor to other dimensions with the same square inch of opening and same air handling characteristics where necessary to avoid interference and clearance difficulties. All duct size changes are to be approved by the Engineer.
  - 2. Provide duct transitions, offsets and connections to dampers, coils, and other equipment in accordance with SMACNA Standards, Section II. Provide streamliner, when an obstruction cannot be avoided and must be taken in by a duct. Repair galvanized areas

23 31 13  
DUCTWORK

with galvanizing repair compound.

- B. Install duct hangers and supports in accordance with SMACNA Standards, Section IV.
  - C. Flexible duct installation: Refer to SMACNA Standards, Section III. Ducts shall be continuous, single pieces not over 4 feet long (NFPA 90A), as straight and short as feasible adequately supported. Centerline radius of bends shall be not less than two duct diameters. Make connections with clamps as recommended by SMACNA. Clamp per SMACNA S3.33 and S3.34 with one or any chase or partition designated as fire or smoke barrier, including corridor partitions fire rated one hour or two hour. Support ducts SMACNA Standards.
  - D. Where diffusers, registers and grilles cannot be installed to avoid seeing inside the duct, paint the inside of the duct with flat black paint to reduce visibility.
  - E. Control Damper Installation:
    - 1. Provide necessary transitions required to install dampers larger than duct size.
    - 2. Assemble multiple sections dampers with required interconnecting linkage and extend required number of shafts through duct for external mounting of damper motors.
    - 3. Provide necessary sheet metal baffle plates to eliminate stratification and provide air volumes specified. Locate baffles by experimentation, and affix and seal permanently in place, only after stratification problem has been eliminated.
    - 4. Install all damper control/adjustment devices on stand-offs to allow complete coverage of insulation.
    - 5. Provide any and all volume control dampers as requested by the Balance Contractor.
  - F. Protection and Cleaning: Adequately protect equipment and materials against physical damage. Place equipment in first class operating condition, or return to source of supply for repair replacement, as determined by A/E/D. Protect equipment and ducts during construction against entry of foreign matter to the inside and clean both inside and outside before operation and painting. When new ducts are connected to existing ductwork, clean both new and existing ductwork by mopping and vacuum cleaning inside and outside before operation.
- 3.02 DUCT LEAKAGE TESTS AND REPAIR
- A. Perform smoke test on duct system with A/E/D present before insulation is applied and seal all detectable leaks in the duct as directed by A/E/D.

END OF SECTION 23 31 13

23 37 13  
DIFFUSERS, GRILLES AND REGISTERS

PART 1 – GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, Section 23 31 13 METAL DUCT WORK apply to this Section.

1.02 SUMMARY

- A. This section includes variable air volume terminals for connection to single duct.

1.03 SUBMITTALS

- A. Product Data: For each product indicated, include the following:
  - 1. Shop drawings are to indicate materials of construction, interior and exterior finish, and mounting details, plus performance data including heating/cooling capacity and air flows.

PART 2 – PRODUCTS

2.01 MANUFACTURERS

- A. Acceptable manufacturers:
  - 1. Krueger
  - 2. Titus
  - 3. Price Industries
  - 4. Tuttle and Bailey
- B. Capacity, size and CFM set points are indicated on the drawings.

2.02 CEILING DIFFUSERS

- A. Square or rectangle with louvered face constructed of steel or aluminum.
  - 1. Air pattern: To be adjustable from vertical, horizontal and off.
  - 2. Inner assembly: To be removable for access and cleaning.
  - 3. Suspended ceiling: To have panel sizes to fit into ceiling grid.
  - 4. Finish: To be factory applied enameled color as selected by Owner.
  - 5. Reference product: Tuttle and Bailey DFF.

2.03 CEILING RETURN AIR GRILLES

- A. Square or rectangle aluminum egg crate  $\frac{1}{2}$ " x  $\frac{1}{2}$ " x 1" deep with no deflection.
  - 1. Finish: To be factory applied enamel color to match ceiling.
  - 2. Ceiling mounting: To have panel sized to fit ceiling grid or flanged for tile mounting.
  - 3. Reference product: Tuttle and Bailey CRE 510

23 37 13  
DIFFUSERS, GRILLES AND REGISTERS

2.04 PART 3 – EXECUTION

3.01 EXAMINATION AND INSTALLATION

- A. Examine areas where outlets and inlets are to be installed for compliance with requirements for installation tolerances and other conditions affecting performance of equipment, such as proximity to walls and other air flow obstructions.
- B. Proceed with installation only after unsatisfactory conditions have been corrected.
  - 1. Contractor to field verify exact frame requirements for each inlet and outlet.
  - 2. Support units from building structure.
  - 3. Connect to ductwork with draw bands or mechanical devices.
  - 4. Assure access to each outlet and inlet.

END OF SECTION 22 37 13

COMMON WORK RESULTS FOR ELECTRICAL

## PART 1 – GENERAL

## 1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of Contract, including General, Supplementary, and Special Conditions apply to all electrical work.

## 1.02 DESCRIPTION OF WORK

- A. Section 260500 applies to all electrical materials, equipment, installations and services supplied under any portion of the work.
- B. All work must meet or exceed all Local, State and Federal Codes and ADA Guidelines.
- C. All Electrical Contractor or Electrical Sub-contractor work shall be performed by a licensed and bonded Electrical Contractor with at least five (5) years of successful installation experience on projects with electrical work similar to this project.
- D. The Electrical Contractor or Electrical Sub-contractor shall coordinate the Basic Requirements as applicable to any equipment, installations and services of an electrical nature.
- E. It is the intention of this Division of the Specifications and the accompanying drawings to describe and provide for the furnishing, installing, testing and placing in satisfactory and successful operation all equipment, materials, devices and necessary appurtenances to provide a complete electrical system.
- F. The Contract drawings indicate the extent and the general location and arrangement of equipment, conduit and wiring. The General Contractor and their Electrical Sub-contractor shall study the plans and details and shall coordinate with all other trades to prevent conflict and interference with other installations.
- G. The Electrical Contractor or the Electrical Sub-contractor is responsible for installation of a complete and operating electrical system in accordance with the intent of the Drawings and Specifications.
- H. Any minor changes in location of equipment and conduits from those shown on the plans shall be made without extra charge if so directed by the Owner prior to installation.
- I. All equipment shall be installed such that maintenance and service may be properly accomplished. If necessary, the Owner may at their option require the contractor to demonstrate the service on any piece of equipment to determine sufficient service space exists. If service space is not adequate, the equipment shall be relocated at no additional cost to the Owner so that sufficient service space is achieved.

## 1.03 PERMITS AND FEES

- A. This work shall include the procurement of and payment for all permits and fees for the performance of the electrical work.

26 05 00  
COMMON WORK RESULTS FOR ELECTRICAL

1.04 SUBMITTALS

- A. The following items that shall be submitted for approval prior to ordering. Submit individually by the appropriate Specification Section number.
  - 1. Raceway (unless special raceway is specified a letter on Company letterhead stating the products to be used are in conformance with the Specifications is acceptable as a Submittal. Check with Engineer/Owner)
  - 2. Wire (unless special wire is specified a letter on Company letterhead stating the products to be used are in conformance with the Specifications is acceptable as a Submittal. Check with Engineer/Owner)
  - 3. Wiring Devices and Covers
  - 4. Lighting Fixtures
  - 5. Disconnect Switches
  - 6. Motor Starters
  - 7. Panelboards and Switchboards
  - 8. Fire Alarm
  - 9. Others as required by the related Division 26 Section.
- B. Submission of the above information shall be electronically in ISU approved PDF Format.

1.05 PROJECT CLOSEOUT

- A. On Electrical Prime Projects one set of all Project documents shall be submitted electronically in PDF Format on a USB Flash Drive. The following is a list, but not limited to, of required documentation to be included on the USB flash drive:
  - 1. Bid Form
  - 2. Award Letter and Contract for Construction
  - 3. Meeting minutes and supporting documentation.
  - 4. Reviewed submittals and reviewed shop drawings
  - 5. All Change documentation, e.g. ASI, RFI, CCD, RFP, CP, CO, etc.
  - 6. Pay Applications
  - 7. Installation instructions and schematic drawings
    - a. Complete parts list with manufacturer's model numbers.
    - b. Complete wiring diagrams showing all connections and internal wiring. Factory typical wiring diagrams are not acceptable.
  - 8. Operating and maintenance instructions.
  - 9. Warranty and guarantee information
  - 10. Substantial Completion documents to determine start of Warranty Period
- B. When individual Specification Sections call for close-out submission they may be combined on a master Project close-out USB flash drive with itemized files and sub-files for each Section.
- C. Additionally, submit one hard copy of the O&M's in a 3-ring binder and unfolded Record Drawings.

COMMON WORK RESULTS FOR ELECTRICAL

- D. Prior to release of final payment, Indiana State University must receive a complete set of record drawings in AutoCAD 2010 on a CD or DVD. The Design Engineer and the Indiana State University Department of Facilities Management engineering staff must approve these drawings.

## 1.06 COPPER REQUIREMENTS FOR ELECTRICAL EQUIPMENT

- A. All current-carrying components (phase, neutral and ground) of all electrical equipment shall be copper. No CUAL allowed without prior approval of Owner.
- B. Exceptions: molded case circuit breakers with in-built lugs and safety switches.

## 1.07 UNDERGROUND UTILITIES

- A. All underground utility lines shall be buried a minimum of 36" below finished grade.
- B. Place 3" of compacted red sand below all buried utility lines and cover with 12" of red sand.
- C. Remainder of the trench shall be back filled with new topsoil free of debris, compacted in 6" lifts to 98% standard proctor using the water jet method.
- D. Install the appropriate 6" wide marker tape a minimum of 12" above any buried utility line.

## 1.08 NEUTRAL RULES

- A. Neutral rules and requirements for multi-circuit branch raceway installations.
  - 1. A separate dedicated neutral shall be installed for every phase conductor in a multi-circuit 120-volt or 277-volt raceway.
  - 2. Neutrals shall be marked in such a way as to prevent the accidental crossing of neutrals at device locations.
  - 3. Neutrals in 120-volt applications shall be white, gray in 277-volt applications.
  - 4. This includes pre-wired raceway systems such as ISODUCT and systems furniture.
  - 5. No sharing of neutrals is allowed.
- B. Over sizing of neutral conductors shall not be allowed in lieu of the preceding rules and requirements.
- C. THESE RULES SUPERCEDE ANY OTHER NEUTRAL INSTRUCTIONS EITHER WRITTEN OR IMPLIED IN ANY OTHER SPECIFICATION SECTION OR SHOWN ON DRAWINGS.

## 1.09 RACEWAY SYSTEMS INSTALLATION SUMMARY

- A. Provide conduits, cable trays, surface raceways, boxes, fittings and supports to form a complete, coordinated, and continuously grounded raceway system.
- B. No more than three (3) single phase (120volt and 277volt) circuits shall be installed in a conduit raceway system.

## 1.10 RACEWAY REQUIREMENTS

- A. Conduits indoors in general areas shall be electrical metallic tubing (EMT) with steel set screw or compression fittings.
- B. Conduits indoors in hazardous areas, encased in concrete floorslabs or subjected to water, physical damage or abuse shall be galvanized rigid steel (GRS) or intermediate metal conduit (IMC) with cast or malleable iron threaded fittings and bushings.
- C. Conduits indoors for medium voltage distribution circuits or for fire pump feeders shall be galvanized rigid steel conduit with cast or malleable iron threaded fittings and bushings.

COMMON WORK RESULTS FOR ELECTRICAL

- D. Conduits outdoors shall be galvanized rigid steel or intermediate metal conduit with cast or malleable iron threaded fittings and bushings.
  - E. Conduits encased in concrete underground shall be Type DB PVC for IT applications and Schedule 80 for MV applications both with matching fittings.
  - F. Conduits direct buried underground shall be Schedule 40 PVC with matching fittings.
  - G. Conduits in steam tunnels shall be galvanized rigid steel or intermediate metal conduit with cast or malleable iron threaded fittings and bushings. Exceptions to this requirement are tunnel segments inside building (i.e., mechanical rooms) where EMT may be used.
  - H. Final connections to recessed lighting fixtures and under counter lights shall be 1/2" minimum flexible metallic conduit, manufactured wiring systems, or galvanized steel Type MC Cable all with steel fittings.
    - 1. Manufactured wiring systems shall
      - a. Only be used above accessible ceilings.
      - b. Shall not be used in walls or above permanent ceilings.
      - c. Shall contain a dedicated, separate, grounding conductor.
    - 2. Type MC cable conductors shall be color coded to match the building color-coding scheme. Type MC Cable shall be terminated with steel setscrew connectors that have integral insulating bushings. Self-locking, twist-in type fittings are not acceptable.
  - I. Final connections to motors, transformers and equipment subject to vibration or removal for maintenance shall be 1/2" minimum liquid tight flexible metallic conduit with steel liquid tight fittings. Transformer connections may be non-liquid tight flexible metallic conduit in electrical rooms only.
  - J. Connections to recessed power receptacles and light switches in areas with accessible ceilings:
    - 1. In new 'metal stud and gypsum board partitions (walls)' and in existing 'metal stud and gypsum board partitions (walls)', where the wall is not being otherwise opened up, the final connections may be made with type MC Cable. This MC Cable, shall:
      - a. Be run to a box immediately above the accessible ceiling, and the box size shall not exceed 4-11/16" square.
      - b. Conduit shall be used for the entire run, from this junction box, to the power source, load (lights), etc.
      - c. No more than three circuits may be run through any given junction box.
      - d. Individual conductors making up the MC cable shall be stranded copper, with separate grounding conductor, and steel corrugated armor. Individual conductors shall be color coded as required in section 16120.
      - e. The MC Cable is terminated using UL listed hardware intended for the cable and boxes being used, (and rated for commercial and industrial environments).
      - f. The MC Cable shall be secured in the wall cavity as required by NEC.
      - g. The MC Cable shall be as short as it is necessary to serve the need and meet the Code
  - K. In areas with non-accessible ceilings devices shall be installed with standard conduit; run back in a continuous installation to a junction box located at an access point in the ceiling
  - L. Connections to other recessed devices, (including communication outlet boxes, junction or pull boxes, etc) shall be with standard conduit of the type appropriate for the wall construction.
- 1.11 CABLE TRAY REQUIREMENTS
- A. Power and telecommunications cable trays shall be aluminum, ladder type, of the sizes shown on the drawings.

COMMON WORK RESULTS FOR ELECTRICAL

- B. Center spline telecommunications cable tray may only be used where shown.
- C. Changes in cable tray direction or elevation shall be made using standard fittings from the same manufacturer as the cable tray.
- D. Barriers shall be installed in cable trays where shown to separate circuits of different voltage levels.

**1.12 SURFACE RACEWAY REQUIREMENTS**

- A. When conduits in finished areas cannot be concealed in walls or above ceilings, surface raceways may be used where permitted. Boxes and fittings shall match and be from the same manufacturer as the raceways.
- B. Raceway shall be metal and white in color unless otherwise noted on the drawings.
- C. Contractor shall verify with the Owner if the use of metal surface raceway is acceptable.

**1.13 BOX REQUIREMENTS**

- A. Provide sheet steel outlet boxes, extensions, and plaster rings for EMT, flexible metal conduit, and MC cable.
- B. Provide cast or malleable iron outlet boxes and covers for galvanized rigid steel conduits, intermediate metal conduits, and liquidtight flexible metal conduits.
- C. Boxes shall be sized for all conductors and devices to be contained within. Box extensions shall not be used to correct for undersized boxes. A single extension may be used as follows only if all free conductors extend at least 3 inches outside of the extension opening.
  - 1. On boxes being flush mounted in masonry walls.
  - 2. On existing boxes in walls that are being furred out.
  - 3. On existing boxes for connecting to an existing circuit.
  - 4. On fire alarm, security and clock system boxes where required by the system manufacturer's instructions.
- D. Plaster rings shall not be considered box extensions, but their capacities may be included in box fill calculations.

**1.14 SUPPORT REQUIREMENTS**

- A. Mechanical Areas and Tunnels
  - 1. Surface mounted equipment shall be secured to steel channels.
  - 2. Surface mounted raceway 1½" and smaller and boxes maybe attached directly to surfaces.
  - 3. Multiple raceway runs maybe attached to
    - a. A trapeze system with approved straps
    - b. Trapeze shall be attached to the structure by steel channels and threaded rod.
  - 4. Vertical surface race way 1½" maybe attached by:
    - a. Below 8' by one or two hole straps
    - b. 8" and above with pipe hangers ("Minerallac style hangers")
  - 5. The channels and raceway shall be attached with toggle bolts to hollow tile, block or similar surfaces, and attached with screws or bolts and expansion shields to solid masonry or concrete.
- B. Finished Areas Above Suspended Ceilings
  - 1. Raceway and boxes maybe attached directly to surfaces with appropriate straps or hangers.

COMMON WORK RESULTS FOR ELECTRICAL

2. Multiple raceway runs may be attached to
    - a. A trapeze system with approved straps
    - b. Trapeze shall be attached to the structure by steel channels and threaded rod.
  3. The channels and raceway shall be attached with toggle bolts to hollow tile, block or similar surfaces, and attached with screws or bolts and expansion shields to solid masonry or concrete.
  4. Attachment of raceway to ceiling grid support wires or rods is not permitted.
- C. Finished Areas Inside Walls
1. Raceway and boxes shall be attached to structural members with devices specifically designed for raceway/box attachment to the type of structural member used.
- D. Finished Areas Exposed
1. Surface raceway shall be attached to finished surfaces utilizing the factory approved method of attachment.
  2. Tape is not acceptable for attachment of non-metallic surface raceway.

## PART 2 - PRODUCTS

## 2.01 CONDUITS

- A. Electrical metallic tubing shall be thin wall steel tubing, electro-galvanized or hot dipped galvanized inside and outside. Fittings and bushings shall be galvanized steel set screw type with two screws per connection for sizes over 2".
- B. Galvanized rigid steel conduit and intermediate metal conduit shall be hot dipped galvanized inside and outside, in 10' lengths and threaded on both ends. Fittings and bushings shall be cast or malleable iron, and hot dipped galvanized inside and outside.
- C. PVC conduit and fittings shall be Type DB for encasement in concrete for IT applications, Schedule 40 for direct burial, concealed and exposed work, and Schedule 80 in MV Duct Banks. Fittings shall be of the same type and from the same manufacturer as the conduit. PVC conduit shall be UL Labeled for 90 degrees C cables. Approved Manufacturers:
  1. Cantex
  2. Carlon
  3. National Pipe & Plastic.
- D. Flexible metallic conduit shall be galvanized steel or aluminum. Fittings shall be of steel with cadmium or galvanized finish. Fittings shall be machine screw clamp type, single or two-piece. Self-locking, twist-in type fittings are not acceptable.
- E. Liquid tight flexible metallic conduit shall consist of a flexible, galvanized steel core, a continuous copper ground strip and a polyvinyl chloride jacket. Fittings shall be steel liquid tight grounding type from the same manufacturer as the conduit.

## 2.02 CABLE TRAYS

- A. Ladder type cable tray shall be aluminum, of the width shown, with 4" rail height, 13/16" minimum rung width, and 9" maximum rung spacing. The tray with a 10' span shall be capable of sustaining a working load of 145 pounds per lineal foot with a load deflection of 1.0" when tested in accordance with NEMA VE1-3.01. Approved Manufacturers:
  1. B-Line
  2. Chalfant
  3. Cope
  4. Globetrax
  5. Husky

COMMON WORK RESULTS FOR ELECTRICAL

- 6. Mono-Systems
  - 7. Square D
  - 8. Wiremold.
  - B. Center spline cable tray shall be aluminum, of the width shown, with top mounted rungs, 3" load depth, 13/16" minimum rung width, and 9" maximum rung spacing. The tray with a 10' span shall be capable of sustaining a working load of 145 pounds per lineal foot with a load deflection of 1.0" when tested in accordance with NEMA VE1-3.01.
  - C. Tray fittings including horizontal and vertical bends, tees, crosses, reducers, splice plates and expansion joints shall be from the same manufacturer and of the same product line as the tray. Bends, tees, crosses and reducers shall have a 13/16" minimum rung width, a 9" maximum rung spacing, and a 12" minimum bend radius.
  - D. Tray fasteners shall be galvanized or zinc plated steel.
- 2.03 SURFACE RACEWAYS
- A. Where surface raceways are called for on the drawings, or when conduits in finished areas cannot be concealed in walls or above ceilings, surface raceways shall be used. Boxes and fittings shall match and be from the same manufacturer as the surface raceway.
  - B. Surface raceways shall consist of a base and cover, sized for the number of conductors contained within, complete with all connectors, fittings, bushings, boxes, covers and mounting hardware.
  - C. Raceways shall be 600 volt rated, and be in compliance with the applicable paragraphs of NEC Article 352.
  - D. They shall be non-flammable, and UL labeled, under UL 5, or UL 5A (as applicable).
  - E. The completed raceway system shall be vandal resistant.
  - F. Shall accept receptacles, cover plates, telephone/data outlets and other standard wiring devices as specified elsewhere in these specifications.
  - G. The coverplates used for wiring devices and telecommunication outlets shall be of the 'overlapping' type, and shall therefore cover the 'cut-end' of the raceway cover.
  - H. The raceways shall have "scuff" resistant finish, and the raceways shall be paintable.
  - I. All components of the raceway system exposed to view shall be of the same color and shade.
  - J. Barriers shall be provided when necessary to separate conductors of different voltages, or services.
  - K. Surface raceways shall be steel or plastic as noted below, and as noted on the drawings:
  - L. Type Standards Manufacturers
    - 1. Metallic
      - a. Metallic raceways shall be of .040" thick (minimum) zinc plated or galvanized steel.
      - b. The acceptable levels of quality are, generically,
        - 1) Like "Wiremold V500 and V700" for smaller single channel raceway applications,
        - 2) Like "Wiremold V3000" for larger single channel raceway applications, and
        - 3) Like "Wiremold V4000" for larger multi-channel raceway applications.
      - c. Manufacturers include Wiremold, Hubbell, Thomas and Betts, or Mono-System.
    - 2. Plastic
      - a. Plastic raceways shall be of a material meeting all of the requirements of UL 5A, (including flammability, resistively structural strength, etc.).

COMMON WORK RESULTS FOR ELECTRICAL

- b. The acceptable levels of quality are, generically,
  - 1) Panduit LD series, or Carlon Series 30 for smaller single channel raceway applications;
  - 2) Panduit Type T-70, or Carlon "Premiere", for larger single channel raceways, and smaller multi-channel raceways; and
  - 3) Panduit Twin 70 or Carlon "Prestige", for larger multi-channel raceway applications.
- c. Manufacturers include Panduit, Carlon, Hubbell, Mono Systems, and Wiremold.
- M. Use vertical surface raceways from junction boxes above the ceiling, to the horizontal portion of the surface raceway. Locate vertical section as close to room corners (or 'vertical breaks' in mid wall) as is possible. Use of exposed vertical conduits is not acceptable.

**2.04 BOXES**

- A. Boxes for fixtures, outlets, switches, equipment connections and wire pulling shall be
  - 1. Cast or formed from carbon steel sheets of commercial grade steel not less than 14-gauge,
  - 2. One-piece construction, zinc, or cadmium plated,
  - 3. Tapped for mounting plates and covers as required.
- B. Pull and junction boxes shall be
  - 1. Fabricated from galvanized or painted code gauge cold rolled carbon steel sheets.
  - 2. Welded construction with flat removable covers fastened to the box with machine screws.
  - 3. Seams and joints shall be closed and reinforced with flanges formed of the same material from which the box is constructed or by continuous welding which will provide equivalent strength to flange construction.
  - 4. Preferably not provided with 'knockouts'.
- C. Box covers shall be fastened in place by machine screws or hinges and latches. Self-tapping or sheet metal fasteners are not acceptable.

**2.05 SUPPORTS**

- A. Hangers and brackets shall be made of steel pipe, channel iron, angle iron or prefabricated steel channel. Prefabricated steel channel shall be by B-Line, Hilti, Powerstrut or Unistrut.
- B. Anchors shall be lead shield anchors or plastic expansion anchors for small loads, and expansion or epoxy anchors for large loads. Powder-driven anchors shall not be used.

**2.06 LABELS AND DIRECTORIES**

- A. Equipment nameplates shall be engraved .125 inch (1/8") thick 'Lanaloid' (Lanacoid) plastic. White, with black letters. The engraved letters shall be at least one quarter inch (1/4") high.
- B. Receptacles and lighting switch covers shall be labeled using clear adhesive backed nylon or Mylar tape with black text permanently laminated to the tape.
- C. Panel directories shall be typed on supplied card stock with panel, or card stock similar in thickness and material as those supplied with the panels. Install supplied clear plastic cover, or one of like material.

**PART 3 - EXECUTION****3.01 GENERAL**

- A. All work shall conform to all applicable Codes and Construction Standards.
- B. All installations shall be warranted for a period of one (1) year against defects in material and workmanship.

COMMON WORK RESULTS FOR ELECTRICAL

- C. The Owner reserves the right to relocate any device fifteen (15) feet prior to installation at no additional cost.
- D. Material Storage
  - 1. All materials shall be new and in original factory packaging.
  - 2. All material shall be kept dry and clean.
  - 3. The Owner reserves the right to reject any material not properly stored.
- E. Contractor shall swab clean the interior of all raceway prior to pulling wire.
- F. Device plate screw slots shall be oriented vertically.

**3.02 RACEWAYS**

- A. Size conduits in accordance with the NEC, but not less than the sizes shown on the drawings. Minimum power, fire alarm and control conduit size shall be ¾". Minimum telecommunications conduit size shall be 1".
- B. Install concealed and exposed conduits and cable trays parallel to or at right angles to building lines. Conduits shall not be embedded in concrete slabs except where specifically shown. Install surface raceways as close to room corners or trim features as possible to make the surface raceways less obvious.
- C. Make directional changes in primary power distribution conduits above ground with sweeps and long radius elbows, and underground with 20' minimum radius bends.
- D. Conceal conduits wherever possible and practical. When conduits cannot be concealed in finished areas, use surface raceways with matching boxes from the same manufacturer as the raceways.
- E. Metal conduits, fittings, enclosures and raceways shall be mechanically joined together in a firm assembly to form a continuous electrical conductor providing effective electrical grounding continuity.
- F. Provide expansion fittings at the intervals specified in the manufacturer's instructions.
- G. Conduits entering panels located outdoors, in parking structures, in steam tunnels and on cooling towers shall enter from the sides, back, or bottom. Conduits shall not enter from the top.
- H. Separate raceways from uninsulated steam pipes, hot water pipes, and other hot surfaces by a minimum of 4" horizontally or 12" vertically. Separate raceways from ventilation ducts and insulated pipes so that they do not come into contact with each other.
- I. Low voltage signal circuits shall be separated or shielded from power circuits to prevent the induction of noise into the signal circuits.
- J. EMT entering sheet metal enclosures and outlet boxes shall be secured in place by a connector with a locknut. Rigid conduit shall be secured with locknut inside and outside and a bushing. Sufficient thread on the connector or conduit shall extend into the enclosure so that the bushing will butt tight into the connector or conduit. Bushings shall not be used as jamb nuts or in lieu of locknuts.
- K. Flexible metallic conduit to motors and similar equipment shall not exceed 3'-0" in length, and shall have adequate slack to absorb the maximum vibration. Flexible conduit connections to lighting fixtures shall not exceed 6'-0" in length.

**3.03 MOUNTING HEIGHTS**

- A. Except where shown otherwise, install equipment and devices at the following heights:
  - 1. Receptacles (Wall): 18" A.F.F. to center

COMMON WORK RESULTS FOR ELECTRICAL

2. Receptacles (Above Counter): 48" A.F.F. to center or 4" minimum above countertop or backsplash.
3. Receptacles (Unfinished Area): 48" A.F.F. to center
4. Surface Raceway Receptacle Strips: 42" A.F.F. to bottom
5. Light Switches: 48" A.F.F. to center
6. Telephone Outlets (Wall Phone): 48" A.F.F. to center
7. Telephone/Data Outlets: 18" A.F.F. to center
8. Clock Outlets: 88" A.F.F. to center
9. Fire Alarm Pull Stations: 45" A.F.F. to center
10. Fire Alarm Horn/Strobes: 80" A.F.F. to bottom or 1' below finished ceiling whichever is lower.
11. Card Readers: 48" A.F.F. to card slot
12. Security System Controls: 48" A.F.F. to center
13. Thermostats/HVAC Controls: 48" A.F.F. to center
14. Panelboards: 72" A.F.F. to top
15. Safety Switches/Motor Starters: 72" A.F.F. to top (except top of handle shall not exceed 78" A.F.F.)
16. Motor Control Pushbuttons: 60" A.F.F. to center
17. Verify with the Owner for heights not otherwise listed.

**3.04 SUPPORTS**

- A. Provide 4" thick concrete housekeeping pads for floor-mounted equipment.
- B. Support all electrical items independently of supports provided by the other trades.
- C. Support conduits and boxes using steel conduit straps or 1/4-inch minimum diameter threaded rod hangers. Suspended ceiling hangers or hanger wire shall not be used (except to support flexible metallic conduit and manufactured wiring systems).
- D. Support cable trays with support brackets or 3/8" diameter minimum threaded rod hangers at intervals not exceeding 8'-0" for straight runs. Additional supports shall be provided at tray fittings.
- E. Hangers shall be of sufficient strength that their deflection at mid span does not exceed 1/240 of the hanger span length after the cables are installed.
- F. Route flexible metallic conduit, manufactured wiring systems and Type MC cable parallel to or perpendicular to building lines, and in a neat and workmanlike manner. Coil the excess manufactured wiring systems and Type MC cable, and support independently of the ceiling grid system at intervals not exceeding 3 feet.

**3.05 PENETRATIONS, SLEEVES AND FIRE SEALS**

- A. Cut floor and wall penetrations neatly and to the minimum size required for installation of the equipment and raceways.
- B. Provide galvanized steel pipe sleeves for all conduits penetrating floors, exterior walls and roofs.
  1. Extend floor sleeves above the floor a minimum of 2 inches.
  2. Embed sleeves in new concrete or step-core concrete and grout sleeves into existing concrete with epoxy grout.
  3. Seal floor sleeves using fire-sealing systems approved by a Nationally Recognized Testing Laboratory.
  4. Seal exterior wall and roof penetrations water tight.

COMMON WORK RESULTS FOR ELECTRICAL

- C. Patch both sides of wall penetrations cut for electrical equipment and raceways to seal against the passage of air, sound and fire.
  - 1. Seal cable tray penetrations in fire rated walls using fire sealant bags approved by a Nationally Recognized Testing Laboratory.
  - 2. Seal conduit penetrations in fire rated walls using firesealing caulk approved by a Nationally Recognized Testing Laboratory.
  - 3. Seal conduit penetrations in non-rated walls using masonry materials that match the wall construction.
  - 4. Fire seal between recessed outlet boxes located on opposite sides of a fire rated wall if the box openings are over 16 square inches and the boxes are less than 24 inches apart.
- 3.06 EXPANSION FITTINGS
  - A. Provide expansion fittings at all building expansion joints.
  - B. Provide expansion fittings, in accordance with manufacture recommendations, in all areas subject to swings in temperature of more than 15 degrees C.
  - C. Install expansion fittings in all locations where expected expansion difference is ¼", or more, between boxes
- 3.07 IDENTIFICATION
  - A. Provide nameplates and labels in accordance with Article 2.6.
    - 1. Lanaloid labels shall be mechanically secured in place with sheet metal screws and/or bolts and nuts
    - 2. Labels shall be neatly centered. Place labels in like positions on similar equipment.
  - B. Color code wiring as noted in Section 26 05 19 3.01 B
  - C. Color code junction boxes and box covers of
    - 1. Emergency power circuits with red paint
    - 2. Fire alarm circuits with red paint.
    - 3. Temperature control circuits with blue paint.
    - 4. Phone and Data circuits with orange paint.

END OF SECTION 260500

26 05 00  
COMMON WORK RESULTS FOR ELECTRICAL

Blank Page

26 05 02  
SELECTIVE ELECTRICAL DEMOLITION

PART 1 – GENERAL

1.01 SCOPE OF WORK

- A. Demolition of electrical items and associated materials as indicated herein or as indicated on the drawings.

1.02 SECTION INCLUDES

- A. Removal of designated equipment and devices.
- B. Removal of designated construction.
- C. Disposal or storage of removed materials.
- D. Identification of utilities.
- E. Refer to items as indicated.

1.03 SUBMITTALS FOR CLOSEOUT

- A. Project Record Documents: Accurately record actual locations of terminated utilities and subsurface obstructions.

1.04 REGULATORY REQUIREMENTS

- A. Conform to applicable code for demolition work, safety of structure, dust control, products requiring electrical disconnection and re-connection.
- B. Obtain required permits from authorities.
- C. Do not close or obstruct egress width to any building or site exit.
- D. Do not disable or disrupt building fire or life safety systems without 3 days prior written notice to Owner.
- E. Conform to procedures applicable when hazardous or contaminated materials are discovered.

1.05 SCHEDULING

- A. Perform work between the hours of 7 a.m. and 7 p.m.

1.06 PROJECT CONDITIONS

- A. Conduct demolition to minimize interference with adjacent and occupied areas.
- B. Maintain protected egress and access to the Work.

PART 2 – NOT USED

PART 3 – EXECUTION

3.01 PREPARATION

- A. Protect existing materials which are not to be demolished.
- B. Notify affected utility companies before starting work and comply with their requirements.
- C. Utilize OSHA lockout/tag-out procedures for disconnecting means.
- D. Label all wiring to remain (phase and device fed) to assure proper re-connection.
- E. Mark location and termination of utilities.

3.02 DEMOLITION

- A. Disconnect, remove, cap, identify designated utilities to remain and demolish in an orderly and careful manner.
- B. Remove demolished materials from site except where specifically noted otherwise.

26 05 02  
SELECTIVE ELECTRICAL DEMOLITION

- C. Remove materials as Work progresses. Upon completion of Work, leave areas in clean condition.

3.03 PROTECTION OF SALVAGED ITEMS

- A. Remove, store and protect the materials and equipment scheduled to be re-used.
- B. Protect wiring to be re-used by means of a Junction Box
  - 1. Junction Box shall be of sufficient size to permit reconnection of existing wiring to new wiring per NEC Requirements.
  - 2. In outdoor locations the junction box shall be NEMA 3R or a custom junction box with welded seams and gasketed cover.

END OF SECTION 26 05 02

LOW VOLTAGE WIRE AND CABLE

## PART 1- GENERAL

## 1.01 DESCRIPTION OF WORK

- A. Extent of electrical wire and cable work is indicated by the Project drawings.
- B. Types of wire, cable and connectors in this section include the following
  - 1. 600 volt insulated copper conductors
  - 2. Twist on insulated metal spring connectors
  - 3. Compression connectors
  - 4. Split Bolt connectors

## 1.02 QUALITY ASSURANCE

- A. Manufacturers: Firms regularly engaged in manufacture of electrical wire and cable of types sizes and ratings required, whose products have been in satisfactory use in similar service for not less than five (5) years.
- B. Installers: Firm with at least five (5) years of successful installation experience with projects utilizing electrical wiring and cabling work similar to those required for this Project.
- C. NEC Compliance: Comply with NEC requirements as applicable to construction, installation and color coding of electrical wires and cable.
- D. U.L. Compliance: Comply with applicable requirements of UL Standard 83, "Thermoplastic-Insulated Wires and Cables", and UL Standard 486A, "Wire Connectors and Soldering Lugs For Use With Copper Conductors".
- E. UL Labels: Provide wire, cable and connectors which are UL listed and labeled.

## 1.03 DELIVERY, STORAGE AND HANDLING

- A. Deliver wire and cable properly packaged in factory-fabricated type containers or wound on NEMA Specified type non-returnable wire and cable reels.
- B. Store wire and cable in a clean dry space. Protect products from weather, damaging fumes, construction debris and traffic.
- C. Handle wire and cable carefully to avoid abrading, puncturing, or tearing wire and cable insulation and sheathing. Ensure that dielectric resistance integrity of wire and cable is maintained.

## PART 2 PRODUCTS

## 2.01 ACCEPTABLE MANUFACTURERS

- A. Available Manufacturers: Subject to compliance with requirements, manufactures offering products which may be used on this Project include, but not limited to, the following:
  - 1. Low Voltage Wire:
    - a. American Insulated Wire and Cable
    - b. Southwire Company
    - c. Others as Approved

LOW VOLTAGE WIRE AND CABLE

2. Electronic Cable
    - a. Belden
    - b. Alpha
    - c. Anixter
  3. Twist on insulated metal spring connectors
    - a. Ideal
    - b. Thomas and Betts Corp
    - c. 3M Company
  4. Compression
    - a. Square D / Anderson
    - b. Thomas and Betts
- 2.02 DESCRIPTION THHN / THWN
- A. Conductor:
    1. Bare, soft annealed copper per ASTM B-3.
    2. Sizes 14 - 10 AWG: Solid, bunched, unilay concentric combination unilay or compressed stranded (class C) alternate ASTM B-787, ASTM B-3 or ASTM B-8 and UL-83.
    3. Sizes 8 - 2 AWG: Concentric, compressed stranded (class C) alternate ASTM B-787, ASTM B-8, UL-83 and UL-1063.
    4. Sizes 1 AWG - 750 KCMIL: Concentric, compressed stranded (class B) ASTM B-8, UL-83 and UL-1063.
  - B. Insulation:
    1. High dielectric polyvinyl chloride (PVC) per UL-83 and UL-1063.
    2. Overall Jacket: Nylon per UL-83 and UL-1063.
  - C. Cable Identification:
    1. Ink print on jacket for Sizes 14 - 10 AWG (solid conductors): "(size) AWG Type THHN or THWN GAS AND OIL RES II 600V(UL) or AWM VW-1---(Company Name).---C-UL Type T90 NYLON or TWN 75"
    2. Ink print on jacket for Sizes 14 AWG - 750 KCMIL (stranded): "(size) AWG (or KCMIL) Type MTW or THHN or THWN or GAS AND OIL RES II 600V (UL) or AWM---(Company Name).---C-UL Type T90 NYLON or TWN 75."
    3. Also "VW-1" and "FT1" on sizes 14 through 6 AWG and "for CT USE SUN RES" on sizes 1/0 AWG and larger in black.
  - D. Cables conform to the following standards:
    1. UL-83 for THHN-THWN, UL-1063 for MTW (stranded conductors only)
    2. Federal Specification J-C-30B, NEMA WC-5, UL-758 for AWM Styles 1316 through 1321, 1408 through 1414, 1452 and 1453.
- 2.03 ELECTRONIC CABLE - COMMUNICATION AND SIGNAL
- A. Shall conform to the recommendations of the manufacturers of the communication and signal systems; however, not less than what is shown.

LOW VOLTAGE WIRE AND CABLE

- B. Wiring shown is for typical systems. Provide wiring as required for the systems being furnished.
- C. Multi-conductor cables shall have the conductors color coded.

**2.04 CABLES AND CONNECTORS**

- A. General: Provide electrical cables and connectors of Manufacturer's standard materials, as indicated by published product information.
- B. Provide copper conductors with conductivity of not less than 98% at 68° F (20° C).
- C. Electronic cable shall be Plenum rated and as recommended by the Equipment Supplier
- D. Connectors shall be for copper to copper connections
- E. Insulation: All connectors shall be fully insulated to match insulation type and rating of conductors being spliced.

**PART 3 – EXECUTION****3.01 INSTALLATION OF WIRES AND CABLES**

- A. General: Install electrical cables, wires and wiring connectors as indicated, in compliance with applicable requirements of NEC, NEMA, UL and NECA's "Standard of Installations", and in accordance with recognized industry practices.
- B. Feeder phase identification from left to right or front to back facing front of equipment shall be one of the following:

Phase A	Phase B	Phase C	Neutral	System
X	Y	Z	N	Any voltage
BLACK	RED	BLUE	WHITE	120/208 volt feeders
BROWN	ORANGE	YELLOW	GRAY	277/480 volt feeders

- C. Install all wiring in conduit except as indicated on the drawings or directed by Owner.
- D. Pull conductors together where more than one is being installed in a raceway.
- E. Use pulling compound or lubricant where necessary. Compound must not deteriorate conductor or insulation. Use of soap is not permitted as a pulling lubricant.
- F. Pulling means must not damage cable or raceway.

**3.02 COMPRESSION CONNECTORS**

- A. Use only compression indenter tools designed for the type of connector used.
- B. For multiple indentations start at center and indent outward.

**3.03 FIELD QUALITY CONTROL**

- A. Prior to energizing, test all cables and wires with "Megger" to determine insulation resistance levels to ensure insulation integrity.
- B. Prior to energizing, test wires and cables for electrical continuity and for short circuits.

END OF SECTION 26 05 19

26 05 19  
LOW VOLTAGE WIRE AND CABLE

Blank Page

26 05 26  
GROUNDING AND BONDING

PART 1 - GENERAL

1.01 SUMMARY

- A. Provide grounding for all systems and equipment.

1.02 GROUNDING SYSTEM REQUIREMENTS

- A. Each ground rod shall have a maximum resistance to ground of 10 ohms before connection to the other ground rods. If reading is above 10-ohms, drive one extension. Further testing of that individual rod is not needed.
- B. The total grounding system with all connections completed shall have a maximum resistance to ground of 2 ohms for primary services or 5 ohms for secondary services.

1.03 CONNECTION REQUIREMENTS

- A. Provide exothermic weld type, or Burndy Hyground, ground connections for concealed, underground, and concrete encased ground connections, for ground connections to structural steel, connections between sections of the main ground bus and all connections to the substation room ground bus bars.
- B. Exposed ground connections (except connections to structural steel and substation room ground bus bars) may be made with copper or bronze compression ground fittings or bolted compression ring lugs.
- C. Provide exothermic weld type, or Burndy Hyground ground connections for splices and taps of grounding conductors No. 8 AWG and larger. Exposed splices and taps shall be taped.

PART 2 - PRODUCTS

2.01 GROUND RODS

- A. Unless shown otherwise, ground rods shall be 3/4" diameter by 10' long, copper clad steel. Ground rods shall be capable of being extended when additional length is required.

2.02 GROUNDING CONDUCTORS

- A. Grounding conductors for direct burial underground, for encasement in concrete, and for grounding of unit substations shall be No. 4/0 AWG minimum, bare, stranded copper.
- B. Grounding conductors for general use shall be stranded, copper conductor, sized in accordance with the NEC unless shown otherwise on the drawings, and insulated with green NEC Type THHN insulation rated 90 degrees C, 600 volts.

2.03 GROUND CONNECTIONS

- A. Ground connections shall be Burndy Hyground, Cadweld, Thermo-weld or Thomas & Betts Blackburn only.

PART 3 - EXECUTION

3.01 INSTALLATION REQUIREMENTS

- A. Ground duct banks and manholes in accordance with Specification Section 26 05 13
- B. Provide bare copper grounding conductors from duct banks, manholes, unit substations, primary switches, transformers, switchgear, panelboards, motor control centers and control panels to the building grounding system. Equipment rated above 480 volts or 600 amps shall be grounded by a minimum of two independent grounding conductors.
- C. Bond transformer, UPS system, central battery/inverter system, emergency generator, and separately derived electrical system neutrals to the building grounding system.
- D. Ground motors rated 460 volts and below by motor feeder equipment grounding conductors. Stranded copper grounding conductors connected to building steel shall also bond motors rated over 460 volts.

GROUNDING AND BONDING

- E. Provide green insulated equipment grounding conductors in all service, feeder, and branch circuits for connection of load devices to the power source ground. Raceways shall not be used as equipment grounding conductors.
- F. Equipment grounding conductors shall not be daisy-chained.
- G. Bond equipment-grounding conductors in boxes and enclosures where the grounding conductors are terminated or spliced.
- H. Bond conduits, cable trays, wireways, surface raceways, boxes, and enclosures together, and to the building grounding system. Provide bonding bushings and bonding jumpers to bond conduits where they enter a box or enclosure.
- I. Ground the lightning protection system with separate ground rods. The building grounding system ground rods shall not be used. After completion of both systems, the lightning protection system shall be bonded to the building grounding system.
- J. Protect separately routed grounding conductors subject to damage or physical abuse by Schedule 40 PVC nonmetallic conduits. Grounding conductors shall not be routed in metallic conduits except when routed with phase conductors.

END OF SECTION 26 05 26

26 05 33  
RACEWAY AND BOXES

PART 1 – GENERAL

1.01 SUMMARY

- A. This Section specifies raceways and boxes for building and structure electrical systems under 600 volts.
- B. Provide all labor, materials, and equipment as necessary to complete all work as indicated on the drawings, and as specified herein.
- C. Related Sections:
  - 1. Division 01 - General Requirements
  - 2. Applicable sections of Division 26 - Electrical

PART 2 – PRODUCTS

2.01 GENERAL INFORMATION

- A. All boxes, brackets, bolts, clamps, etc., shall be galvanized or electro-galvanized.
- B. All hardware used outdoors shall be hot dipped galvanized.

2.02 CONDUIT

- A. Rigid galvanized conduit shall be installed in poured concrete slabs, walls and partitions. Rigid or I.M.C. shall be installed in damp locations and inaccessible places.
- B. All rigid conduit, I.M.C. and E.M.T. shall be hot dipped galvanized or electro-galvanized.
- C. E.M.T. may only be installed exposed, above suspended ceilings, or in partitions.
- D. Flexible steel conduit may be used for short runs to individual pieces of equipment.
- E. Flexible sheathed metallic conduit shall be used for runs less than 6' in length to individual pieces of equipment in mechanical rooms, penthouses, etc.
- F. MC Cable is permitted in existing walls where installation of EMT is not possible to devices
- G. No E.M.T. or aluminum conduit shall be used in concrete, direct burial or in corrosive locations.
- H. Aluminum conduit may only be used in sizes 1-1/2 inch and larger. No aluminum conduit will be permitted in concrete. When aluminum conduit is used, all bends shall be galvanized steel.
- I. Size and type of conduit shall comply with the National Electric Code. Where conduits are indicated on the drawing to be larger than required by Code, the larger conduit shall be used.
- J. Minimum conduit size shall be 3/4 inch in all runs.

2.03 PULL AND JUNCTION BOXES

- G. All pull boxes shall be galvanized sheet steel, sized as required, with thickness not less than no. 14 gauge.

2.04 OUTLET BOXES

- A. All outlets, except as otherwise specified, shall consist of approved galvanized steel boxes of pattern adapted to the special requirements of each outlet, securely fastened in place in an approved manner.

PART 3 – EXECUTION

3.01 CONDUIT

- A. Conduit shall be concealed in all new walls and run above suspended ceilings.
- B. Use Wiremold type metal raceway where necessary to run exposed on existing walls and/or ceilings in finished areas as shown on the drawings.
- C. All conduit shall be fastened or suspended from structural members, slabs, or walls only. It shall not be run on or fastened to tee bars of suspended lay-in ceilings.

26 05 33  
RACEWAY AND BOXES

- D. All conduit shall be supported by approved hangers at spaced per NEC.
- E. All exposed conduit shall be run parallel to the structural members of the building in a neat manner, securely fastened in place.
- F. When metal conduit extends below the bottom of a slab on the ground, the slab shall be thickened in the area of the conduit so as to encase the conduit in concrete by at least 2 inches on all sides. The responsibility for and expense of this work shall be borne by the Contractor.

3.02 OUTLET BOXES

- A. Recessed outlet boxes for single gang or 2-gang installations shall be 4" square with appropriate device ring or plaster ring for the required number of devices.
  - 1. All device rings and plaster rings shall be installed vertically unless instructed otherwise by the A/E or Owner.
  - 2. All plaster rings shall not extend past flush with wall surface or be recessed more than 1/4" from wall surface.
- 3. For installations of more than two devices use the appropriate wall box for the number of devices required. If approved by the Owner the use of gangable wall boxes is allowed.
- 4. For surface installations in Mechanical Area or similar locations 4" square boxes shall be used with 1/4" raised cover.

3.03 PULL AND JUNCTION BOXES

- A. Pull boxes shall not be installed in inaccessible locations.

END OF SECTION 26 05 33

26 09 23  
LIGHTING CONTROLS

PART 1 – GENERAL

1.01 SCOPE

- A. The Contractor shall furnish and install a lighting control as specified and as shown on the contract drawings.

1.02 RELATED SECTIONS

- A. Section 26 05 00 Common Work Results for Electrical
- B. Section 26 05 19 Low Voltage Wire and Cable
- C. Section 26 05 33 Raceway and Boxes
- D. Section 26 51 00 Interior Lighting

1.03 SUBMITTALS -- FOR REVIEW/APPROVAL

- A. The following information shall be submitted to the Architect/Engineer and Owner
  - 1. Manufacturer's product cut-sheet
- B. Submit electronically in PDF format.

1.04 SUBMITTALS -- FOR INFORMATION

- A. When requested by the Engineer the following product information shall be submitted:
  - 1. Descriptive bulletins
  - 2. Product sheets.
- B. Submit electronically in PDF format.

1.05 DELIVERY, STORAGE, AND HANDLING

- A. Equipment shall be handled and stored in accordance with manufacturer's instructions. One (1) copy of these instructions shall be included with the equipment at time of shipment.

1.06 OPERATION AND MAINTENANCE MANUALS

- A. One (1) paper copy and one (1) USB flash Drive of the equipment operation and maintenance manuals shall be provided.
- B. Operation and maintenance manuals shall include the following information:
  - 1. Instruction books and/or leaflets
  - 2. Recommended renewal parts list
  - 3. Drawings and information required by section 1.06.

PART 2 – PRODUCTS

2.01 TIME CLOCK

- A. Manufacturers
  - 1. Paragon
  - 2. Tork

26 09 23  
LIGHTING CONTROLS

B. Ratings

1. Like Paragon Model EC71st /120V Electronic Sun Tracker
2. 120 volt ac control voltage
3. Single Channel control
4. Contact Rating, 15 amp
5. NEMA 1 enclosure

2.02 PHOTOCONTROL

A. Manufacturers

1. Tork
2. Precision

B. Ratings

1. Weatherproof Lexan® housing
2. Photocell: 1 inch cadmium sulfide light sensitive element.
3. Turn on: 1 to 3 foot-candles. External light level slide allows field adjustment between 3 to 10 foot-candles.
4. Turn on / turn off ratio 1:3
5. Minimum 15 second time delay.
6. Single-pole, single-throw switch. Contact position at night normally closed.
7. Temperature Range -40 to 158 degree F
8. ½"-14 threaded stem.

2.03 LIGHTING CONTACTOR

A. Manufacturers

1. ASCO
2. Cutler Hammer
3. Square D

B. Ratings

1. 30 amp minimum
2. Number of poles as required
3. Control/coil voltage 120 volt
4. Electrical held
5. Installed in NEMA 1 enclosure or as required for location.

2.04 OCCUPANCY SENSORS

A. Wall Mounted

1. Wall Mounted occupancy sensors shall be a multi-technology (Ultrasonic & PIR) wall switch that turns lights on and off based upon occupancy and ambient light levels. Type 2 sensors shall contain two separate relays and manual override controls for dual level switching of light fixture. Sensors shall have built-in light level sensor, adjustable time delays, zero crossing switching, and smart technology. Provide necessary device box. Type 1 sensors shall be Hubbell Building Automation #LHMTS1 or pre approved equal. Type 2 sensors shall be Hubbell Building Automation #LHMTD2 or pre approved equal. Color of devices shall be as selected by owner but generally shall match color of wiring devices.

26 09 23  
LIGHTING CONTROLS

B. Ceiling Mounted

1. Ceiling Mounted occupancy sensors, indicated by OS on plans, shall be a multi-technology (ultrasonic & PIR) sensor that turns lights on and off based upon occupancy. Sensor shall have adjustable time delays, zero crossing switching, and smart technology. Provide necessary back-box. Sensor shall be Hubbell Building Automation #OMNIDT2000 or pre approved equal.

C. Power Packs and Relays

1. The power packs shall provide both the 24VDC power supply to operate sensors as well as the 20 amp line voltage relay to control the load. Power pack shall be mounted to a junction box located above accessible ceiling. Housing shall be plenum rated. Power packs shall be Hubbell Building Automation #UVPP Universal Voltage Power Pack, or pre approved equal.

2.05 WALL BOX DIMMERS

- A. Wall box dimmers shall be Leviton Renoir II series or approved equal.
- B. Shall be compatible with light fixture/driver and shall be capable of multi-location applications.

2.06 COMBINATION WALL BOX DIMMER AND OCCUPANCY SENSOR

- A. Wall box device providing both digital PIR occupancy sensor and 0-10V dimming shall be Hubbell LHDMIRS-3 series or approved equal.
- B. 3 buttons provide on/off, raise and lower light levels.

2.07 ELECTRONIC WALL BOX TIMERS

- A. Timer shall be like Hubbell DT300 or Legrand TS-400
  1. Multiple timer intervals
  2. Energy code presets for Title 24, IECC, and ASHRAE 90.1
  3. Visual and audio turnoff warning
  4. 3 Way and Multiple Way Switching
  5. No Neutral Required
  6. No Load Requirement
- B. Do not use in unconditioned spaces where temperature may fall below 30 degrees F.

PART 3 – EXECUTION

3.01 INSTALLATION

- A. The Contractors shall install all equipment per the manufacturer's recommendations and the contract drawings.
- B. Protect the equipment from damage and keep clean and dry during construction.
- C. **Installation of in wall switch replacement occupancy sensors must be approved by the Owner.**
- D. Install power packs above accessible ceilings and locate near door to room. If space has no ceiling, install power pack within a minimum 4" square junction box and locate near the door to the room, as neatly as possible. Coordinate with manufacturer.

END OF SECTION 26 09 23

Blank Page

262726  
WIRING DEVICES

PART 1 – GENERAL

1.01 DESCRIPTION OF WORK

- A. Types and locations of wiring devices are indicated by the Project drawings.
- B. Types of wiring devices in this section include the following
  - 1. Receptacles
  - 2. Switches
  - 3. Cover plates

1.02 QUALITY ASSURANCE

- A. Manufacturers: Firms regularly engaged in manufacture of wiring devices, whose products have been in satisfactory use in similar service for not less than five (5) years.
- B. Installers: Firm with at least five (5) years of successful installation experience with projects utilizing wiring device work similar to those required for this Project.
- C. NEC Compliance: Comply with NEC requirements as applicable to construction, installation and coding of wiring devices.
- D. UL Labels: Provide wiring devices that are UL listed and labeled.

1.03 DELIVERY, STORAGE AND HANDLING

- A. Deliver wiring devices properly packaged in factory-fabricated type containers.
- B. Store wiring devices in a clean dry space. Protect products from weather, damaging fumes, construction debris and traffic.

PART 2 – PRODUCTS

2.01 GENERAL

- A. General use receptacles shall be heavy-duty 20-amp duplex 2 pole 3 wire grounding type.
- B. All switches shall be specification grade quiet switches, 120-277 volt 15 amp.
- C. Device colors shall be as selected by the Owner but generally all devices shall be white on painted walls and brown on wood walls unless for special application.
- D. Devices on emergency circuits shall be red.
- E. All exterior receptacles and any receptacle within six (6) feet of any water shall be GFCI.

2.02 MANUFACTURERS AND CATALOG NUMBERS

- A. Hubbell, legrand, Leviton and Pass & Seymour are the only acceptable manufacturers.
- B. The following is an approved list of receptacles by type (based on Hubbell).
  - 1. 20 amp duplex- # HBL5362 or approved equal
  - 2. 20 amp isolated ground- #IG5362 (orange) or approved equal
  - 3. 20 amp single- # HBL5461 or approved equal
  - 4. 20 amp duplex with two USB charging ports- # USB20X2 or approved equal
  - 5. 20 amp GFCI - # GFR5362SG or approved equal

262726  
WIRING DEVICES

- C. The following is the approved list of switches by type 15 amp (based on Hubbell).
1. Single pole toggle switch-# HBL1201 or approved equal
  2. 2 pole toggle switch - # HBL1202 or approved equal
  3. 3 way toggle switch-# HBL1203 or approved equal
  4. 4 way toggle switch- # HBL1204 or approved equal
  5. Single pole key switch with key- # HBL1201L
  6. 2 pole key switch with key- # HBL1202L
  7. 3 way key switch with key- # HBL1203L
  8. 4 way key switch with key- # HBL1204L
  9. Maintained contact 3 position, 2 circuit, center off, single pole, double throw 20 amp- # HBL1385
  10. Momentary contact 3 position, 2 circuit, center off, 20 amp- # HBL1557
- D. All interior device cover plates are to be nylon (plastic not allowed), color to match device color unless otherwise noted.
- E. All exterior device cover plates shall be weatherproof type unless otherwise noted.

PART 3 - EXECUTION

3.01 INSTALLATION OF WIRING DEVICES

- A. General: Install wiring devices as indicated, in compliance with applicable requirements of NEC, NEMA, UL and NECA's "Standard of Installations", and in accordance with recognized industry practices.
- B. Install all wiring in approved boxes or enclosures.
- C. For vertically install receptacles with ground up and on horizontal receptacles the ground on the left.
- D. Verify proper orientation of all switches
- E. Cover plates must cover all openings around devices and boxes.
- F. All devices must be installed plumb with the surroundings
- G. All device cover plate screws slots shall be vertical.

END OF SECTION 26 27 26

26 51 00  
INTERIOR LIGHTING

PART 1 – GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of Contract, including General, Supplementary, and Special Conditions apply to all lighting installations.
- B. Section 26 05 00 Common Work Results Electrical
- C. Section 26 05 33 Raceway and Boxes
- D. Section 26 05 19 Low Voltage Wiring
- E. Section 26 09 23 Lighting Controls

1.02 REQUIREMENTS OF WORK

- A. The Basic Electrical Requirements apply to all electrical materials, equipment, installations and services supplied under Dimmer package.
- B. The Electrical Contractor shall obtain a Bill of Materials from the Lighting Supplier(s) listed herein or proposed for substitution. The Bill of Materials shall be submitted with the Contractor's bid and shall include, but not limited to, the following.
  - 1. All lighting fixtures
  - 2. All fixture accessories
  - 3. Number, fixture type and luminaire type to be provided
- C. The Electrical Contractor (Sub-Contractor) and the Lighting Supplier(s) are responsible for the installation of a complete and operating lighting system in accordance with the intent of the Contract Documents.

1.03 SUBMITTALS

- A. The following items shall be submitted for approval prior to ordering.
  - 1. Lighting Fixtures
- B. All submittals shall be submitted electronically in PDF format

1.04 INSTALLER QUALIFICATIONS

- A. A firm with at least five (5) years of successful installation experience on projects with electrical works similar to this project.

PART 2 – PRODUCTS

2.01 LIGHTING FIXTURE MANUFACTURERS

- A. Acceptable Manufacturers
  - 1. Refer to light fixture specifications and descriptions on drawings.
  - 2. Other Manufacturers as specified by the Design Engineer for other types of fixture installations.
- B. All others must submit for approval a minimum of ten (10) calendar days prior to Bid date.

26 51 00  
INTERIOR LIGHTING

2.02 FIXTURE SCHEDULE

- A. See drawings.

PART 3 – EXECUTION

3.01 GENERAL

- A. All equipment shall be installed in a workmanlike manner and shall conform to industry Standards for this type on installation.
- B. All fixtures shall be plumb and square with ceilings and walls
- C. Support for fixtures in or on a grid type ceiling. Use grid for support.
  - 1. Install grid support wires on all four corners of each fixture.
  - 2. Install support wires or support chains, minimum of two, independent of the ceiling grid to each fixture not more than 6 inches from the corner on diagonally opposite corners of each fixture.
- D. Flange mounted fixture installation shall be per Manufacturer's instruction.

3.02 TESTING

- A. "Megger" all wiring prior to energizing.
- B. Test all switches and sensors for proper operation
- C. Verify proper operation of each fixture.
- D. Test each emergency fixture by interrupting the power to the fixture.

3.03 CLOSEOUT

- A. Prior to final acceptance and Project closeout the Contractor shall:
  - 1. Clean all fixtures and lenses inside and outside
  - 2. Replace any burned out lamps or LED arrays.

3.04 WARRANTY

- A. As Specified on each individual fixture listed herein.
- B. In lieu of a specific fixture warranty, all parts and labor on this Project shall be warranted for a period of one (1) year after start-up and Owner acceptance.

END OF SECTION 26 51 00

26 53 00  
EXIT LIGHTING

PART 1 – GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of Contract, including General, Supplementary, and Special Conditions apply to all lighting installations.
- B. Section 26 05 00 Common Work Results Electrical
- C. Section 26 05 33 Raceway and Boxes
- D. Section 26 05 19 Low Voltage Wiring

1.02 REQUIREMENTS OF WORK

- A. The Basic Electrical Requirements apply to all electrical materials, equipment, installations and services supplied under Dimmer package.
- B. The Electrical Contractor shall obtain a Bill of Materials from the Lighting Supplier(s) listed herein or proposed for substitution. The Bill of Materials shall be submitted with the Contractor's bid and shall include, but not limited to, the following.
  - 1. All exit lighting fixtures
  - 2. All exit lighting fixture accessories
  - 3. Number of exit fixtures
- C. The Electrical Sub-Contractor and the Lighting Supplier(s) are responsible for the installation of a complete and operating exit lighting system in accordance with the intent of the Contract Documents.

1.03 SUBMITTALS

- A. The following items shall be submitted for approval prior to ordering.
  - 1. Lighting Fixtures
- B. All submittals shall be submitted electronically in PDF format

1.04 INSTALLER QUALIFICATIONS

- A. A firm with at least five (5) years of successful installation experience on projects with electrical works similar to this project.

PART 2 – PRODUCTS

2.01 LIGHTING FIXTURE MANUFACTURERS

- A. Acceptable Manufacturers
  - 1. Lithonia
  - 2. Dual-Lite
- B. All others must submit for approval.

26 53 00  
EXIT LIGHTING

2.02 EXIT LIGHTING STANDARDS

- A. All exit lighting shall be Red illumination
- B. All exit lighting shall include battery back-up even if connected to an emergency circuit
- C. All Exit lighting shall include a self-test/self-diagnostic feature

2.03 EXIT LIGHTING

A. DIE CAST ALUMINUM CONSTRUCTION (Based on DUAL LITE SE Series)

1. APPLICATION

- a. Offers bright and even LED illumination in an attractive die-cast aluminum housing
- b. Features include UL listing for 2 hour runtime, AC or Emergency operation with optional Spectron® self-test/self-diagnostic circuitry
- c. Special Wording (SW) option also allows for customization of the stencil field to convey important information
- d. Housing designed for quick and easy installation with low energy consumption. Damp location listed

2. ILLUMINATION

- a. Exit face illumination is provided by energy savings, long life red or green LEDs
- b. Exceeds UL 924 requirements for brightness and uniformity. 10 year LED life

3. COMPLIANCES

- a. UL 924 Listed (Meets 1998 brightness and uniformity requirements)
- b. UL Damp Location Listed
- c. NFPA 70
- d. NFPA 101
- e. CEC T20 Compliant

4. WARRANTY

- a. 5 year warranty

5. SPECIFICATIONS CONSTRUCTION

- a. Housing, exit face and matching canopy constructed of high-strength die-cast aluminum
- b. Sign finish is textured white, white with brushed aluminum face, black, or black with brushed aluminum face
- c. Diffuser finish is color-matched silk-screened coating which provides optimized LED light output
- d. Exit face design in single or double face with red or green letters and break-out chevrons. Break-out chevrons are also included with the special worded option
- e. Exit stencil with 6" letters and 3/4" stroke

6. INSTALLATION

- a. Universal mounting (wall, ceiling, end) to standard 3½" or 4" octagon or square electrical box by use of easily removed, template configured knockouts
- b. Cast aluminum canopy and universal mounting plate included
- c. All mounting hardware is fully concealed

7. ELECTRICAL

- a. PF .8 lagging
- b. Wattage Range 2.1 – 3.8 watts
- c. Battery Type Sealed NICAD

26 53 00  
EXIT LIGHTING

- d. Reported Hours 60,000
- e. Input Voltage 120/277VAC, 60 Hz

PART 3 – EXECUTION

3.01 GENERAL

- A. All equipment shall be installed in a workmanlike manner and shall conform to industry Standards for this type on installation.
- B. All fixtures shall be plumb and square with ceilings and walls
- C. Support for fixtures in or on a grid type ceiling. Use grid for support.

3.02 TESTING

- A. "Megger" all wiring prior to energizing.
- B. Verify proper operation of each exit fixture.
- C. Test each emergency exit fixture by interrupting the power to the fixture.

3.03 CLOSEOUT

- A. Prior to final acceptance and Project closeout the Contractor shall:
  - 1. Clean all fixtures and lenses inside and outside
  - 2. Replace any defective exit fixtures

3.04 WARRANTY

- A. As Specified on each individual fixture listed herein.
- B. In lieu of a specific fixture warranty, all parts and labor on this Project shall be warranted for a period of five (5) years after start-up and Owner acceptance.

EXIT LIGHTING

Blank Page

Revised 11/18/2019

## GENERAL REQUIREMENTS FOR COMMUNICATIONS

### PART 1 GENERAL REQUIREMENTS

#### 1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### 1.2 SUMMARY

- A. The following items are additional requirements for Division 27 “Communications” Work.
- B. If after reviewing all documents and drawing there is any questions or doubt, or if a conflict or discrepancy is found between the documents and the drawings, contact the Owner in writing for clarification before proceeding. Clarification will be issued by Addendum.
- C. Each Item below has the Division 01 00 00 specification section number (in parenthesis) of the article where the base requirements are found. The additional requirements are to be considered additive to the Division 01 00 00 section and apply only to Division 27 work.
- D. Each Division 27 Specification Section may add additional requirements specific to that Section.

#### 1.3 REQUIREMENTS

- A. (01 25 00 Substitution Procedures)
  - 1. Substitutions
    - a) All products provided as Work of this Project shall be in compliance with, and meet the physical, functional, and operational requirements of the products as outlined in Part II of each Division 27 specification Section.
    - b) Product Substitutions
      - 1) Substitution requests must be received by the Owner as required by Division 1.
      - 2) No substitutions will be accepted without prior approval. Only changes issued in an Addendum will be allowed.
      - 3) See Substitution Submission below.
    - c) Standard of Quality

- 1) A Standard of Quality will be set by applying a Manufacturer and Catalog number to each item in Part II of each applicable specification section.
  - 2) A standard of quality item has the physical, functional, and operational attributes to provide the designed functionality.
  - 3) Additional approved manufacturer(s)
    - i) Listing as an additional approved manufacturer for an item is not an assurance that the manufacturer has products that meet the requirements; at minimum, the written description must be met along with any key attributes used in the Project design.
    - ii) When a listed “additional manufacturer” has a product that meets the written description and has the physical, functional, and operational attributes, that product may be used in place of the product that was listed as the standard of quality without submission for prior approval.
      - (A) If such a substitution is made, the requirements for items by the “same manufacturer” shall be adhered to.
        - (1) Requirements for “system” type warranties requiring the same manufacturer or manufacturing “partnership” items for warranty application shall be adhered to.
      - (B) It will be the sole responsibility of the Contractor to provide adequate design compensation for fulfillment of the intent of the Specification for any change in Scope due to an “approved manufacturer’s” product change from this Section (i.e., required rack space, box size, support requirements, etc.).
        - (1) Adequate compensation shall be determined by the Owner.
  - 4) Where 2 or more Manufacturers and Catalog numbers are listed, one of the two products must be utilized. Item listed first is Owner’s preferred product.
- B. (01 25 13 Product Substitution Procedures)
1. Substitution Submission
    - a) Each item submitted must meet the physical, functional, and operational attributes of the Standard of Quality item.
    - b) All requests for substitutions shall be accompanied by a complete system brochure and/or individual product data sheets.
      - 1) Contractor shall state a reason for the substitution request (i.e. familiarity, availability, functionality, Brand specific training, Manufacturer’s warranty issue, etc.)

- 2) Contractor shall provide comparison list of features, functions and specifications where proposed substitute product differs from specified product.
- 3) Each request must reference the Specification Section number and paragraph and include a description of any deviation from the specified functional requirements of the equipment and/or system(s).
- 4) A demonstration of the proposed equipment and/or system(s) may also be requested. This information must be submitted in compliance with Division 1 Section "Substitutions."
- c) Failure to provide all information may result in the substitute product being rejected.
- d) Owner reserves the right to reject any substitute.
- 2. Substitution Responsibility
  - a) Contractor shall be responsible for all additional costs, both direct and indirect, including costs for additional equipment, materials and labor necessary to properly integrate a substitute product, including additional costs which may be incurred by other trades, the Owner, Architect or Owner. (i.e., required rack space, box size, support requirements, etc.).

C. (01 26 13 Requests for Interpretation)

- 1. Contradictions, discrepancies, or conflicts
  - a) This Contractor shall carefully study and compare the Contract Documents and shall at once report to the Authority as set forth in 01 31 00 "Project Management and Coordination" any error, inconsistency or omission discovered.
  - b) In the case of a contradiction, conflict, or discrepancy between Division 27 Sections and Divisions 0 and/or 1.
    - 1) Division 27 Specifications will be considered additive. It is not intended that Division 27 Sections supersede any legal or contractual requirements set forth in Division 0 or 1.
  - c) In the case of a contradiction, conflict, or discrepancy between T Series Drawings and/or Division 27 Specification Sections
    - 1) If during the Bid period the Contractor discovers a contradiction, discrepancy, or conflict of information on any Drawing, between any two drawings, between Drawings and specification Sections, within any Division 27 Section, between related Sections, between individual parts of a Section, or within any part of any Section; the contradiction, discrepancy, or conflicting information shall be called to the attention of the Owner in writing and will be clarified by Addendum.
    - 2) A contradiction, discrepancy, or conflict of information that has not been clarified in writing at Bid time will be considered to be the more costly of the available options.

- 3) If a contradiction, discrepancy, or conflict of information is discovered after award of Contract; the discrepancy or conflict will be submitted to the Owner in writing for evaluation. The result will be clarified by a Change Order. This Change Order will be of \$0 or will require a deduct to change the requirement to a less costly option if so decided by the Owner.
  - i) If Contractor performs any construction activity knowing it involves a recognized contradiction, discrepancy, or conflict in the contract documents without such notice to the Owner or Owner, the Contractor shall assume appropriate responsibility for such performance and shall bear an appropriate amount of the cost required for correction.

D. (01 31 13 Project Coordination)

1. Coordination

- a) Coordination shall commence immediately upon award of contract. Failure of this contractor in coordinating (including providing and extracting related information to and from other trades for review) in a timely manner, shall not result in any subsequent additional reimbursement, special allowances or additional construction time being made for any facet of the project. Work fabricated or installed before properly coordinating with all other trades shall be done at the Contractor's own risk.
- b) Sequence, coordinate, and integrate installations of communications materials and equipment with the Division 26 electrical contractor any all other applicable trades for efficient flow of the Work.
- c) The contract document drawings are an outline to indicate the approximate location and arrangement of required work. The drawings shall be followed as closely as possible in coordination and in execution of the work.
- d) This contractor shall work in harmony with all building contractors and sub-contractors, so as not to cause any delays in pouring concrete, building masonry walls, etc. This contractor shall consult the Architectural, Plumbing, HVAC and Structural plans in all instances before installing his work so that his work will not interfere with those branches.
- e) This contractor shall participate in coordination efforts and in preparation of coordination drawings prior to fabrication or installation of any equipment, materials, etc. Coordinate actual clearances of all installed equipment.
- f) Conflicts in equipment and materials shall be corrected prior to installation. Should there be a conflict with the drawings of other trades, this contractor shall work with the trades to correct the conflict while coordinating the project (prior to installation). If the conflict cannot be resolved, refer the matter to the owner's representative for a final decision as to method or material. This contractor shall refer to drawings of all other trades for details, dimensions and locations of other work and route their work so as not to conflict with any other branch. Any work installed or equipment

placed in position by this contractor creating a conflict shall be readjusted to the satisfaction of the owner's representative at the expense of this contractor.

- g) Plans are diagrammatic indicating design intent and indicating required size, points of termination and, in some cases, suggested routes of raceways, etc. However, it is not intended that drawings indicate fully coordinated conduit routing, all necessary offsets, etc. All cable assemblies, etc. shall be run as straight as possible and symmetrical (perpendicular to or parallel with) with architectural items and in a consistent elevation. Work installed diagonal to building members shall not be permitted.
- h) The Contractor shall coordinate his work with all other trades and locate equipment accordingly. This Contractor shall refer to coordination drawings of the other trades. Any communications work fabricated or installed before the above referenced coordination with all other trades shall be done at the respective contractors' risk.
- i) It is intended that all apparatus be located symmetrical with architectural elements and shall be installed at exact height and locations as shown on architectural drawings. If a device height or location is in question it shall be the responsibility of this Contractor to immediately seek clarification from the Owner.

E. (01 31 16 Multiple Contract Coordination)

- 1. Coordinate work with Division 26 Contractor (where applicable); prior to Division 26 Contractor's installation of outlet boxes, conduit, conduit stubs, raceways and any other provisions in support of Division 27 Contractor's work.
- 2. Coordinate with all other Contractor's and the Owner, as applicable and necessary to ensure a clean, professional looking and operating systems.

F. (01 31 19.16 Site Mobilization Meetings)

- 1. The Contractor shall fully inform himself regarding all peculiarities and limitations of space available for installation of all work and materials furnished and installed under the contract. He shall exercise due and particular caution to determine that all parts of his work are made quickly and easily accessible. Although the locations of equipment and conduit may be shown on the drawings in certain positions, the architectural details and conditions existing at the job site shall guide the Contractor, coordinating his work with that of others. Provide all offsets as required to provide a neat workmanlike arrangement

G. (01 33 23 Shop Drawings, Product Data, and Samples)

- 1. Submittals required after Award of Contract but before starting Work include:
  - a) Complete BOM list
    - 1) BOM shall include the following information for each product:
  - b) Product Information Sheets "Datasheets": Include catalog information, sizing, and technical data on each item to be used on the Project.

- 1) Each product datasheet must reference the specific paragraph for which the product is being submitted. Each product must be listed in the exact same order as it appears in the Section for which the products are being submitted.
  - i) Datasheets shall each include a clearly identifiable label applied in upper corner of each sheet that clearly references the specification section and drawing (as applicable) to which it applies. Labels shall be consistently affixed in the same location on all sheets unless the labels will obstruct pertinent technical information.
- 2) All datasheets shall be original manufacture datasheets, first generation printed copies of manufacturer's electronic datasheet (i.e. printed copy of a PDF file), or high quality photocopy of original manufacturer's datasheets.
  - i) Fax versions of product datasheets or any photocopies thereof are not acceptable.
  - ii) Submit original printing or "clean" reproductions.
- 3) Where datasheets depict multiple products, versions or options, the Contractor shall highlight (indicate with an arrow) all applicable model(s), version(s) and option(s) applying to the specific product the Contractor will be providing. Exact catalog number must be indicated. The submitted items must be from "approved materials" as specified in each Specification Section.
- 4) Product datasheets shall be "approved" by the Owner before delivery to the Project site. Any product not approved through the submittal process is at the sole risk of the Contractor.
  - i) A copy of "Approved" datasheets shall be included in O & M manual requirements
- 5) Required Information
  - i) Complete Bill of Materials (BOM) List
    - (A) The manufacturer's name (Brand) and full model number shall be used. (Distributor and Contractor assigned names and model numbers are unacceptable).
  - ii) Manufacturer Product Datasheet for each product.
    - (A) Product datasheets shall be manufacturer originals, or first generation printed versions of manufacturer's official electronic product sheets.
    - (B) Manufacture model shall be highlighted on each sheet.
    - (C) Datasheets shall be organized to match the order and organization of this section

2. Submission Format

- a) Submit Shop Drawings and Product Data Sheets in a bound form
  - 1) Submittals shall be supplied in an appropriately sized 3-ring binder(s). Separate binders shall normally be used for each Division 27 Contract.
  - 2) Manuals shall be bound in hard cover, 3 ring binders with clear plastic “pocket” covers to insert Project Information on the exterior of the Binder.
  - 3) Maximum individual Binder spine size shall be 3”; utilize multiple binders as required.
- b) Submittal Manuals shall include the information listed below and be assembled as follows:
  - 1) Binder shall be marked on the cover and spine with the following information
    - i) Project Information
      - (A) Title of Project
      - (B) Name and address of Owner, Contractor, Architect, Owner
      - (C) “Submittals for “ (specification Section(s)
      - (D) Date of Submittal
    - 2) Organization
      - i) The binder is subdivided into specification sections.
      - ii) Each Binder shall be organized as follows
        - (A) Master Tab 1: Project and contact information
        - (B) Master Tab 2: (First) Specification Section
          - (1) Section 1: Title Page
          - (2) Specification section name & number
          - (3) Contractor/Subcontractor Information Including:
            - (4) Name, address and phone
            - (5) Project manager name and phone
          - (6) Section 2: Bill of Materials
          - (7) Section 3: Product Datasheets
          - (8) Section 4: 11 x 17 inch reduced scale versions of full size shop drawings. Drawings shall be folded, punched and inserted into the binder.
        - (C) Master Tab 3 through (x): Additional Specification Section(s)
          - (1) Repeat Sections 1-5 above for each Specification Section.
      - iii) Division 27 submittals may not be combined with submittals from any other Division.
    - 3) Full-size shop drawings shall be printed to scale and bound along the left edge of the drawings with the Title block on the right edge.
    - 4) The Contractor shall provide a record of shop drawings using AutoCAD Release 2000 or higher.

- i) Detail drawings may be submitted in Visio 2000 format.
- 3. Submission
  - a) Provide minimum of (5) copies of all submittal items.
    - 1) Two copies of all Submittals will be retained by the Owner.
    - 2) Three copies will be returned.
      - i) One copy of approved Submittals will be required to prepare Record Drawing for the O&M (Owner's) Manual.
      - ii) One Copy for the Project site
      - iii) One Copy for the Contractor's records
    - 3) Provide additional quantities as may be required by other applicable sections (including Division 1), as requested by the Owner, and as required by the Contractor for its own purposes.
  - b) Timetable
    - 1) Contractor shall make all Submittal submissions as soon as practical after award of Contract.
    - 2) Provide submittals in adequate time so as not to negatively impact the completion of the project or the schedule of other trades.
      - i) Contractor shall allow a minimum of 2 weeks in its schedule for the Owner's review of submittals.
- 4. Review of shop drawings does not relieve the Contractor of responsibility for correct ordering of material and equipment. Contractor review should ensure that equipment will fit in available space.
  - a) **PARTIAL OR INCOMPLETE SUBMITTALS WILL BE REJECTED PRIOR TO FULL REVIEW.**
  - b) Unacceptable submittal items:
    - 1) Fax copies of datasheets
    - 2) Datasheets that are not legible.
    - 3) Datasheets that do not clearly depict and/or enumerate all specification requirements.
    - 4) Non-manufacture datasheets (i.e. from a distributor)
    - 5) HTML web page printouts that are not the manufacturer's official product datasheet.
    - 6) Identification of products by Contractor or Distributor assigned part numbers, catalog numbers or private label brand names.

H. (01 41 13 Codes)

1. Building Codes:

- a) National Electrical Code (NFPA 70)
- b) Life Safety Code (NFPA 101)
- c) Uniform Building Code (Or adopted State Code)
- d) Federal Communications Commission (FCC) Part 68
- e) State specific agencies:
  - 1) Administrative Building Council
  - 2) State Board of Health
  - 3) State Fire Marshal
- f) Local Codes (City, County, etc.)
- g) Local Utility Company requirements

I. (01 41 26 Permits)

- 1. Contractor shall obtain and pay for all permits or certificates of inspection and approval required for his branch of the work.
  - a) Permits shall be posted in a prominent place at the building site properly protected from weather and physical damage.

J. (01 42 16 Definitions)

- 1. Wherever the words "Contractor", "This Contractor" or "Subcontractor" appears in Division 27 specifications, it shall refer to the Division 27 Communications Contractor (or Subcontractor of the Communications Contractor where applicable).
- 2. A reference to Owner shall be referring to the Owner's Representative involved in the design of the System(s). The Owner may or may not be affiliated with the Architect and or Engineer for the Project. All information exchanged between the Contractor(s) and the Owner shall be within the information exchange process of the Project. (i.e. through a Construction Manager, General Contractor, Architectural Firm, etc.)
- 3. Wherever the words "Designer", "Consultant" or "Engineer" appears in Division 27 specifications or its related drawings, it shall be interpreted to mean the specifying authority responsible for the creation of the Division 27 specifications and related drawings.
- 4. Wherever the word "Install" appears on the drawings or in these Division 27 specifications it shall mean to supply all labor, tools and incidental materials necessary to handle, store, mount, terminate, program, configure and adjust product as necessary to fulfill project requirements.
- 5. Wherever the word "Provide" appears on plan drawings or in Division 27 specifications, it shall be interpreted to mean that the Contractor shall "Furnish

- and Install", including all necessary accessories, miscellaneous materials and labor necessary to render the respective system fully operational.
6. Wherever the word "Work" appears in Division 27 specifications or on communication technology drawings, it shall be interpreted to mean any and all labor, materials, accessories, services, etc. necessary to fulfill project requirements.
  7. Wherever the word "Furnish" appears on the drawings or in these Division 27 specifications it shall mean to supply the specified labor or specified product (context dependant), including all associated shipping, storage and warranty expenses.
  8. Wherever the words "Site", "Project Site", or "Premises" appears in Division 27 specifications or its related drawings, it shall be interpreted to mean all real estate, buildings and structures where work will be performed and where products will be installed and reside.
  9. Wherever the phrase "or Approved equal" appears in Division 27 specifications or its related drawings, the contractor shall interpret this to mean that pre-bid approval of specific models of equipment is required before submission of the Contractor's bid.
  10. Wherever the phrase "or Equal from", or "or Equal by" appears in Division 27 specifications or its related drawings, the Contractor shall interpret this to mean that the Contractor may supply any product manufactured by the given list of manufacturer's meeting or exceeding the overall quality, functional, technical performance, construction, finish and general fit and fitness as the "Standard of Quality" design product. The final authority as to whether a product is equal shall remain with the Owner. Pre-bid approval is highly recommended.
  11. Wherever the phrase "Additional Approved Manufacturer(s)" appears in Division 27 specifications or its related drawings, the Contractor shall interpret this to mean that the Contractor may supply any product manufactured by the given list of manufacturer's meeting or exceeding the overall quality, functional, technical performance, construction, finish and general fit and fitness as the basis of design product. The final authority as to whether a product is equal shall remain with the Owner.
  12. Wherever the phrase "Standard of Quality" appears in Division 27 specifications or its related drawings, the Contractor shall interpret this to mean that the listed Manufacturer and Catalog number for each item has the physical, functional, and operational attributes to provide the designed functionality.
  13. Substantial Completion:
    - a) The point at which the following has been completed:
      - 1) All specified work, and;
      - 2) All punch-list items that affect the full and complete use of the system, and;
      - 3) Successful acceptance testing by the Owner, and;

- 4) Successful inspection and demonstration of the work to the Owner's representative, and;
  - 5) Contractor's delivery of a request for "Letter of Substantial Completion"
    - i) The request shall include the Specification Section(s) completed, confirmation of completion of the items listed above, and the requested Substantial Completion date (no more than 7 calendar days prior to this Letter).
  - 6) Contractor has received a Letter of substantial Completion for the Owner.
14. Nominal Operating Levels: The standard signal voltage/power reference level which a manufacturer has designed its product's inputs and outputs to operate at to achieve the manufacturer's specified performance levels.
15. Wherever the words "This Division" appears in Division 27 specifications or its related drawings, it shall be interpreted to mean these Division 27 specifications and all of its related drawings.
16. Wherever the words "Low Voltage", or "Low-Voltage" appears in Division 27 specifications or its related drawings, it shall be interpreted to mean less than or equal to 70.7 volts, AC or DC.
17. Wherever the words "High Voltage", or "High-Voltage" appears in Division 27 specifications or its related drawings, it shall be interpreted to mean greater than 70.7 volts, AC or DC.
- K. (01 43 00 Quality Assurance)
1. Quality Assurance
    - a) Requirements
      - 1) Contractor shall have a minimum five (5) years experience in the installation of Communication Technology system(s) of similar size, type, scope and contract value.
      - 2) The Prime Contractor or his subcontractor responsible for this Section shall have a Registered Communications Distribution Designer (RCDD) on staff that will be ultimately responsible for this Project. The RCDD must have sufficient experience in this type project as to be able to lend adequate technical support to the field forces during installation, the warranty period, and any extended warranty periods or maintenance contracts. If in the opinion of the Owner, the RCDD does not possess adequate qualifications to support the Project, the Owner reserves the right to require the Contractor to assign an RCDD who, in the Owner's opinion, possesses the necessary skills and experience required of this Project.
      - 3) The lead technician(s) on the Project shall carry a current BICSI Technician Certificate or have five years of experience in projects of similar scope.

- 4) The lead technician(s) on the Project shall have a thorough understanding of the following:
  - i) American National Standards Institute/Telecommunications Industry Association/Electronics Industry Association – ANSI/TIA/EIA 568B Commercial Building Telecommunications Cabling Standard.
  - ii) American National Standards Institute/Telecommunications Industry Association/Electronics Industry Association – ANSI/TIA/EIA 569A Commercial Building Standard for Telecommunications Pathways and spaces.
  - iii) American National Standards Institute/Telecommunications Industry Association – ANSI/TIA/EIA 606 The Administrative Standard for the Telecommunications Infrastructure of Commercial Buildings.
  - iv) American National Standards Institute/Telecommunications Industry Association/Electronics Industry Association – ANSI/TIA/EIA 607 Commercial Building Grounding and Bonding Requirements for Telecommunications.
- 5) Contractor shall be a (factory trained) certified installer for all connectivity products.(cable and terminations).
  - i) This minimum requirement shall apply to each Division 27 section independently. If Contractor is incapable of meeting the percent of product value requirement for each section, Contractor shall use a Subcontractor that can meet the percent of product value requirement, in whole, for all products and work of that section for which This Contractor is not qualified.
  - ii) The specific Contractor or Subcontractor meeting the requirements for a specific section shall be responsible for the supply of the products, supplemental engineering services and submittals as well as performing all technical labor associated with the installation, training and warranty servicing of work of that section.
- 6) Contractor shall have substantial business operations located within a 100 mile radius of the project site with a full-time employee staff actively engaged in the supply, installation and service of systems and equipment of the type and scope herein specified.
- 7) Contractor shall have full-time employee service staff based within a 100 mile radius of the project site.
- 8) Contractor shall provide any additional information requested by the Owner as determined appropriate by the Owner to validate a Contractor's (or its Subcontractor's) ability to perform and warranty the specified work in the quality, manner and time frame required.
- 9) In the absence of a requirement to provide a performance bond the Designer reserves the right to require a financial disclosure of the

Contractor and any Subcontractor for the purpose of aiding the Designer in determining the ability of the Contractor or Subcontractor to perform.

- 10) Designer reserves the right to disqualify the use of any Subcontractor that This Contractor plans to use if the Subcontractor fails to meet the quality assurance requirements. Should this occur, This Contractor shall be required to choose another Subcontractor that does meet these quality assurance requirements.
  - i) An equipment vendor not performing the technical labor associated with installation of the work of a given section shall not be considered a Subcontractor.
- 11) Superintendent/Project Manager
  - i) This Contractor shall furnish the services of an experienced superintendent/Project Manager who shall be constantly in charge of the work, together with the qualified Foremen and specialists as required to properly install, connect, adjust, start, operate and test the work involved.
  - ii) The superintendent's/Project Manager's qualifications shall be subject to the review and acceptance by the Owner/Owner. Unless the Owner/Owner grants prior special permission, the same communication Superintendent/Project Manager shall be utilized throughout the duration of the project and be responsible for the complete scope of the Contract.
- b) Documentation to be submitted upon request pre or post bid for evaluation includes:
  - 1) A complete material list by specification section for each specification section:
    - i) Include description, the manufacturer being used, and the manufacturer's part number.
    - ii) Submission of this list does not constitute acceptance by the Owner or relieve the Contractor from providing approved items in the proper quantities to fulfill the Scope of this Project.
  - 2) References:
    - i) A minimum of five reference accounts at which similar work, both in scope and design for each system specified, has been completed by the Contractor within the last four years.
      - (A) The list shall include contact names and telephone numbers for each.
      - (B) Each listed Project shall include a Summary of Work.
      - (C) Each listed Project shall include initial and final contract amounts.
      - (D) Each listed Project shall include initial Contract award date and completion date.

- (E) Each listed Project shall identify the name of Contractor's project manager and lead technician responsible for the project.
- 3) List of test equipment:
  - i) Proposed equipment for use in verifying the installed integrity of copper and fiber optic cable systems on this Project.
- 4) Technical resume:
  - i) Provide experience of the Contractor's Superintendent/Project Manager and onsite installation supervisor (Foreman) who will be assigned to this Project.
- 5) List of technical product training:
  - i) Training attended by the Contractor's personnel that will be working on this Project.
- 6) Subcontractors list for Work of this Project.
  - i) List Scope of Work for each Subcontractor
  - ii) List References for each subcontractor
  - iii) Technical resume as described above for each subcontractor
  - iv) List of technical product training as described above for each subcontractor.
- 7) Each specification section may detail additional Quality Assurance requirements in the PART I, Quality Assurance paragraph.
  - i) Submit each item identified in each Specification Section.
    - (A) Manufacturer Certification documentation as requested in each Section.
- 8) Documentation substantiating the Contractor's factory authorization and warranty service status for all products specified and all other major products proposed for use by the Contractor.
- 9) Financial Disclosure.
- c) Failure to supply a complete quality assurance submittal; failure to supply accurate references or references which yield favorable performance marks; or failure to supply other quality assurance information required shall be taken as a statement of the Contractor's inability to perform and shall be grounds for the Owner and/or Owner to reject the Contractor's bid.
- L. (01 62 00 Product Options)
  - 1. The contract documents are prepared on the basis of a single specific product as the "design equipment," even though other manufacturers' names and models may be listed as acceptable, or equal. The first manufacturer make and model for each product is the "design equipment" or "Standard of Quality".
    - a) This section is designed to provide the Contractor with a minimum standard of quality and functionality for the products used for telecommunications infrastructure.
    - b) This standard will be considered in force for the original response as well as for any additions or changes to this Project. Due to this, there may be items

listed in the Products section that are not required under the scope of this contract.

- c) Project design is based on the “Standard of Quality” listed products’ physical, functional, and operational attributes. The use of any product not listed as the Standard of Quality must be compared for full functionality to the listed Product.
  - d) When several materials, products or items of equipment are specified by name for one use, the first item shall be considered Owner’s preferred product. Contractor may select any one of those specified for requested approval. It shall be the responsibility of the Contractor to provide an item that meets or exceeds the qualities and functional characteristics of the device specifically listed by brand name and model number.
  - e) The Contractor is responsible for any other ancillary changes required to meet the Project objectives when utilizing substitutions. Approval of items submitted during the submittal process does not relieve the Contractor of this responsibility.
- 2. Product acceptability and substitutions are determined by criteria as required this section under “Substitutions”.
  - 3. Materials installed shall be new, full weight and of the best quality. All similar materials shall be of the same type and manufacturer. All materials, apparatus and equipment shall bear the Underwriter's Laboratory, Inc. label where regularly supplied, or required by Code.
  - 4. In the event that a specified product is discontinued by the manufacturer and is no longer available for purchase, the Contractor shall provide replacement product of equal or greater value, performance and function. The replacement product shall be from the same manufacturer as the specified equipment unless written approval to use an alternate manufacture is obtained from the Owner.

M. (01 65 00 Product Delivery Requirements)

1. Product Procurement

- a) The Contractor shall not procure, deliver or install any product until after the contractor’s submittal has been reviewed by the Owner and the submittal has been returned to the Contractor’s marked “No Exceptions”, “Exceptions Noted” or “Exceptions Noted, Submit Record Copy” or “Approved”. Advance procurement, delivery or installation of product prior to the return of submittal is entirely at the Contractor’s own risk. Contractor should schedule its work and procurement accordingly.
- b) Prior to procurement of any equipment or materials, Contractor shall review the model numbers, compatibility and interoperability of all products.
- c) Prior to procurement, Contractor shall, through coordination with other trades and through field measurements and project site inspections, verify that products to be supplied can be physically installed as planned.

- d) No claim for additional payment will be considered for the return of any equipment determined incompatible, or procured without adhering to the aforementioned conditions, including claim for reimbursement of manufacturer's "restock" fees.
  - e) Contractor shall factor all of these conditions into its bid and plan its scheduling and resource needs accordingly to ensure that all work shall be performed according to the Owner's schedule and requirements of this contract.
- N. (01 66 00 Product Storage and Handling Requirements)
- 1. Product Delivery, Storage and Handling
    - a) Receipt of materials
      - 1) The Contractor is responsible for receiving, handling, storing, and protecting all materials used on this Project until Substantial Completion.
    - b) Upon request, submit a schedule of equipment and materials required to complete installation, quantity ordered, order date, and promised delivery date.
    - c) Deliver equipment and materials in accordance with factory shipping requirements.
      - 1) Pack components in factory-fabricated protective containers.
      - 2) Units shall be delivered in sections of such size as will pass through available openings.
    - d) Until ready for installation, store products in original factory containers.
      - 1) Products shall be stored in a clean, dry space and as additionally recommended by the product manufacturer.
      - 2) Keep products out of the weather and away from construction traffic and debris, including drywall finish dust.
      - 3) Do not exceed structural capacity of the floor or platform on which the products are stored.
    - e) Until final acceptance of the system, protect all supplied products from damage resulting from moisture, fumes, dirt, dust and debris or any other source of potential damage.
    - f) Handle all products with care before, during and after installation so as to prevent damage.
      - 1) Replace any products damaged prior to final acceptance with new replacement products.
        - i) Replacement shall be done at not charge to the owner.
      - 2) Contractor is responsible for the safety and good condition of the materials and equipment installed until final acceptance by the Owner.
    - g) Save original product shipping containers and related packaging materials for major products until final acceptance.
      - 1) Prior to disposal, check with owner to determine if the owner wishes any of the packaging materials.

- 2) Deliver specified packaging materials to the owner as requested.
- O. (01 71 00 Examination and Preparation)
1. Examination of the Site
    - a) Contractor shall visit the Site to familiarize himself with the local conditions under which the work is to be performed and correlate his observations with the requirements of the Contract Documents. No allowance shall be made for claims for concealed conditions which the Contractor, in exercise or reasonable diligence in observations of the Site and review of the local conditions under which the work is to be performed, learned or should have learned of, unless otherwise specifically agreed by Owner and Owner in writing.
    - b) Before ordering any materials or doing any work, the Contractor shall verify all measurements and be responsible for correctness of same. No extra charge or compensation will be allowed for duplicate work or material required because of an unverified difference between an actual dimension and the measurement or size indicated in the drawings or specifications. Any discrepancies found shall be submitted in writing to the Project Manager and Owner for consideration before proceeding with the work.
    - c) This Contractor must verify all dimensions locating the work and its relation to existing work, all existing conditions and their relation to the work and all man made obstructions and conditions, etc. affecting the completion and proper execution of the work as indicated in the Contract Documents.
- P. (01 73 19 Installation)
1. Work and workmanship
    - a) Provide all required labor, materials, equipment and Contractor's services necessary for complete installation of systems required to comply with the requirements of authorities having jurisdiction, as indicated on Drawings, and as specified.
    - b) Work shall be functional and complete in every detail, including any and all items required to complete the system, whether or not these items have been enumerated or shown on the Drawings.
    - c) Special attention shall be given to access to working and controlling parts. Adjustable parts shall be within easy reach. Removable parts shall have space for removal.
    - d) Each Contractor shall be fully knowledgeable of the details of all Work to be performed by other trades and take necessary steps to integrate and coordinate his Work with other trades.
    - e) Wherever tables or schedules show quantities of materials, they shall not be used as a final count. These figures serve only as a guide for the Contractor. Each Contractor shall be responsible for furnishing all materials on the Drawings or as specified.

- f) The Consultant and Owner's Representative have full power to condemn or reject any Work, materials or equipment not in accordance with these Specifications and Construction Drawings or the manufacturer's specifications or drawings approved by the Owner or Consultant.
- g) Work or equipment that is rejected shall be removed and replaced to the satisfaction of the Owner at the Contractor's expense. Work or equipment that is rejected shall be so stated in writing by the Owner or Consultant.
- h) Such decisions that the Owner or Consultant may make with respect to questions concerning the quality, fitness of materials, equipment, and workmanship shall be binding upon the parties thereto.
- i) All Work shall fully comply with these specifications and related Drawings and all manufacturers recommended installation practices.
- j) All Work shall be performed with the best practices of the trade for performance, functionality, safety, endurance, and aesthetics.
- k) Coordinate ordering and installation of all equipment with long lead times or having a major impact on work by other trades so as not to delay the job or impact the schedule.
- l) Where mounting heights are not detailed or dimensioned, install systems, materials and equipment to provide the maximum headroom possible, as appropriate to the application.
- m) Set all equipment to accurate line and grade, level all equipment and align all equipment components.
- n) Provide all scaffolding, rigging, hoisting and services necessary for erection and delivery of equipment and apparatus furnished into the premises. These items shall be removed from premises when no longer required.
- o) No equipment shall be hidden or covered up prior to inspection by the owner's representative. All work that is determined to be unsatisfactory shall be corrected immediately.
- p) All work shall be installed level and plumb, parallel and perpendicular to other building systems and components.
- q) Install all equipment and materials in strict accordance with manufacturer's written instructions. Bring any conflicts between the manufacturer's written instructions and these specifications to the attention of the Designer for recommendations.
- r) Upon completion of installation of equipment and communication circuitry, energize circuitry and demonstrate capability and compliance with requirements. Where possible, correct malfunctioning units at site, then retest to demonstrate compliance; otherwise, remove and replace with new units, and proceed with re-testing.

Q. (01 73 29 Cutting and Patching)

1. Where demolition of existing surfaces are required by the Work, the same shall be restored to at least as good a condition as they were before.
2. Contractor shall be responsible for painting, patching, repairing and replacing any building surface, furnishing, wall/floor/ceiling covering that is damaged or penetrated in the process of performing work on the project site.
3. Additional work required to repair work performed under this Contract shall be at the expense of This Contractor.
4. The Division 27 contractor shall do all cutting as required for the admission of Division 27 work. Unless directed otherwise in field, provide all related patching and painting to match surrounding methods, materials and colors. Any damage done by this contractor to the building during the progress of this contractor's work shall be made good at this contractor's expense. Perform cutting, fitting, and patching and materials as required to:
  - a) Uncover Work to provide for installation of ill-timed Work.
  - b) Remove and replace defective Work.
  - c) Remove and replace Work not conforming to requirements of the Contract Documents.
  - d) Remove samples of installed Work as specified for testing.
  - e) Install equipment and materials in existing structures.
  - f) Upon written instructions from the owner's representative, uncover and restore work to provide for observation of concealed work by owner's representative or by inspection authority having jurisdiction.
  - g) During cutting and patching operations, protect adjacent installations (structure, finishes, furnishings, etc.). Where applicable, provide and maintain temporary partitions or dust barriers adequate to prevent the spread of dust and dirt to system components and components of other trades.
  - h) Patch surfaces and building components using new materials matching existing materials and using experienced Installers. Refer to Division 1 for definition of experienced "Installer" or determine qualifications as directed in field by owner's representative.
  - i) Patching through fire rated walls and enclosures shall not diminish the rating of that wall or enclosure. All materials used for patching shall be installed to meet or exceed the smoke and fire rating of the respective surface being patched.
  - j) Neatly cut and drill all openings in walls and floors required for the installation. Secure approval of Owner's Representative before cutting and drilling in existing facilities. Neatly patch all openings cut.
  - k) Cutting and patching shall be held to a minimum by arranging with other contractors for all sleeves and openings before construction is started.
  - l) Provide factory-assembled watertight wall and floor seals, of types and sizes required; suitable for sealing around conduit, pipe, or tubing passing through

concrete floors and walls. Construct seals with steel sleeves, malleable iron body, neoprene sealing grommets and rings, metal pressure rings, pressure clamps, and cap screws.

- m) Pipe sleeves shall be fabricated from Schedule 40 rigid, heavy wall, full weight galvanized steel pipe; remove burrs. Use sleeves which are two standard sizes larger than conduit passing through respective sleeve.
- n) Provide sleeve seals for piping which penetrates foundation walls below grade, exterior walls or roofs, caulk between sleeve and pipe with non-toxic, UL-classified caulking material to ensure watertight seal. Elsewhere modular provide mechanical type seals, consisting of interlocking synthetic rubber links shaped to continuously fill annular space between pipe and sleeve, connected with bolts and pressure plates which cause rubber sealing elements to expand when tightened, providing watertight seal and electrical insulation.
- o) Install standard Schedule 40 black steel pipe sleeves two sizes larger than pipes passing through floors, bearing walls, fire walls and masonry construction. Sleeves through walls shall be cut flush with both faces. Sleeves through floor shall extend one inch above floor top elevation. Pipes penetrating roof shall use a pipe curb assembly equal to Pate Co. Furnish and set all forms required in masonry walls or foundation to accommodate pipes.

5. Grout

- a) Provide non-shrink, nonmetallic grout, premixed, factory-packaged, non-staining, non-corrosive, nongaseous grout, recommended for interior and exterior applications.

6. General Joint Sealer Application

- a) Joint sealers, joint fillers, and other related materials compatible with each other and with joint substrates under conditions of service and application.
- b) Apply joint sealers under temperature and humidity conditions within the limits permitted by the joint sealer manufacturer. Do not apply joint sealers to wet substrates.
- c) Clean all affected surfaces, joints, etc. immediately before applying joint sealers to comply with recommendations of joint sealer manufacturer.
- d) Apply sealant primer to substrates as recommended by manufacturer. Protect adjacent areas from spillage and migration of sealant, using masking tape. Remove tape immediately after tooling without disturbing seal.
- e) Comply with joint sealer manufacturers' printed application instructions applicable to products and applications indicated, except where more stringent requirements apply.
- f) Comply with recommendations of ASTM C 962 for use of elastomeric joint sealers.
- g) Comply with recommendations of ASTM C 790 for use of acrylic-emulsion joint sealants.

- h) Immediately after sealant application and prior to time shinning or curing begins, tool sealants to form smooth, uniform beads; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint. Remove excess sealants from surfaces adjacent to joint. Do not use tooling agents that discolor sealants or adjacent surfaces or are not approved by sealant manufacturer.
  - i) Colors for exposed seals shall be as selected by the Owner's representative from manufacturer's standard colors.
- 7. Elastomeric Joint Sealers
  - a) One-part, nonacid-curing, silicone sealant complying with ASTM C 920, Type S, Grade NS, Class 25, for uses in non-traffic areas for masonry, glass, aluminum, and other substrates recommended by the sealant manufacturer.
  - b) One-part, mildew-resistant, silicone sealant complying with ASTM C 920, Type S, Grade NS, Class 25, for uses in non-traffic areas for glass, aluminum, and nonporous joint substrates; formulated with fungicide; intended for sealing interior joints with nonporous substrates; and subject to in-service exposure to conditions of high humidity and temperature extremes. Silicone Sealant shall be equal to the following:
    - 1) "Dow Corning 790", Dow Corning Corp.
    - 2) "Gesil N SCS 2600", General Electric Co.
    - 3) A/D Fire Protection Systems.
- 8. Acrylic-Emulsion Sealants
  - a) One-part, non-sag, mildew-resistant, paintable complying with ASTM C 834 recommended for exposed applications or interior and protected exterior locations involving joint movement of not more than plus or minimum 5 percent. Subject to compliance with requirements, provide one of the following:
    - 1) "Chem-Calk 600", Bostik Construction Products Div.
    - 2) "AC-20", Pecora Corp.
    - 3) "Sonolac", Sonneborn Building Products Div.
    - 4) "Tremco Acrylic Latex 834", Tremco, Inc.
- R. (01 74 16 Site Maintenance)
  - 1. During the progress of the work, the Contractor shall clean up after his men and leave the premises and all portions of the building in which he is working in a clean and safe condition. This cleaning shall occur on a daily basis.
- S. (01 74 23 Final Cleaning)
  - 1. Clean all parts of the apparatus and equipment. Exposed parts, which are to be painted, shall be cleaned of cement, plaster and other materials and all oil and grease spots shall be removed. Such surfaces shall be carefully wiped and all corners and cracks scraped out.

T. (01 77 16 Final Closeout Review)

1. Project Closeout

- a) Contractor shall meet all provisions of Substantial completion as defined earlier in this section and in each related section.
- b) Final Payment
  - 1) Final payment of contract will not be made until receipt, review and acceptance, by the owner's representative, of all of the following:
    - i) Substantial Completion
    - ii) Completion of all punch-list items.
    - iii) Approved submittals, including shop drawings;
    - iv) Owner's manuals;
    - v) Record documentation;
    - vi) Certification of warranty;
    - vii) Certificate of final acceptance signed by the Owner and the Owner;
    - viii) Copies of all training sign-in sheets, signed by owner's representative;
    - ix) Signed delivery receipt indicating that the owner has received all training recordings produced to-date;
    - x) All additional applicable closeout provisions of Division 1;
- c) 100% of all closeout documents shall be supplied within 30 calendar days following the substantial completion.

U. (01 77 19 Closeout Requirements)

1. Acceptance Testing

- a) Upon the Designer's receipt of and approval of the Contractor's pre-test submittal, the Contractor shall contract the Designer to schedule acceptance testing. Contractor shall allow not less than 10-business days of advance notice to the Owner.
- b) In the presence of the Owner, the Contractor shall demonstrate the presence of all specified products, cabling and installation methods. The Contractor shall demonstrate the operation of the system (and any requested sub-component thereof) and shall be prepared to make any electronic, physical or software related adjustments to the system or any of its sub-components to the satisfaction of the Owner, as required to achieve full compliance with the specifications.
- c) The contractor shall have available at the project site all test equipment, cables, tools and personnel necessary to demonstrate full compliance with these specifications as determined necessary by the designer.
- d) During the acceptance testing the Contractor shall have a clean and fresh copy of the contractor's most up-to-date as-built record documentation, printed to scale.
- e) This Contractor shall provide all required labor services required to completely verify and test the systems in the presence of the Owner.

- f) Verify that each system, as a whole system, meets these Specifications and complies with all applicable standards.
- g) Rectify deficiencies indicated by tests and completely retest work affected by such deficiencies at Contractor's expense.
- h) Should the Owner be required to return to the project site to perform acceptance testing more the once for any system the Contractor shall be responsible for all costs, up to \$1500 per day, plus travel and expenses, for each return trip to the project site. Payment of this may be required before final payment will be authorized.

2. Supplemental Engineering Services

- a) This Contractor is responsible for all supplemental engineering services specifically outlined in these specifications and otherwise required for the completion of the work specified. Contractor shall estimate its costs accordingly, taking into account all information provided.
- b) In the event that the Owner is required to provide additional services as a result of Contractor's errors, omissions or failure to conform to the requirements of the Contract Documents, or if the Owner is required to examine and evaluate any changes proposed by the Contractor solely for the convenience of the Contractor, then the Owner's expenses in connection with such additional services shall be paid by the Contractor and may either be deducted from any monies owed to the Contractor, or billed to the contractor, entirely at the discretion of the Owner. The contractor shall be billed at prevailing hourly rates.
- c) In the event that the Owner is required to provide additional services as a result of substitution of equivalent materials or equipment by the Contractor, or changes by the Contractor in dimension, weight, power requirements, etc., of the equipment and accessories furnished, or if the Owner is required to examine and evaluate any changes proposed by the Contractor for the convenience of the Contractor, then the Owner's expenses in connection with such additional services shall be paid by the Contractor. Costs will be calculated based upon the Owners prevailing rates.

V. (01 78 13 Completion and Correction List)

- 1. Owner shall be furnished with a certificate of final inspection and approval prior to final acceptance of this branch of the work.

W. (01 78 36 Warranties)

1. Warranty Period

- a) Specified materials and workmanship provided shall be fully guaranteed by the Contractor for one year from the transfer of title via notice of substantial completion against any defects in materials or workmanship.
  - i) Extended (additional) warranty(ies) may be required and will be identified in the individual Specification Section and will be considered additive to this base Contractor Warranty.

- ii) Requirements for Manufacturer's Warranties, required by a Specification Section, shall run concurrent to this base Warranty by the Contractor but may exceed the Contractor's Warranty Period.
- 2) Manufacturer's Warranties shall also begin on Substantial Completion; not on purchase of equipment or delivery of equipment to the site.
- b) The Warranty shall begin upon Substantial Completion.
  - 1) Note: Delivery of closeout documents is not a conditional requirement to commencement of the warranty.
- 2. This warranty shall in no manner cover equipment that has been damaged or rendered unserviceable due to negligence, misuse, acts of vandalism, or tampering by the Owner or anyone other than employees or agents of the Contractor.
  - a) The Contractor's obligation under its warranty is limited to the cost of repair of the warranted item or replacement thereof, at the Contractor's option.
  - b) Insurance covering said equipment from damage or loss is to be borne by the Contractor until full acceptance of equipment and services.
- 3. Individual specification sections may have additional warranty requirements for the work in that section. The warranty above will cover all materials and work where not covered by an extended warranty listed in the individual specification section.
- 4. Warranty Coverage
  - a) Specified materials and workmanship provided shall be fully guaranteed by the Contractor against any defects in materials or workmanship.
    - 1) Contractor shall provide a full "System Warranty" which shall cover all materials, labor and related product shipping expenses for a period of five years from the date of Owner acceptance.
      - i) Supplied products with manufacturer's warranties of less than the System Warranty term shall be extended by the Contractor for the full specified term
    - 2) During this period the Contractor will remedy (at no cost to the owner) any problem with the system, or any of its related components that is the result of defective materials, settings, workmanship, or loss or programming.
    - 3) Any defective items or work shall be removed and replaced at the Contractor's expense to the satisfaction of the owner's representative and the Owner.
    - 4) During the Warranty Period, the Contractor shall respond by phone within four (4) business hours of notice by the owner of a problem. Within (1) business day or (72) contiguous hours, which ever comes first, the Contractor shall have qualified personnel onsite to remedy the problem if the problem cannot be quickly be remedied over the phone.
      - i) The contractor shall make available to the owner on-call emergency response service labor to the Owner. Cost for

emergency service labor during the warranty period shall not exceed the Contractor's published emergency service rates, or two-times its standard rate, whichever is lower.

- 5) The period of the Contractor warranty(ies) for any items herein are not exclusive remedies, and the Owner has recourse to any warranties of additional Scope given by the Contractor to the Owner and all other remedies available by law or in equity.
- 6) Additional Warranty requirements may be added by an individual Specification Section.
  - i) Scope of these extended (additional) warranty(ies) will be identified in the individual Specification Section and will be considered additive to this base Contractor Warranty.
  - ii) Requirements for Manufacturer's Warranties, required by a Specification Section, shall run concurrent to this base Contractor Warranty by the Contractor.
    - (A) Manufacturer's Warranties shall also begin on Substantial Completion; not on purchase of equipment.

X. (01 78 39 Project Record Documents)

1. Project Record Document requirements for Division 27 "Communications" shall be described in Section 27 01 00 "Operation and Maintenance of Communications Systems".

Y. (01 79 00 Demonstration and Training)

1. Training

- a) Proper operation in many cases is a function of adequate training of key users on new systems.
  - 1) Each Division 27 section may specify special Training requirements.
    - i) Training requirements will be for a quantity of hours, allow for multiple trips.
  - 2) If no special requirements are specified in the individual section, allow for 4 hours and 2 trips to provide basic overview, operation and maintenance information.
  - 3) Each Specification Section will indicate any training criteria specific to that Section.
  - 4) Train Owner's maintenance personnel on the procedures and schedules involved in operating, general troubleshooting, and preventative maintenance of the system.
  - 5) All training sessions shall be audio and video recorded. Recordings shall be supplied in DVD formats and playable on standard consumer grade reproduction equipment. Recordings do not need to be professionally edited but shall have intelligible audio and a clear image of the subject trainer and any supplemental visual content critical to the training.

- 6) Recordings shall be turned over and signed for by an owner's representative at the end of each training session.
- 7) Contractor shall require all attendees to sign-in for each training session. The sign-in form shall summarize the training to be conducted, specification section and subsection being trained on, as well as the starting time and duration of training. Following training, a representative of the owner shall sign the form, acknowledging the same. Contractor shall retain the original copy of these forms and turn over a photo copy of the form to the owner's representative as evidence of training. Training conducted without this official record of training shall not be considered as part of the Contractor's training obligation.
- b) Schedule training with the Owner's representative, at least 14 days in advance.
- c) Contractor shall assume training will be conducted in a minimum of (2) separate sessions, on non-contiguous days and will require separate trips to the project site, and should be bid accordingly.
- d) Owner shall have the right to use its allocated training for a period of 365 calendar days following acceptance of the system.

**END OF SECTION 27 00 10**

Revised 11/20/2019

## **OPERATION AND MAINTENANCE OF COMMUNICATIONS SYSTEMS**

### **PART 1 GENERAL**

#### **1.1 RELATED DOCUMENTS**

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### **1.2 SUMMARY**

- A. Section Includes:
  - 1. Basic materials, methods and installation guidelines applicable to the installation of all communication systems.
    - a) This Section is a “Common Work Results” Section that includes information that is applicable and “Related” to all Division 27 Sections.
- B. Related Sections
  - 1. All Division 27 Sections.
- C. Related Drawings
  - 1. All Technology (T-Series) Drawings

#### **1.3 RECORD DOCUMENTS FOR COMMUNICATIONS SYSTEMS**

- A. The Operations and Maintenance Manual (Owner’s Manual) paragraph below details the basic information required to be documented.
- B. Each specification section will detail applicable additional Record Document requirements in the PART I, Submittals paragraph under Close-out documentation.
  - 1. All Record Document information, except for full size floor plans and detail drawings, will be placed in the appropriate location in the Operations and Maintenance Manual described below.
  - 2. Full sized drawing sheets shall be supplied in triplicate and on electronic media.

#### **1.4 OPERATIONS AND MAINTENANCE MANUALS (OWNER’S MANUAL)**

- A. Prepare Operations and Maintenance Manuals in accordance with Division 1 Section “Maintenance and Operation.” In addition to the requirements specified in Division 1, provide additional information as detailed in each Section and include the following information for equipment items:

1. Manufacturer's printed operating procedures to include start-up, break-in, and routine and normal operating instructions, regulation, control stopping, shutdown, and emergency instructions.
  2. Equipment Maintenance Manuals indicating routine preventative maintenance and troubleshooting, disassembly, repair, and reassembly, aligning and adjusting instructions.
- B. Schedule:
1. A review copy of the O&M Manual shall be submitted to the Owner within 2 weeks of substantial completion of the Project.
  2. The corrected reproductions of the Manual shall be submitted within 2 weeks of the return of the review copy by the Owner.
- C. Construction
1. Manuals shall be bound in hard cover, 3 ring binder(s) with clear plastic "pocket" covers to insert Project Information on the exterior of the Binder.
  2. Maximum individual Binder spine size shall be 3"; utilize multiple binders as required.
- D. Operations and Maintenance Manuals shall include the information listed below and be assembled as follows:
1. Binder shall be marked on the cover and spine with the following information
    - a) Project Information
      - 1) Title of Project
      - 2) Name and address of Owner, Contractor, and Architect/Engineer
      - 3) Completion date of Project
    - b) Contents of Binder
  2. Section 1:
    - a) Index
      - 1) Provide additional information if multiple binders are utilized.
  3. Section 2 through x (Provide one (1) Tabbed Section for each Specification Section).
    - a) Each Specification Section Tab shall include the following information:
      - 1) Sub Tab 1
        - i) Specification Section Identification
      - 2) Sub Tab 2
        - i) Warranty Information
        - ii) Copy of "Substantial Completion" Document establishing warranty period.
        - iii) Punch List Final Inspection certificate

- 3) Sub Tab 3
  - i) A listing of all materials and equipment that was submitted for approval shall be bound into this manual separated into individual sections (by the Division 27 Section number) for each system.
  - ii) A List of Drawings included as attachments to the O & M Manual.
    - (A) Full Size drawings shall be submitted with the Manual and a index including sheet Title and Number be placed in this Tab
- 4) Sub Tab 4
  - i) A copy of the Shop Drawings “Product Information Sheets” for each item required to perform Work as specified
    - (A) Include a copy of the “stamped” and “approved” Product Information Sheets for each product utilized on the Project.
- 5) Sub Tab 5
  - i) Manufacturer provided information (As Applicable)
    - (A) Installation instructions published by the manufacturer
    - (B) Operating instructions published by the manufacturer
    - (C) Maintenance Manuals furnished with the equipment
      - (1) Maintenance procedures for routine preventative maintenance and troubleshooting; disassembly, repair, and re-assembly; aligning and adjusting instructions.
      - (2) Parts list pertaining to that equipment
    - (D) Description of function, normal operating characteristics and limitations, performance curves, engineering data and tests, and complete nomenclature and commercial numbers of replacement parts.
    - (E) Manufacturer's printed operating procedures including start-up, break-in, normal operating instructions, regulation, control, stopping, shutdown, and emergency instructions.
    - (F) Emergency operating instructions or a list of service organizations (including addresses and telephone numbers) capable of servicing various parts of the system.
- 6) Sub Tab 6
  - i) Test reports (as applicable)
    - (A) Infrastructure
      - (1) Copper Backbone tests
      - (2) Fiber Optic Backbone Tests
      - (3) Horizontal cable tests
    - (B) Systems
      - (1) As required by the individual Specification Section
  - ii) Summary test reports shall be placed in the O & M manual.

- (A) Provide an electronic copy (CD-ROM) of all test results
      - (1) Provide “Reader” software on the disk.
    - (B) Provide a single copy of each detailed test.
      - (1) Tests shall be placed in (a) binder(s) in the same order as submitted on the summary reports.
      - (2) Submit with final “Approved” O & M Manual submission.
  - 7) Sub Tab 7
    - i) Items listed in individual Division 27 sections and as previously described in the Record Documents paragraph. (Additional Tabs to separate Section(s) requirements.
- E. Distribution:
- 1. Provide one review copy for Consultant approval prior to reproduction.
    - a) Consultant will review, correct or approve, and return.
  - 2. Provide (5) copies of the complete (corrected) manual.
    - a) Include one printed copy of test results as detailed above.
    - b) Provide 5 copies of all attachments (drawings; electronic test reports, etc.).

## **PART 2 PRODUCTS**

### **2.1 NOT USED**

## **PART 3 EXECUTION**

- A. Record Documents (A.K.A. AS-BUILTS)
- 1. Shall be prepared as outlined above.
  - 2. Record actual site specific information
    - a) Make arrangements for providing two complete sets of communication prints which shall be used to provide record drawings which shall be separate, clean, prints reserved for the purpose of showing a complete picture of the work as actually installed (including routing of all conduit and cables).
    - b) Drawings shall serve as work progress report sheets and the Contractor shall make any notations, neat and legible thereon daily as work proceeds. The drawings shall be available for inspection at all times and shall be kept at the job at a location designated by the owner's representative.
    - c) Maintain the clean, undamaged set of prints of Contract Drawings as well as a set of submittal drawings and coordination drawings where applicable. Mark the sets to show the actual installation where the installation varies from the Contract Documents as originally shown. Record drawings shall include locations of underground and concealed items if placed other than shown on the Contract Documents. Do not permanently conceal any construction until this required information is recorded. Mark which drawing is most capable of showing conditions fully and accurately. Where shop drawings are used, record a cross-reference at the corresponding

location on the Contract Drawings. Give particular attention to concealed elements that would be difficult to measure and record at a later date.

- d) Record documents shall show changes in: size, type, capacity, etc., of material device or piece of equipment, location of device or piece of equipment; location of outlet or source of building service systems; routing of piping, conduit, or other building services. These drawings shall also record location of concealed equipment, communication service work, conduits and other piping/work by indication of measured dimensions to each line from readily identifiable and accessible walls or corners of building. Indicate all approved substitutions, contract modifications, and actual equipment and materials installed.
- e) Record documents shall include a detail diagram of all mounting devices and method of rigging those devices to the structure. Record documents shall include plan view drawings indicating cable paths, cable types identified, device identification, riser diagrams, system block diagrams and rack layouts. System block diagrams shall indicate device selection and location in signal flow schematically. Contractor shall provide legend defining all devices and symbols used.
- f) For communication work installed below slabs, pavements, grade, etc., these drawings shall also record location of nearby concealed water piping, sewers, wastes, vents, ducts, conduit and other piping, etc. by indication of measured dimensions to each line from readily identifiable and accessible walls or corners of building and from adjacent communication work. Show inverted elevation of underground communication work relative to work installed by other trades.
- g) Upon substantial completion of the work make arrangements for obtaining a complete set of CAD computer files for the project. All information from the print record drawings shall be neatly drafted/digitized (using pre-established layering system) into the applicable CAD drawing. Neatly erase and redraft work as required to reflect the work as actually installed. Perform drafting in a manner in which all work shall be shown in its actual locations, existing as well as new, by erasing inaccurate locations and redrawing proper routing/locations. This applies for all concealed work as well as work visible. All work shall be performed using AutoCAD Release 2000 or more recent release of AutoCAD.
- h) Affix near the title block on each drawing of the set of record drawing prints the Contractor's Company Names, signature of Contractors' Representative and current date. Deliver one set of prints to the Designer. Deliver the second set of prints, the original reproducibles, the CAD computer files and the marked-up field prints to the architect.

- i) All prints shall be signed and dated by the General Contractor, This Contractor and applicable Subcontractor.
- j) In addition to the above, provide "as-built" record documentation for shop drawings (and coordination drawings where applicable).

**END OF SECTION 27 01 00.00**

Revised 11/20/2019

## **BASIC MATERIALS AND METHODS FOR COMMUNICATIONS**

### **PART 1 MATERIALS AND METHODS**

#### **1.1 RELATED DOCUMENTS**

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### **1.2 SUMMARY**

- A. Section Includes:
  - 1. Basic materials, methods and installation guidelines applicable to the installation of all communication systems.
    - a) This Section is a “Common Work Results” Section that includes information that is applicable and “Related” to all Division 27 Sections.
- B. Related Sections
  - 1. All Division 27 Sections.
- C. Related Drawings
  - 1. All Technology (T-Series) Drawings

#### **1.3 QUALITY ASSURANCE**

- A. Welding
  - 1. Welding shall be performed by persons licensed by the authority having jurisdiction where the work is performed. This shall apply to all work which is routinely regulated by said authority.
- B. High Voltage Wiring
  - 1. High voltage wiring and connections shall be performed by persons licensed by the authority having jurisdiction where the work is performed. This shall apply to all work which is routinely regulated by same authority.

### **PART 2 PRODUCTS**

#### **2.1 NOT USED**

## **PART 3 EXECUTION**

### **3.1 RELATED OPERATIONS**

#### **A. Welding**

1. Onsite welding, where it is necessary, shall not be performed without the express written consent of the owner's representative. All project specifications governing welding shall apply, regardless of whether said specifications are referenced within the Division 27 specifications.

#### **B. High Voltage Wiring**

1. Review all high voltage provisions for This Contractor's work with the Division 16 electrical contractor. Coordinate specific device termination, loading and circuiting requirements with the electrical contractor.

### **3.2 INSTALLATION OF COMMUNICATIONS SYSTEMS**

#### **A. General**

1. All work installed in finished areas shall be concealed. All work installed in unfinished areas may be exposed at the discretion of the Owner's representative.
2. Install systems, materials, and equipment to conform with approved submittal data, including coordination drawings, Any exceptions to be approved by Owner.
3. Install equipment to facilitate servicing, maintenance, and repair or replacement of equipment components. Connect equipment for ease of disconnecting, with minimum of interference with other installations.
4. Install systems, materials, and equipment giving right-of-way priority to systems required to be installed at a specified slope.
5. Protect the structure, furnishings, finishes, and adjacent materials not indicated or scheduled to be removed.
6. Verify all dimensions by field measurements. Take measurements and be responsible for exact size and locations of all openings required for the installation of work. Figured dimensions are reasonably accurate and should govern in setting out work. Where detailed method of installation is not indicated or where variations exist between described work and approved practice, direction of the owner's representative on job shall be followed.
7. The symbols used to indicate the purpose of which the various outlets are intended are identified in the Legend.
8. If during construction it becomes apparent that certain minor changes in layout will affect a neater job or better arrangement, such alterations shall be made as part of the contract. Owner's review shall be obtained before making such changes.
9. Workmanship throughout shall conform to the standards of best practice. Marks, dents or finish scratches will not be permitted on any exposed materials, fixtures or fittings. Inside of panels and equipment boxes shall be left clean.

10. Use caution not to exceed the allowed bending radius for respective cables and not to compromise the integrity of the cables during installation by pulling cable management devices too tightly, damaging cables, etc. Raceway/Cabling bending radii shall be minimum as directed by cable manufacturer. Use pulling compound or lubricant, where necessary; compound must not deteriorate conductor or insulation.

B. Cable

1. General

- a) Provide color-coded jackets to identify runs of different systems.
  - 1) See related specifications and drawings for applicable color coding.
- b) Neatly route cables parallel, perpendicular and plumb to building architectural lines.
- c) **Neatly comb out multiple cable bundled runs to remove tangling and crossing of cables within the bundles. Neatly dress all cable work and provide vertical and horizontal cable management** (or other approved method) for properly dressing all work at racks, control panels, backboards etc. See detail(s) if applicable.
  - 1) To avoid Alien Crosstalk, do not cinch UTP cables into tight bundles.
- d) Plenum-rated hook and loop one inch wide tape shall be used wherever wire ties are permitted and wherever plenum rated cable is used.
- e) Plenum-rated hook and loop one inch wide tape shall never be used in a manner that causes deformation of the cable jacket, damage to the cable, or has any adverse affect on the usability, specifications or longevity of the cable(s) on which it is applied.
- f) Plenum-rated hook and loop one inch wide tape (Velcro) type wire ties shall be used in plenum spaces; in equipment racks; in rack cabinets, and; in related equipment housing enclosures.

2. Support

- a) All cables shall be supported/anchored every 5 feet (or less) and within 12" of device boxes, outlets, racks/cabinets and cable tray.
- b) Use J-Hook type cable supports for all cables run outside of conduit or cable tray. Bridle rings shall not be used for Communications Technology cables.
- c) Use separate J-Hook cable support systems for cables belonging to different systems and for cables carrying different operating levels. See Cable Separation guidelines in this section.
- d) Loosely secure cables at each J-Hook.
- e) Cables shall not be directly or indirectly supported by a suspended ceiling or any other surface, support, material or structure not permissible for this use by all applicable codes and standards.

- f) Cable trays or messenger strand positioning
  - 1) Used to route cables in hallways
  - 2) Each must have a minimum twelve inches (12") vertical clear space above the top of the cable tray or messenger strand, and a minimum six inches (6") clear space below and on each side of the cable tray or messenger strand.
- 3. Cable Separation
  - a) Cables carrying signals of different nominal operating level shall be kept separated to reduce the risk of undesirable cross-talk interference between cables.
    - 1) As a general rule, for each 25dB of nominal level voltage difference between cables, Contractor shall provide an additional 6 inches of physical separation between the cables. For example: cables with a 25dB voltage difference shall be separated by at least 18 inches. As the difference increases the distance shall increase proportionally.
    - 2) This guideline shall be used to govern the separation of low voltage Communications Technology cabling from AC power circuits as well. For example: A Microphone line running parallel to a 480v power line shall be separated by nearly 27-30 inches.
    - 3) Provide greater separation than this guideline where the contractor believes and/or determines it is necessary to prevent or remedy interference between cables.
  - b) Keep length of parallel runs to a minimum. Cross cables of different nominal levels at 90 degrees.
  - c) Provide additional separation as necessary to prevent and remedy any crosstalk which:
    - 1) Adversely affects the performance and usability of the system, or;
    - 2) Exceeds specific crosstalk performance specified in individual specifications.
  - d) Contractor shall take all precautions necessary to keep low-voltage cable away from sources of EMI and RF interference. Where close proximity is absolutely necessary to satisfactory appearance, performance or installation of the Work, provide all necessary shielding necessary to ensure that ingress interference is minimal and has no negative impact of the Work.
- 4. Cable Termination
  - a) The cables terminating at a device outlet shall be left not less than 10 inches to facilitate installation and servicing of devices. Longer working lengths shall be provided as appropriate to the application.
  - b) All termination types shall correctly match the cable and device termination point. Connectors of the appropriate type, size, color and rating shall be used to match with the mating equipment

- c) Tools as recommended by each specific connector manufacturer shall be used in attachment of all connectors.
- d) Spade connectors.
  - 1) Spade type connectors shall be used on cable ends where screw-type terminal connectors are used.
    - i) All spade connectors shall be insulated. Provide heat shrink type insulation where solder-type or non-insulated spade connectors are used.
  - 2) Spade connectors used shall be rated by the manufacturer for the gauge, insulation, type and stranding of the cable to which it is applied. Spade connectors shall be sized to exactly match the stud size and spacing of mating termination connector.
  - 3) Tools as recommended by the specific connector manufacturer shall be used in attachment of the connector to the cable.
  - 4) When spade connectors are the required to be used for audio circuits operating at  $\leq +8\text{dBv}$  nominal, solder type spade connectors only shall be permitted.
  - 5) No more than two spade connectors shall be permitted under a single terminal. Fewer should be used when recommended by the specific manufacturer's equipment or connector.
- e) Wire Nuts
  - 1) Wire nuts shall not be used in any audio circuit, except when necessary in the following:
    - i) 25 Voltage Constant-Voltage loudspeaker circuits.
    - ii) 70 Voltage Constant-Voltage loudspeaker circuits.
  - 2) Wire nuts shall not be used in any data or voice communications or remote control circuit.
  - 3) Wire nuts shall not be used in any circuit which radiates RF energy.
  - 4) Contractor must advise and gain prior approval of the Owner for any circuit which the Contractor desires to use wirenuts as the means of termination.
- f) Drain Wires, Non-insulated Ground Wires and Shields
  - 1) Drain or non-insulated ground conductors shall be insulated with appropriately sized heat-shrinkable insulated sleeving immediately upon exit from the jacket of the cable. Contractor shall use GREEN colored sleeving unless otherwise necessary to resolve specific color coding conflicts on a given cable. This methodology shall apply to ALL methods of termination, including inline connectors, device plates, direct equipment terminations etc... Sleeving shall be applied to twisted and braided shields once the internal conductors have been combed out or otherwise removed from the center of the shield.

- 2) Wherever a cable contains a non-insulated conductor within a jacketed cable, the conductors, as they exit the manufacturer's jacket, shall have a piece of heat shrinkable sleeving applied equally over the jacket and the exposed insulated conductors. The length of this sleeving shall be 1" for all cable diameters of .250" or less. For cables diameters larger than .250" the length of the sleeving shall be approximately equal to 4 times the diameter of the cable jacket. Note: This added sleeving is recommended but not mandatory when cable termination occurs fully within the confines of a fully insulated and strain relieved connector. Black shall be used unless otherwise necessary for specific cosmetic or cable identification purposes.
  - 3) A heat-gun of the appropriate temperature, size, type and rating for shrinking the tubing shall be used as recommended by the manufacturer of the sleeving used. Open flame (i.e. matches, cigarette lighters, torches) and direct metal conduction (i.e. soldering iron) methods to shrink the sleeving shall not be permitted. Sleeving which is burnt or otherwise marred shall be removed and replaced.
  - 4) There shall not be any non-insulated exposed conductors within a device backbox, junction box, or equipment rack/cabinet.
- g) Unused Conductors
- 1) Unused conductors shall not be "clipped" or removed from any jacketed cable. Conductors which are not required or used at the end of a jacketed cable shall be kept intact. Conductors shall be fully insulated from one and other to prevent shorts which could occur at either end of the cable. Conductor ends shall also be insulated to prevent shorts to other conductive materials which could come in contact with the conductor.
  - 2) Unused conductors shall be kept the same length as the longest conductor of the cable being used.
- h) Cable and Conductor Nicks
- 1) Attention shall be paid to the proper preparation of all cables and all conductors of these cables. There shall not be nicks to cable jackets, conductor insulation, or the conductors themselves.
  - 2) Special attention should be paid to nicked conductors. Should a conductor be nicked during preparation or termination the cable shall be reworked/replaced to remove the nick.
- i) Cut, Disconnected, or Not Terminated Cables
- 1) Any voice, data, or coaxial cable that is cut, disconnected, or not terminated at both ends shall be completely removed end to end. Any labels at either end shall be erased. Record drawings shall reflect the removal of these cables.

**END OF SECTION 27 05 01.00**

Revised 11/20/2019

## **PATHWAYS FOR COMMUNICATIONS SYSTEMS**

### **PART 1 GENERAL**

#### **1.1 RELATED DOCUMENTS**

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### **1.2 SUMMARY**

##### **A. Section Includes:**

- 1. This Section includes requirements and minimum standards for:
  - a) Raceways
  - b) Fittings
  - c) Boxes
  - d) Penetrations
  - e) Pathway accessories
- 2. This Section is a “Common Work Results” Section that includes information that is applicable and “Related” to all Division 27 Sections.
- 3. This Section requires the addition of basic items, not specified elsewhere, to the installation of pathways.
  - a) Add the following to the pathways:
    - 1) Provide a pull rope in each installed pathway and leave a pull rope in the pathway after the cabling is installed.
    - 2) Provide proper identification, labeling, and documentation of key pathway locations and components.
    - 3) All pathways designed for fiber optic cables will require an innerduct for the installation of the fiber optic cable unless interlocking armored cable construction is utilized.
    - 4) Provide cable spillways where cabling will drop out of sleeve(s), unsupported for more than six inches:

##### **B. Related Sections**

- 1. All Division 27 Sections

##### **C. Related Drawings**

- 1. Technology (T-Series) Drawings

### 1.3 REFERENCES

- A. ANSI/TIA/EIA-569-B – Commercial Building Standard for Telecommunications Pathways and Spaces.
- B. ANSI/TIA/EIA-606-A – The Administrative Standard for the Telecommunications Infrastructure of Commercial Building.
- C. “TELECOMMUNICATIONS DISTRIBUTION METHODS MANUAL” published by the Building Industry Consulting Services International (BISCI).

### 1.4 GENERAL INFORMATION

- A. NFPA Compliance:
  - 1. Comply with NFPA 70 “National Electrical Code” for components and installation.
- B. Coordinate layout and installation of raceway and boxes with other construction elements to ensure adequate headroom, working clearance, and access.
- C. UL Compliance:
  - 1. Cable tray shall be UL certified.
  - 2. Sleeves shall be UL listed assemblies.
- D. All Work shall fully comply with these Specifications and related Drawings and all manufacturers’ recommended installation practices.

### 1.5 SYSTEM DESCRIPTION / DESCRIPTION OF WORK

- A. The work covered by this Specification Section includes any and all requirements for this type work required for proper installation of work specified in each related Division 27 Specification Section and/or as shown on the Drawings.
  - 1. This Specification Section is a Materials and Methods Section for Division 27. All requirements herein are required by each related Section and will be enforced for each related Section.
  - 2. Pathways for Communications are to be provided to create a re-usable pathway for Communications cables.

### 1.6 SUBMITTALS

- A. General
  - 1. Product Data and Shop Drawing submittals for work of this section shall be SUBMITTED TOGETHER, complete, as a single submittal. Product Data and Shop Drawings are not to be submitted separately.
  - 2. Samples shall be submitted with or immediately following submission of Product Data submittals.

B. Items to be submitted for approval prior to commencement of work:

1. Product Data

- a) Manufacture datasheets for all items
  - 1) Data sheets shall include
    - i) Manufacturer name
    - ii) Manufacturer model number (as it appears on manufacturer's product data sheet)
    - iii) Manufacturer product description
    - iv) Paragraph number of this section where the product is specified.
    - v) Picture or Drawing of item

**PART 2 PRODUCTS**

2.1 PRODUCT STANDARDS

A. General

- 1. Part II is designed to provide the Contractor with a minimum standard of quality and functionality for the products used for telecommunications infrastructure.
  - a) This standard will be considered in force for the original response as well as for any additions or changes to this Project. Due to this, there may be items listed in the "Products" section that are not required under the Scope of this Contract.

2.2 RACEWAYS

A. Conduits

- 1. Rigid steel conduit:
  - a) Threaded rigid steel conduit shall be manufactured from mild steel, zinc galvanized both inside and outside including threads. It shall be constructed in accordance with ANSI C80.1, Federal Specification WW-C-581; UL listed.
- 2. Intermediate metallic conduit:
  - a) Threaded intermediate metallic conduit shall be manufactured from mild steel, zinc galvanized both inside and outside including threads. It shall be constructed in accordance with ANSI C80.6, Federal Specification WW-C-581; UL listed.
- 3. Electric metallic tubing:
  - a) Electric metallic tubing shall be manufactured from mild steel, zinc galvanized both inside and outside. It shall be constructed in accordance with ANSI C80.2, Federal Specification WW-C-563; UL listed.

4. Flexible metallic conduit:
    - a) Flexible metallic conduit with neoprene jacket shall be spirally wound steel, strip zinc galvanized both inside and outside, integral ground conductor.
      - 1) Unless otherwise indicated, flexible metallic conduit provided for telecommunications cabling can only be provided as a pathway from the telecommunications outlet box to the ceiling space above and cannot exceed 6 meters.
  5. Non-metallic raceways
    - a) Polyvinylchloride (PVC):
      - 1) PVC conduit shall be virgin C300 type, Schedule 40 or 80 (90° C). It shall be constructed in accordance with NEMA TC2 and Federal Specifications W-C-1094A.
- B. Surface raceways:
1. Single compartment raceway:
    - a) Single compartment electrical ivory raceway as indicated, surface mounted base with cover.
      - 1) Provide appropriate elbows (Panduit RAFC10IW-X), tees (Panduit TFC10IW-X), entrance end fitting (Panduit DCEFXIW-X), etc. to follow wall layout.
      - 2) Standard of quality shall be Panduit Panway LDP-10IW8-A.
      - 3) Additional approved manufacturers: Wiremold, Hubbell
  2. Large Single compartment raceway:
    - a) Single compartment electrical ivory raceway as indicated, two piece surface mounted with snap on cover.
      - 1) Provide appropriate elbows, tees, entrance end fitting, etc. to follow wall layout. Provide wire T45WR-X retainers at a minimum of every three feet and as necessary to contain cabling.
      - 2) Standard of quality shall be Panduit Panway T-45.
        - i) Additional approved manufacturers: Wiremold, Hubbell
  3. Two compartment raceway:
    - a) Dual channel electrical ivory raceway as shown on the Drawings, two-piece surface mounted with snap on cover, compartment for power, and compartment for data.
      - 1) Provide appropriate elbows, tees, entrance end fittings, etc. as recommended by the manufacturer.
      - 2) Standard of quality shall be Panduit Panway Twin-70.
        - i) Additional approved manufacturers: Wiremold, Hubbell
- C. Telecommunications/power poles:
1. Construction:
    - a) Two compartment.
    - b) 10 foot – 5 inch height and 2 ½ inches x 2 5/16 inch overall width.
    - c) Removable covers.

2. Provide mounting hardware, entrance end fitting, and ceiling trim plate.
  3. Standard of quality shall be Panduit Pan-pole.
    - a) Additional approved manufacturer: Wiremold, Hubbell
- D. Cable tray:
1. Wall Mounted
    - a) Provide cable tray sized and located as indicated on the Drawings.
    - b) Cable tray shall comply with NEMA 8B, 12B, or 12C. Cable tray and all fittings and accessories shall effect a complete structural system in the form of a rigid mechanical tray of compatible material and design, functional to support all cabling.
    - c) Provide aluminum, rectangular tube, center spine with rungs perpendicular to the spine and spaced 6 inches on center.
    - d) Prefabricated structure consisting of a longitudinal rail with transversely connected members (rungs) that project from one side; single or double tiered; aluminum alloy.
    - e) Provide gray-colored manufacturer's rung caps on all rungs.
    - f) Sections to be joined by bolted splice connectors.
    - g) 4 inches overall depth per tier, 6 inches rung spacing.
    - h) Rung ends shall be factory bent upward to a height as indicated on the Drawings.
    - i) The rungs shall be positioned at the side of the spine at the top such that the spine is not part of the cable laying area (for example see Mono-Systems "top rung" cable tray).
    - j) Provide all manufacturer recommended fittings and accessories for a complete and functional system as indicated.
      - 1) Accessories: Provide crosses, tees, angles, wyes, drops, rises, etc., and other accessories required for the installation specified.
    - k) Standard of quality shall be Mono Systems 6114-0323 and 9114-0323.
      - 1) Approved manufacturers include: Allied Support Systems, B-Line.
  2. Center Hung
    - a) Provide cable tray sized and located as indicated on the Drawings.
    - b) Cable tray shall comply with NEMA 8B, 12B, or 12C. Cable tray and all fittings and accessories shall effect a complete structural system in the form of a rigid mechanical tray of compatible material and design, functional to support all cabling.
    - c) Provide aluminum, rectangular tube, center spine with rungs perpendicular to the spine and spaced 6 inches on center.
    - d) Prefabricated structure consisting of a longitudinal rail with transversely connected members (rungs) that project from both sides; aluminum alloy.
    - e) Provide gray-colored manufacturer's rung caps on all rungs.
    - f) Sections to be joined by bolted splice connectors.

- g) 4 inches overall depth per tier, 6 inches rung spacing.
  - h) Rung ends shall be factory bent upward to a height as indicated on the Drawings.
  - i) The rungs shall be positioned at the side of the spine at the top such that the spine is not part of the cable laying area (for example see Mono-Systems “top rung” cable tray).
  - j) Provide all manufacturer recommended fittings and accessories for a complete and functional system as indicated.
    - 1) Accessories: Provide crosses, tees, angles, wyes, drops, rises, etc., and other accessories required for the installation specified.
    - 2) Provide waterfall fittings in every location that cable is designed to exit the tray downward at the end of a run or between the rungs.
    - 3) Support with threaded rod and U-channel supports systems (See Accessories, Supporting Devices – Field Fabricated)
  - k) Standard of quality shall be Mono Systems .
    - 1) Additional approved manufacturers include: Allied Support Systems, B-Line.
- E. Telecommunications cabling support: Where necessary, provide additional cable support to create a re-usable pathway for Communications cables:
- 1. General
    - a) Primary pathways are those supporting the cabling infrastructure from the Equipment Rooms/Telecommunications Rooms through the corridors and chases to the secondary pathways.
    - b) Secondary pathways are those supporting the cabling infrastructure from the primary pathway to telecommunications outlets.
    - c) Cable supporting devices manufactured with small round surfaces (i.e. bridal rings) are not acceptable.
  - 2. Primary pathways
    - a) Messenger Strand
      - 1) Anchors shall be securely mounted to building structure at each end.
      - 2) Tensioners shall be installed to connect strand.
      - 3) Additional supports shall be installed with threaded rod from the deck above to support the strand approximately 6-8” above suspended ceiling in all locations.
        - i) Support with threaded rod and U-channel supports systems (See Accessories, Supporting Devices – Field Fabricated)
        - ii) Properly sized.
          - (A) Multiples of strands (100 horizontal cables each) appropriate to handle the required cable quantities plus 25% spare capacity.
          - (B) Separate strand for Backbone cables.
        - iii) Provide minimum ¼” steel strand with applicable hardware.
    - b) Open top cable supports

- 1) Plenum rated
- 2) Complies with UL, cUL, NEC, and ANSI/TIA/EIA requirements for structured cabling systems.
- 3) Shall be mounted to building structure or suspended by threaded rod from the deck above approximately 6-12" above suspended ceiling.
  - i) Support with threaded rod and U-channel supports systems (See Accessories, Supporting Devices – Field Fabricated)
  - ii) Properly sized.
    - (A) Multiples of J-Hooks (80 cables each) appropriate to handle the required cable quantities plus 25% spare capacity.
    - (B) Multiples of J-Hooks (300 cables each) appropriate to handle the required cable quantities plus 25% spare capacity.
  - iii) Provide Erico CAT32/CAT64 or approved equal for all primary pathway cable support.
  - iv) Additional approved manufacturers: B-Line, Panduit
3. Secondary pathways (those extending from the primary pathways to the space above the telecommunications outlets).
  - a) J-hooks with galvanized finish to provide smooth surface and corrosion resistance.
  - b) Complies with UL, cUL, NEC, and ANSI/TIA/EIA requirements for structured cabling systems.
  - c) Accommodates up to 16 horizontal UTP cables.
  - d) Shall be mounted to building structure or suspended by threaded rod from the deck above approximately 6-12" above suspended ceiling.
    - 1) Support with threaded rod and U-channel supports systems (See Accessories, Supporting Devices – Field Fabricated)
  - e) Standard of Quality shall be Erico CAT12xx/CAT21xx
    - 1) Additional approved manufacturer(s): B-Line, Panduit
4. Small Secondary pathways
  - a) Mounting for up to ten 4 pair UTP cables may be supported from ceiling grid support wires (at least every 5').
  - b) Standard of quality shall be Erico CAT12TS
    - 1) Additional approved manufacturer(s): B-line, Panduit

## 2.3 FITTINGS

- A. Rigid steel or intermediate metallic conduit:
  1. Fittings shall be threaded zinc galvanized steel.
  2. At least one bushing shall be grounding type
    - a) Equipped with a ground lug
    - b) Provide on each conduit or sleeve where surface extends below ceiling line.

- B. Electric metallic tubing:
  - 1. Fittings shall be compression type.
  - 2. At least one bushing shall be grounding type
    - a) Equipped with a ground lug
    - b) Provide on each conduit or sleeve where surface extends below ceiling line.
- C. Flexible metallic conduit:
  - 1. Fittings shall be suitable for the specific application.
  - 2. Use oil-tight fittings with neoprene jacketed flexible metallic conduit.
- D. Non-metallic conduit:
  - 1. Fittings shall be of the same type and manufacturer as the raceway, connected in accordance with manufacturer's written instructions.
- E. Expansion:
  - 1. Expansion fittings shall be of a type suitable for the particular condition and shall be complete with bonding jumper.

## 2.4 BOXES

- A. Box Eliminator devices
  - 1. Standard outlet size brackets that securely clamp to drywall.
  - 2. Available in single and dual gang sizes.
  - 3. Standard of quality shall be Caddy by Erico MP-1
    - a) Additional approved manufacturer(s):
- B. Floor Boxes
  - 1. Shall be utilize only with prior Owner approval
  - 2. FSR type boxes; see Division 26 specifications for exact sizing.
  - 3. Separate Telecommunications and Electrical compartments.
  - 4. A minimum of two 1" conduits or a 1 1/4" conduit for Communications cables.
- C. Outlet boxes:
  - 1. General:
    - a) Stamped steel, code gauge, galvanized, minimum 2 1/2 inches deep.
    - b) Provide single or double gang outlet boxes as indicated in details on the Drawings.
  - 2. In masonry or tile walls:
    - a) Rectangular boxes, 4" square, with square corners minimum 2 1/2 inches deep where the box is at the end of the run.
      - 1) Provide 1" deep single or 2 device trim ring.
    - b) Rectangular boxes, 4 11/16" square, with square corners minimum 2 1/2 inches deep where the box is in a continuing run.
      - 1) Provide 1" deep single or 2 device trim ring.

3. In gypsum board walls
    - a) Single and dual gang outlet boxes with a depth of 3 to 3.5”.
  4. Surface mounted and exterior use:
    - a) Single or dual gang Cast aluminum boxes with threaded hubs
  5. No through-wall boxes or utility boxes will be accepted.
  6. Where surface raceway is indicated, provide outlet boxes designed for use with the raceway by the same manufacturer as the surface raceway.
- D. Junction boxes:
1. Covers shall be screw attached (unless otherwise noted on the drawing) and of same type of material as the box. All covers shall be easily accessed.
  2. Boxes in exterior or moist locations shall meet NEMA 3R (at minimum)
    - a) The box must meet the NEMA requirements for the atmospheric condition in which the box is installed.
  3. Surface raceway boxes
    - a) Where surface raceway is indicated, provide junction boxes by the same manufacturer as the surface raceway.
- E. Pull boxes:
1. Required after every 100’ or after 180 degrees of bends in a conduit run
  2. Shall be sized as follows:
    - a) One 4” conduit straight through pull:
      - i) 15” wide, 60” long, and 8” deep; minimum.
      - ii) Add 8” to the width for each additional conduit.
      - iii) Information about other trade sizes; reference EIA/TIA 569 standard.
- F. Splice boxes:
1. Required after every 100’ or after 180 degrees of bends in a conduit run
  2. Used to hold splice hardware.
  3. Shall be sized as follows:
    - a) One 4” conduit straight through pull:
      - i) 42” wide, 66” long, and 11” deep; minimum.
      - ii) Add 7” to the width for each additional conduit.
      - iii) Information about other trade sizes; reference EIA/TIA 569 standard.
- G. Poke-thru systems:
1. Assembly consisting of disposable plate, barriered raceway, conduit adaptor, housing, base, barrier, and faceplate.
    - a) Provide Wiremold RC900-FF3 series multi-service poke-thru with 341-H/B assembly and FP2R faceplates as indicated.
      - 1) Additional approved manufacturers: Hubbell, Walker

## 2.5 ACCESSORIES

### A. Pull wires:

1. Pull wires shall be nylon type as manufactured by Arnco or approved equal.
2. Provide in all empty conduits, sleeves, raceways, and all cabling pathways for future use.
  - a) Additional approved manufacturers: Greenlee, Condux

### B. Fiber optic innerduct:

1. NEMA TC 5, UL listed, corrugated, specifically designed for optical fiber cable pathways.
  - a) Fiber optic innerduct shall be orange in color
  - b) Innerduct shall be 1-inch minimum inside diameter, and a minimum pulling strength of 600 pounds.
  - c) Each innerduct shall include a factory installed pull rope
  - d) Each duct shall be suited for the environment in which it is installed.
  - e) Standard of Quality shall be Carlon DF4X1C-xxxx for installation in Riser rated applications; and, Carlon CF4X1C-xxxx for installation in Plenum environments.
    - 1) Additional approved Manufacturers: Arnco, Endot, Opti-Com, Pyramid

### C. Cable spillways

1. Provide Bejed BJ-2049B-002 Spillway on four-inch sleeves; provide Bejed BJ-2049A-001 Cable Spillway on two-inch sleeves.
  - a) Additional approved manufacturers: B-Line, Panduit

### D. Labels

1. Standard of quality shall be Brady
  - a) Additional approved manufacturers: Panduit, Hellerman-Tyton

### E. Penetrations through floors and walls

1. Sleeves through floors and walls:
  - a) All penetrations through floors or walls to allow Division 27 cable or pathway to pass through will require a UL listed device for the purpose of penetrating the construction.
  - b) Penetrations through walls of spaces utilizing a chemical or pressure system for fire suppression must utilize Wiremold FS series penetration unless an alternate assembly is pre-approved by the Owner.

- c) Refer the Penetration Sectional View Drawings for UL listed assemblies.
  - 1) Concrete, block, brick, and gypsum drywall construction providing a fire rating of greater than one hour for walls and floors will require a UL rated sleeve assembly installed to manufacturer's requirements allowing the penetration(s) to not degrade the designed fire rating of the wall or floor.
    - i) Standard of quality shall be as manufactured by Unique Fire Stop Products (USFP). Utilize USFP's Threaded Penetrator system for all fire-rated penetrations.
    - ii) Additional approved manufacturers : Specified Technologies E-Z Path, Wiremold FS Series
  - 2) All other penetrations and gypsum drywall constructed walls providing a fire rating of one hour or less will require a UL rated sleeve assembly installed to manufacturer's requirements allowing the penetration(s) to not degrade the designed fire rating of the wall or floor.
    - i) Standard of quality shall be as manufactured by Unique Fire Stop Products (USFP). Utilize USFP's Smooth Penetrator system for all fire-rated penetrations.
    - ii) Additional approved manufacturers : Specified Technologies E-Z Path, Wiremold FS Series
  - 3) All penetrations found to be improperly sleeved after the installation of cabling will be sleeved and firestopped to restore the proper aesthetics and required fire rating to the obstruction.
    - i) Standard of quality shall be as manufactured by Unique Fire Stop Products (USFP). Utilize USFP's split-sleeve system for all fire rated penetrations.
- d) Penetrations into fire rated walls with gypsum board construction.
  - 1) All penetrations required in gypsum board walls for installation of horizontal cabling, where conduit is not stubbed into the ceiling cavity for this purpose, will require a sleeved penetration through the drywall membrane or the wall cap.
    - i) Each penetration will require a UL listed sleeve assembly installed by an installer trained on proper installation of the sleeving device.
    - ii) Standard of quality shall be as manufactured by Unique Fire Stop Products (USFP). Utilize USFP's Membrane Penetrator or Cap Penetrator system for all fire rated penetrations.
    - iii) Additional approved manufacturers : Specified Technologies E-Z Path, Wiremold FS Series
  - 2) Standard of quality shall be Unique Fire Stop Products.
    - i) Additional approved manufacturers : Specified Technologies E-Z Path, Wiremold FS Series

F. Supporting devices – Field Fabricated:

1. General

- a) Shop or field-fabricated supports or manufactured supports assembled from U-channel components.
- b) Steel brackets: Fabricated of angles, channels, and other standard structural shapes. Connect with welds and machine bolts to form rigid supports.
- c) All steel components utilized to fabricate supports shall be of U.S. manufacture.

2. Coatings:

- a) Supports, support hardware, and fasteners shall be protected with zinc coating or with treatment of equivalent corrosion resistance using approved alternative treatment, finish, or inherent material characteristic. Products for use outdoors shall be hot-dip galvanized.
- b) Where possible, supports shall have a finish similar to the device it is supporting.
  - 1) Where installed below the finished ceiling line, the support shall be painted to match the finish of the device it is supporting.

3. Material Types

- a) Concrete and masonry anchors:
  - 1) Shall be a guaranteed anchoring system with field training available.
    - i) Standard of quality will be as manufactured by Hilti or approved equal.
    - ii) All onsite personnel performing this work will be required to be manufacturer trained on the anchoring system being utilized, and upon request, to show proof of manufacturer's training certification.
- b) Raceway supports:
  - 1) Clevis hangers, riser clamps, conduit straps, threaded C-clamps with retainers, ceiling trapeze hangers, wall brackets, and spring steel clamps.
- c) Fasteners:
  - 1) Types, materials, and construction features as follows:
    - i) Expansion anchors:
      - (A) Carbon steel wedge or sleeve type
    - ii) Toggle bolts:
      - (A) All steel springhead type
    - iii) Powder-driven threaded studs:
      - (A) Heat-treated steel, designed specifically for the intended service

- d) Conduit sealing bushings:
  - 1) Factory-fabricated watertight conduit sealing bushing assemblies suitable for sealing around conduit or tubing passing through concrete floors and walls. Construct seals with steel sleeve, malleable iron body, neoprene sealing grommets or rings, metal pressure rings, pressure clamps, and cap screws.
- e) Cable supports for vertical conduit:
  - 1) Factory-fabricated assembly consisting of threaded body and insulating wedging plug for non-armored electrical cables in riser conduits. Provide plugs with number and size of conductor gripping holes as required to suit individual risers. Construct body of malleable-iron casting with hot-dip galvanized finish.
- f) Threaded Rod Stock (All-Thread Rod)
  - 1) Available in ¼", 3/8", ½", and 5/8" sizes.
    - i) Utilize ½" for supporting of 12" ladder racks and cable trays.
    - ii) Utilize 5/8" for supporting of 24" ladder racks and cable trays.
  - 2) Rod lengths over 6' will require a "Rod Stiffener" installation for ½" and 5/8" rods.
    - i) A section of U-Channel stock is placed around the rod and stiffener clamp assemblies used to clamp to rod
      - (A) Place clamps a minimum of 6" from the top and bottom of the rod and every 18" in between.
      - (B) Standard of quality shall be B-Line SC228
        - (1) Additional approved manufacturer(s): Unistrut Diversified Products, GS Metals Corp., Haydon Corp., Kin-Line Inc.
- g) U-channel systems:
  - 1) 16-gauge steel channels, with 9/16 inch diameter holes, at a minimum of 8 inches on center, in top surface. Provide fittings and accessories that mate and match with U-channel and are of the same manufacture.
- 4. Slotted metal angle and U-channel systems:
  - a) Standard of quality shall be Unistrut Diversified Products
    - 1) Additional approved manufacturers: Allied Tube & Conduit, American Electric, B-Line Systems, Inc., Cinch Clamp Co., Inc., GS Metals Corp., Haydon Corp., Kin-Line Inc.

### **PART 3 EXECUTION**

#### **3.1 GENERAL**

- A. Minimum raceway size shall be as necessary to comply with fill ratio of referenced standards, but in no case less than one and one quarter inch (1 1/4 inch).
- B. Provide specified pull wires in all cabling pathways.
- C. Ground and bond all systems in accordance with the NEC and ANSI/TIA/EIA 607.

- D. All installation material and practices shall fully comply with NFPA 70 “National Electrical Code” and ANSI/TIA/EIA 569A Commercial Building Standard for Telecommunications Pathways and Spaces.
- E. Coordinate work with the building structural systems and electrical installation.
- F. All work shall fully comply with these Specifications and related Drawings and all manufacturers’ recommended installation practices.

### 3.2 PATHWAY INSTALLATION

#### A. Raceways

##### 1. Conduit Usage:

- a) Rigid Galvanized Steel (GRC):
  - 1) All exposed conduit installed above grade outside the building envelope.
  - 2) All conduits installed in moist locations.
- b) Electric Metallic Tubing (EMT):
  - 1) All conduits within the building envelope.
- c) Polyvinylchloride (PVC):
  - 1) Underground which may continue from underground through floor slab to Equipment Room/Telecommunications Room.
- d) Flexible Metal Conduit (FMC):
  - 1) Unless otherwise indicated, FMC can only be provided for secondary pathways from the ceiling space to the telecommunications outlet box.
  - 2) Maximum length shall not exceed 6 meters.

##### 2. Conduit installation:

- a) Provide all conduit terminations with locknuts and bushings. Provide conduits 1 ½ inches and larger with insulating bushings and locknuts inside and outside the enclosure.
  - 1) At least one bushing per conduit shall be grounding type
    - i) Equipped with a ground lug
    - ii) Provide on each conduit or sleeve where surface extends below ceiling line and install Bonding Conductor to TMGB.
- b) Support conduits by pipe straps or trapeze hangers. Space supports not more than 8 feet on center. Secure supports by means of toggle bolts, inserts or expansion bolts.
- c) Space wall brackets supporting conduits not more than 4 feet 6 inches on center. Secure supports by means of toggle bolts, inserts or expansion bolts.
- d) Support conduits directly from structural systems not from ceiling suspensions systems.
  - 1) Provide additional support at junction or pull boxes.
- e) Wherever possible, conceal raceways under floors, in walls, above ceilings or in furred spaces in finishes areas.

- f) Support single conduits 1 ½ inches and larger by means of rod and cast ring hangers. Support multiple runs in similar manner or use common trapeze hanger.
  - 1) Trapeze hanger:
    - i) Unistrut P2000 or P4000, or equal by Allied Support systems or Superstrut, as required for span and loading.
    - ii) Provide end caps on hangers.
    - iii) Fasten conduits by means of heavy galvanized straps.
- g) Provide two hole sheet metal pipe straps for all surface mounted conduit supports on walls up to a height of 8 feet above the finished floor. Pinch type hangers similar to minerallac type may only be used at heights greater than 8 feet.
- h) Protect conduits during construction with temporary plugs or caps. Securely cap all conduit until wire or cable is installed.
- i) Minimum conduit size is 1 inch.
- j) Do not install conduit in concrete slab.
- k) Provide expansion fittings where raceway crosses the building expansion joints. (O.X. Type AX, EX, EXDS, TX, EXE, or approved equal).
- l) Route and maintain conduits as shown on the Drawings.
  - 1) If no specific routing information appears on the Drawings, the routing shown shall be considered diagrammatic.
    - i) In such a case, the Contractor shall coordinate his Work with the different trades so that interferences between conduit, cable tray, piping, equipment, architectural, and structural work shall be avoided.
      - (A) Should an interference arise, the Contractor shall inform the Consultant before proceeding with the Work.
      - (B) Should the Contractor fail to contact the Consultant and interferences develop, the Owner's Representative will decide which equipment, piping, etc. must be replaced, regardless of which was installed first. The relocation shall be performed at no expense to the Owner.
- m) There shall not be more than the equivalent of 180 degrees of bends in any single run of conduit between adequately sized pull.
- n) Conduit bends
  - 1) Bends shall be made so that the conduit will not be flattened or kinked and the internal diameter of the conduit will not be reduced.
  - 2) The radius of the curve of the inner edge of any bend shall not be less than as indicated by the National Electrical Code and ANSI/TIA/EIA 569A Commercial Building Standard for Telecommunications Pathways and Spaces.

- 3) In no case shall any conduit be bent or any fabricated elbow be applied to less than the allowable bending radius as specified by the cable manufacturer of the installed conductor.
- 4) When necessary to make field bends, use tools designed for conduit bending.
  - i) Heating of metallic conduit to facilitate bending is not permitted.
- o) A conduit run shall not be longer than 100' between pull boxes for conduit runs inside a building.
- p) The Contractor shall not cut, burn, or drill any structural member to mount electrical equipment or to facilitate tray or conduit installations without having previously received approval, in writing, from the Architect/Engineer/Consultant.
- q) Mount all conduits a minimum of 7 inches above any accessible type ceiling.
- r) Maintain conduit runs at least 6 inches from insulated pipes, steam lines or any other hot pipes they pass. Where the lines are not insulated, the clearances shall be increased until the temperature of the conduit, with no live conductors enclosed, does not rise above the ambient temperature of the installation area.
- s) Conceal all raceways except where otherwise indicated.
  - 1) Provide flashing and counter-flashing or pitch pockets for waterproofing of all raceways, outlets, fittings, etc. that penetrate the roof.
  - 2) Route all raceways parallel or perpendicular to the building lines with symmetrical bends.
  - 3) Provide sleeves in forms for new concrete walls, floor slabs, and partitions for passage of raceways.
    - i) Seal in an approved manner all raceway openings and sleeves through fire rated walls, floors, and ceilings after raceway installation.
- t) Waterproof all sleeved raceways where required.

**B. Surface Raceway**

**1. Surface raceway installation**

- a) Provide surface raceways as indicated.
- b) Coordinate installation with casework before installation. Field verify lengths to be installed before ordering equipment.
- c) Install plumb and level.
- d) Anchor all raceways to walls with the anchors designed for that particular wall construction. Secure raceway at a minimum of every 2 feet and not less than 6 inches from raceway ends.
- e) Install raceway per the manufacturer's written recommendation, including necessary entrance, end and bend fittings.
- f) Provide all of the manufacturer's recommended fittings and accessories.

- g) Where surface raceway is provided for a secondary pathway from the outlet to the ceiling space, extend surface raceway into the ceiling space not less than 4 inches.

C. Telecommunications/power poles

- 1. Mount straight and anchor to building structure above the ceiling line.
- 2. Provide mounting hardware, entrance end fitting, and ceiling trim plate.

D. Cable Tray

1. Planning

- a) Contractor shall plan entire cable tray system layout and all components required to provide a complete system, verifying dimensions and right-of-way clearances as needed.

b) Design

1) Wall mounted

- i) Where 12" capacity is indicated on the drawings a single tiered 12" rung size tray will be utilized.
- ii) Where 24" capacity is indicated on the drawings a two tiered 12" rung size tray will be utilized.

2) Suspended

- i) Where 12" capacity is indicated on the drawings a double sided 6" rung size tray will be utilized.
- ii) Where 24" capacity is indicated on the drawings a double sided 12" rung size tray will be utilized.

2. Coordination and positioning

- a) Coordinate positioning with other trades to assure maximum accessibility.

1) Tray shall be mounted securely along the wall at a minimum of 6" (lower tier) above the ceiling line.

- i) Where two 12" trays connect to a two tier unit, the upper tray may continue at 12" (upper tier) above the accessible ceiling.
- ii) Where tray cannot be wall mounted, (transversing hallways, etc.) mount span securely to wall at each end and provide 1/2" threaded rod supports, anchored into the concrete deck above, every 4' at minimum.

2) Minimum access should be 12 inches clear above the tray (each tier) and 12 inches clear beside the tray to facilitate moves, adds and changes for telecommunications cabling.

3. Installation

- a) Cable tray shall be routed as shown schematically by Contract Documents, run level and true to building lines.
- b) Changes in direction, changes in elevation, tees, crosses, and bends shall be made with manufactured fittings and accessories.
- c) Where conduits terminate above a cable tray, the conduit shall be provided with an insulating bushing.

- d) Mounting heights shall be sufficient to clear light fixtures, piping, and equipment and permit ready access through lay-in ceiling grids. Do not install less than 6 inches above ceiling.
- e) Cable tray shall be grounded by a separate stranded #6 AWG copper ground conductor attached to the building grounding electrode system and connected to nearest section of the cable tray with UL approved aluminum/copper termination.
  - 1) See “Grounding and Bonding” specification for further details.
- f) Cable tray shall be installed in accessible area. Provide raceway system of equivalent cross section area of cable tray where ceiling system is not accessible.
- g) Cable tray and all fittings and accessories shall effect a complete structural system in the form of a rigid mechanical tray of compatible material and design, functional to support all cabling.
- h) Transition cable tray system around physical obstructions using manufacturer’s recommended turns, sweeps, transition products, and materials to create a complete continuous cabling pathway free of obstructions and maintaining specified clearances.
- i) Where physical discontinuity is necessary, mechanically support cabling over the discontinuity as specified. Bond the ends of the cable tray together electrically over any discontinuity.
  - 1) Fire-wall penetrations shall be made with 4” sleeves (4 per 12” of tray width minimum).
    - i) Utilize requirements of the NFPA NEC to determine correct construction and sizing of wall penetration if tray is to penetrate fire rated wall.
  - 2) Ground and bond the system in accordance with the NEC and ANSI/TIA/EIA 607.
  - 3) Do not use copper fittings or hardware to connect any bonding conductor to aluminum cable tray.
- j) Provide support for cable trays at a minimum of 4’ 6” on center and at all splices, tees, elbows, bends, intersections, and transitions.
  - 1) Support with threaded rod and U-channel supports systems
    - i) 12” width – ½” ATR; 24” width – 5/8” ATR
  - 2) Rod lengths over 6’ will require a “Rod Stiffener” installation.
    - i) A section of U-Channel stock is placed around the rod and stiffener clamp assemblies used to clamp to rod
      - (A) Place clamps a minimum of 6” from the top and bottom of the rod and every 18” in between.
- k) Install system free of all sharp edges, burrs, or projections.
- l) Provide rung caps on rung ends as specified.
- m) Provide waterfall fittings in every location that cable is designed to exit the tray downward at the end of a run or between the rungs.

- n) Route parallel and perpendicular to building surfaces.
- o) Mount cable tray in such a fashion as to be re-usable.
  - 1) Install as straight and flat as practical and perpendicular to building lines.
    - i) Utilize manufactured 45 degree transitions up and down to change elevations.
    - ii) Utilize manufactured 45 or wide sweep 90 degree fittings to change route.
      - (A) Mount cable tray at approximately 6-12" above accessible ceiling.
      - (B) Locate in a position to allow at least 12" clearance on each side of the cable tray for access.
- 4. Install as a complete system in accordance with manufacturer's installation instructions indicated on the Drawings and to ensure electrical continuity of the system and adequate support for the cabling. Provide all manufacturer's recommended fittings and accessories.
- 5. Supports shall be attached to building structure.
- E. Messenger Strand
  - 1. Anchors shall be securely mounted to building structure at each end.
  - 2. Tensioners shall be installed to connect strand.
  - 3. Additional supports shall be installed with threaded rod from the deck above to support the strand approximately 6-8" above suspended ceiling in all locations.
    - a) Support with threaded rod and U-channel supports systems (See Accessories, Supporting Devices – Field Fabricated)
    - b) Properly sized.
      - 1) Multiples of strands (100 horizontal cables each) appropriate to handle the required cable quantities plus 25% spare capacity.
      - 2) Separate strand for Backbone cables.
- F. Open top discreet cable supports (J-Hooks)
  - 1. Primary pathways (corridors, vertical chases, etc.) plenum rated, adjustable cable support that complies with UL cUL, NEC, and ANSI/TIA/EIA requirements for structured cabling systems and accommodates up to 425 horizontal UTP cables or multiples of CAT32 (80 cables each) appropriate to handle the required cable quantities plus 25% spare capacity.
    - a) Install j-hook pathway, supporting at least every 5', as straight as possible perpendicular to building structure at approximately 12" above accessible ceiling.
    - b) Attachment of J-Hooks must be to building structure directly or utilize a minimum of 1/4" all-thread rod anchored into deck above.

2. Secondary pathways (those extending from the primary pathways to the space above the telecommunications outlets) J-hooks with galvanized finish to provide smooth surface and corrosion resistance that complies with UL, cUL, NEC, and ANSI/TIA/EIA requirements for structured cabling systems and accommodates up to 16 horizontal UTP cables.
  - a) Install j-hook pathway, supporting at least every 5', as straight as possible perpendicular to building structure at approximately 12" above accessible ceiling.
  - b) Attachment of J-Hooks must be to building structure directly or utilize a minimum of 1/4" all-thread rod anchored into deck above.
  - c) Exception: Cable routes of less than ten 4 pair UTP (or equivalent weight) may be supported with ceiling grid support wiring when utilizing a support manufactured for that purpose.
    - 1) Must be supported every 5'
    - 2) Cannot interfere with the removal of the ceiling tile
    - 3) Must be installed approximately 12" above ceiling

### 3.3 BOXES

#### A. Outlet boxes:

1. Provide outlet boxes flush with the surface unless otherwise noted and properly centered in ceiling tiles, wall finishes, or casework elements. Heights as indicated or to match existing outlet boxes.
  - a) Install all telecommunication video outlet with control for locations indicated to be wall hung TV's or monitors 8 feet above finished floor or 12 inches below finished ceiling, whichever is lower.
2. Provide outlet boxes of a type appropriate for the use and location. Gang adjacent devices in multiple gang boxes under a common finish plate.
3. Boxes shall be securely and rigidly attached and supported plumb, level, and true to building lines by any of the following methods:
  - a) Double bar installation for metal stud walls. Bar hanger punch, mounting clips, and retainer clips shall be used in strict accordance with manufacturer's instructions. Factory pre-punched stud holes shall not be used to support the bar hangers.
  - b) Steel stud installed behind box for support without caddy-type mounting clips for metal stud wall construction.
  - c) Caddy screw gun bracket installed behind box for support. Installation shall be per manufacturer's instructions.
4. Finish plates shall not span different types of wall finishes either vertically or horizontally. Plates shall cover mortar joints and cut openings completely.

5. Outlet, junction, and pull boxes and their covers shall have corrosion protection suitable for the atmosphere in which they are installed. Provide gaskets for all boxes installed outside or in other wet or damp locations (tunnels, crawlspaces, pits, etc.).
  6. Outlet boxes shall be protected from plaster. Debris shall be thoroughly cleaned from the box before installation of conductors.
  7. Floor boxes shall be installed flush and true with the floor.
  8. Finish plates:
    - a) Install a blank coverplate for each new or existing unused outlet box.
- B. Junction and pull boxes
1. Provide junction and pull boxes as indicated in the Contract Documents and as required.
  2. Provide junction and pull boxes in accessible spaces or behind access panels. Boxes located above snap-in or lay-in removable ceilings will be considered accessible.
  3. Provide junction and pull boxes where necessary to facilitate the installation of raceways and pulling of wire or cable.
  4. Provide junction and pull boxes sized in accordance with NEC and installed such that conduit entry will permit the longest radius for conductors contained therein.
  5. Provide junction and pull boxes such that conduits enter and exit across from each other on opposite sides of the junction box. Do not provide junction and pull boxes in place of conduit bends.
  6. Support all such boxes in accordance with the National Electrical Code.
- C. Mounting heights
1. Exceptions:
    - a) At junction of different materials in wall finishes.
    - b) Where outlet would occur in moldings, break in wall surface or unsuitable location in the tile, wood, or similar finish.
    - c) Where outlets would conflict with locations of wall-mounted equipment such as radiators, convectors, unit heaters, etc.
    - d) As noted otherwise.
    - e) Where electrical outlet on that wall is of different height.

### 3.4 PENETRATIONS THROUGH FLOORS AND WALLS

#### A. General:

1. Provide, locate and set sleeves where conduit passes through floors, walls, and other concrete or masonry structural materials except where tunnels, chases or shafts are provided in the constructions.
  - a) Sleeves through poured-in-place concrete floors shall be set before the pour and shall be of a design that will seal against passage of water between sleeves and concrete floor.
2. Provide bushings on all conduit sleeves.
3. Extend all wall sleeves a minimum of 2 inches or as required to allow the installation of conduit bushings.
4. Extend floor sleeves 4-6 inches above finished floors unless otherwise specified.
5. The void between the sleeve wall and conduit shall be neatly filled with an approved fire stop material.

#### B. Quantity and sizing:

1. Penetrations through floors, access through walls of Equipment Rooms and/or Telecommunications Rooms, and obstructions along a backbone or primary horizontal cabling route.
  - a) Provide the required quantity of 4 inch sleeve assemblies as specified with a minimum of one 4 inch sleeve. Properly firestop after installation of the telecommunications cabling.
  - b) Install sizes and quantities as specifically noted on the prints, or the quantity required so as to accommodate all planned cables, not exceeding a 40 percent maximum fill ratio in each sleeve, plus one spare 4 inch sleeve.
2. Penetrations through walls or along secondary horizontal cabling routes.
  - a) Provide a 2 inch or 4 inch sleeve assembly as specified with a minimum of one 2 inch sleeve. Properly fire stop after installation of the telecommunications cabling.
  - b) Install sizes and quantities as specifically noted on the prints, or the quantity required so as to accommodate all planned cables, not exceeding a 40 percent maximum fill ratio in each sleeve, plus one spare 4 inch sleeve.

#### C. Construction:

1. All penetrations through floors or walls to allow Division 27 cable or pathway to pass through will require a UL listed device for the purpose of penetrating the construction.
  - a) Concrete, block, brick, and gypsum drywall construction providing a fire rating of greater than one hour for walls and floors will require a UL rated sleeve assembly installed to manufacturer's requirements allowing the penetration(s) to not degrade the designed fire rating of the wall or floor.
    - 1) Each penetration will require a UL listed sleeve assembly installed by an installer trained on proper installation of the sleeving device.

- 2) Each penetration shall have the accompanying certification paperwork completely filled out and attached to the building structure adjacent to the penetration.
2. All other penetrations and gypsum drywall constructed walls providing a fire rating of one hour or less will require a UL rated sleeve assembly installed to manufacturer's requirements allowing the penetration(s) to not degrade the designed fire rating of the wall or floor.
  - a) Each penetration will require a UL listed sleeve assembly installed by an installer trained on proper installation of the sleeving device.
  - b) Each penetration shall have the accompanying certification paperwork completely filled out and attached to the building structure adjacent to the penetration. A copy of this paperwork will be required in the O & M Manual.
3. All penetrations found to be improperly sleeved after the installation of cabling will be sleeved and firestopped to restore the proper aesthetics and required fire rating to the obstruction.
  - a) Each penetration will require a UL listed sleeve assembly installed by an installer trained on proper installation of the sleeving device.
  - b) Each penetration shall have the accompanying certification paperwork completely filled out and attached to the building structure adjacent to the penetration. A copy of this paperwork will be required in the O & M Manual.
4. All penetrations required in gypsum board walls for installation of horizontal cabling, where conduit is not stubbed into the ceiling cavity for this purpose, will require a sleeved penetration through the drywall membrane or the wall cap.
5. Each penetration will require a UL listed sleeve assembly installed by an installer trained on proper installation of the sleeving device.

### 3.5 SUPPORTS

#### A. General:

##### 1. Coatings

- a) Coating: Supports, support hardware, and fasteners shall be protected with zinc coating or with treatment of equivalent corrosion resistance using approved alternative treatment, finish, or inherent material characteristic. Products for use outdoors shall be hot-dip galvanized.
- b) Concrete and masonry anchors
  - 1) Shall be a guaranteed anchoring system with field training available.
    - i) All onsite personnel will be required to be manufacturer trained on the anchoring system being utilized, and upon request, to show proof of manufacturer's training certification.

B. Manufactured supporting devices:

1. Raceway supports: Clevis hangers, riser clamps, conduit straps, threaded C-clamps with retainers, ceiling trapeze hangers, wall brackets, and spring steel clamps.
2. Fasteners: Types, materials, and construction features as follows:
  - a) Expansion anchors: Carbon steel wedge or sleeve type
  - b) Toggle bolts: All steel springhead type
  - c) Powder-driven threaded studs: Heat-treated steel, designed specifically for the intended service
3. Conduit sealing bushings: Factory-fabricated watertight conduit sealing bushing assemblies suitable for sealing around conduit or tubing passing through concrete floors and walls. Construct seals with steel sleeve, malleable iron body, neoprene sealing grommets or rings, metal pressure rings, pressure clamps, and cap screws.
4. Cable supports for vertical conduit: Factory-fabricated assembly consisting of threaded body and insulating wedging plug for non-armored electrical cables in riser conduits. Provide plugs with number and size of conductor gripping holes as required to suit individual risers. Construct body of malleable-iron casting with hot-dip galvanized finish.
5. U-channel systems: 16-gauge steel channels, with 9/16 inch diameter holes, at a minimum of 8 inches on center, in top surface. Provide fittings and accessories that mate and match with U-channel and are of the same manufacture.

C. Fabricated supporting devices:

1. General: Shop or field-fabricated supports or manufactured supports assembled from U-channel components.
2. Steel brackets: Fabricated of angles, channels, and other standard structural shapes. Connect with welds and machine bolts to form rigid supports.
3. Raceway supports: Comply with the NEC and the following requirements.
  - a) Conform to the manufacturer's recommendations for selection and installation of supports.
  - b) Strength of each support shall be adequate to carry present and future load multiplied by a safety factor of at least four. Where this determination results in a safety allowance of less than 200 lbs. provide additional strength until there is a minimum of 200 lbs. safety allowance in the strength of each support.
  - c) Install individual and multiple (trapeze) raceway hangers and riser clamps as necessary to support raceways. Provide U-bolts, clamps, attachments, and other hardware necessary for hanger assembly and for securing hanger rods and conduits.
  - d) Support parallel runs of horizontal raceways together on trapeze-type hangers.

- e) Support individual horizontal raceways by separate pipe hangers. Spring steel fasteners may be used in lieu of hangers for 1 ½ inch and smaller raceways serving lighting and receptacle branch circuits above suspended ceilings only. For hanger rods with spring steel fasteners, use ¼ inch diameter or larger threaded steel. Use spring steel fasteners that are specifically designed for supporting single conduits or tubing.
  - f) Support exposed and concealed raceway within 1 foot of an unsupported box and access fittings. In horizontal runs, support at the box and access fittings may be omitted where box or access fittings are independently supported and raceway terminals are not made with chase nipples or threadless box connectors.
  - g) In vertical runs, arrange support so the load produced by the weight of the raceway and the enclosed conductors is carried entirely by the conduit supports with no weight load on raceway terminals.
4. Miscellaneous supports:
- a) Support miscellaneous electrical components as required to produce the same structural safety factors as specified for raceway supports. Install metal channel racks for mounting cabinets, pull boxes, junction boxes, and other devices.
  - b) Support sheet metal boxes directly from the building structure or by bar hangers. Where bar hangers are used, attach the bar to raceways on opposite sides of the box and support the raceway with an approved type of fastener not more than 24 inches from the box.
5. Conduit seals:
- a) Install seals for conduit penetrations of slabs on grade and exterior walls below grade and where indicated. Tighten sleeve seal screws until sealing grommets have expanded to form watertight seal.
6. Fastening:
- a) Unless otherwise indicated, fasten electrical items and their supporting hardware securely to the building structure, including but not limited to; conduits, raceways, cables, cable traps, busways, cabinets, panelboards, transformers, boxes, disconnect switches, and control components in accordance with the following:
    - 1) Fasten by means of wood screws or screw-type nails on wood, toggle bolts on hollow masonry units, concrete inserts or expansion bolts on concrete or solid masonry, machine screws, welded threaded studs, or spring-tension clamps on steel. Threaded studs driven by a powder charge and provided with lock washers and nuts may be used instead of expansion bolts and machine or wood screws. Do not weld conduit, pipe straps, or items other than threaded studs to steel structures. In partitions of light steel construction, use sheet metal screws.

- 2) Holes cut to depth of more than 1 ½ inch in reinforced concrete beams or to depth of more than ¾ inch in concrete shall not cut the main reinforcing bars. Fill holes that are not used.
  - 3) Ensure that the load applied to any fasteners does not exceed 25 percent of the proof test load. Use vibration-and shock-resistant fasteners for attachments to concrete slabs.
7. Raceway supports: Hanger spacing shall be as required for proper and adequate support of raceway, but in no case shall be less than one hanger per 5 feet of raceway length.

**END OF SECTION**

Revised 11/20/2019

## **FIRESTOPPING FOR COMMUNICATIONS SYSTEMS**

### **PART 1 GENERAL**

#### **1.1 RELATED DOCUMENTS**

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.

**1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.**

#### **1.2 SUMMARY**

- A. Section Includes:

**1. This Section is a “Common Work Results” Section that includes information that is applicable and “Related” to all Division 27 Sections.**

- a) Refer to related Section 27 05 28 “Pathways for Communications Systems” for Sleeving requirements.
- b) This Section includes firestopping for the following:
  - 1) Penetrations through fire-resistance/-rated floor and roof construction including both empty openings and openings containing cables, pipes, ducts, conduits, and other penetrating items.
  - 2) Penetrations through fire-resistance/-rated walls and partitions including both empty openings and openings containing cables, pipes, ducts, conduits, and other penetrating items.
  - 3) Penetrations through smoke barriers and construction enclosing compartmentalized areas involving both empty openings and openings containing penetrating items.
  - 4) Sealant joints in fire-resistance/-rated construction.
- c) Label each firestopped sleeve with the label furnished with the sleeve assembly; each certification label shall be copied and added to the O & M Manual.

**2. System includes but is not limited to:**

- a) Firestopping Compounds

- B. Related Sections

**1. All Division 27 Sections**

- C. Related Drawings

**1. Technology (T-Series) Drawings**

### 1.3 GENERAL INFORMATION

#### A. Definitions:

##### 1. Firestopping

- a) A material or combination of materials used to retain integrity of fire-rated construction by maintaining an effective barrier against the spread of flames, smoke, and/or hot gasses through penetrations in fire-rated wall and floor assemblies.
- B. All Work shall fully comply with these specifications and related Drawings and all manufacturers recommended installation practices.

### 1.4 SYSTEM DESCRIPTION / DESCRIPTION OF WORK

#### A. General:

- 1. **Provide firestopping systems that are produced and installed to resist the spread of fire, according to requirements indicated, and the passage of smoke and other gasses.**
- 2. **Firestopping may be factory installed in a re-usable sleeve assembly or may be a removable/ re-usable material(s) inserted into a sleeve assembly to provide adequate protection.**
- 3. **Refer to related Division 27 Section "Pathways for Communications Systems" for Sleeving requirements.**
- B. Fire stopping requirements/locations are not indicated on drawings. It shall be the responsibility of this contractor to review all architectural and other drawings to determine fire/smoke rated walls and floors and rating requirements of same. This contractor shall provide all required fire stopping work associated with all Division 27 penetrations. Provide fire stop pillows, putty and/or sealant, as applicable, with minimum UL classification for 1 hour fire and cold side temperature ratings.
  - 1. **At a minimum, provide firestopping to equal or exceed the rating of the wall or floor.**
  - 2. **Provide Fire Stop Putty equal to Nelson FSP #AA400 series, or by 3M Fire Protection Products; Fire Protection Services, Inc.; UL Classified for 3 hour fire and cold side temperature ratings, reusable when penetrating items are removed or added and requiring no special tools, mixing, curing or drying time.**
- C. System Performance requirements:
  - 1. **Provide re-usable firestopping system(s) in all backbone pathway and major horizontal routes.**
  - 2. **F-rated through-penetration firestop systems:**
    - a) Provide through-penetration firestop systems with F rating indicated, as determined per ASTM E 814, but not less than that equaling or exceeding the fire-resistance rating of the constructions penetrated.

**3. T-rated through-penetration firestop systems:**

- a) Provide through-penetration firestop systems with T ratings, in addition to F ratings, as determined per ASTM E 814 where indicated and where systems protect penetrating items exposed to contact with adjacent materials in occupied floor areas. T-rated assemblies are required where the following conditions exist:
  - 1) Firestop systems protect penetrations located outside of wall cavities.
  - 2) Firestop systems protect penetrations located outside fire-resistive shaft enclosures.
  - 3) Firestop systems protect penetrations located in construction containing doors required to have a temperature-rise rating.
  - 4) Firestop systems protect penetrating items larger than a 4-inch (100 mm) diameter nominal pipe or 16 sq. in. (100 sq. cm) in overall cross-sectional area.

**4. Fire-resistive joint sealants:**

- a) Provide joint sealants with fire-resistance ratings indicated, as determined per ASTM E 119, but not less than that equaling or exceeding the fire-resistance rating of the construction in which the joint occurs.

**5. For firestopping exposed to view, traffic, moisture, and physical damage, provide products that do not deteriorate when exposed to these conditions.**

- a) For floor penetrations with annular spaces exceeding 4 inches (100 mm) or more in width and exposed to possible loading and traffic, provide firestop systems capable of supporting the floorloads involved either by installing floor plates or by other means.
- b) For penetrations involving insulated piping, provide through-penetration firestop systems not requiring removal of insulation.

**6. For firestopping exposed to view, provide products with flame-spread values of less than 25 and smoke-developed values of less than 450, as determined per ASTM E 84.**

1.5 SUBMITTALS

A. General

- 1. **Product Data and Shop Drawing submittals for work of this section shall be SUBMITTED TOGETHER, complete, as a single submittal. Product Data and Shop Drawings are not to be submitted separately.**
- 2. **Samples shall be submitted with or immediately following submission of Product Data submittals.**

B. Items to be submitted for approval prior to commencement of work:

**1. Product Data**

- a) Manufacture datasheets for all items
  - 1) Data sheets shall include
    - i) Manufacturer name
    - ii) Manufacturer model number (as it appears on manufacturer's product data sheet)
    - iii) Manufacturer product description
    - iv) Paragraph number of this section where the product is specified.

**2. Shop Drawings**

- a) System block wiring diagram, detailed.

C. Quality Assurance / Control Submittals

- 1. RCDD Certification for the staff member responsible for this project.**
- 2. Resume of the last 10 projects of the RCDD responsible for this project**
- 3. BICSI Technician's certificate for each lead Technician(s) on the project**

D. Closeout Submittal

- 1. Manufacturer's Material Safety Data Sheets (MSDS) for each item.**
- 2. Product certificates signed by manufacturers of firestopping products certifying that their products comply with specified requirements.**

**PART 2 PRODUCTS**

**2.1 PRODUCT STANDARDS**

A. General

- 1. This section is designed to provide the Contractor with a minimum standard of quality and functionality for the products used for telecommunications infrastructure.**
- 2. This standard will be considered in force for the original response as well as for any additions or changes to this Project. Due to this, there may be items listed in the Products section that are not required under the scope of this contract.**

**2.2 FIRESTOPPING, GENERAL**

A. Compatibility:

- 1. Provide firestopping components that are compatible with each other, the substrates forming openings, and the items, if any, penetrating the firestopping under conditions of service and application, as demonstrated by firestopping manufacturer based on testing and field experience.**

B. Accessories:

**1. Provide components for each firestopping system required to install fill materials and to comply with “System Performance Requirements” Article in Part 1. Use only components specified by the firestopping manufacturer and approved by the qualified testing and inspecting agency for the designated fire-resistance-rated systems. Firestopping materials shall be asbestos-free and shall not contain flammable solvents. Accessories include but are not limited to the following:**

- a) Permanent forming/damming/backing materials including the following:
  - 1) Semi-refractory fiber (mineral wool) insulation
  - 2) Ceramic fiber
  - 3) Sealants used in combination with other forming/damming materials to prevent leakage of fill materials in liquid state
  - 4) Fire-rated formboard
  - 5) Joint fillers for joint sealants
- b) Temporary forming materials
- c) Substrate primers
- d) Collars
- e) Steel sleeves

C. Applications:

**1. Provide firestopping systems composed of materials specified in this Section that comply with system performance and other requirements.**

2.3 FILL MATERIALS FOR THROUGH-PENETRATION FIRESTOP SYSTEMS

A. Subject to compliance with requirements, provide one or more of the following types:

B. Ceramic-fiber and mastic coating:

**1. Ceramic fibers in bulk form formulated for use with mastic coating and ceramic fiber manufacturer’s mastic coating.**

- a) Standard of quality shall be 3M Fire Protection Products
  - 1) Additional approved manufacturer(s): Thermal Ceramics, FireMaster Bulk, FireMaster Mastic

C. Ceramic-fiber sealant:

**1. Single-component formulation of ceramic fibers and inorganic binders.**

- a) Standard of quality shall be 3M Fire Protection Products
  - 1) Additional approved manufacturer(s): Metacaulk 525, The RectorSeal Corporation

D. Endothermic, latex compound sealant:

**1. Single-component, endothermic, latex formulation.**

- a) Standard of quality shall be 3M Fire Protection Products
  - 1) Additional approved manufacturer(s): Fyre-Shield, Tremco Inc., Flame-Safe FS500/600 Series, International Protective Coatings Corp., Flame-Safe FS900/FST900 Series, International Protective Coating Corp., Cafco TYPs Type 1, Isolatek International, STI LC150, Specified Technologies, Inc.

E. Intumescent, latex sealant:

**1. Single-component, intumescent latex formulation.**

- a) Standard of quality shall be Fire Barrier CP 25WB Caulk, 3M Fire Protection Products
  - 1) Additional approved manufacturer(s): Metacaulk 950, The RectorSeal Corporation, Cafco TPS Type 1, Isolatek International, STI SSS100, Specified Technologies, Inc., Hilti

F. Intumescent putty:

**1. Nonhardening, dielectric, water-resistant putty containing no solvents, inorganic fibers, or silicone compounds.**

- a) Standard of quality shall be Fire Barrier Moldable Putty, 3M Fire Protection Products
  - 1) Additional approved manufacturer(s): Intumescent Putty, General Electric Co., Flame-Safe FSP1000 Putty, International Protective Coatings Corp., Cafco TPS Types P and EP, Isolatek International, Hilti

G. Intumescent wrap strips:

**1. Single-component, elastomeric sheet with aluminum foil on one side.**

- a) Standard of quality shall be Fire Barrier FS-195 Wrap/Strip, 3M Fire Protection Products
  - 1) Additional approved manufacturer(s): CS2420 intumescent wrap, Hilti Construction Chemicals, Inc., STI SSW Red, Specified Technologies, Inc.

H. Pillows/bags:

**1. Reusable, heat-expanding pillows/bags composed of glass-fiber cloth cases filled with a combination of mineral-fiber, water-insoluble expansion agents and fire-retardant additives.**

- a) Standard of quality shall be Firestop Pillows, Bio Fireshield, Inc.
  - 1) Additional approved manufacturer(s): KBS Sealbags, International Protective Coatings Corp., SSB Pillows, Specified Technologies, Inc., 3M Fire Protection Products

I. Intumescent collars:

- a) Standard of quality shall be Cafco TPS Type D, Isolated International
- b) Additional approved manufacturer(s): STI SSC Collars, Specified Technologies, Inc., 3M Fire Protection Products

2.4 FIRE-RESISTIVE ELASTOMERIC JOINT SEALANTS

A. Elastomeric sealant standard:

- 1. Provide manufacturer's standard chemically curing, elastomeric sealants for base polymer indicated that complies with ASTM C 920 requirements, including those referenced for type, grade, class, and uses; and requirements specified in this Section applicable to fire-resistive joint sealants.**

B. Single-component, neutral-curing silicone sealant:

- 1. Type S, Grade NS, Class 25, exposure-related Use NT, and joint-substrate related Uses M, G, A, and (as applicable to joint substrates indicated) O.**

- a) Additional movement capability:

- 1) Provide sealant with the capability to withstand the following percentage changes in joint width existing at time of installation, when tested for adhesion and cohesion under maximum cyclic movement per ASTM C 719, and remain in compliance with other requirements of ASTM C 920 for uses indicated:
    - i) 50 percent movement in both extension and compression for a total of 100 percent movement.
    - ii) 100 percent movement in extension and 50 percent movement in compression for a total of 150 percent movement.

C. Single-component, nonsag, urethane sealant:

- 1. Type S, Grade NS, Class 25, and Uses NT, M, A, and (as applicable to joint substrates indicated) O.**

D. Products: Subject to compliance with requirements, provide one of the following:

- 1. Single-component, neutral-curing, silicone sealant:**

- a) Dow Corning 790, Dow Corning Corp.
- b) Dow Corning 795, Dow Corning Corp.
- c) Silpruf, General Electric Co.
- d) Ultraglaze, General Electric Co.
- e) Omniseal, Sonneborn Building Products Div. Chem Rex, Inc.
- f) Hilti
- g) FS-One

**2. Single-component, nonsag, urethane sealant:**

- a) Isoflex 880 GB, Harry S. Peterson Co., Inc.
- b) Isoflex 881, Harry S. Peterson Co., Inc.
- c) Vulkem 921, Mameco International Inc.
- d) Sikaflex-15LM, Sika Corp.
- e) NP-1, Sonneborn building Products Civ., Chem Rex, Inc.

**2.5 FIRE STOPPING FOR ALL OTHER WALL AND FLOOR OPENINGS**

- A. Provide Fire Stop Sealant shall be equal to Nelson #AA491 series, or by 3M Fire Protection Products; Fire Protection Services, Inc.; UL Classified for 3 hour fire and cold side temperature ratings, non-sagging, permanently flexible, non-toxic, non-shrinking, water/air/smoke-tight and easily re-penetrated. The following shall be considered equal.
  - 1. For Floor Openings: Instant Firestop; 305-SL.**
  - 2. For Wall Openings: Instant Firestop; 344-GG.**
  - 3. Mineral Felt: Instant Firestop; Type MW.**
  - 4. For Insulated Pipes: Instant Firestop; Type PI.**
  - 5. For Fill Areas: Instant Firestop; C-1000.**
- B. Apply sealant primer to substrates as recommended by manufacturer (if any). Protect adjacent areas from spillage and migration of primers, using masking tape. Remove tape immediately after tooling without disturbing joint seal.
- C. Immediately after sealant application and prior to time shinning or curing begins, tool sealants to form smooth, uniform beads; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint. Remove excess sealants from surfaces adjacent to joint. Do not use tooling agents that discolor sealants or adjacent surfaces or are not approved by sealant manufacturer.

**PART 3 EXECUTION**

**3.1 PROJECT CONDITIONS**

- A. Environmental conditions:
  - 1. Do not install firestopping when ambient or substrate temperatures are outside limits permitted by firestopping manufacturers or when substrates are wet due to rain, frost, condensation, or other causes.**
- B. Ventilation:
  - 1. Ventilate firestopping compounds per manufacturers' instructions by natural means or, when this is inadequate, forced air circulation.**

### 3.2 SEQUENCING AND SCHEDULING

- A. **Do not cover up those firestopping installations that will become concealed behind other construction until the Architect/Engineer/Consultant has examined each installation**

### 3.3 DELIVERY, STORAGE, AND HANDLING

- A. Deliver firestopping products to the Project site in original, unopened containers or packages with intact and legible manufacturers' labels identifying product and manufacturer, date of manufacture, lot number, shelf life, if applicable, qualified testing and inspecting agency's classification marking applicable to Project, curing time, and mixing instructions for multi-component materials.
  - 1. **Coordinate the delivery date of firestopping materials with the scheduled date of installation to minimize amount of storage time required at the Project site.**
  - 2. **Store with a copy of the manufacturers MSDS sheet.**
    - a) Submit a copy of each sheet to the site manager.
- B. Store and handle firestopping materials to prevent their deterioration or damage due to moisture, temperature changes, contaminants, or other causes.
- C. **Damaged or expired materials shall be removed from the site and shall not be used in the Work.**

### 3.4 FIRE-TEST-RESPONSE CHARACTERISTICS: PROVIDE FIRESTOPPING THAT COMPLIES WITH THE FOLLOWING REQUIREMENTS AND THOSE SPECIFIED IN THE "SYSTEM PERFORMANCE REQUIREMENTS" ARTICLE IN THIS SECTION.

- A. Firestopping tests are to be performed by a qualified testing and inspecting agency. A qualified testing and inspecting agency is an agency performing testing and follow-up inspection services for firestop systems that is acceptable to authorities having jurisdiction.
- B. Through-penetration firestop systems are identical to those tested per ASTM E 814 under conditions where positive furnace pressure differential of at least 0.01 inch of water (2.5 Pa) is maintained at a distance of 0.78 inch (20 mm) below the fill materials surrounding the penetrating items in the test assembly. Provide rated systems complying with the following requirements:
  - 1. **Through-penetration firestop system products shall bear classification marking of qualified testing and inspecting agency.**
  - 2. **Through-penetration firestop systems correspond to those indicated by reference to through-penetration firestop system designations listed by UL in their "Fire Resistance Directory," by Warnock Hersey, or by another qualified testing and inspecting agency.**

- C. Fire-resistive joint sealant systems are identical to those tested for fire-response characteristics per ASTM E 119 under conditions where the positive furnace pressure differential is at least 0.01 inch of water (2.5 Pa) as measured 0.78 inch (20 mm) from the face exposed to furnace fire. Provide systems complying with the following requirements:

**1. Fire-resistance rating of joint sealants**

- a) As indicated by reference to design designations listed by UL in their “Fire Resistance Directory” or by another qualified testing and inspecting agency.

**2. Joint sealants, including backing materials, bear classification marking of qualified testing and inspection agency.**

- D. Where no UL test firestop application exists, manufacturer’s engineering judgment derived from similar UL system designs or other tests will be submitted to local authorities having jurisdiction for their review and approval prior to installation.
- E. Firestopping systems and their locations in the Project are not specifically indicated in the Drawings.
- F. It is the sole responsibility of the Firestopping Contractor to install tested and approved systems that comply with all applicable codes, standards and/or agencies having jurisdiction.

**3.5 INSTALLER QUALIFICATIONS:**

- A. Engage an installer with not less than two years experience in the installation of firestopping similar in material, design, and extent to that indicated for this Project.

**3.6 SINGLE-SOURCE RESPONSIBILITY:**

- A. Obtain through-penetration firestop systems for each kind of penetration and construction condition indicated from a single manufacturer.

**3.7 PROVIDE FIRESTOPPING PRODUCTS CONTAINING NO DETECTABLE ASBESTOS AS DETERMINED BY THE METHOD SPECIFIED IN 40 CFR PART 763, SUBPART F, APPENDIX A, SECTION 1, “POLARIZED LIGHT MICROSCOPY.”**

**3.8 COORDINATING WORK:**

- A. Coordinate construction of openings and penetrating items to ensure that designated through-penetration firestop systems are installed per specified requirements.

**3.9 EXAMINATION**

- A. Examine substrates and conditions with installer present for compliance with requirements for opening configurations, penetrating items, substrates, and other conditions affecting performance of firestopping. Do not proceed with installation until unsatisfactory conditions have been corrected.

### 3.10 PREPARATION

#### A. Surface cleaning:

**1. Clean out openings and joints immediately before installation of firestopping to comply with firestopping manufacturer's recommendations and the following requirements:**

- a) Remove all foreign materials from surfaces of opening and joint substrates and from penetrating items that could interfere with adhesion of firestopping.
- b) Clean opening and joint substrates and penetrating items to produce clean, sound surfaces capable of developing optimum bond with firestopping. Remove loose particles remaining from cleaning operation.
- c) Remove laitance and form release agents from concrete.

#### B. Masking tape:

**1. Use masking tape to prevent firestopping from contact with the following:**

- a) Adjoining surfaces that will remain exposed upon completion of Work.
- b) Surfaces that would otherwise be permanently stained or damaged by such contact or cleaning methods used to remove smears from firestopping materials.

**2. Remove tape as soon as it is possible to do so without disturbing firestopping seal with substrates.**

### 3.11 GENERAL FIRE STOPPING MATERIAL APPLICATION

- A. Clean all affected surfaces, joints, etc. immediately before applying fire stopping to comply with recommendations of manufacturer.
- B. Comply with fire stop material manufacturers' printed application instructions applicable to products and applications indicated, except where more stringent requirements apply.
- C. Install fire stop materials, including forming, packing, and other accessory materials, to fill openings around services penetrating floors and walls, to provide fire-stops with fire-resistance ratings indicated for floor or wall assembly in which penetration occurs. Comply with installation requirements established by testing and inspecting agency.
- D. Caulk between sleeves and pipes with rockwool and caulk around sleeves with sealing compound. Material must meet all applicable fire ratings required.
- E. Patch shall be equal to rockwool, firestop, caulk or approved "rated" patch.
- F. Where a smoke and/or fire-resistance classification is indicated on architectural drawings or otherwise, provide the following as applicable.
- G. Fire stop pillows, putty and/or sealant with minimum UL classification for 3 hour fire and cold side temperature ratings for all penetrations.

- H. Access door assembly with panel door, frame, hinge, and latch from manufacturer listed in the UL "Building Materials Directory" for rating required; Provide UL Label on each fire-rated access door.
- I. Wall and Floor Opening Fire Stopping for Open Cable Tray or J-Hook Paths
- J. Provide Fire Stop Pillows equal to Nelson FSP #AA500 PLW or #AA501 PLW or by Fire Protection Services, Inc.; 3M Fire Protection Products as required, UL Classified for 3 hour fire and cold side temperature ratings, quickly removable and reusable, non-toxic and requiring no special tools.
- K. Wall & Floor Opening Fire Stopping for Work Likely to Require Ongoing Moves, Adds and Changes
- L. All Work shall comply with manufacturer's written installation instructions.
  - 1. **Seal all holes to ensure a flame/gas/smoke resistant seal.**
  - 2. **Do not permit UL firestop systems to hamper the performance of fire dampers in ductwork.**

### 3.12 INSTALLING THROUGH-PENETRATION FIRESTOPS

- A. General:
  - 1. **Comply with the "System Performance Requirements" Article in Part 1 and the through-penetration firestop manufacturer's installation instructions and drawings pertaining to products and applications indicated.**
- B. Install forming/damming materials and other accessories of types required to support fill materials during their application and in the position needed to produce the cross-sectional shapes and depths required to achieve fire ratings of designated through-penetration firestop systems. After installing fill materials, remove combustible forming materials and other accessories not indicated as permanent components of firestop systems.
- C. Install fill materials for through-penetration firestop systems by proven techniques to produce the following results:
  - 1. **Completely fill voids and cavities formed by openings, forming materials, accessories, and penetrating items.**
  - 2. **Apply materials so they contact and adhere to substrates formed by openings and penetrating items.**

### 3.13 INSTALLING FIRE-RESISTIVE JOINT SEALANTS

- A. General:
  - 1. **Comply with the "System Performance Requirements" Article in Part 1, with ASTM C 1193, and with the sealant manufacturer's installation instructions and drawings pertaining to products and applications indicated.**
- B. Install joint fillers to provide support of sealants during application and at the position required to produce the cross-sectional shapes and depths of installed sealants relative to joint widths that allow optimum sealant movement capability and develop fire-resistance rating required.

- C. Install sealants by proven techniques that result in sealants directly contacting and fully wetting joint substrates, completely filling recesses provided for each joint configuration, and providing uniform, cross-sectional shapes and depths relative to joint width at optimum sealant movement capability. Install sealants at the same time joint fillers are installed.
- D. Tool nonsag sealants immediately after sealant application and before skinning or curing begins. Form smooth, uniform beads of configuration indicated or as required to produce fire-resistance rating, as well as to eliminate air pockets, and to ensure contact and adhesion of sealants with sides of joint. Remove excess sealant from surfaces adjacent to joint. Do not use tooling agents that discolor sealants or adjacent surfaces or that are not approved by the sealant manufacturer.

#### 3.14 FIELD QUALITY CONTROL

- A. Do not proceed to enclose firestopping with other construction until examinations are completed.
- B. Where deficiencies are found, repair or replace firestopping at no additional expense to the Owner so that Work complies with requirements.

#### 3.15 CLEANING

- A. Remove excess fill materials and sealants adjacent to openings and joints as Work progresses. Use methods and cleaning materials approved by manufacturers of firestopping products and products in which openings and joints occur. Return all surfaces to their original condition.
- B. During and after the curing period, protect firestopping from contact with contaminating substances and from damage resulting from construction operations or other causes so that they are without deterioration or damage or at time of Substantial Completion.
  - 1. **If damage or deterioration occurs, cut out and remove damaged or deteriorated firestopping immediately and install new materials to produce firestopping complying with specified requirements.**

**END OF SECTION**

Revised 11/18/2019

## IDENTIFICATION FOR COMMUNICATIONS SYSTEMS

### PART 1 GENERAL

#### 1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### 1.2 SUMMARY

- A. Section Includes:
  - 1. Labeling of Communications Systems
  - 2. Labeling of Life Safety and Security Systems
    - a) This Section is a “Common Work Results” Section that includes information that is applicable and “Related” to all Division 27 Sections.
  - 3. System includes but is not limited to:
    - a) Labels
- B. Related Sections
  - 1. All Division 27 Sections
- C. Related Drawings
  - 1. Technology (T-Series) Drawings

#### 1.3 REFERENCES

- A. “TELECOMMUNICATIONS DISTRIBUTION METHODS MANUAL” published by the Building Industry Consulting Services International (BISCI).

#### 1.4 SYSTEM DESCRIPTION / DESCRIPTION OF WORK

- A. Furnish and install labeling for all Communication products, including but not limited to:
  - 1. Patch panels
  - 2. Device plates
  - 3. Cabling
  - 4. Equipment racks
  - 5. Building Distribution Frame <BDF>/Entrance Facility <EF>
  - 6. Equipment room(s) <ERxxxx>
  - 7. Telecommunications room(s) <TRxxx>
  - 8. Structured cabling, including horizontal and backbone cabling

- 9. Communications cabling cross-connects
  - 10. Communications backboards
  - B. Labeling system shall be an ANSI/TIA/EIA-606 compliant system - The Administrative Standard for the Telecommunications Infrastructure of Commercial Building Identification System.
    - 1. See Drawings for graphical representation.
- 1.5 SUBMITTALS
- A. General
    - 1. Product Data and Shop Drawing submittals for work of this section shall be SUBMITTED TOGETHER, complete, as a single submittal. Product Data and Shop Drawings are not to be submitted separately.
    - 2. Samples shall be submitted with or immediately following submission of Product Data submittals.
  - B. Product Data
    - 1. Manufacture datasheets for all labels
  - C. Shop Drawings
    - 1. Labeling system diagram, detailed.
  - D. Quality Assurance
    - 1. RCDD Certificate for the Contractor's staff member(s) with ultimate responsibility for ensuring Contractor compliance with work of this section.
    - 2. BISCIT Technician Certificate for the technicians performing work of this section
  - E. Closeout Submittals
    - 1. A diagram of the labeling scheme used on the Project.

## **PART 2 PRODUCTS**

### **2.1 MANUFACTURERS**

- A. Brady
- B. Panduit
- C. Hellerman/Tyton
- D. Brother

## 2.2 GENERAL

1. This section is designed to provide the Contractor with a minimum standard of quality and functionality for the products used for telecommunications infrastructure.
2. This standard will be considered in force for the original response as well as for any additions or changes to this Project. Due to this, there may be items listed in the Products section that are not required under the scope of this contract.
3. Products required by the Drawings but not listed in Part 2, will be evaluated as a performance specification based on the information provided on the Drawings.

## 2.3 LABELS

### A. Labels

1. Labels shall have a white background and black print.
2. Provide alphanumeric, clearly typewritten labels at all designated points as follows:
  - a) Horizontal Cables
    - 1) 4 pair UTP cables
      - i) Standard of quality shall be Brady PTL-31-642
    - 2) 4 pair STP cables
      - i) Standard of quality shall be Brady PTL-21-642
    - 3) RG-6 Coaxial
      - i) Standard of quality shall be Brady PTL-31-642
  - b) Telecommunications outlet port
    - 1) Standard of quality shall be Panduit PLL-46-Y2-1
  - c) Telecommunications outlet faceplate:
    - 1) Standard of quality shall be Panduit JLEFPS-1
  - d) Patch panel ports
    - 1) Standard of quality shall be Panduit JLCPL-1
  - e) Patch Panels
    - 1) Standard of quality shall be Brady PTL-20-422
  - f) Backbone cables
    - 1) 100 pair Copper cables
      - i) Standard of quality shall be Brady PTL-34-642
    - 2) Fiber Optic Cables
      - i) Standard of quality shall be Brady PTL-21-642
    - 3) Cable Bundles
      - i) Standard of quality shall be Brady PTL-12-109
    - 4) 110 style blocks
      - i) Standard of quality shall be Panduit DSL-110
      - ii) Use with Panduit P110LH
    - 5) Telecommunications Backboards
      - i) Standard of quality shall be Brady PTL-37-422

- 6) Racks and Cabinets
  - i) Standard of quality shall be Brady PTL-42-422

### **PART 3 EXECUTION**

#### **3.1 GENERAL**

- A. This section is designed to provide the vendor with a standard of quality and functionality for the installation of technology systems infrastructure. Not all procedures will be necessary for the installation of this Project. However, this standard will be considered in force for the original response as well as for any additions or changes to this Project.
- B. Contractor SHALL work with Owners Telecommunications representative to gain approval of labeling plan BEFORE any cable labeling is started.
- C. Jacks in patch panels shall be installed with room numbers in sequential numerical order and in floor order.

#### **3.2 INSTALLATION**

##### **A. Labels**

- 1. Apply all labels shall be installed parallel to the dominate visual lines of the product being labeled.
- 2. Labels shall be clearly legible and appropriately sized for the application.
- 3. Provide alphanumeric, clearly typewritten labels at all designated points as follows:
  - a) See for graphical representation of labeling scheme.
  - b) Horizontal cabling:
    - 1) Cabling to ER/TR from outlets and devices
      - i) ER/TR # - Outlet Room Number - Patch Panel #/Port #.
      - ii) Example: ER01-211-B22 where Equipment Room is identified as ER01, the cable travels to room 211 and the cable is landed on patch panel B position 22 (of 48) in the ER.
      - iii) Locate label on cable jacket between 3 and 6 inches of each end of the cable.
    - 2) Cabling between horizontal outlets/devices
      - i) Label local input cables.
      - ii) Locate label on cable jacket between 3 and 6 inches of each end of the cable.
      - iii) Label each cable as to its signal type, purpose, and destination. Add a numeric suffix to uniquely identify multiple cables of duplicate signal type, purpose or destination.

- c) Telecommunications outlet ports and faceplates:
  - 1) ER/TR# - Outlet Room Number – Patch panel #/ Jack #.
  - 2) Example: ER01-211 faceplate number and B22 through B25 jack numbers for a 4 port faceplate where Equipment Room is identified as ER01, the cable is landed on patch panel B position 22 through 25 (of 48) in the ER and travels to room 211.
  - 3) Locate the faceplate label, excluding the jack designation at the top of the faceplate. Locate the individual jack designation numbers immediately above each jack on the faceplate.
  - 4) Label local input terminations as follows: F Connector – Camera, RCA yellow – Local Video, RCA white – L Audio, RCA red– R Audio, BNC – Local Video, Horizontal UTP – Local Control.
- d) Patch panels and patch panel ports:
  - 1) Label each patch panel A-Z, top-to-bottom
    - i) Locate label on the front upper left corner of all patch panels
  - 2) Locate on the front of all patch panels, directly above or below (as indicated by the manufacturer) each jack position (1 through 24) in the patch panel; place the room number corresponding to the room number used on the faceplate for each port.
  - 3) Labeling shall be in numerical order and correspond to the telecommunications outlet faceplate scheme.
- e) Backbone cabling:
  - 1) Service designation – ER#/TR#.
  - 2) Service designation – CB = Copper Backbone, FB = Fiber Backbone, VB = Video Backbone. Example: CB – ER01/TR02.
  - 3) Locate label on cable jacket within 6 inches of each end of the cable and at key pull points along pathway.
- f) Cross-connect blocks, 110 style
  - 1) Locate on the front of all patch panels directly above or below (as indicated by the manufacturer) each position in the block.
  - 2) Labeling shall be in numerical order and correspond to the telecommunications outlet faceplate scheme or opposite end labeling dependant on use.
  - 3) Label the upper left corner of each block designating the service of that particular block. Do not terminate mixed services on the same block.

- g) Cross-connect blocks, 66 style
  - 1) Locate on the front of all patch panels directly above or below (as indicated by the manufacturer) each position in the block.
  - 2) Labeling shall be in numerical order and correspond to the telecommunications outlet faceplate scheme or opposite end labeling dependant on use.
  - 3) Label the upper left corner of each block designating the service of that particular block. Do not terminate mixed services on the same block.
- h) Communications Backboards (TBB)
  - 1) Backboard # with the prefix TBB, followed by the numeric backboard number in the room, followed by the suffix identifying the room in which the backboard is located. Example: TBB-01-ER-xxx.
  - 2) Label each 4'x8' sheet and each partial sheet, in numerical order left-to-right as facing the front of the backboards.
- i) Equipment Racks
  - 1) Device ID. Example: ER01 – 02.
  - 2) Label each cabinet/rack in numerical order left-to-right as facing front of cabinet/rack bays.
- j) Telephone Patch Cables
  - 1) Labeled with the same unique identifier at both ends of the assembly.

### 3.3 TRAINING

- A. Conduct a walk through of the project site and demonstrate the presence and location of all key labeling elements used.
- B. Furnish handouts to all owner personnel attending training that clearly depicts the labeling schema used on the project.

**END OF SECTION**

Revised 11/18/2019

## **VERIFICATION TESTING OF STRUCTURED CABLING**

### **PART 1 GENERAL**

#### **1.1 RELATED DOCUMENTS**

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### **1.2 SUMMARY**

- A. Section Includes:
  - 1. The work covered by this Specification Section includes any and all requirements for this type work required for proper Commissioning of work specified in each related Division 27 Specification Section and/or as shown on the Drawings.
  - 2. Provide all labor, materials, tools, field-test instruments and equipment required for the complete testing of the work called for in the Contract Documents.
    - a) This Section is a “Common Work Results” Section that includes information that is applicable and “Related” to all Division 27 Sections.
- B. Related Sections
  - 1. All Division 27 Sections
- C. Related Drawings
  - 1. Technology (T-Series) Drawings

#### **1.3 REFERENCES**

- A. All testing procedures and field-test instruments shall comply with applicable requirements of:
  - 1. ANSI Z136.2, ANS For Safe Use Of Optical Fiber Communication Systems Utilizing Laser Diode And LED Sources
  - 2. ANSI/EIA/TIA-455-50B, Light Launch Conditions For Long-Length Graded-Index Optical Fiber Spectral Attenuation Measurements
  - 3. ANSI/TIA/EIA-455-59A, Measurement of Fiber Point Discontinuities Using an OTDR.
  - 4. ANSI/TIA/EIA-455-133A, Measurement of Fiber or Cable Length Using an OTDR.
  - 5. ANSI/TIA/EIA-455-61A, Measurement of Fiber or Cable Attenuation Using an OTDR.

6. ANSI/TIA/EIA-526-7, Optical Power Loss Measurements of Installed Singlemode Fiber Cable Plant.
7. ANSI/TIA/EIA-526-14-A, Optical Power Loss Measurements of Installed Multimode Fiber Cable Plant.
8. ANSI/TIA/EIA-568-C.1, Commercial Building Telecommunications Cabling Standard,
9. TIA/EIA TSB-140, Additional Guidelines for Field-Testing Length, Loss and Polarity of Optical Fiber Cabling Systems.
- B. ANSI/TIA/EIA-568-C.2 – Balanced Twisted Pair Telecommunications Cabling and Components Standard
- C. ANSI/TIA/EIA-568-C.3 – Optical Fiber Cabling Components Standard
- D. ANSI/TIA/EIA-568-C.4 – Standard on Coaxial Cabling Components
- E. “TELECOMMUNICATIONS DISTRIBUTION METHODS MANUAL” published by the Building Industry Consulting Services International (BISCI).

#### 1.4 SYSTEM DESCRIPTION / DESCRIPTION OF WORK

##### A. General

1. Testing shall be carried out in accordance with this document.
2. Testing shall be performed on each cabling link (connector to connector).
3. Testing shall not include any active devices or passive devices within the link other than cable, connectors, and splices.
  - a) Link attenuation does not include such devices as optical bypass switches, couplers, repeaters, or optical amplifiers.
4. Contractor shall maintain and provide to ISU a Microsoft Excel spreadsheet in electronic format of all connections installed with the following fields filled out. **NO DATA PORTS WILL BE ACTIVATED UNTIL THIS SHEET IS PROVIDED FULLY FILLED OUT TO OWNER:**
  - a) Room Number
  - b) Jack Label
  - c) Wire label
  - d) IDF Room Number
  - e) Rack Label for patch panel
  - f) Patch Panel label
  - g) Patch panel port
  - h) Cable Length
  - i) Data switch rack label (if connected to data switch)
  - j) Data switch label (if connected to data switch)
  - k) Data switch port number (if connected to data switch)

##### B. Copper (Twisted Pair) Testing

1. Copper Cat 6A Installation: field test requirements upon completion of the installation
  - a) General Requirements (Category 6A)

- 1) Every cabling link in the installation shall be tested in accordance with the field test specifications defined in ANSI/TIA/EIA-568B-2.10 "*Transmission Performance Specifications for 4-pair 100Ω Category 6A Cabling*". This document will be referred to as the "TIA Cat 6A Standard."
  - 2) The installed twisted-pair horizontal links shall be tested from the MDF/IDF (ER/TR) in the telecommunications room to the telecommunication wall outlet in the work area against the "*Permanent Link*" performance limits specification as defined in the TIA Cat 6A Standard.
  - 3) One hundred percent of the installed cabling links must be tested and must pass the requirements of the standards mentioned above and as further detailed in Part 3. Any failing link must be diagnosed and corrected. The corrective action shall be followed with a new test to prove that the corrected link meets the performance requirements. The final and passing result of the tests for all links shall be provided in the test results documentation (below).
- b) Qualifications
- 1) Trained technicians who have successfully attended an appropriate training program and have obtained a certificate as proof thereof shall execute the tests. Appropriate training programs include but are not limited to installation certification programs provided by BiCSi or the ACP (Association of Cabling Professionals).
- c) Coordination/Verification:
- 1) **A representative of the Owner shall be invited to witness field testing. The representative shall be notified of the start date of the testing phase five business days before testing commences.**
  - 2) A representative of the Owner may elect to select a random sample of 5% of the installed links. The representative (or his authorized delegate) shall test these randomly selected links and the results are to be stored in accordance with the prescriptions in Section A.3. The results obtained shall be compared to the data provided by the installation contractor. If more than 2% of the sample results differ in terms of the pass/fail determination, the installation contractor under supervision of the end-user representative ***shall repeat 100% testing and the cost shall be borne by the installation contractor.***

## C. FIBER OPTIC Testing

### 1. GENERAL

- a) The testing Tier shall be as indicated on the Detail Drawings.
  - 1) Testing Tiers requirements are as described below.
  - 2) If not otherwise noted:

- i) All fiber optic Intra-Building Links shall be tested as Tier 1.
    - ii) All fiber optic Inter-Building Links shall be tested as Tier 2.
  - b) Every fiber optic cabling link in the installation shall be tested in accordance with the field test specifications defined by the Telecommunications Industry Association (TIA) standards ANSI/TIA/EIA-568-C.1, *“Commercial Building Telecommunications Cabling Standard, Part 1, General Requirements,”* and TIA/EIA TSB140, *“Additional Guidelines for Field-Testing Length, Loss and Polarity of Optical Fiber Cabling Systems.”*
  - c) ANSI/TIA/EIA-568-B.1, defines the passive cabling network, to include cable, connectors, and splices (if present), between two optical fiber patch panels (connecting hardware). The test does not, however, include the performance of the connector at the interface with the test equipment.
  - d) 100% of the installed cabling links must be tested and must pass the requirements as specified within this document. Any failing link must be diagnosed and corrected. The corrective action shall be followed with a new test to prove that the corrected link meets the performance requirements. The final and passing result of the tests for all links shall be provided in the test results documentation in accordance Part 3.
  - e) The Pass or Fail condition for the link-under-test is determined by the results of the required individual tests in Part 3.
  - f) A Pass or Fail result for each parameter is determined by comparing the measured values with the specified test limits for that parameter.
2. Qualifications
- a) Trained technicians who have successfully attended an appropriate training program, which includes testing with an OLTS and an OTDR and have obtained a certificate as proof thereof shall execute the tests. These certificates may have been issued by any of the following organizations or an equivalent organization.
    - 1) Manufacturer of the fiber optic cable and/or the fiber optic connectors.
    - 2) Manufacturer of the test equipment used for the field certification.
    - 3) Training organizations (e.g., BICSI, A Telecommunications Association headquarters in Tampa, Florida; ACP [Association of Cabling Professionals™] Cabling Business Institute located in Dallas, Texas)
3. Coordination/Verification
- a) The Owner or the Owner’s representative shall be invited to witness and/or review field-testing.
    - 1) **The Owner or the Owner’s representative shall be notified of the start date of the testing phase five (5) business days before testing commences.**

- 2) The Owner or the Owner's representative will select a random sample of 5% of the installed links. The Owner or the Owner's representative shall test these randomly selected links and the results are to be stored in accordance with Part 3 of this document. The results obtained shall be compared to the data provided by the installation contractor. If more than 2% of the sample results differ in terms of the pass/fail determination, ***the installation contractor under supervision of the representative shall repeat 100% testing at no cost to the Owner.***
- 3) All tests shall be documented including OLTS dual wavelength attenuation measurements for multimode and singlemode links and channels and OTDR traces and event tables for multimode and singlemode links and channels.
4. Acceptance of test results.
  - a) Unless otherwise specified by the Owner or the Owners representative, each cabling link shall be in compliance with the following test limits:
    - 1) Optical loss testing
      - i) Backbone (multimode and singlemode) link
        - (A) The link attenuation shall be calculated by the following formulas as specified in ANSI/TIA/EIA-568-B.1.
          - (1)  $\text{Link\_Attenuation (dB)} = \text{Cable\_Attn (dB)} + \text{Connector\_Attn (dB)} + \text{Splice\_Attn (dB)}$
          - (2)  $\text{Cable\_Attn (dB)} = \text{Attenuation\_Coefficient (dB/km)} * \text{Length (Km)}$
          - (3)  $\text{Connector\_Attn (dB)} = \text{number\_of\_connector\_pairs} * \text{connector\_loss (dB)}$
          - (4) Maximum allowable connector\_loss = 0.75 dB
          - (5)  $\text{Splice\_Attn (dB)} = \text{number\_of\_splices} * \text{splice\_loss (dB)}$
          - (6) Maximum allowable splice\_loss = 0.3 dB
          - (7) The values for the Attenuation\_Coefficient (dB/km) are listed in the table below:

Type of Optical Fiber	Wavelength (nm)	Attenuation coefficient (dB/km)	Wavelength (nm)	Attenuation coefficient (dB/km)
Multimode 62.5/125 $\mu\text{m}$	850	3.5	1300	1.5
Multimode 50/125 $\mu\text{m}$	850	3.5	1300	1.5
Single-mode (Inside plant)	1310	1.0	1550	1.0
Single-mode (Outside plant)	1310	0.5	1550	0.5

- ii) Horizontal (multimode) link

- (A) The acceptable link attenuation for a multimode horizontal optical fiber cabling system is based on the maximum 90 m (295 ft) distance.
    - (B) The horizontal link may be tested using a fixed upper limit for attenuation of 2.0 dB. This value is based on the loss of two (2) connector pairs, one pair at the telecommunications outlet/connector and one pair at the horizontal cross-connect, plus 90 m (295 ft) of optical fiber cable.
    - (C) A horizontal link in an Open Office Cabling network with a consolidation point may be tested using a fixed upper limit for attenuation of 2.75 dB.
  - iii) Centralized (multimode) link
    - (A) The acceptable link attenuation for a multimode centralized optical fiber cabling system is based on the maximum 300 m (984 ft) distance.
    - (B) The centralized link may be tested using a fixed upper limit for attenuation of 3.3 dB. This value is based on the loss of three (3) connector pairs, one pair at the telecommunications outlet/connector, one pair at the consolidation point and one pair at the horizontal cross-connect, plus 300 m (984 ft) of optical fiber cable.
    - (C) A horizontal link in an Open Office Cabling network with a consolidation point may be tested using a fixed upper limit for attenuation of 4.1 dB.
- 2) OTDR testing
  - i) Reflective events (connections) shall not exceed 0.75 dB.
  - ii) Non-reflective events (splices) shall not exceed 0.3 dB.
- 3) Magnified endface inspection
  - i) Fiber connections shall be visually inspected for endface quality.
  - ii) Scratched, pitted or dirty connectors shall be diagnosed and corrected.
- b) All installed cabling links and channels shall be field-tested and pass the test requirements and analysis as described in Part 3. Any link or channel that fails these requirements shall be diagnosed and corrected. Any corrective action that must take place shall be documented and followed with a new test to prove that the corrected link or channel meets performance requirements. The final and passing result of the tests for all links and channels shall be provided in the test results documentation in accordance with Part 3.
- c) Acceptance of the test results shall be given in writing after the project is fully completed and tested in accordance with Contract Documents and to the satisfaction of the Owner.

## 1.5 SUBMITTALS

A. General

1. Product Data and Shop Drawing submittals for work of this section shall be SUBMITTED TOGETHER, complete, as a single submittal. Product Data and Shop Drawings are not to be submitted separately.
2. Samples shall be submitted with or immediately following submission of Product Data submittals.

B. Equipment Data

1. Manufacture datasheets for all twisted pair test equipment
2. Manufacturers datasheets for fiber optic field-test instruments including optical loss test sets (OLTS; power meter and source), optical time domain reflectometer (OTDR) and inspection scope as applicable.

C. Quality Assurance / Control Submittals

1. RCDD Certification for the staff member responsible for this project.
2. Resume of the last 10 projects of the RCDD responsible for this project
3. BICSI Technician's certificate for each lead Technician(s) on the project

D. Closeout Submittal

1. Copper (Twisted Pair) Test Result Documentation
  - a) The test result information for each link shall be recorded in the memory of the field tester upon completion of the test.
  - b) The test result records saved by the tester shall be transferred into a Windows™-based database utility that allows for the maintenance, inspection and archiving of these test records. A guarantee must be made that these results are transferred to the PC unaltered, i.e., "as saved in the tester" at the end of each test. The popular 'csv' format (comma separated value format) does not provide adequate protection and shall not be acceptable unless specified by the end user.
  - c) The database for the completed job, including twisted-pair copper cabling links if applicable, shall be stored and delivered on USB flash drive. This USB flash drive shall include the software tools required to view, inspect, and print any selection of test reports.
  - d) Circuit IDs reported by the test instrument shall match the specified label ID.
  - e) A copy of the test results shall be provided that lists all the links that have been tested with the following summary information. The copy may be delivered on paper or electronically as specified by the end user.
    - 1) The identification of the link in accordance with the naming convention defined in the overall system documentation
    - 2) The overall Pass/Fail evaluation of the link-under-test
    - 3) The date and time the test results were saved in the memory of the tester

- f) General Information to be provided in the electronic data base containing the test result information for each link:
    - 1) The identification of the customer site as specified by the end-user
    - 2) The overall Pass/Fail evaluation of the link-under-test
    - 3) The name of the standard selected to execute the stored test results
    - 4) The value of the NVP of the cable installed; used for length calculations
    - 5) The date and time the test results were saved in the memory of the tester
    - 6) The brand name, model and serial number of the tester
    - 7) The revision of the tester software and the revision of the test standards database in the tester
  - g) The detailed test results data to be provided in the electronic database for each tested link must contain the information as set forth in Part 3.
2. Fiber Optic Test Result Documentation
- a) The OLTS and OTDR test result information for each link shall be recorded in the memory of the field tester upon completion of the test.
  - b) The test result records saved by the tester shall be transferred into a Windows™-based database utility that allows for the maintenance, inspection and archiving of these test records. A guarantee must be made that these results are transferred to the PC unaltered, i.e., “as saved in the tester” at the end of each test. The popular ‘csv’ format (comma separated value format) does not provide adequate protection and shall not be acceptable unless specified by the end user.
  - c) The database for the completed job, including twisted-pair copper cabling links if applicable, shall be stored and delivered on USB flash drive. This USB flash drive shall include the software tools required to view, inspect, and print any selection of test reports.
  - d) Circuit IDs reported by the test instrument shall match the specified label ID.
  - e) A copy of the test results shall be provided that lists all the links that have been tested with the following summary information. The copy may be delivered on paper or electronically as specified by the end user.
    - 1) The identification of the link in accordance with the naming convention defined in the overall system documentation
    - 2) The overall Pass/Fail evaluation of the link-under-test
    - 3) The date and time the test results were saved in the memory of the tester
  - f) General Information to be provided in the electronic data base containing the test result information for each link:
    - 1) The identification of the customer site as specified by the end-user
    - 2) The overall Pass/Fail evaluation of the link-under-test
    - 3) The name of the standard selected to execute the stored test results

- 4) The value of the 'index of refraction' used for length calculations
- 5) The date and time the test results were saved in the memory of the tester
- 6) The brand name, model and serial number of the tester
- 7) The revision of the tester software and the revision of the test standards database in the tester
- g) The detailed test results data to be provided in the electronic database for each tested optical fiber must contain the following information
  - 1) The identification of the link/fiber in accordance with the naming convention defined in the overall system documentation
  - 2) Tier 1:
    - (A) The insertion loss (attenuation) measured at each wavelength, the test limit calculated for the corresponding wavelength and the margin (difference between the measured attenuation and the test limit value).
    - (B) The link length shall be reported for each optical fiber for which the test limit was calculated based on the formulas above.
  - 3) Tier 2:
    - i) All Tier 1 test results.
    - ii) The overall OTDR loss (attenuation) and length.
    - iii) The OTDR event loss at each wavelength and event location.
    - iv) The OTDR trace at each wavelength.
  - 4) Tier 3:
    - i) All Tier 1 and 2 test results.
    - ii) A picture of the magnified connector endface.
    - iii) The pass status based upon visual inspection.

## PART 2 PRODUCTS

### A. Copper (Twisted Pair) Test Equipment

#### 1. Category 6A Compliance

- a) The test equipment (tester) shall comply with the accuracy requirements for level III field testers as defined in the TIA Cat 6A Document. The tester including the appropriate interface adapter must meet the specified accuracy requirements. The accuracy requirements for the permanent link test configuration (baseline accuracy *plus* adapter contribution) are specified in Table B.2.10 of the TIA Cat 6A Standard.
- b) The test plug shall fall within the values specified in E.3.2.2 Modular test plug NEXT loss requirements of the TIA Cat 6A Standard.
- c) The tester shall be within the calibration period recommended by the vendor in order to achieve the vendor-specified measurement accuracy.
- d) The tester interface adapters must be of high quality and the cable shall not show any twisting or kinking resulting from coiling and storing of the tester

interface adapters. In order to deliver optimum accuracy, preference is given to a permanent link interface adapter for the tester that can be calibrated to extend the reference plane of the Return Loss measurement to the permanent link interface. The contractor shall provide proof that the interface has been calibrated within the period recommended by the vendor. To ensure that normal handling on the job does not cause measurable Return Loss change, the adapter cord cable shall not be of twisted-pair construction.

- e) The Pass or Fail condition for the link-under-test is determined by the results of the required individual tests (detailed in Part 3). Any Fail or Fail\* result yields a Fail for the link-under-test. In order to achieve an overall Pass condition, the results for each individual test parameter must Pass or Pass\*.
  - f) A Pass or Fail result for each parameter is determined by comparing the measured values with the specified test limits for that parameter. The test result of a parameter shall be marked with an asterisk (\*) when the result is closer to the test limit than the accuracy of the field tester. The field tester manufacturer must provide documentation as an aid to interpret results marked with asterisks.
2. Utilize the appropriate test equipment as manufactured by Datacom Technologies, Fluke, MicroTest, Scope, WaveTek, WireScope or approved equal. Print test results from the test unit used. Documentation shall include meter catalog number, serial number, manufacturer, cable identifier, Equipment Room/Telecommunications Room identifier, cable type, NVP settings, meter readings, test date, calibration information, and operator responsible for tests.
- B. Fiber Optic Test Equipment
- 1. The test equipment shall be within the calibration period recommended by the manufacturer.
  - 2. Fiber optic test jumpers and adapters shall be of high quality and shall not show excessive wear.
  - 3. Optical Loss Test Set (OLTS)
    - a) An OLTS is comprised of two components: an optical light source and an optical power meter. After making a reference measurement, the source and meter are located at opposite ends of the fiber under test. A source and meter may be contained within the same package to enable bi-directional testing without swapping end test equipment.
    - b) Multimode optical fiber light source
      - 1) Provide dual LED light sources with central wavelengths of 850nm ( $\pm 30$ nm) and 1300nm ( $\pm 20$ nm).
      - 2) Output power of -20dB minimum.
      - 3) Shall meet the requirements of ANSI/TIA/EIA-526-14A. The light source shall meet the launch requirements of ANSI/EIA/TIA-455-50B, Method A. This launch condition can be achieved either within the field test equipment or by use of an external mandrel wrap (as

described in clause 11 of ANSI/TIA/EIA-568-B.1) with a Category 1 light source.

- c) Singlemode optical fiber light source
  - 1) Provide dual laser light sources with central wavelengths of 1310nm ( $\pm 20$ nm) and 1550nm ( $\pm 20$ nm).
  - 2) Output power of  $-10$ dB minimum.
  - 3) Shall meet the requirements of ANSI/EIA/TIA-526-7.
- d) Power Meter
  - 1) Provide 850nm, 1300nm, 1310nm and 1500nm wavelength test capability
  - 2) Shall meet the requirements of ANSI/EIA/TIA-526-14A and ANSI/EIA/TIA-526-7.
  - 3) Power measurement uncertainty of  $\pm 0.25$  dB.
  - 4) Store reference power measurement.
  - 5) Save at least 100 results in internal memory.
  - 6) PC interface (serial or USB)
- e) Optional requirements that lead to faster, more efficient testing
  - 1) Dual-wavelength single-adapter light source
  - 2) Dual-fiber automated testing
  - 3) Fiber length measurement using time-of-flight technology
  - 4) Automated loss budget calculation and pass/fail analysis
- f) Optical Time Domain Reflectometer (OTDR)
  - 1) Shall have a bright, color transmissive LCD display with backlight.
  - 2) Shall have rechargeable Li-Ion battery for 8 hours of normal operation.
  - 3) Weight with battery and module of not more than 4.5lb and volume of not more 200in<sup>3</sup>.
  - 4) Internal non-volatile memory and removable memory device with at least 16MB capacity for results storage.
  - 5) Serial and USB ports to transfer data to a PC.
  - 6) Multimode OTDR
    - i) Wavelengths of 850nm ( $\pm 20$ nm) and 1300nm ( $\pm 20$ nm).
    - ii) Event deadzones of 1m maximum at 850nm and 2m maximum at 1300nm.
    - iii) Attenuation deadzones of 6m maximum at 850nm and 15m maximum at 1300nm.
    - iv) Distance range at least 2000m.
    - v) Dynamic range at least 10dB at 850nm and 1300nm.
- g) Optional requirements
  - 1) Integrated OLTS
  - 2) Integrated optical power meter
  - 3) Integrated video microscope

4. Fiber Microscope
  - a) Magnification of 250X or 400X for endface inspection
  - b) Optional requirements
    - 1) Video camera and display showing magnified endface image
    - 2) Camera probe tips permitting inspection through adapters
    - 3) Capability to save image
  - c) Standard of Quality Shall be Westover Scientific

### **PART 3 EXECUTION**

#### **3.1 GENERAL**

- A. All tests performed on optical fiber cabling that use a laser or LED in a test set shall be carried out with safety precautions in accordance with ANSI Z136.2.
- B. All outlets, cables, patch panels and associated components shall be fully assembled and labeled prior to field-testing. Any testing performed on incomplete systems shall be redone on completion of the work.

#### **3.2 COPPER (TWISTED PAIR) TESTING**

- A. General
  1. Field-test instruments shall have the latest software and firmware installed.
  2. Link test results from the Test Equipment shall be recorded in the test instrument upon completion of each test for subsequent uploading to a PC in which the administrative documentation (reports) may be generated.
  3. Testing shall be performed on each cabling segment (panel to connector or connector to connector).
  4. Testing of the cabling shall be performed using high-quality test cords of the same Category and manufacturer as the cabling under test.
- B. Performance Test Parameters (Category 6A)
  1. The test parameters for Cat 6A are defined in TIA Cat 6A standard, which refers to the ANSI/TIA/EIA-568B-2.10 standard. Test results shall at a minimum show alien attenuation crosstalk ratio far-end (AACRF), alien far-end crosstalk (AFEXT), alien near-end crosstalk (ANEXT), power sum alien attenuation crosstalk ratio far-end (PSAACRF), power sum alien far-end crosstalk (PSAFEXT), and power sum alien near-end crosstalk (PSANEXT).

#### **3.3 OPTICAL FIBER CABLE TESTING**

- A. General
  1. Field-test instruments shall have the latest software and firmware installed.
  2. Link and channel test results from the OLTS and OTDR shall be recorded in the test instrument upon completion of each test for subsequent uploading to a PC in which the administrative documentation (reports) may be generated.

3. Fiber endfaces shall be inspected at 250X or 400X magnification. 250X magnification is suitable for inspecting multimode and singlemode fibers. 400X magnification may be used for detailed examination of singlemode fibers. Scratched, pitted or dirty connectors shall be diagnosed and corrected.
    - a) It is preferable that the endface images be recorded in the memory of the test instrument for subsequent uploading to a PC and reporting.
  4. Testing shall be performed on each cabling segment (connector to connector).
  5. Testing shall be performed on each cabling channel (equipment to equipment) that is planned for use per the owner's instructions.
  6. Testing of the cabling shall be performed using high-quality test cords of the same fiber type as the cabling under test. The test cords for OLTS testing shall be between 1 m and 5 m in length. The test cords for OTDR testing shall be approximately 100 m for the launch cable and at least 25 m for the receive cable.
- B. Performance Test Parameters
1. Three tiers of certification are available that vary in thoroughness of infrastructure analysis.
    - a) Tier 1: optical loss testing
    - b) Tier 2: optical loss and OTDR testing
    - c) Tier 3: optical loss and OTDR testing and magnified endface inspection
  2. Tier 3 certification is recommended unless otherwise specified by the end-user.
  3. Optical loss testing (Tiers 1, 2 and 3)
    - a) Backbone link: The backbone link shall be tested bi-directionally at both operating wavelengths to account for attenuation deltas associated with wavelength. Because backbone length and the potential number of splices vary depending upon site conditions, the link attenuation equation (Section C.3.iv) shall be used to determine limit (acceptance) values.
      - 1) Multimode backbone links shall be tested at 850 nm and 1300 nm in accordance with ANSI/EIA/TIA-526-14A, Method B, One Reference Jumper or the equivalent method.
      - 2) Singlemode backbone links shall be tested at 1310 nm and 1550 nm in accordance with ANSI/TIA/EIA-526-7, Method A.1, One Reference Jumper or the equivalent method.
      - 3) The link attenuation shall be calculated by the following formulas as specified in ANSI/TIA/EIA standard 568-B
      - 4)  $\text{Link\_Attenuation (dB)} = \text{Cable\_Attn (dB)} + \text{Connector\_Attn (dB)} + \text{Splice\_Attn (dB)}$ 
        - i)  $\text{Cable\_Attn (dB)} = \text{Attenuation\_Coefficient (dB/km)} * \text{Length (Km)}$
        - ii)  $\text{Connector\_Attn (dB)} = \text{number\_of\_connector\_pairs} * \text{connector\_loss (dB)}$
        - iii) Maximum allowable connector\_loss = 0.75 dB
        - iv)  $\text{Splice\_Attn (dB)} = \text{number\_of\_splices (S)} * \text{splice\_loss (dB)}$

- v) Maximum allowable splice\_loss = 0.3 dB
- vi) The values for the Attenuation\_Coefficient (dB/km) are listed in the table below:

Type of Optical Fiber	Wavelength (nm)	Attenuation coefficient (dB/km)	Wavelength (nm)	Attenuation coefficient (dB/km)
Multimode 62.5/125 $\mu\text{m}$	850	3.5	1300	1.5
Multimode 50/125 $\mu\text{m}$	850	3.5	1300	1.5
Single-mode (Inside plant)	1310	1.0	1550	1.0
Single-mode (Outside plant)	1310	0.5	1550	0.5

- 5) Link attenuation does not include any active devices or passive devices other than cable, connectors, and splices, i.e. link attenuation does not include such devices as optical bypass switches, couplers, repeaters, or optical amplifiers.
- 6) The above link test limits attenuation are based on the use of the One Reference Jumper Method specified by ANSI/TIA/EIA-526-14A, Method B and ANSI/TIA/EIA-526-7, Method A.1; or the equivalent method. The user shall follow the procedures established by these standards or application notes to accurately conduct performance testing.
- b) Horizontal (multimode) link: The acceptable link attenuation for a multimode horizontal optical fiber cabling system is based on the maximum 90 m (295 ft) distance. The horizontal optical fiber cabling link segments need to be tested at only one (1) wavelength. Because of the short length of cabling, attenuation deltas due to wavelength are insignificant. The horizontal link should be tested at 850 nm *or* 1300 nm in one direction in accordance with ANSI/EIA/TIA-526-14A, Method B, One Reference Jumper method.
  - 1) The horizontal link may be tested using a fixed upper limit for attenuation of 2.0 dB. This value is based on the loss of two (2) connector pairs, one pair at the telecommunications outlet/connector and one pair at the horizontal cross-connect, plus 90 m (295 ft) of optical fiber cable.
  - 2) A horizontal link in an Open Office Cabling network with a consolidation point may be tested using a fixed upper limit for attenuation of 2.75 dB.
- c) Centralized (multimode) link: The acceptable link attenuation for a multimode centralized optical fiber cabling system is based on the maximum 300 m (984 ft) distance. The centralized optical fiber cabling link segments need to be tested at only (1) wavelength. Because of the short length of cabling, attenuation deltas due to wavelength are insignificant.

The horizontal link should be tested at 850 nm *or* 1300 nm in one direction in accordance with ANSI/EIA/TIA-526-14A, Method B, One Reference Jumper method. Testing at 850 nm is recommended unless otherwise specified by the end user.

- 1) The centralized link may be tested using a fixed upper limit for attenuation of 3.3 dB. This value is based on the loss of three (3) connector pairs, one pair at the telecommunications outlet/connector, one pair at the consolidation point and one pair at the horizontal cross-connect, plus 300 m (984 ft) of optical fiber cable.
- 2) A horizontal link in an Open Office Cabling network with a consolidation point may be tested using a fixed upper limit for attenuation of 4.1 dB.
- d) Optional requirements:
  - 1) Each horizontal and centralized link shall be tested bi-directionally since the direction of the signal transmission often cannot be predicted at the time of installation. This is especially true for non-polarized connectors.
  - 2) Each horizontal and centralized link shall be tested at both 850nm and 1300nm to confirm no attenuation differences due to wavelength even over short links.
4. OTDR Testing (Tiers 2 and 3).
  - a) Backbone, horizontal and centralized links shall be tested at the appropriate operating wavelengths for anomalies and to ensure uniformity of cable attenuation and connector insertion loss.
    - 1) Backbone multimode: 850nm and 1300nm
    - 2) Backbone singlemode: 1310nm and 1550nm
    - 3) Horizontal multimode: 850nm or 1300nm
    - 4) Centralized multimode: 850nm or 1300nm (850nm recommended unless otherwise specified by the end user)
  - b) Each fiber link and channel shall be tested in one direction.
  - c) A launch cable shall be installed between the OTDR and the first link connection. The launch cable shall be approximately 100m (328ft) in length and of the same fiber type as the link under test.
  - d) A receive cable shall be installed after the last link connection. The receive cable shall be at least 25m (82ft) in length and of the same fiber type as the link under test.
  - e) Reflective events (connections) exceeding 0.75 dB shall be identified, recorded and remedied to be less than 0.75 dB.
  - f) Non-reflective events exceeding 0.3 dB shall be identified recorded and remedied to be less than 0.3 dB. . Non-reflective events shall only be accepted for splices along the cabling. There shall be no losses acceptable for cable bends.

- g) Optional requirements
  - 1) Bi-directional link testing.
  - 2) Segment attenuation coefficient if segment length > 1000m (3280ft). The segment attenuation coefficient shall not exceed 3.5 dB/km at 850nm and 1.5 dB at 1300 dB. Fibers exceeding these attenuation coefficients shall be replaced.
- 5. Magnified Endface Inspection (Tier 3)
  - a) Fiber connections shall be visually inspected for endface quality. High loss and reflectance can result from improperly terminated, poorly polished or dirty connectors.
  - b) Fibers shall be inspected at 250X or 400X magnification. 250X magnification is suitable for inspecting multimode and singlemode fibers. 400X magnification may be used for detailed examination of singlemode fibers.
  - c) Scratched, pitted or dirty connectors shall be diagnosed and corrected.
  - d) Optional requirements
    - 1) The endface image shall be saved and included in the test documentation package.
- 6. Length Measurement
  - a) The length of each fiber shall be recorded.
  - b) It is preferable that the optical length be measured using an OLTS or OTDR.
- 7. Polarity Testing
  - a) Paired duplex fibers in multi-fiber cables shall be tested to verify polarity in accordance with subclause 10.3 of ANSI/TIA/EIA-568-B.1. The polarity of the paired duplex fibers shall be verified using an OLTS.
- C. Performance Test Parameters (OSP Cable)
  - 1. Campus Backbone OSP Fiber Optic cable testing.
    - a) Fiber optic cabling: Test all fiber optic cabling completely in accordance with ANSI/TIA/EIA-568-A, Annex H.
      - 1) All fibers shall be proof tested by the manufacturer at a minimum load of 6000 kPa. All fibers shall be 100 percent attenuation tested by the manufacturer for compliance with the specified performance requirements. Provide manufacturer's test results and performance certification before installation.
      - 2) Perform 100 percent attenuation test on all fiber optic cabling on the reel after receipt and before installation. Submit results to Owner for comparison against manufacturer's certified test results.

- 3) If any test results fail to meet the manufacturer's certified test results or are non-compliant with this Section, the cable shall be rejected.
- 4) Test and document all fiber optic cables from both ends on each terminated strand with a properly calibrated Optical Time Domain Reflectometer (OTDR) as manufactured by Siecor or approved equal. Documentation shall include OTDR catalog number, serial number, manufacturer, strand identifier, meter readings, test date, calibration information, and operator responsible for tests. All OTDR testing shall be fully compliant with ANSI/EIA/TIA-455-8.
- 5) Provide 100 meters of like fiber to project OTDR cable examination beyond the "dead zone."
- 6) Test and record all fiber losses and submit to Owner for approval. Provide all test information on printouts and on electronic files. Perform test as segments of the fiber installation are completed and as directed by the Owner

**END OF SECTION**

Revised 11/20/2019

## COMMUNICATIONS COPPER HORIZONTAL CABLING

### PART 1 GENERAL

#### 1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### 1.2 SUMMARY

- A. Section Includes:
  - 1. Supply and installation of a complete and working Horizontal Cabling Systems for
    - a) Voice / Telephone
    - b) Data / Network
      - 1) Including Data provisions for Other Systems (i.e. Video Surveillance, Access Control, Control Data, Intrusion Detection, etc.).
  - 2. System includes but is not limited to:
    - a) Horizontal cabling.
    - b) Station outlets including frames, connector modules, and cover plates.
    - c) Patch panels
- B. Related Sections
  - 1. All Division 27 Sections
  - 2. Common Work Results
    - a) Division 27 – “Operation and Maintenance of Structured Cabling and Enclosures”
    - b) Division 27 – “Basic Materials and Methods”
    - c) Division 27 – “Grounding and Bonding for Communications Systems”
    - d) Division 27 - “Pathways for Communications Systems”.
    - e) Division 27 – “Firestopping for Communications Systems”
    - f) Division 27 – “Identification for Communications Systems”
    - g) Division 27 – “Commissioning of Structured Cabling”
  - 3. Interrelated Sections
    - a) Division 27 – “Communications Cabinets, Racks, Frames and Enclosures”
    - b) Division 27 – “Communications Cable Management and Ladder Rack”

C. Related Drawings

1. Technology (T-Series) Drawings

1.4 SYSTEM DESCRIPTION / DESCRIPTION OF WORK

- A. The system shall be a 4 pair UTP copper Horizontal cabling system.
  - 1. Provide, test, and label all cables and terminations devices as described below and as shown on the plans.
  - 2. The system shall be an ANSI/TIA/EIA 568-B Category 6A compliant Unshielded Twisted Pair (UTP) horizontal cabling system.
  - 3. The Horizontal voice cabling systems shall be a Category 6A compliant system.
  - 4. The Horizontal data cabling system shall be a Category 6A compliant system.
  - 5. System shall meet or exceed the requirements for the PanGen System Warranty 25 year warranty and shall include the 25 year PanGen System Warranty. Contractor shall provide PanGen System Warranty documentation at project close out. **Or**, cabling manufacturer and/or contractor shall provide a total system warranty equal to or better than the PanGen System Warranty 25 year warranty. System Warranty documentation shall be provided to Owner Telecommunications department at project close out.
  - 6. See related Drawings for specific Project requirements.
  - 7. The system shall consist of total connectivity for a complete and permanent installed communications link.
  - 8. Refer to detail drawings for terminations standards and positioning of termination devices Provide, test, and label all cables and terminations devices as described below and as shown on the plans.
  - 9. The cable distance between the termination point with a Communications Room(s) and the station outlet(s) shall be no greater then 90 meters (295 ft).

10. The total channel distance shall not exceed 100 meters (328 feet) distance between equipment in the Communications room and station equipment, including all patch cables and station attachment cables
11. All system cables shall be continuous between points of termination, without splices.
12. All system cables shall be UL/NEC rated for the location, manner and site conditions in which the cables are installed. This includes, but is not limited to:
  - a) Use of the cable rated for the application
  - b) Not exceeding fill capacities of raceways
  - c) All cable used shall be in compliance with Local, State, and Federal laws (at minimum the NFPA published "National Electric Code") as to acceptability for placement in the designed pathway. This includes, but is not limited to, cable fill capacities of raceways and plenum vs. non-plenum construction. **ONLY Plenum station cable shall be installed on the Indiana State University campus.** The Contractor shall provide and install the appropriate cable for the appropriate conditions.

#### 1.5 SUBMITTALS

##### A. General

1. Product Data and Shop Drawing submittals for work of this section shall be SUBMITTED TOGETHER, complete, as a single submittal. Product Data and Shop Drawings are not to be submitted separately.
2. Samples shall be submitted with or immediately following submission of Product Data submittals.

##### B. Items to be submitted for approval prior to commencement of work:

###### 1. Product Data

- a) Manufacture datasheets for all cable
- b) Manufacture datasheets for all connectors
  - 1) Data sheets shall include
    - i) Manufacturer name
    - ii) Manufacturer model number (as it appears on manufacturer's product data sheet)
    - iii) Manufacturer product description
    - iv) Paragraph number of this section where the product is specified.
    - v) Picture or Drawing of item

##### C. Quality Assurance / Control Submittals

1. RCDD Certification for the staff member responsible for this project.
2. Resume of the last 10 projects of the RCDD responsible for this project
3. BICSI Technician's certificate for each lead Technician(s) on the project

D. Closeout Submittal

1. Communication Room Rack Layouts, drawing to scaled, depicting devices and rack space occupied by each installed component.
2. A diagram of the labeling scheme used on the Project.
3. Additional closeout documentation as required in Division 1 and Division 27 "General Requirements for Communications".
4. Contractor shall provide PanGen System Warranty documentation at project close out. **Or**, cabling manufacturer and/or contractor shall provide a total system warranty equal to or better than the PanGen System Warranty 25 year warranty.

1.6 WARRANTY

- A. Additional requirements: All cabling and connectivity products manufacturers, including patch cords, shall have in place an agreement recognizing each other for complete execution of warranty as specified. All performance and applications warranties shall be channel rated.
1. The cable manufacturer and the connectivity products manufacturer shall have a partnership agreement established in order to provide the required warranty.
  2. Required warranty:
    - a) The ANSI/TIA/EIA 568-B Proposed Category 6A compliant cable system shall include as a minimum a 25 year PanGen System Warranty. **Or**, cabling manufacturer and/or contractor shall provide a total system warranty equal to or better than the PanGen System Warranty 25 year warranty.

**PART 2 PRODUCTS**

2.1 PRODUCT STANDARDS

A. General

1. This section is designed to provide the Contractor with a minimum standard of quality and functionality for the products used for telecommunications infrastructure.
2. This standard will be considered in force for the original response as well as for any additions or changes to this Project. Due to this, there may be items listed in the Products section that are not required under the scope of this contract.
3. Products required by the Drawings but not enumerated will be evaluated as a performance specification based on the information provided on the Drawings.

2.2 CABLES

A. General

1. All cables on this Project shall be color-coded. \*\*\*See Detail drawings for color code.

2. CMP (OFNP) and CMR (OFNR) references below are as required by the NEC published by the National Fire Protection Association.
    - a) Cables not specifically identified otherwise, shall be provided with CMP classification.
    - b) Exceptions:
      - 1) Proper cable classification is ultimately determined by building construction; reductions in classification for cables, not clarified or altered by addendum to the specifications, shall require a contract cost deduction through a change order.
- B. Twisted Pair Cables
1. Electrical Requirements:
    - a) All Twisted Pair cable is required to have the appropriate Category classification as defined by EIA/TIA/ANSI 568C. The compliance to these electrical characteristics must be third party verified by the manufacturer. Part 1 of this specification Section will define the appropriate Category for each cable.
    - b) Recognized Categories:
      - 1) Category 1-2, Category 3, Category 5e, Category 6, Category 6A
      - 2) All requirements and testing parameters as set forth by EIA/TIA 568C.
  2. Construction
    - a) All Twisted pair cable will be properly constructed for the environmental conditions and to meet all applicable codes.
    - b) The following basic construction types are recognized for this Project:
      - 1) Premise Distribution 4 pair Cables - Category 6A
        - i) Fully ANSI/EI/TIA 568C.1 Category 6A compliant
        - ii) Cable shall have 2 individual insulated 24 AWG solid copper conductors formed into a twisted pair.
        - iii) Cable must be constructed of four individually insulated Unshielded Twisted Pairs (UTP)
        - iv) The cable construction must be available in plenum (CMP) and non-plenum riser (CMR) rated constructions.
        - v) This cable construction is used in indoor pathways primarily as horizontal cabling but may also be used as backbone cable.
        - vi) Standard of quality shall be as manufactured by Panduit Cable PUP6AM04BU-UG .
          - (A) Additional approved manufacturer(s):
          - (B) General Cable 7132849
          - (C) CommScope 2091B BLU C6A 4/23 U/UTP W1000 | 760107201
          - (D) Belden 10GXW13
          - (E) Mohawk M59146

## 2.3 TERMINATION HARDWARE

### A. General

1. Suggested layout of termination hardware is indicated on the Drawings. Contractor shall coordinate layout of termination hardware with the Owner's Representative before installation.
2. Provide one single manufacturer for all twisted-pair termination hardware used together in a permanent link or whenever a Category Certification is required.
3. Termination devices on this Project shall be color-coded. \*\*\*\*\*See Detail Drawings for details.
4. Terminate all UTP cabling utilizing the T568B wiring configuration.
5. The manufacturer of the cable and the manufacturer of the connectivity products shall have a partnership agreement established in order to provide the required warranty. See Warranty requirements above and in related Section 27 00 01.00. Contractor shall provide Owner warranty documentation at project close out.  
All devices shall be UL listed as required by the NEC published by the National Fire Protection Association.
6. All RJ-45 twisted pair termination devices are required to have the appropriate Category classification as defined by EIA/TIA/ANSI 568B. The compliance to these electrical characteristics must be third party verified by the manufacturer. Part 1 of this specification Section will define the appropriate Category for each cable.
  - a) Recognized Categories:
    - 1) Category 1-2, Category 3, Category 5e, Category 6, Category 6A.
    - 2) All requirements and testing parameters as set forth by the latest update to EIA/TIA 568B.

### B. Station Outlet

1. The following basic termination devices are available and recognized for this Project.
  - a) Flush Faceplate – Single Gang
    - 1) Sloped faceplate Frame
    - 2) Four position minimum on each faceplate
    - 3) Electrical Ivory color unless otherwise specified
    - 4) May be mounted on an outlet box, bracket, or raceway.
    - 5) Must use module inserts below.
    - 6) Standard of quality shall be Panduit CFPSL4xxY
  - b) Quad Jack Frame
    - 1) Four position minimum on each frame
    - 2) Electrical Ivory color unless otherwise specified
    - 3) May be mounted on an outlet box, bracket, or raceway.
    - 4) Will require a faceplate with standard duplex electrical outlet cut-out
    - 5) Standard of quality shall be Panduit CFG4xx

- c) Faceplate Blank Insert
    - 1) Provide blanks for all un-used positions in faceplates, surface boxes, or jack frames.
    - 2) Color to match outlet faceplate as described above; Electrical Ivory color unless otherwise specified
    - 3) Standard of quality shall be Panduit CMBxx-X
  - d) Wall-Phone Jack
    - 1) Stainless Steel faceplate with mounting posts for keyhole slot telephone mounting
    - 2) May be mounted on an outlet box, bracket, or raceway.
    - 3) Standard of quality shall be Panduit KWP6PY.
  - e) Category 6A jack insert RJ-45
    - 1) Fully compliant ANSI/TIA/EIA 568B Category 6A RJ45 modular jack.
    - 2) Color shall be Blue for all locations identified as being voice locations. Color shall be Electrical Ivory for all locations identified as data locations. Coordinate with Owner's Representative or Architect/Engineer.
    - 3) Standard of quality shall be Panduit CJ6X88TGxx
- C. Communications Room Equipment Rack(s)
- 1. The following basic termination devices are available and recognized for this Project.
    - a) UTP Cat 6A Patch Panel 24 port
      - 1) Panel shall be black steel with PCB connection between interfaces
      - 2) Shall provide 24 ports in 1.75" of rack space (1 RU).
      - 3) Must have labeling areas on front and rear
      - 4) Fully compliant ANSI/TIA/EIA 568B Category 6A
      - 5) RJ45 jack interface on front and 110 style IDC connections on rear
      - 6) Mountable in EIA standard 19" rack/cabinet rails.
      - 7) Standard of quality shall be Panduit CPPL24WBLY 24-Port Modular Patch Panel with Labels fully loaded with Panduit CJ6X88TGBL Category 6A Jack Modules.

## **PART 3 EXECUTION**

### **3.1 GENERAL**

- A. This section is designed to provide the vendor with a standard of quality and functionality for the installation of technology systems infrastructure. Not all procedures will be necessary for the installation of this Project. However, this standard will be considered in force for the original response as well as for any additions or changes to this Project.

### 3.2 INSTALLATION

#### A. Coordination

1. Review and coordinate proper pathways prior to installation.

#### B. General

1. Cable routing shall follow building structure lines and shall be installed with adequate length to reach to any location within the equipment racks with at least 5 feet of service loop at each end.
2. At point of final terminations, excess cable and the service loop shall be stored and dressed neatly.
  - a) At the station end of the cable the service loop shall be stored above the ceiling line at an accessible point and support with an approved device designed for that purpose.
  - b) Within a Communications Room the service loop shall be dressed and stored within the ladder rack.
3. Strain relief techniques shall be applied to all cables to lessen the risk of physical cable damage and to provide proper aesthetic value.
4. Route all cabling and pathways parallel to building surfaces and at 90 degrees angles to the rafters and trusses.
5. Cable runs shall be continuous and without splices.
6. Wiring shall be free from grounds, shorts, opens, and reversals. Strain relief shall be provided at all connection points.

#### C. Protection

1. Maintain protection of all cabling throughout the entire duration of the project. Cabling shall not be left hanging or coiled where it potentially obstructs the Work of other trades. Cabling shall be bundled, supported, and protected up out of the way of other trades any time it is determined necessary to ensure the safety or personnel and protection of the cable.
2. Do not terminate cables designated for different services onto the same patch panel unless otherwise clearly indicated on the drawings. Coordinate with Owner before any terminations are made.
3. Do not exceed minimum bend radius or pulling tension specifications set forth by the product manufacturer.
4. Cable Separation and Organization
  - a) Horizontal cables of all service types (i.e. Voice, Data, Control, RF, etc....) shall be organized and kept segregated within cable trays, ladder rack, wire management and other pathways to the degree physically possible.
  - b) Cables of different services shall not be intertwined.
  - c) Terminate all cabling on specified termination hardware in numerical order and on specified outlets.

D. Labeling

1. Every cable shall have a label applied to the jacket at each end.
2. Each terminating device and port shall have a unique identifier.
3. Label all cabling and terminations as specified and indicated on related drawings.

E. Use of Raceways

1. Install cabling within conduit and in surface raceway where specified in this or related sections and as indicated on the drawings.
2. Cabling shall be installed in a concealed manner. Cables may be visible only in the following areas;
  - a) Equipment Rooms
  - b) Telecommunications Rooms
  - c) Building spaces equipped with cable trays, but without finished ceilings to conceal the cables.
3. Install cabling in Cable Tray / and Ladder rack where specified and/or indicated on the drawings.
4. Support cables using approved products and methods whenever conduit, surface raceway and cable tray are not specified. Cable supports shall be attached directly to building structure.

F. Cabling on backboards and in Equipment racks

1. Neatly dress, support, and securely attach all cabling.

G. Termination

1. Terminate each end of every cable provided.
2. Terminate all UTP cabling utilizing the T568B wiring configuration.
3. Terminate each cable from a station outlet in numerical order on adjacent ports on the specified termination hardware within the appropriate Communications Room.
4. Terminate cables using the tools and connectors specified and as recommended by the cable/connector manufacturer.

H. Separation from Sources of Interference

1. Route cables at least 1.2m (4 foot) from motors or transformers; 30 cm (1 foot) from conduit and cables used for AC power distribution; 12 cm (5 inches) from fluorescent lighting fixtures.

I. Cable Supports

1. Where cabling is not supported by cable tray or conduit, provide necessary cable support as specified. Provide nylon cable tie at the support to contain cabling within the support. Do not bundle cable between supports. Provide cable support as specified at intervals not to exceed 5 feet. Do not secure cabling to the support. Do not use cable supports with round surfaces (i.e. bridal rings).

J. Horizontal cabling

1. The length of patch cords and cross connect jumpers installed in the Telecommunications Room shall be 5 m (15 ft) total or less.
2. The length of patch cords and cross connect jumpers installed in the Equipment Room shall be 5 m (15 ft) total or less.
3. Locate telecommunications outlets so that the cable assembly required to reach work area equipment will be no more than 5 m (15 ft) long.
4. Provide service loops on all cables at the station end of 2 feet (coiled above the ceiling and with a minimum of 6 inches at the telecommunications outlet coiled in the box or raceway).
5. Provide service loop at the Equipment Room/Telecommunications Room end of 5 feet coiled above the ceiling or neatly bundled in ladder rack above the cabinet/rack.
6. Install telecommunications outlets securely at work area locations.
7. Any necessary electrical components (e.g., impedance-matching devices) at outlets shall be located outside the faceplate via a standard plug connection.
8. Provide surface raceway on all walls where existing pathway has not been provided and cables cannot be concealed inside the wall cavity. Do not conceal cabling inside of block walls. Install surface raceway “level” straight and securely anchored to walls with screws, bolts, or anchors as appropriate.
9. Provide a 6 inch service loop on each horizontal UTP cable that breaks out from the harness for termination and do not violate the minimum bend radius of the cable.

3.3 TESTING

- A. All cables shall be fully tested and verified compliant with these specifications.
  1. See: “Commissioning of Structured Cabling” for UTP Horizontal performance testing parameters and procedures.
- B. The Owner reserves the right to have a representative present during any or all testing procedures. Verification testing of copper and fiber will be performed at or near Project completion by the Consultant for quality assurance.
- C. Upon verification testing, if the Consultant finds the test results do not match the Contractor’s results, the Consultant or a third party may at the Owner’s request retest all of the cabling and submit those results to the Owner and deduct the verification testing costs from the Contractor’s Contract amount.

**END OF SECTION 27 15 13.00**

Revised 11/18/2019

## **COMMUNICATIONS CONNECTING CORDS, DEVICES, AND ADAPTERS**

### **PART 1 GENERAL**

#### **1.1 RELATED DOCUMENTS**

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.
  - 1. Supplementary to Division 1, Refer to Division 27 Section(s) for additive information where applicable.

#### **1.2 SUMMARY**

- A. Section Includes:
  - 1. Cable Assemblies, Devices, and Adapters for Communications
    - a) Voice / Telephone
    - b) Data / Network
  - 2. General requirements are as follows:
    - a) Provide cable assemblies and devices with electrical/optical properties to match the designed infrastructure.
  - 3. Special requirements are as noted on Drawings.
  - 4. All Work shall fully comply with these specifications and related Drawings and all manufacturers recommended installation practices.
- B. Products Supplied But Not Installed Under This Section
  - 1. None
- C. Products Installed But Not Supplied Under This Section
  - 1. None
- D. Related Sections
  - 1. All Division 27 Sections
- E. Related Drawings
  - 1. Technology (T-Series) Drawings

#### **1.3 SYSTEM DESCRIPTION**

- A. Provide the following cable assemblies (cords), Devices, and adapters: **(only provide if specifically requested by Owner)**
  - 1. Telephone Patch Cables
    - a) Category 6A cables, 3-5 feet in length as required for the Equipment Room/Telecommunications Room end.
    - b) Confirm Color for telephone cables

- c) Labeled with the same unique identifier at both ends of the assembly.
- d) Provide a quantity of 1 for each horizontal telephone cable installed.

B. Labels:

- 1. Provide alphanumeric, clearly typewritten labels at all designated points as follows:
- 2. See Detail Drawings for graphical representation of labeling scheme.

1.4 SUBMITTALS

A. General

- 1. Product Data and Shop Drawing submittals for work of this section shall be SUBMITTED TOGETHER, complete, as a single submittal. Product Data and Shop Drawings are not to be submitted separately.
- 2. Samples shall be submitted with or immediately following submission of Product Data submittals.

B. Items to be submitted for approval prior to commencement of work:

1. Product Data

- a) Manufacture datasheets for all cable assemblies
- b) Manufacture datasheets for all devices
- c) Manufacture datasheets for all adapters
  - 1) Data sheets shall include
    - i) Manufacturer name
    - ii) Manufacturer model number (as it appears on manufacturer's product data sheet)
    - iii) Manufacturer product description
    - iv) Paragraph number of this section where the product is specified.
    - v) Picture or Drawing of item

C. Closeout Submittal

- 1. Cable color code utilized for patching.
- 2. Labeling scheme utilized for cable assemblies.

**PART 2 PRODUCTS**

2.1 PRODUCT STANDARDS

A. General

- 1. As required in Division 27 Section 27 00 01 "General Requirements for Communications"
- 2. This section is designed to provide the Contractor with a minimum standard of quality and functionality for the products used for telecommunications infrastructure.
- 3. This standard will be considered in force for the original response as well as for any additions or changes to this Project. Due to this, there may be items listed in the Products section that are not required under the scope of this contract.

4. Products required by the Drawings but not listed in Part 2, will be evaluated as a performance specification based on the information provided on the Drawings.

## 2.2 CABLES

### A. Copper Cable Assemblies (Twisted Pair)

#### 1. Category 6A Copper patch cables

- a) Copper patch cables shall be ANSI/TIA/EIA 568A Proposed Category 6A compliant with eight position RJ45 modular plugs on each end. Use T568B wiring. Apply an identifying label to each end of the cable assembly (same identifier on each end of the cable and a unique identifier for each patch cable on the Project regardless of installed location).
- b) Color Coding:
  - 1) Critical Building Systems Red
  - 2) Voice Over IP Orange
  - 3) Classroom Black
  - 4) Administrative Yellow
  - 5) Cross-Over connections Blue
  - 6) Straight-Through uplinks Green
  - 7) Network Management Purple
  - 8) IP Video White
  - 9) Work Area (Attachment) Gray
- c) UTP Cable Assemblies Category 6A, coordinate with Owner prior to purchasing cables. In most cases data patch cables will be six inch.
  - 1) Standard of quality shall be Panduit
    - i) 6 inch with labels added
    - ii) 3 foot with labels added
    - iii) 5 foot with labels added
    - iv) 7 foot with labels added
    - v) 10 foot with labels added
    - vi) 14 foot with labels added
    - vii) 20 foot with labels added
  - 2) Additional Approved Manufacturers:

## PART 3 EXECUTION

### 3.1 GENERAL REQUIREMENTS

- A. This section is designed to provide the vendor with a standard of quality and functionality for the installation of technology systems infrastructure. Not all procedures will be necessary for the installation of this Project. However, this standard will be considered in force for the original response as well as for any additions or changes to this Project.

### 3.2 INSTALLATION PRACTICES

- A. Standards: The minimum criteria for proper installation can be found in the *TELECOMMUNICATIONS DISTRIBUTION METHODS MANUAL* published by the Building Industry Consulting Services International. The vendor must refer to this publication for cable installation practices. This Specification may take exception to optional statements within this manual. Treat any conflict per this Specification under discrepancies or Conflicts.
- B. The following items should be considered to be minimum standards for this Project:
  - 1. The vendor is responsible for receiving, handling, storing, and protecting all materials used on this Project until the Project is signed as complete.
- C. General Requirements:
  - 1. Throughout the entire installation the Contractor must maintain complete protection of all cabling. Cabling shall not be left hanging or coiled where it potentially obstructs the Work of other trades. Cabling shall be bundled, supported, and protected up out of the way of other trades any time it is determined by the Architect/Engineer to be necessary.

### 3.3 LABELING

- A. Provide labeling as specified in Part I.
- B. Label all items listed in quantities required by the drawings and specifications.
- C. Apply all labels straight and legible.

**END OF SECTION 27 16 00.00**

28 05 00  
COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

PART 1 - GENERAL

1.01 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.
- B. Division 28 Specifications and Drawings.

1.02 SUMMARY

- A. Basic materials, methods and installation guidelines applicable to the work of all Division 28 documents.
- B. The information included in this Section apply too and are additional requirements for all of Division 28 documents.
- C. Thoroughly review entire bid documents, including all drawings and specifications prior to bidding and include all indicated work in bid.

1.03 REQUIREMENTS

- A. Project Coordination
  - 1. Commence coordination immediately upon award of contract. Coordination includes providing and extracting related information to and from other trades for review. Failure to coordinate in a timely manner shall not result in any subsequent additional reimbursement, special allowances or additional construction time being made for any facet of the project. Work fabricated or installed before properly coordinating with all other trades shall be done at the Contractor's own risk.
  - 2. Work in harmony with all building trades, so as not to cause any delays. Sequence, coordinate, and integrate installations of communications materials and equipment with all other applicable trades for efficient flow of the Work. In addition, contact and coordinate/facilitate work of local communications service providers for incoming communications services. Execute connections with local services providers complete as indicated.
  - 3. The drawings indicate the approximate location and arrangement of required work. The drawings shall be followed as closely as possible in coordination and in execution of the work.
  - 4. Participate in coordination efforts and in preparation of coordination drawings prior to fabrication or installation of any equipment, materials, etc. Coordinate actual clearances of all installed equipment.
  - 5. Conflicts in equipment and materials shall be corrected prior to installation. Should there be a conflict with the drawings of other trades, work with the trades to correct the conflict while coordinating the project. If the conflict cannot be resolved, refer the matter to the owner's representative for a final decision as to method or material. Refer to drawings of all other trades for details, dimensions and locations of other work and route their work so as not to conflict with any other branch. Any work installed or equipment placed in position by this contractor creating a conflict shall be readjusted to the satisfaction of the Owner's representative at the expense of this contractor.
  - 6. All products furnished of a given type shall be by a single manufacturer; shall bear the same brand name; shall be of the same finish color and texture; and shall be from the same product model series, unless otherwise noted.
  - 7. Plans are diagrammatic indicating design intent and indicating required size, points of termination and, in some cases, suggested routes of raceways, etc. However, it is not intended that drawings indicate fully coordinated conduit routing, all necessary offsets, etc. Provide all cable assemblies, etc. as straight as possible and symmetrical (perpendicular to or parallel

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

with) with architectural items and in a consistent elevation. Do not provide work installed diagonal to building members.

B. Shop Drawings, Product Data, and Samples

1. All submittals shall be submitted electronically in PDF format unless otherwise directed by the A/E or Owner.
2. Provide complete master material list.
3. Provide the following information for each product:
  - a. The manufacturer's name (Brand) and full model number.
  - b. Product Information Sheets "Datasheets": Include catalog information, sizing, and technical data on each item to be used on the Project.
  - c. Each product datasheet must reference the specific paragraph for which the product is being submitted. Each product must be listed in the exact same order as it appears in the Section for which the products are being submitted.
  - d. Datasheets shall each include a clearly identifiable label applied in upper corner of each sheet that clearly references the specification section and drawing (as applicable) to which it applies. Labels shall be consistently affixed in the same location on all sheets unless the labels will obstruct pertinent technical information.
4. All datasheets shall be original manufacture datasheets.
5. Where datasheets depict multiple products, versions or options, the Contractor shall highlight (indicate with an arrow) all applicable model(s), version(s) and option(s) applying to the specific product the Contractor will be providing. Exact catalog number must be indicated. The submitted items must be from "approved materials" as specified in each Specification Section.
6. Do not combine with submittals from any other Division.

C. Operation and Maintenance Manuals

- a. Prepare Operations and Maintenance Manuals in accordance with Section 01 77 00 Contract Closeout.
- b. Operations and Maintenance (O&M) manuals shall be provided for each item of equipment. Flash drives shall be file folder indexed for each piece of equipment. O&M submittals shall include but not be limited to the following:
  - a. Installation instructions and schematic drawings.
  - b. Operating and maintenance instructions.
  - c. Complete parts list with manufacturer's model numbers.
  - d. Complete set of approved shop drawings.
  - e. Complete wiring diagrams showing all connections and internal wiring diagrams of all equipment, including module diagrams. Factory typical wiring diagrams are not acceptable.

D. Building Codes:

1. National Electrical Code (NFPA 70)
2. Life Safety Code (NFPA 101)
3. Uniform Building Code (Or adopted State Code)
4. Federal Communications Commission (FCC) Part 68
5. State specific agencies:
  - a. Administrative Building Council
  - b. State Board of Health
  - c. State Fire Marshal

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

- d. Local Codes (City, County, etc.)
- e. Local Utility Company requirements

## E. Standards

1. American National Standards Institute/Telecommunications Industry Association – ANSI/TIA 568C Commercial Building Telecommunications Cabling Standard.
2. American National Standards Institute/Telecommunications Industry Association – ANSI/TIA 569D Commercial Building Standard for Telecommunications Pathways and spaces.
3. American National Standards Institute/Telecommunications Industry Association – ANSI/TIA 606B The Administrative Standard for the Telecommunications Infrastructure of Commercial Buildings.
4. American National Standards Institute/Telecommunications Industry Association – ANSI/TIA 607C Commercial Building Grounding and Bonding Requirements for Telecommunications.
5. American National Standards Institute /Building Industry Consulting Services International – ANSI/BICSI 005-2016, Electronic Safety and Security (ESS) System Design and Implementation Best Practices.
6. ASIS – Security Management Standard: Physical Asset Protection (PAP)
7. ASIS – Facilities Physical Security Measures Guideline (FPSM)

## F. Permits

1. Contractor shall obtain and pay for all permits or certificates of inspection and approval required for his branch of the work.
2. Permits shall be posted in a prominent place at the building site properly protected from weather and physical damage.

## G. Definitions

1. Wherever the word "Install" appears on the drawings or in these Division 28 specifications it shall mean to supply all labor, tools and incidental materials necessary to handle, store, mount, terminate, program, configure and adjust product as necessary to fulfill project requirements.
2. Wherever the word "Provide" appears on plan drawings or in Division 28 specifications, it shall be interpreted to mean that the Contractor shall "Furnish and Install", including all necessary accessories, miscellaneous materials and labor necessary to render the respective system fully operational.
3. Wherever the word "Work" appears in Division 28 specifications or on communication technology drawings, it shall be interpreted to mean any and all labor, materials, accessories, services, etc. necessary to fulfill project requirements.
4. Wherever the word "Furnish" appears on the drawings or in these Division 28 specifications it shall mean to supply the specified labor or specified product, including all associated shipping, storage and warranty expenses.
5. Wherever the words "Site", "Project Site", or "Premises" appears in Division 28 specifications or its related drawings, it shall be interpreted to mean all real estate, buildings and structures where work will be performed and where products will be installed and reside.
6. Wherever the phrase "Standard of Quality" appears in Division 28 specifications or its related drawings, the Contractor shall interpret this to mean that the listed Manufacturer and Catalog number for each item has the physical, functional, and operational attributes to provide the designed functionality.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

## H. Quality Assurance

1. Contractor shall have a minimum five (5) years of experience in the installation of Communication Technology system(s) of similar size, type, scope and contract value.
2. The lead technician(s) on the Project shall have a thorough understanding of the following:
  - a. American National Standards Institute/Telecommunications Industry Association/Electronics Industry Association – ANSI/TIA/EIA 568B Commercial Building Telecommunications Cabling Standard.
  - b. American National Standards Institute/Telecommunications Industry Association/Electronics Industry Association – ANSI/TIA/EIA 569A Commercial Building Standard for Telecommunications Pathways and spaces.
  - c. American National Standards Institute/Telecommunications Industry Association – ANSI/TIA/EIA 606 The Administrative Standard for the Telecommunications Infrastructure of Commercial Buildings.
  - d. American National Standards Institute/Telecommunications Industry Association/Electronics Industry Association – ANSI/TIA/EIA 607 Commercial Building Grounding and Bonding Requirements for Telecommunications.
  - e. American National Standards Institute /Building Industry Consulting Services International – ANSI/BICSI 005-2016, Electronic Safety and Security (ESS) System Design and Implementation Best Practices
  - f. ASIS – Security Management Standard: Physical Asset Protection (PAP)
  - g. ASIS – Facilities Physical Security Measures Guideline (FPSM)
3. Contractor shall be a (factory trained) certified installer for all systems provided in Division 28.
  - a. This minimum requirement shall apply to each Division 28 section independently. If Contractor is incapable of meeting the percent of product value requirement for each section, Contractor shall use a Subcontractor that can meet the percent of product value requirement, in whole, for all products and work of that section for which This Contractor is not qualified.
  - b. The specific Contractor or Subcontractor meeting the requirements for a specific section shall be responsible for the supply of the products, supplemental engineering services and submittals as well as performing all technical labor associated with the installation, training and warranty servicing of work of that section.
4. Contractor shall have substantial business operations located within a 100-mile radius of the project site with a full-time employee staff actively engaged in the supply, installation and service of systems and equipment of the type and scope herein specified.
5. Contractor shall have full-time employee service staff based within a 100-mile radius of the project site.
6. Contractor shall provide any additional information requested by the Owner as determined appropriate by the Owner to validate a Contractor's (or its Subcontractor's) ability to perform and warranty the specified work in the quality, manner and time frame required.
7. Superintendent/Project Manager
  - a. This Contractor shall furnish the services of an experienced superintendent/Project Manager who shall be constantly in charge of the work, together with the qualified Foremen and specialists as required to properly install, connect, adjust, start, operate and test the work involved.
  - b. The superintendent's/Project Manager's qualifications shall be subject to the review and acceptance by the A/E and Owner. Unless the A/E or Owner grants prior special permission, the same communication Superintendent/Project Manager shall be utilized throughout the duration of the project and be responsible for the complete scope of the Contract.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

## I. Product Delivery Requirements

1. The Contractor shall not procure, deliver or install any product until after the contractor's submittal has been reviewed by the A/E and Owner and the submittal has been returned to the Contractor's marked "Reviewed No Exceptions Taken", "Reviewed as Noted" or "Rejected Resubmit". Advance procurement, delivery or installation of product prior to the return of submittal is entirely at the Contractor's own risk. Contractor should schedule its work and procurement accordingly.
2. Prior to procurement of any equipment or materials, Contractor shall review the model numbers, compatibility and interoperability of all products.
3. Prior to procurement, Contractor shall, through coordination with other trades and through field measurements and project site inspections, verify that products to be supplied can be physically installed as planned.
4. No claim for additional payment will be considered for the return of any equipment determined incompatible, or procured without adhering to the aforementioned conditions, including claim for reimbursement of manufacturer's "restock" fees.
5. Contractor shall factor all of these conditions into its bid and plan its scheduling and resource needs accordingly to ensure that all work shall be performed according to the Owner's schedule and requirements of this Contract.

## J. Product Storage and Handling Requirements

1. The Contractor is responsible for receiving, handling, storing, and protecting all materials used on this Project until Substantial Completion.
2. Pack components in factory-fabricated protective containers.
3. Units shall be delivered in sections of such size as will pass through available openings.
4. Until ready for installation, store products in original factory containers.
5. Products shall be stored in a clean, dry space and as additionally recommended by the product manufacturer.
6. Keep products out of the weather and away from construction traffic and debris, including drywall finish dust.
7. Do not exceed structural capacity of the floor or platform on which the products are stored.
8. Until final acceptance of the system, protect all supplied products from damage resulting from moisture, fumes, dirt, dust and debris or any other source of potential damage.
9. Handle all products with care before, during and after installation so as to prevent damage.
10. Replace any products damaged prior to final acceptance with new replacement products.
11. Replacement shall be at Contractor's expense.
12. Contractor is responsible for the safety and good condition of the materials and equipment installed until final acceptance by the Owner.
13. Save original product shipping containers and related packaging materials for major products until final acceptance.
14. Prior to disposal, check with owner to determine if the owner wishes any of the packaging materials.

## K. Examination and Preparation

1. Contractor shall visit the Site to familiarize himself with the local conditions under which the work is to be performed and correlate his observations with the requirements of the Contract

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

Documents. No allowance shall be made for claims for concealed conditions which the Contractor, in exercise or reasonable diligence in observations of the Site and review of the local conditions under which the work is to be performed, learned or should have learned of, unless otherwise specifically agreed by A/E and Owner in writing.

2. Before ordering any materials or doing any work, the Contractor shall verify all measurements and be responsible for correctness of same. No extra charge or compensation will be allowed for duplicate work or material required because of an unverified difference between an actual dimension and the measurement or size indicated in the drawings or specifications. Any discrepancies found shall be submitted in writing to the A/E and Owner for consideration before proceeding with the work.
3. This Contractor must verify all dimensions locating the work and its relation to existing work, all existing conditions and their relation to the work and all man made obstructions and conditions, etc. affecting the completion and proper execution of the work as indicated in the Contract Documents.

L. Installation

1. Provide all required labor, materials, equipment and Contractor's services necessary for complete installation of systems required to comply with the requirements of authorities having jurisdiction, as indicated on Drawings, and as specified.
2. Work shall be functional and complete in every detail, including any and all items required to complete the system, whether or not these items have been enumerated or shown on the Drawings.
3. Special attention shall be given to access to working and controlling parts. Adjustable parts shall be within easy reach. Removable parts shall have space for removal.
4. Each Contractor shall be fully knowledgeable of the details of all Work to be performed by other trades and take necessary steps to integrate and coordinate his Work with other trades.
5. Wherever tables or schedules show quantities of materials, they shall not be used as a final count. These figures serve only as a guide for the Contractor. Each Contractor shall be responsible for furnishing all materials on the Drawings or as specified.
6. The Consultant and Owner's Representative have full power to condemn or reject any Work, materials or equipment not in accordance with these Specifications and Construction Drawings or the manufacturer's specifications or drawings approved by the Owner or Consultant.
7. Work or equipment that is rejected shall be removed and replaced to the satisfaction of the A/E and Owner at the Contractor's expense. Work or equipment that is rejected shall be so stated in writing by the A/E or Owner.
8. Such decisions that the A/E or Owner may make with respect to questions concerning the quality, fitness of materials, equipment, and workmanship shall be binding upon the parties thereto.
9. All Work shall fully comply with these specifications and related Drawings and all manufacturers recommended installation practices.
10. All Work shall be performed with the best practices of the trade for performance, functionality, safety, endurance, and aesthetics.
11. Coordinate ordering and installation of all equipment with long lead times or having a major impact on work by other trades so as not to delay the job or impact the schedule.
12. Where mounting heights are not detailed or dimensioned, install systems, materials and equipment to provide the maximum headroom possible, as appropriate to the application.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

13. Set all equipment to accurate line and grade, level all equipment and align all equipment components.
14. Provide all scaffolding, rigging, hoisting and services necessary for erection and delivery of equipment and apparatus furnished into the premises. These items shall be removed from premises when no longer required.
15. No equipment shall be hidden or covered up prior to inspection by the owner's representative. All work that is determined to be unsatisfactory shall be corrected immediately.
16. All work shall be installed level and plumb, parallel and perpendicular to other building systems and components.
17. Install all equipment and materials in strict accordance with manufacturer's written instructions. Bring any conflicts between the manufacturer's written instructions and these specifications to the attention of the A/E for recommendations.
18. Upon completion of installation of equipment and communication circuitry, energize circuitry and demonstrate capability and compliance with requirements. Where possible, correct malfunctioning units at site, then retest to demonstrate compliance; otherwise, remove and replace with new units, and proceed with re-testing.

**M. Cutting and Patching**

1. Where demolition of existing surfaces are required by the Work, the same shall be restored to at least as good a condition as they were before.
2. Contractor shall be responsible for painting, patching, repairing and replacing any building surface, furnishing, wall/floor/ceiling covering that is damaged or penetrated in the process of performing work on the project site.
3. Additional work required to repair work performed under this Contract shall be at the expense of This Contractor.
4. The Division 28 contractor shall do all cutting as required for the admission of Division 28 work. Unless directed otherwise in field, provide all related patching and painting to match surrounding methods, materials and colors. Any damage done by this contractor to the building during the progress of this contractor's work shall be made good at this contractor's expense.

**N. Site Maintenance**

1. During the progress of the work, the Contractor shall clean and leave the premises and all portions of the building in a clean and safe condition. This cleaning shall occur on a daily basis.

**O. Final Cleaning**

1. Clean all parts of the apparatus and equipment. Exposed parts, which are to be painted, shall be cleaned of cement, plaster and other materials and all oil and grease spots shall be removed. Such surfaces shall be carefully wiped and all corners and cracks scraped out.

**P. Closeout Requirements**

1. Upon the Designer's receipt of and approval of the Contractor's pre-test submittal, the Contractor shall contract the Designer to schedule acceptance testing. Contractor shall allow not less than 10-business days of advance notice to the Owner.
2. In the presence of the Owner, the Contractor shall demonstrate the presence of all specified products, cabling and installation methods. The Contractor shall demonstrate the operation of the system (and any requested sub-component thereof) and shall be prepared to make any electronic, physical or software related adjustments to the system or any of its sub-components to the satisfaction of the Owner, as required to achieve full compliance with the specifications.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

3. The contractor shall have available at the project site all test equipment, cables, tools and personnel necessary to demonstrate full compliance with these specifications as determined necessary by the designer.
4. During the acceptance testing the Contractor shall have a clean and fresh copy of the contractor's most up to date as-built record documentation, printed to scale.
5. This Contractor shall provide all required labor services required to completely verify and test the systems in the presence of the Owner.
6. Verify that each system, as a whole system, meets these Specifications and complies with all applicable standards.
7. Rectify deficiencies indicated by tests and completely retest work affected by such deficiencies at Contractor's expense.

## Q. Warranties

1. Specified materials and workmanship provided shall be fully guaranteed by the Contractor for one year from the transfer of title via notice of substantial completion against any defects in materials or workmanship.
2. Extended (additional) warranty(s) may be required and will be identified in the individual Specification Section and will be considered additive to this base Contractor Warranty.
3. Requirements for Manufacturer's Warranties, required by a Specification Section, shall run concurrent to this base Warranty by the Contractor but may exceed the Contractor's Warranty Period.
4. Manufacturer's Warranties shall also begin upon Substantial Completion.
5. The Warranty shall begin upon Substantial Completion.
6. This warranty shall in no manner cover equipment that has been damaged or rendered unserviceable due to negligence, misuse, acts of vandalism, or tampering by the Owner or anyone other than employees or agents of the Contractor.
7. The Contractor's obligation under its warranty is limited to the cost of repair of the warranted item or replacement thereof, at the Contractor's option.
8. Insurance covering said equipment from damage or loss is to be borne by the Contractor until full acceptance of equipment and services.
9. Individual specification sections may have additional warranty requirements for the work in that section. The warranty above will cover all materials and work where not covered by an extended warranty listed in the individual specification section.
10. Specified materials and workmanship provided shall be fully guaranteed by the Contractor against any defects in materials or workmanship.
11. Contractor shall provide a full "System Warranty" which shall cover all materials, labor and related product shipping expenses for a period of five years from the date of Owner acceptance.
12. Supplied products with manufacturer's warranties of less than the System Warranty term shall be extended by the Contractor for the full specified term.
13. During this period the Contractor will remedy (at no cost to the owner) any problem with the system, or any of its related components that is the result of defective materials, settings, workmanship, or loss or programming.
14. Any defective items or work shall be removed and replaced at the Contractor's expense to the satisfaction of the owner's representative and the Owner.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

15. The period of the Contractor warranty(s) for any items herein are not exclusive remedies, and the Owner has recourse to any warranties of additional Scope given by the Contractor to the Owner and all other remedies available by law or in equity.
  16. Additional Warranty requirements may be added by an individual Specification Section.
  17. Scope of these extended (additional) warranty(s) will be identified in the individual Specification Section and will be considered additive to this base Contractor Warranty.
  18. Requirements for Manufacturer's Warranties, required by a Specification Section, shall run concurrent to this base Contractor Warranty by the Contractor.
  19. Manufacturer's Warranties shall also begin on Substantial Completion.
- R. Demonstration and Training
1. Each Division 28 section may specify special Training requirements.
  2. Training requirements will be for a quantity of hours, allow for multiple trips.
  3. If no special requirements are specified in the individual section, provide for 4 hours and 2 trips for basic overview, operation and maintenance information per section.
  4. Train Owner's maintenance personnel on the procedures and schedules involved in operating, general troubleshooting, and preventative maintenance of the system.
  5. Contractor shall require all attendees to sign-in for each training session. The sign-in form shall summarize the training to be conducted, specification section and subsection being trained on, as well as the starting time and duration of training. Following training, a representative of the owner shall sign the form, acknowledging the same. Contractor shall retain the original copy of these forms and turn over a photo copy of the form to the owner's representative as evidence of training. Training conducted without this official record of training shall not be considered as part of the Contractor's training obligation.
  6. Schedule training with the Owner's representative, at least 14 days in advance.

## PART 2 - PRODUCTS

## 2.01 ASSIGNMENT OF MISCELLANEOUS WORK

- A. Excavating and backfilling for telecommunications work shall be by telecommunications contractor.
1. Properly support banks of excavation with safety sheet pile. Install necessary guards. Provide adequate pumping equipment and keep excavation free of water.
  2. Excavate pipe trenches to proper depth. Where rock is encountered, excavate to 6 inches below pipe and refill to 6 inches above pipe with compacted granular fill. Granular fill shall consist of dune sand, gravel or other suitable material containing not more than 10 percent by weight passing #200 sieve and 100 percent passing 1-inch sieve.
  3. Excavation for utilities shall not be backfilled until all required tests are performed and approved by Engineer and the utility company.
  4. Whenever underground feeders are run below footings and grade beams, contractor shall backfill the void with poured, steel-reinforced concrete to elevation of bottom of footing or grade beam. Backfill within building lines shall be made with granular fill or compacted backfill material laid in 6-inch layers and tamped to specified compaction after each layer.
  5. Backfill under paved area shall be made with granular fill compacted backfill material laid in 12-inch layers and tamped to compaction after each layer.
  6. Backfill under open yards or fields shall be made with non-compacted backfill laid in layers not to exceed 24 inches deep. Sand trenches may be allowed to settle naturally and shall be refilled back to grade as required during first year after final acceptance.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

7. Contractor shall refill, regrade and refinish any area that becomes unsatisfactory due to settlement within one year after final acceptance.
  8. Contractor shall verify all existing grades, inverts, utilities, obstacles and topographical conditions prior to any trenching, excavation or underground installation. In event existing conditions are such as to prevent installation in accordance with Drawings, contractor shall immediately notify Engineer.
  9. Provide appropriate plastic marker tape buried directly above underground electric and communication lines continuously along length of lines. Marker tape shall be located 12 inches below finished grade, but no closer than 12 inches above underground lines. Tape shall be a minimum of 6 inches wide.
  10. Refer to Division 31 Section "Earth Moving," for additional requirements. In event of conflict between this section and Division 31 Section "Earth Moving," Division 31 Section "Earth Moving" shall apply, unless otherwise indicated by A/E.
- B. Provide sleeved penetrations for all cabling access where applicable.
1. Where conduits pass through walls, roofs, ceilings, or floors, contractor shall set sleeves when floors, walls, ceilings or roofs are constructed. If any holes are cut in finished work where sleeves have been omitted, cutting shall be done with a concrete coring machine or other approved means and only with consent of Engineer. All such holes are to be carefully cut and shall not be larger than necessary. These holes are to be entirely covered by escutcheon plates when work is completed. Sleeves shall be made of pipe or rolled sheet steel no lighter than No. 18 gauge.
  2. Where conduits pass through sleeves in exterior walls above grade, annular space shall be caulked with oakum and filled inside and out with non-hardening, waterproof sealant finished off flush with both faces of wall.
  3. Provide penetration seals for all conduits penetrating the building wall below grade.
    - a. Description: The pipe to wall penetration closures shall be "Link-Seal" or equal, as manufactured by PSI/Thunderline Corporation – Houston, TX. Seals shall be modular type, consisting of synthetic rubber shaped to continuously fill the annular space between the pipe and wall opening. After the seal assembly is positioned in the sleeve, the rubber sealing elements shall provide an absolutely water-right seal between the pipe and wall opening. The seal shall be constructed as to provide insulation between the pipe and wall, thus reducing changes of cathodic reaction between these two members.
    - b. Wall Opening: Provide "Century-Line" sleeves or equal as manufactured by PSI/Thunderline Corporation – Houston, TX. Contractor shall determine the required inside diameter of each individual wall opening of sleeve before ordering, fabricating or installing. The inside diameter of each wall opening shall be sized as recommended by the manufacturer to fit the pipe and Link-Seal to assure a water- tight joint. Sizing (correct Link-Seal model and number of links per seal) may be obtained through manufacturer's catalog. If pipe O.D is non-standard due to coating, insulation, etc. consult Thunderline's factory for engineering assistance and recommendation before proceeding with wall opening detail.
    - c. Holes through Structural members: Holes required for conduit of size 5-inches and smaller shall be cut in field at expense of this contractor. Obtain structural engineer's approval in writing prior to any cutting.
    - d. Pitch Pockets: Required for conduit penetrating roof. Seal sleeves and provide flashing.
    - e. Painting of telecommunications cabling and components is not permitted. Notify painting contractor that painting of telecommunications cabling and components is not permitted. Protect cabling as necessary to avoid painting.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

## 2.02 MATERIALS AND EQUIPMENT

- A. Equipment shall be new, listed by UL and shall conform to NEMA and ICEA standards.
- B. Materials used for like service shall be by same manufacturer.
- C. All materials and equipment, including any hangers, supports, fastenings or accessory fittings, shall have corrosion protection suitable for atmosphere in which they are installed, whether located indoors or out. Care shall be taken during installation to assure integrity of corrosion protection.
- D. All screws, bolts, nuts, clamps, fittings or other fastening devices shall be made up tight. All bolts, screws, nuts and other threaded devices shall have standard threads and heads so they may be installed and replaced when necessary without special tools.

## 2.03 PRODUCT AND MATERIAL APPROVAL

- A. A Specification followed by one or more manufacturers is limited to those manufacturers. Names of other manufacturers may be submitted for approval to A/E and Owner a minimum of ten (10) days prior to receiving bids. Approval will be issued by Addendum if granted.
- B. A Specification followed by one or more manufacturers and "or approved equal" is open to all equal products or materials; however, Contractor shall supply one of listed manufacturers at no additional cost if Engineer finds substituted product unsatisfactory.

## 2.04 CAULKING AND FIRESTOPPING

- A. In addition to the requirements in Division 07 Section "Penetration Firestopping," comply with this Article.
- B. All raceway and sleeve penetrations of fire barriers shall be sealed to achieve fire resistance equivalent to fire separation.
  - 1. Maintain fire rating per ASTM E-814 and UL 1479.
  - 2. This assembly must also maintain a watertight seal between floor or wall and pipe.
- C. For other penetrations through non-rated walls, partitions, floors and ceilings, caulk the space between raceways and raceway sleeves with non-staining, waterproof gun grade compound. Apply caulking compound by the gun method using nozzles of a proper size to fit the width of joint. Prepare the joint for caulking by packing it tightly with a resilient foam or rope yarn.
- D. Products: Subject to compliance with requirements, provide one of the following:
  - 1. Maintain fire rating per ASTM E-814 and UL 1479.
  - 2. Penetration sealant:
    - a. 3M Brand "Moldable Putty Pads": and "Moldable Putty Stix"
    - b. 3M Brand "Fire Barrier" Caulk, Putty or Penetrating Sealing Systems
    - c. Dow Corning "Fire Stop Foam: and "Fire Stop Sealant" systems
    - d. Insta-Foam Products, Inc. "Insta-Fire Seal Silicone RTV Foam"
    - e. Standard Oil Engineering Materials Company, "Frye Putty"
    - f. Chase technology "Chase Foam #CTC PR-855"
  - 3. Intumescent Sealant for use at openings and sleeves involving flexible cable.
    - a. 3M Brand "Fire Barrier" caulk or putty, FS-195 Wrap Strip and CS-195 Composite Sheet.
    - b. Dow Corning "Fire Stop Intumescent Wrap Strip"
    - c. Fox Couplings, Inc. "The Fox Cast-in-Place Coupling"

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

4. Performance Characteristic: Firestopping materials shall conform to both Flame (F) and Temperature (T) ratings as tested by nationally accepted test agencies per ASTM E814 or UL 1479 fire test.
  - a. °F Rating shall be a minimum of one hour but not less than the fire resistance rating of the assembly being penetrated.
  - b. Conduct the fire test with a minimum positive pressure differential of 0.01 inches of water column.
5. Quality Assurance: Installer qualifications – a firm specializing in firestopping installation with not less than two years of experience or trained and approved by firestopping manufacturer.

## PART 3 - EXECUTION

## 3.01 INSTALLATION OF COMMUNICATIONS SYSTEMS

## A. General

1. All work installed in finished areas shall be concealed.
2. Install systems, materials, and equipment to conform with approved documents.
3. Install equipment to facilitate servicing, maintenance, and repair or replacement of equipment components. Connect equipment for ease of disconnecting, with minimum of interference with other installations.
4. Protect the structure, furnishings, finishes, and adjacent materials not indicated or scheduled to be removed.
5. Verify all dimensions by field measurements. Take measurements and be responsible for exact size and locations of all openings required for the installation of work. Proposed dimensions are reasonably accurate and should govern in setting out work. Where detailed method of installation is not indicated or where variations exist between described work and approved practice, direction of the owner's representative on job shall be followed.
6. Workmanship throughout shall conform to the standards of best practice. Marks, dents or finish scratches will not be permitted on any exposed materials, fixtures or fittings. Inside of panels and equipment boxes shall be left clean.
7. Use caution not to exceed the allowed bend radius for respective cables and not to compromise the integrity of the cables during installation by pulling cable management devices too tightly, damaging cables, etc. Raceway/Cabling bending radii shall be minimum as directed by cable manufacturer. Use pulling compound or lubricant, where necessary; compound must not deteriorate conductor or insulation.

## B. Cable

1. Provide color-coded jackets to identify different systems.
2. Neatly comb out multiple cable bundled runs to remove tangling and crossing of cables within the bundles. Neatly dress all cable work and provide vertical and horizontal cable management (or other approved method) for properly dressing all work at racks, control panels, backboards etc.
3. Provide spacing between cable bundles to help dissipate heat. Do not cinch cables into tight bundles.
4. Nylon cable ties are not permitted. Bundle cables with "Velcro" style cable straps with a minimum of 1-inch width.
5. All cables shall be supported every 5 feet (or less) and within 12" of device boxes, outlets, racks/cabinets and cable tray.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

6. Use separate J-Hook cable support systems for cables belonging to different systems and for cables carrying different operating levels.
7. Loosely secure cables at each J-Hook.
8. Cables shall not be directly or indirectly supported by a suspended ceiling or any other surface, support, material or structure not permissible for this use by all applicable codes and standards.
9. Cables carrying signals of different nominal operating level shall be kept separated to reduce the risk of undesirable cross-talk interference between cables.
10. Keep length of parallel runs to a minimum. Cross cables of different nominal levels at 90 degrees.
11. Provide additional separation as necessary to prevent and remedy any crosstalk.
12. Contractor shall take all precautions necessary to keep low-voltage cable away from sources of EMI and RF interference. Where close proximity is absolutely necessary to satisfactory appearance, performance or installation of the Work, provide all necessary shielding necessary to ensure that ingress interference is minimal and has no negative impact of the Work.
13. Provide a minimum of 12 inches cable slack where terminating at a device outlet to facilitate installation and servicing of devices. Longer working lengths shall be provided as appropriate to the application.
14. All termination types shall correctly match the cable and device termination point. Connectors of the appropriate type, size, color and rating shall be used to match with the mating equipment.
15. Tools as recommended by each specific connector manufacturer shall be used in attachment of all connectors.
16. When spade connectors are the required to be used for audio circuits operating at  $\leq +8\text{dBv}$  nominal, solder type spade connectors only shall be permitted.
17. No more than two spade connectors shall be permitted under a single terminal. Fewer should be used when recommended by the specific manufacturer's equipment or connector.
18. Wire Nuts
  - a. Wire nuts shall not be used in any audio circuit, except when necessary in the following:
    - 1) 25 Volt Constant-Voltage loudspeaker circuits.
    - 2) 70.7 Volt Constant-Voltage loudspeaker circuits.
  - b. Wire nuts shall not be used in any data or voice communications or remote control circuit.
  - c. Wire nuts shall not be used in any circuit which radiates RF energy.
  - d. Contractor must advise and gain prior approval of the Owner for any circuit which the Contractor desires to use wire nuts as the means of termination.
19. Drain Wires, Non-insulated Ground Wires and Shields
  - a. Drain or non-insulated ground conductors shall be insulated with appropriately sized heat-shrinkable insulated sleeving immediately upon exit from the jacket of the cable. Contractor shall use GREEN colored sleeving unless otherwise necessary to resolve specific color coding conflicts on a given cable. This methodology shall apply to ALL methods of termination, including inline connectors, device plates, direct equipment terminations etc... Sleeving shall be applied to twisted and braided shields once the internal conductors have been combed out or otherwise removed from the center of the shield.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

- b. Wherever a cable contains a non-insulated conductor within a jacketed cable, the conductors, as they exit the manufacturer's jacket, shall have a piece of heat shrinkable sleeving applied equally over the jacket and the exposed insulated conductors. The length of this sleeving shall be 1" for all cable diameters of .250" or less. For cables diameters larger than .250" the length of the sleeving shall be approximately equal to 4 times the diameter of the cable jacket. Note: This added sleeving is recommended but not mandatory when cable termination occurs fully within the confines of a fully insulated and strain relieved connector. Black shall be used unless otherwise necessary for specific cosmetic or cable identification purposes.
- c. A heat-gun of the appropriate temperature, size, type and rating for shrinking the tubing shall be used as recommended by the manufacturer of the sleeving used. Open flame (i.e. matches, cigarette lighters, torches) and direct metal conduction (i.e. soldering iron) methods to shrink the sleeving shall not be permitted. Sleeving which is burnt or otherwise marred shall be removed and replaced.
- d. There shall not be any non-insulated exposed conductors within a device backbox, junction box, or equipment rack/cabinet.

## 20. Unused Conductors

- a. Unused conductors shall not be "clipped" or removed from any jacketed cable. Conductors which are not required or used at the end of a jacketed cable shall be kept intact. Conductors shall be fully insulated from one and other to prevent shorts which could occur at either end of the cable. Conductor ends shall also be insulated to prevent shorts to other conductive materials which could come in contact with the conductor.
- b. Unused conductors shall be kept the same length as the longest conductor of the cable being used.
- c. Attention shall be paid to the proper preparation of all cables and all conductors of these cables. There shall not be nicks to cable jackets, conductor insulation, or the conductors themselves.
- d. Special attention should be paid to nicked conductors. Should a conductor be nicked during preparation or termination the cable shall be reworked/replaced to remove the nick.
- e. Any voice, data, or coaxial cable that is cut, disconnected, or not terminated at both ends shall be completely removed end to end. Any labels at either end shall be erased. Record drawings shall reflect the removal of these cables.

## 3.02 ATTACHING TO BUILDING CONSTRUCTION

- A. Attach supports to structural members (beams, joists, etc.) rather than to floor or roof slabs. Do not attach to ceiling support wires.
- B. Where equipment and raceway are suspended from existing concrete or masonry construction, use expansion shields to attach supports to construction. Expansion shield bolt diameter shall be same size as support rod diameter, hereinafter specified. Expansion shields shall be Star Double, Star Gloxin, Star Loxin or approved equal.
- C. Where existing masonry is not suitable to receive and hold expansion shield or where other means of attachment is advantageous, submit alternate method for approval by Engineer.
- D. Equipment to be installed in groups shall not be mounted directly to masonry or concrete walls. Mount 1- by 1-inch structural channel such as Unistrut, to wall and secure equipment to these channels.
- E. Where raceways are suspended from structural steel building framing or supporting members, provide beam clamps for attaching piping device to building member.
- F. Obtain approval from Owner and structural engineer before cutting or welding to structural members, or before hanging heavy equipment.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

## 3.03 ESCUTCHEONS

- A. Provide chrome plated escutcheons on material, leaving and entering walls, floors, ceilings, etc.

## 3.04 EQUIPMENT INSTALLATION

- A. All equipment must be installed such that maintenance and service may be properly accomplished. If necessary, the Owner, at their option, may require the contractor to demonstrate the service on any piece of equipment to determine sufficient service space exists. If the service space is not adequate, the equipment shall be relocated at no additional cost to the Owner such that sufficient service space is achieved.

## 3.05 OCCUPATIONAL SAFETY &amp; HEALTH STANDARDS

- A. All work shall comply with current requirements of U.S. Department of Labor-Occupational Safety & Health Administration, entitled Occupational Safety and Health Standards; National Consensus Standards and Established Federal Standards.

## 3.06 DEMOLITION

- A. In addition to the requirements in Division 02 Section "Selective Demolition," comply with this Article.
  - 1. Scope of Work: Provide demolition required for removal of systems and equipment made obsolete by this Project and as determined by the Architect/Engineer.
  - 2. Work Included:
    - a. Non-destructive removal of systems, materials, and equipment for reuse or salvage as shown on Drawings or requested by Owner.
    - b. Removal of all debris from site and legal disposal of same.
    - c. Removal of all abandoned or obsolete exposed materials and equipment for a clean and finished installation.
    - d. Removal of all abandoned or obsolete raceways, wiring, cabling, or electrical devices of any kind.
- B. Conditions
  - 1. Coordination: Adjacent areas need to remain in operation and services to these areas need to be maintained. A schedule will be worked out prior to beginning work and as many criteria for operation as possible will be explained. Contractor cooperation shall be expected in all conditions.
    - a. Phasing: Prior to commencing demolition in any area of the work, notify the Owner and Architect/Engineer five (5) working days in advance to insure that no adjacent occupied areas will be disrupted.
    - b. Demolition phasing must be approved by Architect/Engineer prior to commencement of operations.
    - c. Removal of debris and construction traffic will be limited to specified areas. Confirm all operations with Architect/Engineer prior to commencement of work.
  - 2. Adjacent Materials:
    - a. During the execution of the work, primary consideration shall be given to protecting from damaging the structure, furnishings, finishes, and the like which are not specifically indicated to be removed and disposed.
    - b. Existing items or surfaces to remain which are damaged as a result of this work shall be refinished, repaired, or replaced to the satisfaction of the Architect/Engineer and Owner at no additional cost.

COMMON WORK RESULTS FOR ELECTRONIC SAFETY AND SECURITY

## C. Materials

1. Patching: Materials used for patching shall be in conformance with the applicable sections of the Project Manual. Where materials are not specifically described but required for proper completion of the work, they shall be as selected by the Contractor subject to approval of the Architect/Engineer. Materials used and workmanship shall match surrounding areas as much as possible, unless otherwise directed.

## D. Demolition

1. Site Inspection
  - a. The Contract Documents do not propose to show all systems, materials, or equipment existing on the project that will require demolition.
  - b. Before commencing the work of this Section, verify with the Architect/Engineer and Owner all systems, materials, and equipment to be removed and those to be preserved.
2. Scheduling
  - a. Schedule all work in a careful manner with all necessary considerations for public and adjacent areas.
  - b. Avoid interference with the use of adjacent areas and passage to and from these areas.
3. Abandoned Materials and Equipment: Items so indicated on Contract Documents to be removed and not indicated or specified to be saved or retained, shall be demolished, removed, demounted, or disconnected in the best possible manner to ensure that no damage will result to other adjacent items or surfaces to remain.
4. Salvage
  - a. During removal of items so indicated, caution shall be used to eliminate damage to any equipment having salvage value.
  - b. All reusable salvaged material shall remain the property of the Owner and be retained for his inspection. Only items so inspected and rejected by the Owner shall be disposed by the Contractor. All other such items shall be turned over and deposited as directed by the Owner.
5. Disposal and Clean Up
  - a. Areas in which demolition and salvage work is being done shall be cleaned daily.
  - b. Dirt, dust, debris, unsalvageable and reusable items, and the like shall be totally removed from the project site daily. Under no circumstances shall such refuse be allowed to collect for longer periods.
  - c. Refuse shall not be allowed to block, or otherwise impair, circulation in corridors, stairs, sidewalks, or other traffic areas.

END OF SECTION 28 05 00

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

## PART 1 - GENERAL

## 1.01 SUMMARY

- A. This Section covers fire alarm systems, including initiating devices, notification appliances, controls, and supervisory devices.
- B. Work covered by this section includes the furnishing of labor, equipment, and materials for installation of the fire alarm system as indicated on the drawings and specifications.
- C. The Fire Alarm System shall consist of all necessary hardware equipment and software programming to perform the following functions:
  - 1. Fire alarm and detection operations
  - 2. Control and monitoring of elevators, smoke control equipment, door hold-open devices, fire suppression systems, emergency power systems, and other equipment as indicated in the drawings and specifications.
  - 3. One-way supervised automatic voice alarm operations.

## 1.02 ACCEPTABLE MANUFACTURERS

- A. Manufacturers: The equipment and service described in this specification are those supplied and supported by Johnson Control Fire Protection, LP (Simplex).
- B. No Substitutions allowed; must match the Campus fire alarm network systems.

## 1.03 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this section.
- B. The work covered by this section is to be coordinated with related work as specified elsewhere in the specifications. Requirements of the following sections apply:
  - 1. Division 26: applicable sections apply
- C. The system and all associated operations shall be in accordance with the following Guidelines of the following Building Code: UBC IBC
  - 1. NFPA 72, National Fire Alarm Code
  - 2. NFPA 70, National Electrical Code
  - 3. NFPA 101, Life Safety Code
  - 4. NFPA 90A, Standard for the Installation of Air Conditioning and Ventilating Systems
  - 5. Other applicable NFPA standards
  - 6. Local Jurisdictional Adopted Codes and Standards
  - 7. ADA Accessibility Guidelines

## 1.04 SYSTEM DESCRIPTION

- A. Based on Simplex 4100ES
- B. General: Provide a complete, non-coded, addressable/conventional, microprocessor-based fire alarm system with initiating devices, notification appliances, and monitoring and control devices as indicated on the drawings and as specified herein.
- C. Software: The fire alarm system shall allow for loading and editing instructions and operating sequences as necessary. The system shall be capable of on-site programming to accommodate system expansion and facilitate changes in operation. All software operations shall be stored in a non-volatile programmable memory within the fire alarm control unit. Loss of primary and secondary power shall not erase the instructions stored in memory. System shall be capable of storing dual configuration programs with one active and one in reserve. Panel shall be capable of full system operation during a new configuration download.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

- D. History Logs: The system shall provide a means to recall alarms and trouble conditions in chronological order for the purpose of recreating an event history. A separate alarm and trouble log shall be provided.
- E. Wiring/Signal Transmission:
  - 1. Transmission shall be hard-wired, using appropriate communications or power wiring for the devices connected. Wiring shall be low voltage power limited and as specified by the system Manufacturer.
  - 2. System connections to all devices shall be as directed by the Manufacturer
  - 3. System Trouble Supervision: System "Troubles" shall be indicated by a trouble signal at the FACP. Provide a distinctive indicating audible tone and alphanumeric annunciation.
  - 4. All system events shall be transmitted to the Owner's Simplex Tru-Site monitoring system.
- F. Required Functions: The following are required system functions and operating features:
  - 1. Priority of Signals: Fire Alarm events have highest priority. Subsequent alarm events are queued in the order received and do not affect existing alarm conditions.
    - a. Exception: If an Emergency Notification message is received it shall supersede the fire alarm signal while the Emergency Notification message is playing.
  - 2. Priority Two, Supervisory and Trouble events have second-, third-, and fourth-level priority respectively. Signals of a higher-level priority take precedence over signals of lower priority even though the lower-priority condition occurred first.
- G. Annunciate all events regardless of priority or order received.
  - 1. Noninterfering: An event on one addressable device does not prevent the receipt of alarm signals from any other addressable device. All fire alarm and priority 2 alarms are manually resettable from the FACP after the initiating device or devices are restored to normal.
- H. Transmission to Remote Monitoring Stations shall be over the Owner's Simplex Fire Alarm Network on Owner supplied fiber optic cables.
- I. Annunciation: Operation of alarm, priority 2 or supervisory initiating devices shall be annunciated at the FACP indicating the location and type of device.
- J. General Alarm: Unless otherwise noted all building fire alarms are general alarms. A system general alarm shall include the following to occur:
  - 1. Indication of alarm condition at the FACP.
  - 2. Identification of the device or monitor zone that is the source of the alarm at the FACP.
  - 3. Operation of audible and visible notification devices throughout the building until silenced at FACP.
  - 4. Closing doors normally held open by magnetic door holders.
  - 5. Unlocking designated doors.
  - 6. Shutting down supply and return fans serving the area where alarm is initiated.
  - 7. Closing smoke dampers on system serving the area where alarm is initiated.
  - 8. Initiation of smoke control sequence through the building temperature control system.
  - 9. Notifying the ISU Public Safety Dispatch Center and ISU Department of Facilities Management.
- K. Priority 2 Operations: Upon activation of a Priority 2 device such as a security panel or panic alarm the system shall operate as follows:
  - 1. Activate the system Priority 2 audible signal and illuminate the LED at the control unit.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

2. Pressing the Priority 2 Acknowledge Key will silence the Priority 2 audible signal while maintaining the Priority 2 LED "on" indicating off-normal condition.
  3. Record the event in the FACP historical log.
  4. Transmission of Priority 2 signal to the ISU Public Safety Dispatch Center.
  5. Restoring the condition and performing a Priority 2 reset shall cause the Priority 2 LED to clear and restore the system to normal.
- L. Supervisory Operations: Upon activation of a supervisory device such as fire pump power failure, low air pressure switch, and tamper switch, the system shall operate as follows:
1. Activate the system supervisory service audible signal and illuminate the LED at the control unit.
  2. Pressing the Supervisory Acknowledge Key will silence the supervisory audible signal while maintaining the Supervisory LED "on" indicating off-normal condition.
  3. Record the event in the FACP historical log.
  4. Transmission of supervisory signal to the ISU Public Safety Dispatch Center.
  5. Restoring the condition shall cause the Supervisory LED to clear and restore the system to normal.
- M. Alarm Silencing: If the "Alarm Silence" button is pressed, all audible and visible alarm signals shall cease operation.
- N. System Reset
1. The "System Reset" button shall be used to return the system to its normal state. Display messages shall provide operator assurance of the sequential steps ("IN PROGRESS", "RESET COMPLETED") as they occur. The system shall verify all circuits or devices are restored prior to resetting the system to avoid the potential for re-arming the system. The display message shall indicate "ALARM PRESENT, SYSTEM RESET ABORTED."
  2. Should an alarm condition continue, the system will remain in an alarmed state.
- O. A manual evacuation (drill) switch shall be provided to operate the notification appliances without causing other control circuits to be activated.
- P. WALKTEST: The system shall have the capacity of 8 programmable passcode protected one person testing groups, such that only a portion of the system need be disabled during testing. The actuation of the "enable one person test" program at the control unit shall activate the "One Person Testing" mode of the system as follows:
1. The city circuit connection and suppression release circuits shall be bypassed for the testing group.
  2. Control relay functions associated to one of the 8 testing groups shall be bypassed.
  3. The control unit shall indicate a trouble condition.
  4. The alarm activation of any initiation device in the testing group shall cause the audible notification appliances to sound a [voice announcement] [code] to identify the device or zone.
  5. The unit shall automatically reset itself after signaling is complete.
  6. Any momentary opening of an initiating or notification appliance circuit wiring shall cause the audible signals to voice announce the trouble condition.
- Q. Analog Smoke Sensors:
1. Monitoring: FACP shall individually monitor sensors for calibration, sensitivity, and alarm condition, and shall individually adjust for sensitivity. The control unit shall determine the condition of each sensor by comparing the sensor value to the stored values.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

2. Environmental Compensation: The FACP shall maintain a moving average of the sensor's smoke chamber value to automatically compensate for dust, dirt, and other conditions that could affect detection operations.
  3. Programmable Sensitivity: Photoelectric Smoke Sensors shall have 7 sensitivity levels ranging from 0.2% to 3.7%, programmed and monitored from the FACP.
  4. Sensitivity Testing Reports: The FACP shall provide sensor reports that meet NFPA 72 calibrated test method requirements. The reports shall be viewed on a CRT Display or printed for annual recording and logging of the calibration maintenance schedule.
  5. The FACP shall automatically indicate when an individual sensor needs cleaning.
    - a. The system shall provide a means to indicate that a sensor requires cleaning. When a sensor's average value reaches a predetermined value, (3) progressive levels of reporting are provided.
    - b. The first level shall indicate that a sensor is close to a trouble reporting condition and will be indicated on the FACP as "ALMOST DIRTY." This condition provides a means to alert maintenance staff of a dirty sensor without creating a trouble in the system.
    - c. If this indicator is ignored, a second level "DIRTY SENSOR" condition shall be indicated at the FACP and subsequently a system trouble is reported to the ISU Public Safety Dispatch Office. The sensor base LED shall glow steady giving a visible indication at the sensor location. The "DIRTY SENSOR" condition shall not affect the sensitivity level required to alarm the sensor.
    - d. If a "DIRTY SENSOR" is left unattended, and its average value increases to a third predetermined value, an "EXCESSIVELY DIRTY SENSOR" trouble condition shall be indicated at the control unit.
  6. The FACP shall continuously perform an automatic self-test on each sensor which will check sensor electronics and ensure the accuracy of the values being transmitted. Any sensor that fails this test shall indicate a "SELF TEST ABNORMAL" trouble condition.
  7. Multi-Sensors shall combine photoelectric smoke sensing and heat sensing technologies. An alarm shall be determined by either smoke detection, with selectable sensitivity from 0.2 to 3.7 %/ft obscuration; or heat detection, selectable as fixed temperature or fixed with selectable rate-of-rise; or based on an analysis of the combination of smoke and heat activity.
- R. Programmable bases. It shall be possible to program relay and sounder bases to operate independently of their associated sensor.
- S. Magnet test activation of smoke sensors shall be distinguished by its label and history log entry as being activated by a magnet.
- T. Audible Alarm Notification:
1. By voice evacuation and tone signals on loudspeakers in areas as indicated on drawings.
  2. Automatic Voice Evacuation Sequence:
    - a. The audio alarm signal shall consist of a high-low alarm tone that shall sound continuously until the "Alarm Silence" switch is activated.
  3. The system shall also include the standard ISU tornado warning and all clear message.
  4. All audio operations shall be activated by the system software so that any required future changes can be facilitated by authorized personnel without any component rewiring or hardware additions.
- U. Speaker: Speaker notification appliances shall be listed to UL 1480.
1. The speaker shall operate on a standard 25VRMS or 70.7VRMS NAC using twisted/shielded wire.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

2. The following taps are available: 0.25W, 0.50W, 1.0W and 2.0W. At the 1.0W tap, the speaker has minimum UL rated sound pressure level of 84dBA at 10 feet.
3. The speaker shall have a frequency response of 400 to 4000 Hz for Fire Alarm and 125 to 12kHz for General Signaling.

## V. Manual Voice Paging

1. The system shall be configured to allow voice paging. Upon activation of any speaker manual control switch, the alarm tone shall be sounded over all speakers in that group.
2. The control panel operator shall be able to make announcements via the push-to-talk paging microphone over the pre-selected speakers.
3. Facility for total building paging shall be accomplished by the means of an "All Speaker Talk" switch.

## W. Fire Suppression Monitoring:

1. Water flow: Activation of a water flow switch shall initiate general alarm operations.
2. Sprinkler valve tamper switch: The activation of any valve tamper switch shall activate system supervisory operations.
3. WSO: Water flow switch and sprinkler valve tamper switch shall be capable of existing on the same initiating monitor device. Activation of either device shall distinctly report which device is in alarm on the FACP.

## X. Power Requirements

1. The control unit shall receive AC power via a dedicated fused disconnect circuit.
2. The system shall be provided with sufficient battery capacity to operate the entire system upon loss of normal AC power in a normal supervisory mode for a period of 24 hours with 15 minutes of alarm operation at the end of this period. The system shall automatically transfer to battery standby upon power failure. All battery charging and recharging operations shall be automatic.
3. All circuits requiring system-operating power shall be 24 VDC and shall be individually fused at the control unit.
4. The incoming power to the system shall be supervised so that any power failure will be indicated at the control unit. A green "power on" LED shall be displayed continuously while incoming power is present.
5. The system batteries shall be supervised so that a low battery or depleted battery condition or disconnection of the battery shall be indicated at the control unit and displayed for the specific fault type.
6. The system shall support NAC Lockout feature to prevent subsequent activation of Notification Appliance Circuits after a Depleted Battery condition occurs in order to make use of battery reserve for front panel annunciation and control.
7. The system shall support 100% of addressable devices in alarm or operated at the same time, under both primary (AC) and secondary (battery) power conditions.
8. Loss of primary power shall sound a trouble signal at the FACP. FACP shall indicate when the system is operating on an alternate power supply.

## 1.05 SUBMITTALS

## A. General: Submit the following according to Conditions of Contract and Division 01 Specification Sections.

1. Product data sheets for system components highlighted to indicate the specific products, features, or functions required to meet this specification. Alternate or as-equal products submitted under this contract must provide a detailed line-by-line comparison of how the submitted product meets, exceeds, or does not comply with this specification.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

2. Wiring diagrams from manufacturer.
  3. Shop drawings showing system details including location of FACP, all devices, circuiting and details of IMS graphic screens.
  4. System Power and battery charts with performance graphs and voltage drop calculations to assure that the system will operate per the prescribed backup time periods and under all voltage conditions per UL and NFPA standards.
  5. System operation description including method of operation and supervision of each type of circuit and sequence of operations for all manually and automatically initiated system inputs and outputs. A list of all input and output points in the system shall be provided with a label indicating location or use of IDC, NAC, relay, sensor, and auxiliary control circuits
  6. Operating instructions for FACP.
  7. Operation and maintenance data for inclusion in Operating and Maintenance Manual. Include data for each type product, including all features and operating sequences, both automatic and manual. Provide the names, addresses, and telephone numbers of service organizations.
  8. Product certification signed by the manufacturer of the fire alarm system components certifying that their products comply with indicated requirements.
  9. Record of field tests of system.
- 1.06 QUALITY ASSURANCE
- A. Installer Qualifications: A factory authorized installer is to perform the work of this section.
  - B. Each and all items of the Fire Alarm System shall be listed as a product of a single fire alarm system manufacturer under the appropriate category by Underwriters Laboratories, Inc. (UL), and shall bear the "UL" label.
  - C. Exception: Notification Appliance Devices by COOPER Notification (Wheelock) are acceptable.
- 1.07 MAINTENANCE SERVICE
- A. Maintenance Service Contract: Provide maintenance of fire alarm systems and peripheral equipment for a period of 12 months after substantial completion, using factory-authorized service representatives. Maintenance shall be on a 24/7/365 basis with a guaranteed 4 hour response if the problem is deemed by the Owner to be serious enough to require this level of response. The Owner is knowledgeable of fire alarm system operation and what constitutes a problem serious enough to require the 4-hour response. Adjust and replace defective parts and components with original manufacturer's replacement parts, components, and supplies.
    1. If the Owner replaces a defective peripheral device from their peripheral device stock the replaced peripheral device shall be provided to the Owner at no additional cost for the Owner's stock replacement provided the peripheral device was not damaged due to misuse or vandalism. The Owner will provide the defective peripheral device that was replaced to the Manufacturer upon request. The Owner's labor costs for the peripheral device replacement will not be billed to the Manufacturer.
  - B. System Inspection: Prior to the end of the one year warranty the Manufacturer shall provide a complete panel inspection, including battery testing, and correct any problems found with the panel and any peripheral equipment showing on the panel as being defective at the time of the panel inspection as a part of the system warranty.
  - C. Additional Services: Perform services within the above 12-month period not classified as routine maintenance or as warranty work when authorized in writing. Compensation for additional services must be agreed upon in writing prior to performing services.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

## 1.08 EXTRA MATERIALS

- A. General: Furnish extra materials, packaged with protective covering for storage, and identified with labels clearly describing contents as follows:
  - 1. Break Rods for Manual Stations: Furnish quantity equal to 15 percent of the number of manual stations installed; minimum of 6 rods.
  - 2. Addressable Manual Stations: Furnish quantity equal to 5 percent of the number of units installed, but not less than one.
  - 3. Addressable speaker/strobe and strobe only units: Furnish quantity equal to 5 percent of the number of units installed, but not less than one.
  - 4. Smoke Sensors, Heat Sensors and Flame Detectors: Furnish quantity equal to 5 percent of the number of units of each type installed but not less than one of each type used.
  - 5. Addressable Sensor Bases: Furnish quantity equal to 5 percent of the number of units of each type installed but not less than one of each type.

## 1.09 SYSTEM PROGRAMMING

- A. Provide three (3) years of system reprogramming including FACP, Network Nodes as required and the Tru-Site Computers
- B. The three (3) year period starts on date of final acceptance of the completed system by the Owner.

## PART 2 - PRODUCTS

## 2.01 FIRE ALARM CONTROL PANEL (FACP)

- A. General: Comply with UL 864, "Control Units for Fire-Protective Signaling Systems." **The FACP will be provided by the Owner for installation by the contractor. Refer to the product Bill of Materials at the end of this specification section for information.**
- B. The following FACP hardware shall be provided:
  - 1. Power Limited base panel with beige cabinet and flat door, 120 VAC input power.
  - 2. 2,000 point capacity where (1) point equals (1) monitor (input) or (1) control (output).
  - 3. 2,000 points of Network Annunciation at FACP Display when applied as a Network Node
  - 4. 2,000 points of annunciation where one (1) point of annunciation equals:
    - a. 1 LED driver output on a graphic driver or 1 switch input on a graphic switch input module.
    - b. 1 LED on panel or 1 switch on panel.
  - 5. From all battery charging circuits in the system provide battery voltage and ammeter readouts on the FCP LCD Display.
  - 6. One Auxiliary Relay, SPDT 2A @32VDC, programmable as an alarm relay, trouble relay, either as normally energized or de-energized, or as an auxiliary control.
  - 7. Where required provide Intelligent Remote Battery Charger for charging up to 110Ah batteries.
  - 8. Power Supplies with integral intelligent Notification Appliance Circuit Class B for system expansion.
  - 9. Four (4) form "C" Auxiliary Relay Circuits (Form C contacts rated 2A @ 24VDC, resistive), operation is programmable for trouble, alarm, supervisory of other fire response functions. Relays shall be capable of switching up to ½ A @ 120VAC, inductive.
  - 10. The FACP shall support (6) RS-232-C ports and one service port.
  - 11. Remote Unit Interface: supervised serial communication channel for control and

ADDRESSABLE FIRE ALARM WITH ADDRESSABLE SPEAKER/VISUAL

monitoring of remotely located annunciators and I/O panels.

12. Programmable DACT for either Common Event Reporting or per Point Reporting.
13. Service Port Modem for dial in passcode access to all fire control panel information.
- C. Cabinet: Lockable steel enclosure. Arrange unit so all operations required for testing or for normal care and maintenance of the system are performed from the front of the enclosure. If more than a single unit is required to form a complete control unit, provide exactly matching modular unit enclosures.
- D. Alphanumeric Display and System Controls: Panel shall include an 80 character LCD display to indicate alarm, supervisory, and component status messages and shall include a keypad for use in entering and executing control commands.
- E. Voice Alarm: Provide an emergency communication system, integral with the FACP, including voice alarm system components, microphones, amplifiers, and tone generators. Features include:
  1. Amplifiers comply with UL 1711, "Amplifiers for Fire Protective Signaling Systems." Amplifiers shall provide an onboard local mode temporal coded horn tone as a default backup tone. Test switches on the amplifier shall be provided to test and observe amplifier backup switchover. Each amplifier shall communicate to the host panel amplifier and NAC circuit voltage and current levels for display on the user interface.
  2. All announcements are made over dedicated, supervised communication lines. All risers shall support addressable wiring for each audio channel and addressable speakers.
  3. Emergency voice communication audio controller module shall provide up to 32 minutes of message memory for digitally stored messages. Provide supervised connections for master microphone and up to 5 remote microphones.
  4. Status annunciator indicating the status of the various voice alarm speaker zones and the status of fire fighter telephone two-way communication zones.
- F. Distributed Module Operation: FACP shall be capable of allowing remote location of the following modules; interface of such modules shall be through a Style 7 (Class A) supervised serial communications channel (SLC):
  1. Amplifiers, voice and telephone control circuits
  2. Addressable Signaling Line Circuits
  3. Initiating Device Circuits
  4. Notification Appliance Circuits
  5. Auxiliary Control Circuits
  6. Graphic Annunciator LED/Switch Control Modules

## 2.02 EMERGENCY POWER SUPPLY

- A. General: Components include battery, charger, and an automatic transfer switch.
- B. Battery: Sealed lead-acid. Provide sufficient capacity to operate the complete alarm system in normal or supervisory (non-alarm) mode for a period of 24 hours. Following this period of operation on battery power, the battery shall have sufficient capacity to operate all components of the system, including all alarm indicating devices in alarm or supervisory mode for a period of 15 minutes.

## 2.03 TRUEALARM SENSOR BASES

- A. TrueAlarm sensor bases contain integral addressable electronics that constantly monitor the status of the detachable photoelectric or heat sensors. Each sensor's output is digitized and transmitted to the system fire alarm control panel every four seconds.
- B. Since TrueAlarm sensors use the same base, different sensor types can be easily interchanged to meet specific location requirements. This feature also allows intentional sensor substitution during building construction. When conditions are temporarily dusty, instead of covering the smoke sensors (causing them to be disabled), heat sensors may be

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

installed without reprogramming the control panel. Although the control panel will indicate an incorrect sensor type, the heat sensor will operate at a default sensitivity providing heat detection for building protection at that location.

- C. Base mounted address selection:
  - 1. Address remains with its programmed location
  - 2. Accessible from front (DIP switch under sensor)
- D. General features:
  - 1. Automatic identification provides default sensitivity when substituting sensor types
  - 2. Integral red LED for power-on (pulsing), or alarm or trouble (steady on)
  - 3. Locking anti-tamper design mounts on standard outlet box
  - 4. Magnetically operated functional test
- E. Supervised relay and remote LED Indicator options are available.

## 2.04 ADDRESSABLE MANUAL PULL STATIONS

- A. Description: Addressable single- or double-action type, red LEXAN, with molded, raised-letter operating instructions of contrasting color. Station will mechanically latch upon operation and remain so until manually reset by opening with a key common with the control units.
- B. Protective Shield: Where required provide a tamperproof, clear LEXAN shield and red frame that easily fits over manual pull stations. When shield is lifted to gain access to the station, a battery powered piercing warning horn shall be activated. The horn shall be silenced by lowering and realigning the shield. The horn shall provide 85dB at 10 feet and shall be powered by a 9 VDC battery.

## 2.05 TRUEALARM SENSORS

- A. Smoke Sensors (Photoelectric)
  - 1. TrueAlarm photoelectric sensors use a stable, pulsed infrared LED light source and a silicon photodiode receiver to provide consistent and accurate low power smoke sensing. Seven levels of sensitivity are available for each individual sensor, ranging from 0.2% to 3.7% per foot of smoke obscuration. Sensitivities of 0.2%, 0.5%, and 1% are for special applications in clean areas. Standard sensitivities are 1.5%, 2.0%, 2.5%, 3.0%, and 3.7%. Application type and sensitivity are selected and then monitored at the fire alarm control panel.
  - 2. The sensor head design provides 360° smoke entry for optimum response to smoke from any direction. Due to its photoelectric operation, air velocity is not normally a factor, except for impact on area smoke flow.
  - 3. Built-in insect screens
- B. Heat Sensors
  - 1. TrueAlarm heat sensors are self-restoring and provide rate compensated, fixed temperature sensing, selectable with or without rate-of-rise temperature sensing. Due to its small thermal mass, the sensor accurately and quickly measures the local temperature for analysis at the fire alarm control panel.
  - 2. Rate-of-rise temperature detection is selectable at the control panel for either 15° F (8.3° C) or 20° F (11.1° C) per minute. Fixed temperature sensing is independent of rate-of-rise sensing and programmable to operate at 135° F (57.2° C) or 155° F (68° C). In a slow developing fire, the temperature may not increase rapidly enough to operate the rate-of-rise feature. However, an alarm will be initiated when the temperature reaches its rated fixed temperature setting.
  - 3. TrueAlarm heat sensors can be programmed as a utility device to monitor for temperature extremes in the range from 32° F to 155° F (0° C to 68° C). This feature can provide freeze warnings or alert to HVAC system problems.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

## C. Duct Smoke Sensor:

1. Photoelectric type, with sampling tube of design and dimensions as recommended by the manufacturer for the specific duct size and installation conditions where applied. Sensor includes relay as required for fan shutdown.
2. Environmental compensation, programmable sensitivity settings, status testing, and monitoring of sensor dirt accumulation for the duct sensor shall be provided by the FACP.
3. The Duct Housing shall provide a supervised relay driver circuit for driving up to 15 relays with a single "Form C" contact rated at 7A@ 28VDC or 10A@ 120VAC. This auxiliary relay output shall be fully programmable. Relay shall be mounted within 3 feet of HVAC control circuit.
4. Duct Housing shall provide a relay control trouble indicator Yellow LED.
5. Compact Duct Housing shall have a transparent cover to monitor for the presence of smoke. Cover shall secure to housing by means of four (4) captive fastening screws.
6. Duct Housing shall provide two (2) Test Ports for measuring airflow and for testing. These ports will allow aerosol injection in order to test the activation of the duct smoke sensor.
7. Duct Housing shall provide a magnetic test area and Red sensor status LED.
8. For maintenance purposes, it shall be possible to clean the duct housing sampling tubes by accessing them through the duct housing front cover.
9. Each duct sensor shall have a Remote Test Station with an alarm LED and test switch.

## 2.06 ADDRESSABLE CIRCUIT INTERFACE MODULES

## A. Individual addressable modules (IAMs)

1. Both power and communications from a two-wire MAPNET II or IDNet circuit. They provide location specific addressability to a single initiating device (such as single station smoke detector alarm contacts or heat detector contacts) or multiple devices at the same location by monitoring normally open dry contacts and the wiring to an end-of-line resistor.
  - a. Total wiring distance from IAM to supervision resistor(s) of up to 500 ft (152 m)
  - b. Monitored connection is compatible with Simplex® 2081-9044 Overvoltage Protectors for outdoor wiring or electrically noisy applications
  - c. For use in indoor locations up to 158° F (70° C) such as attic spaces or similar applications.
2. Model 4090-9001 is packaged in a thermoplastic housing and provides screw terminal connections and a status indicating LED. (**ISU Standard choice**)
  - a. Enclosed design minimizes dust infiltration
  - b. Mounts in standard single gang electrical box
  - c. Screw terminals for wiring connections
  - d. Visible LED flashes to indicate communications
  - e. Optional covers are available to allow LED to be viewed after installation (requires mounting bracket, ordered separately)
3. Model 4090-9051 is an encapsulated package with wire leads. It does not provide a status indicating LED.
4. IDNet communications provides current limited monitoring:
  - a. Provides monitoring of tamper switch (supervisory) and waterflow switch (alarm) on same circuit using one point
  - b. Available with IDNet communications only

ADDRESSABLE FIRE ALARM WITH ADDRESSABLE SPEAKER/VISUAL

5. Multiple operation modes are available and are selectable at the control panel:
    - a. Contact closure status can be tracked
    - b. Momentary contact closure conditions can be selected at the panel to be latched or tracked.
  - B. Individual Addressable Relay Module (Relay IAM)
    1. IDNet Relay IAMs allow fire alarm control panels to control a remotely located Form "C" contact using IDNet addressable communications for both data and module power. Typical applications would be for switching local power for control functions such as elevator capture, or control of HVAC components, pressurization fans, dampers, etc. Relay status is also communicated requiring only one device address.
      - a. A single addressable point provides control and status tracking of a Form "C" contact
      - b. Contact Rating
        - 1) Power Limited 2A @ 24VDC resistive
        - 2) Power Limited 1A @ 24VDC inductive
        - 3) Non-power limited 0.5A @ 120VAC resistive
      - c. Low power latching relay design allows IDNet communications to supply both data and module power
      - d. Relay is set to OFF on initial power up and upon loss of IDNet communications
      - e. Enclosed design minimizes dust infiltration
      - f. Mounts in standard 4" (102 mm) square electrical box, optional adapter bracket is available to mount in a 4 11/16" (119 mm) square electrical box
      - g. Screw terminals for wiring connections
      - h. Visible LED flashes to indicate communications
      - i. Optional covers are available to allow LED to be viewed after installation
  - C. Dual Contact Relay IAM (Individual Addressable Module)
    1. Same as Addressable Relay Module (Relay IAM) , item B above, except with two form C contacts on common relay.
- 2.07 MAGNETIC DOOR HOLDERS
- A. Description: Units shall be listed to UL 228. Units are equipped for wall or floor mounting as indicated and are complete with matching door plate. Unit shall operate from a 120VAC, a 24VAC or a 24VDC source, and develops a minimum of 25 lbs. holding force.
  - B. Material and Finish: Match door hardware.
- 2.08 EMERGENCY NOTIFICATION SYSTEM INTERFACE
- A. A Valcom VE8001AR unit shall be provided for interface of Owner's Emergency Notification System with the building Addressable Alarm Notification devices.
  - B. The Owner will provide campus network connection to the Valcom unit'
  - C. Contractor/Simplex will provide interconnection from Valcom unit to the FACP Addressable Alarm Notification control.
  - D. Coordinate testing with ISU Public Safety Department.
- 2.09 ADDRESSABLE ALARM NOTIFICATION APPLIANCES
- A. Alarm notification appliances shall be by Simplex.
  - B. General Requirements
    1. Wall mounted units are to be red and ceiling mounted units are to be white unless noted otherwise.
    2. Input voltage: 25 or 70.7Vrms

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

3. Speaker Wattage output: ¼, ½, 1, 2 watts
  4. Frequency 400-4000Hz (S/V), 200-10,000Hz (H/F), General Signaling 125 Hz to 12 kHz
  5. Strobe candela: 15, 30, 75, 110, 135, 185 cd
- C. Wall mount Addressable Speaker Visible (S/V) Notification Appliances
1. Are individually powered, addressed, and controlled from a Simplex fire alarm control panel IDNAC Signaling Line Circuit (SLC). S/V notification appliances use a multi-tapped speaker for audio/tone notification and a multi-candela strobe with synchronized 1 Hz flash rate (63 synchronized strobes maximum per NAC) and selectable candela rating.
  2. Wiring supervision is electronically monitored and allows audio wiring to be T-tapped for class B wiring, reducing wiring costs and wiring distances.
  3. Wall mount S/V appliances are available in a 400-4000 Hz model and high fidelity H/F) model capable of operating between 200-10000 Hz.
  4. Separate appliance and cover selection greatly simplifies the ordering and installation process. A colored lens kit is available to customize the light output.
- D. Ceiling Mounted Addressable Speaker Visible (S/V) Notification Appliances
1. Are individually powered, addressed, and controlled from a Simplex fire alarm control panel IDNAC Signaling Line Circuit (SLC). S/V notification appliances use a multi-tapped speaker for audio/tone notification and a multi-candela strobe with synchronized 1 Hz flash rate (63 synchronized strobes maximum per NAC) and selectable candela rating.
  2. Wiring supervision is electronically monitored and allows audio wiring to be T-tapped for class B wiring, reducing wiring costs and wiring distances.
  3. Ceiling mount speaker visible appliances are available in 400 - 4000 Hz models and high fidelity models capable of operating between 200 – 10000 Hz.
  4. Separate appliance and cover selection greatly simplifies the ordering and installation process.
- E. Addressable Visual (Strobe) Only Notification Appliances (Wall and Ceiling Mounted)
1. TrueAlert ES addressable strobes are individually addressed visible notification appliances that receive power, supervision, and control signals from a Simplex fire alarm control panel providing IDNAC Signaling Line Circuits (SLCs).
  2. Individually addressed and controlled multi-candela TrueAlert ES V/O (visible only) notification appliances provide:
  3. Multi-candela xenon strobe with synchronized 1 Hz flash rate and with intensity *programmable from the control panel* or jumper selected as 15, 30, 75, 110, 135, or 185cd
  4. Advanced addressable notification controlled by *IDNAC SLCs* providing *regulated 29 VDC* allowing strobes to operate with lower current even under battery backup
  5. Wiring supervision to each appliance allowing "T-tapped" connections for Class B circuits to simplify wiring (Class A circuits require in/out wiring)
  6. *Self-Test Mode* allows an on-board sensor to detect the strobe output and then report its status to the control panel

## PART 3 - EXECUTION

## 3.01 INSTALLATION, GENERAL

- A. A pre-installation meeting shall be held prior to any installation work beginning. The meeting shall be held on-site. Coordinate with the Owner for a location. This meeting shall be conducted by the manufacturer's installation service technician assigned to the job. The Contractor's installation personnel shall be in attendance. The Owner's personnel may choose to attend at their own discretion.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

- B. Install system components and all associated devices in accordance with applicable NFPA Standards and manufacturer's recommendations.
- C. Installation personnel shall be supervised by persons who are qualified and experienced in the installation, inspection, and testing of fire alarm systems. Examples of qualified personnel shall include, but not be limited to, the following:
  - 1. Factory trained and certified personnel.
  - 2. National Institute of Certification in Engineering Technologies (NICET) fire alarm level II certified personnel.
  - 3. Personnel licensed or certified by state or local authority.

**3.02 WIRING AND RACEWAY INSTALLATION**

- A. System Wiring: Wire and cable shall be a type listed for its intended use by an approval agency acceptable to the Authority Having Jurisdiction (AH) and shall be installed in accordance with the appropriate articles from the current approved edition of NFPA 70: National Electric Code (NEC).
- B. Contractor shall obtain from the Fire Alarm System Manufacturer written instruction regarding the appropriate wire/cable to be used for this installation. No deviation from the written instruction shall be made by the Contractor without the prior written approval of the Fire Alarm System Manufacturer.
- C. Fire Alarm cable above suspended ceilings may be ran exposed but all cable shall be plenum rated. Cable shall be adequately supported to the building structure. Attachment to ceiling support wire or piping is not permitted.
- D. Paint fire alarm system junction boxes covers red in concealed locations, e.g. above ceilings, and where exposed in mechanical/electrical spaces.
- E. Where raceway is installed exposed in finished spaces it shall be painted to match the installation surface or as directed by the A/E/D or Owner.

**3.03 FIELD QUALITY CONTROL**

- A. Manufacturer's Field Services: Provide services of a factory-authorized service representative to supervise the field assembly and connection of components and the pre-testing, testing, and adjustment of the system.
- B. Service personnel shall be qualified and experienced in the inspection, testing, and maintenance of fire alarm systems. Examples of qualified personnel shall be permitted to include, but shall not be limited to, individuals with the following qualifications:
  - 1. Factory trained and certified.
  - 2. National Institute for Certification in Engineering Technologies (NICET) fire alarm certified.
  - 3. International Municipal Signal Association (IMSA) fire alarm certified.
  - 4. Certified by a state or local authority.
  - 5. Trained and qualified personnel employed by an organization listed by a national testing laboratory for the servicing of fire alarm systems.
- C. Pre-testing: Determine, through pre-testing, the conformance of the system to the requirements of the Drawings and Specifications. Correct deficiencies observed in pre-testing. Replace malfunctioning or damaged items with new and retest until satisfactory performance and conditions are achieved.
- D. Final Test Notice: Provide a 10-day minimum notice in writing when the system is ready for final acceptance testing.
- E. Minimum System Tests: Test the system according to the procedures outlined in NFPA 72.

ADDRESSABLE FIRE ALARM WITH ADDRESABLE SPEAKER/VISUAL

- F. Retesting: Correct deficiencies indicated by tests and completely retest work affected by such deficiencies. Verify by the system test that the total system meets the Specifications and complies with applicable standards.
- G. Report of Tests and Inspections: Provide a written record of inspections, tests, and detailed test results in the form of a test log.
- H. Final Test, Certificate of Completion, and Certificate of Occupancy:
- I. Test the system as required by the Authority Having Jurisdiction in order to obtain a certificate of occupancy.

**3.04 CLEANING AND ADJUSTING**

- A. Cleaning: Remove paint splatters and other spots, dirt, and debris. Clean unit internally using methods and materials recommended by manufacturer.
- B. Occupancy Adjustments: When requested within one year of date of Substantial Completion, provide on-site assistance in adjusting sound levels and adjusting controls and sensitivities to suit actual occupied conditions. Provide up to three visits to the site for this purpose.

**3.05 TRAINING**

- A. Provide the services of a factory-authorized service representative to demonstrate the system and train Owner's maintenance personnel as specified below.
- B. Train Owner's maintenance personnel in the procedures and schedules involved in operating, troubleshooting, servicing, and preventive maintaining of the system. Provide a minimum of 8 hours' training.
- C. Schedule training with the Owner at least seven days in advance.

**3.06 SPECIAL INSTALLATION INSTRUCTIONS**

- A. ***The Owner will provide the FACP and some additional products for installation by the contractor. Refer to the attached list of products to be furnished. The contractor shall provide all additional equipment and devices as required to provide a complete working system as shown on the bid drawings.***
- B. ***Johnson Controls Fire Protection LP = JCFPLP.***
- C. ***The existing Simplex/JCFPLP Tru-Site computer system will need to be relocated within the dispatch area. Include all costs associated for JCFPLP to assist with this relocation.***
- D. ***As part of this project's scope, several existing fire alarm devices will be removed from the existing Burford Hall and Pickerl Hall fire alarm systems. Include all costs associated for JCFPLP to update the existing fire alarm system Tru-Site graphics and programming for those systems.***
- E. ***As part of this project's scope, include the costs for JCFPLP to provide a TSW Remote Client software on an Owner provided workstation at one of the dispatch desks. Coordinate with the Owner. Refer to the attached scope of work.***

#### Comments

#### Scope of work:

Provide and install 1 (one) additional TSW client license

Relocate hardware to new location and test/confirm operation.

Any required hardware and monitors to be provided by customer.

Fiber extensions to be provided by customer to the new location.

#### Excluding

1. Any additional equipment or materials required by the local Authority Having Jurisdiction, but not specifically listed under this proposal. These items, if any, will be quoted as an extra to the contract price.
2. A Fire Watch during installation, whether or not required by the local Authority Having Jurisdiction.
3. Any conduit provision or installation of any kind.
4. Wire, wiring installation for the data loop and the signaling circuits, and termination of devices

Fire, Security, Communications, Sales & Service  
Offices & Representatives in Principal Cities throughout North America

Comments (continued)

(manual pull stations, panels, etc...).

5. Central Station monitoring and telephone connections..

6. Specialty testing of the wiring system (megger testing).

7. All power connections and surge protection associated with the project.

8. Any applicable State, Federal, or Local Taxes.

9. State Submittals or any permits are not included in this proposal

10. Any faults with existing equipment or devices are not covered by this proposal and will be approached on a T&M basis once approval has been gained.

**Revised 04/05/2022**

**PART 1 – GENERAL**

**1.01 SCOPE**

- A. This Section details the hardware and software to be used for the installation of a video security camera system on the Campus of Indiana State University and any remote properties owned or operated by Indiana State University. System shall be a fully installed and fully functional system. Indiana State University is currently standardized on Meraki cloud-based cameras in all buildings.
- B. Contractor shall confirm video security plan with owner and designer at the start of each project.
- C. Complete installation shall be to established industry standards and applicable Codes.

**1.02 RELATED SECTIONS**

- A. Division 00 Bidding Requirements
- B. Division 01 General Requirements
- C. Division 26 Electrical
- D. Division 27 Communications

**1.03 SUBSTITUTIONS**

- A. There are no substitutions permitted for the Products listed here-in as these represent the ISU Campus Standard.

**1.04 INSTALLER QUALIFICATIONS**

- A. A firm with at least five (5) years of successful installation experience on projects with video security system work similar to this project.

**1.05 SUBMITTALS**

- A. Provide submittals of all hardware and software proposed for use on this Project
- B. All submittals shall be submitted electronically in PDF format.

**1.06 WARRANTY**

- A. All hardware on this Project shall be fully warranted for a period of three (3) years for all parts and labor.
- B. Warranty shall commence after start-up and Owner acceptance

## PART 2 – PRODUCTS

### 2.01 CAMERAS

- A. All cameras, mounting hardware, and software licensing will be purchased by the owner and provided to the Contractor for installation.
- B. Fixed view interior cameras shall be – Meraki MV22.
- C. Fixed view exterior cameras shall be – Meraki MV72.
- D. Elevator cameras shall be – Meraki MV22 Mounted at the upper right corner of the ceiling of the elevator as you enter the elevator facing the rear of the cab. Camera shall be aimed to provide the widest view possible of the entire elevator cab.
- E. For locations where Owner elects to install a 360 degree or 180 degree camera the Meraki MV32 Network Camera shall be installed.
- F. **NOTE:** On some projects the Owner and project design firm may work with camera manufacturers to specify other model numbers due to design considerations. Make sure to review the bid documents and drawings carefully before installing any cameras.

### 2.02 MOUNTS

- 1. Interior camera mounts as required shall be the camera brand mounts designed for the specific camera and mounting task required.
- 2. Exterior camera mounts, domes, heaters, and dehumidifiers as required shall be the camera brand designed for the specific camera, mounting task, and expected year around Indiana weather.
- 3. Camera mount arms will be provided by the owner as required.

### 2.03 CABLE/FIBER LENGTH REQUIREMENTS

- A. If a camera is specified and cameras cable length will be over 300 feet Transition Networks E-TBT-FRL-05 Fiber Optic Media Converters for multi-mode fiber with ST connectors must be installed on fiber optic cable to the building data wiring center

### 2.04 CABLE

- A. Camera cables and connectors shall all be the brands and models specified in Division 27 for data communications.

## PART 3 – EXECUTION

### 3.01 INSTALLATION

- A. The Contractor shall install all cameras in their intended location and confirm proper functionality with the owner.
- B. **The Owner reserves the right to relocate camera locations up to 15' before installation at no additional cost to the Owner.**
- C. All cable/wiring shall be properly labeled on both ends of each run as specified in Division 27 for data communications.

### 3.02 START-UP

- A. The Contractor shall demonstrate to the Owner's satisfaction the proper operation of every component of the installation.

### 3.03 PROJECT CONTACT

- A. If you have any questions concerning these specifications, please contact:

Justin Hart  
Unified Communications Services Assistant Director  
Indiana State University  
(812) 237-8067 | [Justin.Hart@indstate.edu](mailto:Justin.Hart@indstate.edu)
